When
nourishment
is the main problem . . .

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

Each year the brown nuts emerge gleaming from their green shells, but few children see this as a miracle. To them the conker is all. So it is with any efficient process that carries on from one year to the next. Even among our customers few realise how many problems are solved by the Midland Bank each day; for them it is enough to know that their bank accounts run smoothly and that the other services of this modern bank are always available for their use.

THE PEDIATRIC CLINICS OF NORTH AMERICA

A new quarterly publication devoted exclusively to the *practical aspects* of pediatric care.

THE PEDIATRIC CLINICS OF NORTH AMERICA will present an on-the-spot picture of current pediatric practice at America's leading centres of child care. Using the same planned editorial approach as the MEDICAL and the SURGICAL CLINICS OF NORTH AMERICA, these PEDIATRIC CLINICS will be devoted entirely to the *practical aspects* of pediatric management. There will be no preliminary research; no reports of unusual cases; no theoretical discussions.

Each number will contain a symposium (sometimes two) on subjects of everyday interest:—

FEBRUARY: Symposium on *Cardiovascular Diseases*.

MAY: Symposium on *Clinical Advances in Pediatrics*.
Symposium on *Polioomyelitis, 1954*.

AUGUST: Symposium on *Surgery of Anomalies in the Newborn*.
Symposium on *The Premature Infant*.

NOVEMBER: Symposium on *Pediatric Accidents and Emergencies*.
Symposium on *Pediatric Allergy*.

Publication commencing in February, 1954. Subscription price in United Kingdom and Eire only, 90s., elsewhere 105s.

Each number will contain about 225 pages of CLINICAL MATERIAL—no advertising, and will be bound in cloth covers.

Would you believe it?

says OLD HETHERS

Believe it or not, there are still some folk who make the sick room barley water by great-grandma's "stew-and-strain" method with pearl barley! Fancy going to such trouble when, with Robinson's 'Patent' Barley, it can be made in next to no time—just like cocoa! And cheaply too—a 1/7½d tin makes 48 pints. There is no need for people to pull a long face when barley water is prescribed as it can be so easily prepared from Robinson's 'Patent' Barley.

A new and logical therapy for Rheumatic conditions

Water-soluble esters of salicylic, p-aminobenzoic and nicotinic acids, that readily pass the skin barrier

The local treatment of rheumatic conditions has hitherto presented certain difficulties; drugs which penetrated the skin often caused intense irritation and their use was of doubtful value.

Transvasin, a new preparation developed by Hamol, S.A., our Swiss associates, and now available for prescription in this country, contains esters of salicylic, p-aminobenzoic and nicotinic acid. These esters, being both water- and fat-soluble, readily pass the skin barrier in therapeutic quantities without causing irritation, and enable an adequate concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema but also brings about a deep hyperaemia of the underlying tissues.

Salicylic acid tetrahydrofurfuryl-ester	14%
Nicotinic acid ethyl-ester	2%
Nicotinic acid n-hexyl-ester	2%
p-Aminobenzoic acid ethyl-ester	2%
Water-miscible cream base ad	100%

Transvasin is available in 1 oz. tubes at 4/-, which are obtainable on form E.C.10, and is not advertised to the public.

in the
control of
epilepsy

'Mysoline', an entirely new anticonvulsant, was introduced in 1952 following publication of the results obtained in long-standing cases of major epilepsy which had resisted treatment with other established drugs. Since that time clinical evaluation in numerous important neurological centres in Great Britain and overseas has amply confirmed the earlier trials. These investigations have all shown that 'Mysoline' possesses a number of notable features—ability to control the grand mal attack, low toxicity and freedom from hypnotic effect. In addition, a beneficial effect on general behaviour, performance and sociability has been observed.

Preliminary studies with 'Mysoline' in psychomotor epilepsy are extremely encouraging, and there is evidence that it may also be of use in petit mal.

'Mysoline' tablets (0.25 gramme) are now available in packings of 100 and 1,000.

'Sopronol' for fungous infections of the feet

'SOPRONOL' Ointment fulfils the criteria laid down* for the ideal fungicidal compound:

IT INHIBITS AND KILLS FUNGI

IT PENETRATES THE STRATUM CORNEUM, REACHING THE DEEP SEATED MYCELIA

IT NEITHER IRRITATES NOR SENSITIZES THE SKIN

This therapeutic efficiency derives from the use of *Sodium Propionate* and *Caprylate*—both originally isolated from concentrated human sweat. It is this physiological kinship which enables 'SOPRONOL' to control the most chronic case of *Tinea Pedis* . . . with a complete absence of the superadded skin sensitisations so liable to complicate treatment.

