BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

For the 'bilious' or 'liverish' patient

DEHYDROCHOLIN B.D.H. is the most active and least toxic of the bile acids. Since it is highly effective in promoting the secretion of bile and therefore aids the digestion and absorption of foodstuffs, particularly fats, it is indicated particularly for the treatment of 'bilious' or 'liverish' conditions.

Dehydrocholin B.D.H. is also useful in establishing normal bowel action in patients with a deficiency of bile and in patients needing mild peristaltic stimulation. Dosage of three tablets three times a day is recommended.

DEHYDROCHOLIN B.D.H.

Tablets for oral administration, each containing 0.25 gramme in bottles of 20 at 4/1 and 100 at 17/7. Solution for injection—ampoules containing 2 gramme of sodium dehydrocholate in 10 ml. Box of 6 ampoules 18/11; box of 25 at 74/3. Prices in Great Britain to the Medical Profession.

THACKERAY

Overeating is often an expression of inward uneasiness. Many fat people, despite their outward appearance of joviality, are anxious and unhappy and find in food a solace for their troubles. They try to hide themselves behind a 'wall of fat' and a façade of jolliness.

For this reason, 'Drinamyl' is often helpful in the treatment of many cases of overweight. Given before meals it curbs the appetite and, by relieving the emotional tension that may be at the back of the patient's habit of overeating, helps him to eat less.

'DRINAMYL'

Each 'Drinamyl' Tablet
contains 5 mg. 'Dexedrine' and
32 mg. amylobarbitone.

for summer irritations...

SUMMER brings an increase in skin irritations among infants and children. The sources of allergy multiply. Rashes, itching and eruptions become more prevalent; insect bites and nettle stings are a minor but frequent nuisance. Simple and effective treatment for these ailments is found in *Caladryl Lotion* a bland, cooling, non-greasy liquid containing 1% Benadryl which can easily be applied to the affected parts, or soothing *Caladryl Cream*, conveniently packed in a collapsible tube.

Both are recommended for topical use against inflammation or irritation of all kinds.

PRACTICAL PENICILLIN

Despite the widespread and sometimes successful search for new antibiotics, it is a remarkable fact that penicillin, the least costly of them all, remains the most therapeutically useful.

'Distaquaine' brand procaine penicillin products, for aqueous suspension and for administration in repository doses, are a most convenient way to give penicillin.

A daily dose of 'Distaquaine' G, 300,000 i.u. costs 1s. 2d.* A single massive dose of 5 c.c. 'Distaquaine' Suspension, recommended in the *Lancet*† as adequate for four days in the treatment of minor surgical infections, costs even less—1s. 0d. per day.* Doctors will be guided in their dosage by their own experience, but the above are average doses and do indicate that

VERILOID INTRAMUSCULAR *Solution*

in **PRE-ECLAMPSIA**

The dependable hypotensive action of Veriloid Intramuscular Solution makes this unique extract of *Veratrum viride* alkaloids highly valuable in mild and moderate pre-eclampsia. It produces a prompt initial fall in blood pressure, and, given at intervals of 3 to 6 hours, holds the tension at, or near to, normotensive levels until delivery occurs.

Clinical Results

In a series of 56 patients with mild to severe pre-eclampsia, Veriloid Intramuscular Solution produced excellent results in 47 patients, good results in 4, and fair results in 5. In all patients the significantly depressed blood pressure was maintained until delivery took place. In 5 cases of postpartum pre-eclampsia the results were especially gratifying since only a single injection was required in each patient.

In Hypertension

Given in proper dosage, Veriloid Intramuscular Solution offers a positive means of lowering the blood pressure not only in eclampsia, but also in malignant hypertension, encephalopathy, and hypertensive crises. A single dose produces its maximum effect in 60 to 90 minutes and exerts a hypotensive influence for 3 to 6 hours. By repeated injections the blood pressure may be depressed for hours or even days, depending upon the therapeutic need.

In hypertensive emergencies, when the blood pressure must be reduced within minutes, Veriloid Intravenous Solution merits first consideration. Its action is prompt and profound, lowering the arterial tension in most patients to, or near to, normotensive levels. However, the clinician at all times has complete control of the extent of the induced hypotension.

Veriloid Intramuscular Solution, containing 1.0 mg. of standardized *Veratrum viride* alkaloids per cc. of buffered isotonic aqueous solution (incorporating one per cent procaine hydrochloride), is available in boxes of 6 ampoules of 2 cc.

A new and logical therapy for Rheumatic conditions

**Water-soluble esters of salicylic,
p-aminobenzoic and nicotinic acids,
that readily pass the skin barrier**

The local treatment of rheumatic conditions has hitherto presented certain difficulties; drugs which penetrated the skin often caused intense irritation and their use was of doubtful value.

Transvasin, a new preparation developed by Hamol, S.A., our Swiss associates, and now available for prescription in this country, contains esters of salicylic, p-aminobenzoic and nicotinic acid. These esters, being both water- and fat-soluble, readily pass the skin barrier in therapeutic quantities without causing irritation, and enable an adequate concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema but also brings about a deep hyperaemia of the underlying tissues.

Salicylic acid tetrahydro- furfuryl-ester	14%
Nicotinic acid ethyl-ester	2%
Nicotinic acid n-hexyl-ester	2%
p-Aminobenzoic acid ethyl-ester	2%
Water-miscible cream base ad.	100%

Transvasin is available in 1 oz. tubes at 4/-, which are obtainable on form E.C.10, and is not advertised to the public.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.