AND WIDE
THERAPEUTIC
MARGIN**

'DORMUPAX', a strong hypnotic agent whose high efficacy derives primarily from its inclusion of *calcium n-butyl-allyl-barbiturate*, provides per tablet—

Calcium n-butyl-allyl-barbiturate. . . 3.75 grains
Carbromalum B.P.C. 1.5 grains

Advantages:

The therapeutic index of *n-butyl-allyl-barbituric acid* is superior to that of the majority of commonly used barbituric acid derivatives. It has also been shown that the quotient DE/DL is even more favourable for the calcium salt than for the acid. The molecule of *n-butyl-allyl-barbituric acid* reaches the sleep centre unchanged. After an average sleep duration of 8 hours, it is completely degraded to an indifferent form.

The efficacy of 'Dormupax' is reinforced by carbromalum, a safe, prompt, medium-strength hypnotic which is free from after-effects. 'DORMUPAX' has been thoroughly investigated in several mental hospitals, with satisfactory results. In senile, motor-restless patients efficacy is good on dosage of half a tablet in the afternoon and one tablet in the evening. After-effects are not observed.

Excited insane patients tolerate 4 tablets daily in a course of 2 to 4 days without deleterious after-effects.

Indications:

Insomnia due to psychic cause or pain—Insomnia, including in circulatory diseases or arteriosclerosis—Spastic vascular states.

Dosage:

Maximum daily single dose: 2 Tablets; maximum daily dose: 5 Tablets.

'Pro-Banthine' is parallel in action to its widely reported forerunner 'Banthine' but is 2 to 3 times more potent and exhibits greatly reduced side-effects. A true anticholinergic, 'Pro-Banthine' promotes the healing of peptic ulceration by blocking excessive vagal stimulation. The result of this action is a consistent decrease in gastric hypermotility and usually a lowering of the acidity of gastric secretions. 'Pro-Banthine' acts as an anticholinergic drug through its ability to inhibit the transmission of neural stimuli at the sites where acetylcholine serves to transmit the impulse. These sites are the parasympathetic ganglia and effectors and the sympathetic ganglia.

When relief of Hypertensive Symptoms

... presents **INCREASING DIFFICULTIES**

The headache, vertigo, dyspnoea and malaise associated with severe hypertension can be promptly controlled or greatly mitigated by Veriloid Intramuscular Solution. This intramuscularly administered hypotensive agent produces a prompt, sustained and significant reduction in blood-pressure, and provides welcome relief from the distressing subjective symptoms.

A single injection of Veriloid Intramuscular Solution lowers the blood-pressure for 3 to 6 hours. In many instances symptomatic relief persists for considerably longer periods. By repeated injections, the arterial tension may be depressed for many hours or even days. Thereafter, oral medication

with Veriloid tablets may be employed.

Veriloid Intramuscular Solution is indicated in hypertensive states accompanying cerebral vascular disease, malignant hypertension, hypertensive crises (encephalopathy), toxæmia of pregnancy, eclampsia and pre-eclampsia.

Veriloid Intramuscular Solution reduces blood-pressure by a central action independent of ganglionic function, and has no direct relaxing action on the blood vessels. It contains the equivalent of 1 mg. per cc. of the standardized alkaloids of *Veratrum viride* assayed for potency in dogs.

Veriloid Intramuscular Solution is supplied in boxes of 6 ampoules of 2 cc. Detailed information will gladly be sent on request.

Why MIXOGEN is prescribed for menopausal symptoms

Because it is now established that :—

- combined male and female hormone treatment is the most effective in this condition.
- the correct balance of the two hormones is essential both for efficacy and economy—determined by extensive clinical trial in the U.K. and unique to Mixogen.
- both the hormones in Mixogen are completely effective when swallowed—thus maximum, immediate relief is given in the simplest and most convenient way.

A new generation

The introduction of Chloromycetin was the beginning of a new era in the history of medicine. Its discovery and isolation in the Parke-Davis Research Laboratories and its subsequent synthesis on a large scale manufacturing basis can be counted among the really great events in chemotherapy. Moreover, the ever increasing use of Chloromycetin provides convincing evidence of the effectiveness of this latest Parke-Davis contribution to the advance of medicine.

FOR MILD FORMS OF PAIN

"Aspirin and phenacetin are effective and useful, and a sedative effect is obtainable if a barbiturate is combined with them... The reputation of codeine as a pharmacologically useful drug is at present waning, for the analgesic effect of the compound tablet of codeine B.P. is probably due more to its content of aspirin and phenacetin than to the ½ gr. (8 mg.) of codeine present. It is a weak analgesic even when given in full doses." (Brit. Med. J. 1952 (Oct. 25th) ii, p.928)

Tercin combines aspirin and phenacetin with a barbiturate. It is intended for the relief of all those mild forms of pain for which tablets of Aspirin, Phenacetin and Codeine have hitherto been prescribed.

Its cost to the National Health Service is no greater than that of Tab. Codein. Co. B.P.

Tercin is available in tablets containing aspirin 5 gr., phenacetin 3 gr. and butobarbitone ½ gr.

For dispensing only, 200 at 4/10, and 1000 at 24/- (Prices to pharmacists in Great Britain).

A perfect source of Vitamin C

RIBENA (*Syrupus Ribis Nigri B.P.C.*)

HIGH CONCENTRATION OF VITAMIN C—REMARKABLE STABILITY

Four characteristics of Ribena make it a perfect source of Vitamin C:

- 1 It contains a high concentration of Vitamin C—and it is very stable.
- 2 The vitamin is in its natural state.*
- 3 Ribena is very well tolerated even by sensitive stomachs. It is completely free from all cellular structure. It is suitable for infants almost from birth, for peptic ulcer cases, and for women suffering from "morning sickness"; they can take it when almost everything else increases discomfort.
- 4 In addition to its therapeutic values, it is delicious in its own right as sweet blackcurrant syrup.

* Following reports of unsatisfactory response to the therapeutic use of synthetic ascorbic acid in peptic ulcer cases, controlled tests using Ribena were instituted at various large British hospitals, with striking results.

Clinical experience has also shown that in ulcerative gingivitis, the routine use of Ribena as an adjunct to local therapy has given more satisfactory results than that of the synthetic vitamin.

The superiority is presumably due to the presence of other factors of the Vitamin-C complex, possibly the Vitamin P, as well as mineral elements.

Therapeutic uses

Ribena is recommended for all conditions requiring Vitamin-C implementation: namely, as a natural and rapid restorative from fatigue; for increasing resistance to local infection and colds; for expectant and nursing mothers; for infants from birth; for children and adolescents; in many dental conditions; in peptic ulcer cases; in fractures and wounds; in blood dyscrasias and hæmorrhagic states; in infections and fevers; and in many skin disorders.

Reports for doctors overseas

The makers of Ribena co-operated extensively with the Ministries of Food and Health during the war, a co-operation which still goes on to some extent even now. The Royal Forest Factory has attached to it a series of very fine laboratories where research into fruit juices and vitamins is conducted to an academic level, under the direction of an expert, lately in charge of the Fruit Products Section of the University of Bristol Agricultural Research Station. Reports of much of the work done are available, on application, to doctors and scientists overseas. These are likely to be of particular interest now that Ribena is being extensively exported.

Send for further information. A booklet entitled "Blackcurrant Juice in Modern Therapy: Natural Vitamin C" will be forwarded to you with pleasure; also details of a number of controlled tests made on the use of Vitamin C, if you will write to:—

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER:** £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

For IRON DEFICIENCY ANAEMIAS

Iron without irritation

In hypochromic anaemia of pregnancy 'Fergon'—a specially prepared tablet form of ferrous gluconate—is an advance on current iron therapy. Ordinary iron preparations produce digestive disturbances; the patient may 'skip' doses and so recovery is delayed. 'Fergon', on the other hand, does not interfere with gastro-intestinal function so that there is no vomiting, constipation or diarrhoea. Maximum therapeutic effect is assured because absorption and haemoglobin response are not reduced by gastro-intestinal upsets. Apart from anaemia of pregnancy, 'Fergon' is well suited for the treatment of anaemia in children and other iron deficiency anaemias.

The basic N.H.S. price of one week's treatment is 1/2d.
Packings: tablets, gr. 5, in bottles of 100 and 1,000.
