THROMBUS PREVENTION

In all parts of the human vascular system it is essential to prevent blockage. TROMEXAN, by lowering the level of the prothrombin complex in the blood, reduces the tendency towards intravascular clotting.

TROMEXAN is thus indicated in the prophylaxis and treatment of all forms of intravascular clotting, including thrombosis and embolism of peripheral vessels, post-operative prophylaxis, coronary thrombosis, and congestive heart failure. Its therapeutic index is approximately three times that of dicoumarol, its action is rapid and its toxicity low.

Estimated to have been used in more than 10,000,000 clinical cases, aureomycin has been the subject of over 7,000 papers from world-wide sources in every branch of medical practice. Since 1949 the trend of these reports is towards lower dosages of aureomycin—a true broad-spectrum, uniformly active antibiotic.

THE NEW LOW-DOSAGE AUREOMYCIN SCHEDULE:

Dose	Approx. Weight of Patient	Amounts Given	No. of Doses in 24 hrs.
0.1 Gm. Daily	18 lb.	50 mg. dose twice daily, after food is taken	2
0.5 Gm. Daily	90 lb.	250 mg. dose twice daily, after breakfast and supper 100 mg. dose every 3 or 4 hours after mea's 50 mg. dose every 2 hours with milk	2 5 10
1.0 Gm. Daily	175 lb.	250 mg. dose every 4 hours 100 mg. dose every 2 hours	4 10
1.5 Gm. Daily	265 lb.	250 mg. dose every 3 hours	6

Since the introduction of AUREOMYCIN, a revolutionary change has taken place in many of the concepts of surgical intervention. The actual scope of surgical procedures has been broadened, permitting the surgeon to take advantage of techniques which heretofore may have seemed inadvisable.

AUREOMYCIN, intravenously, is advocated in all conditions where peripheral circulatory failure seems likely to be followed by infection, as in *septic toxæmia* or *post-traumatic oligæmia*; or following prolonged radical surgery, particularly on the gastro-intestinal tract. AUREOMYCIN is indicated in the sepsis which complicates *agranulocytosis*, in *bacterial endocarditis* and in the recurrences of rheumatic fever. It is an invaluable prophylactic agent for the prevention of *puerperal sepsis* and *surgical infections*, particularly those feared in colonic and pulmonary surgery. For all *contaminated wounds* and those potentially infected (including all produced by external violence), AUREOMYCIN should be used prophylactically.

PACKAGES:

Aci-jel
combats
vaginitis
by providing
a persistent
acid medium

- hostile to most vaginal pathogens
- hospitable to normal vaginal flora
- effective in controlling symptoms

The establishment of normal acidity is a most important factor in preventing recurrence of vaginal infection. Recurrence, characteristic of the vaginitides, is especially marked in trichomoniasis; it is also often a problem in many cases of moniliasis. Highly buffered Aci-jel —unexcelled for restoring normal acidity— helps prevent recurrences. It is simply applied, prolonged in action and non-irritating.

DOSAGE: One applicatorful intravaginally twice daily.

On original prescriptions specify "Aci-jel with applicator."

Notes on Clinical uses of Ribena No. 3 In Infective Conditions

★
An extra-dietary supply of Vitamin C during the course of acute infections is physiologically sound, in view of the relationship between the vitamin and immunological reactions. Ribena is being increasingly employed in hospital and general practice in such infections as whooping-cough, measles, rheumatic fever, pneumonia, diphtheria and bronchitis. In the convalescence after such conditions, Ribena provides an important stimulus to complete recovery.

AN EFFECTIVE, REALISTIC TREATMENT FOR

Threadworm

As a result of investigations at The Wellcome Laboratories of Tropical Medicine, 'Antepar' brand Elixir is now offered as a major advance in the treatment of threadworm infestation.

Piperazine hydrate, the active ingredient of 'Antepar', has proved to be far more efficient than any of the traditional oxyuricides, yet virtually non-toxic. In clinical trials a 97 per cent cure rate was achieved at the recommended dose level and no important side-effects were observed.

No special regimen of fasting or purging was required; nor were the stringent hygienic precautions, usually associated with threadworm treatment, necessary.

'Antepar' is pleasantly flavoured and readily acceptable to small children. It contains 500 mgm. of piperazine hydrate per fluid drachm, and is available in bottles of 4 fl. oz. (6/6d. plus 1/3d. P.T.) and 20 fl. oz. (24/9d.—exempt P.T.) subject to discount.

- Outstanding efficacy
- Rapid and complete cure
- No important side-effects
- Simply administered
- Pleasantly flavoured
- No special regimen needed

A new means of treating mild & moderate Hypertension

• • • • • **RAUWILOID**

Rauwiloid represents an alkaloidal extract of the root of the Indian plant *Rauwolfia serpentina*. The hypotensive action of this drug has long been known, but a purified, standardized dosage form has not previously been available. In the form of Rauwiloid, all the

advantageous features of the drug are provided in a reproducible alkaloidal mixture. Each batch of Rauwiloid is biologically tested in dogs for its effectiveness in producing reduction of blood pressure, bradycardia, and sedation.

What Rauwiloid does

The hypotensive action of *Rauwolfia serpentina* is of moderate intensity.¹ It is not apparent for several days after therapy is initiated and does not attain its maximum extent for weeks or even months.² When therapy is stopped, the hypotensive effect persists for some time.³ Coincidentally with the hypotensive action, Rauwiloid produces a mild bradycardia, especially advantageous in the presence of the tachycardia which so frequently disturbs the hypertensive patient. A significant feature of Rauwiloid is the distinct sense of well-being and emotional calm it induces, as well as

the prompt relief of symptoms experienced by the patient. The entire daily dose of Rauwiloid may be taken at one time, for instance upon retiring. Rauwiloid produces no undesirable side effects, even when given in excessive amounts. Dosage therefore is not critical, hence exact dosage calculation is not necessary. Rauwiloid is not a ganglionic or adrenergic blocking agent, and does not interfere with postural reflexes.

Available evidence shows that when a second hypotensive agent is given with *Rauwolfia serpentina*, its effect is exerted in addition to that of *Rauwolfia serpentina*.

Indications

Rauwiloid is the medication of choice in mild and moderate hypertension; in severe and malignant hypertension

its synergistic properties are valuably employed with other medication. *There are no known contra-indications.*

Administration and Dosage

The initial dose of Rauwiloid is 4 mg. daily, given as a single dose at night, and continued until the desired effect has been attained. Maintenance dosage at

2 mg. daily can be instituted when symptomatic and objective improvement indicates, usually after one or two months.

Rauwiloid is available as 2 mg. tablets in bottles of 60 (approximately one month's treatment) and 500.

In Severe or Resistant Hypertension RAUWILOID + VERILOID

Rauwiloid + Veriloid provides the greater hypotensive effect required in severe or resistant hypertension. In this combination, consisting of 1 mg. of Rauwiloid and 3 mg. of Veriloid standard reference powder, the effect of Veriloid is superimposed upon that of Rauwiloid.

The response appears to be greater than simple summation of the two effects, pointing to synergistic potentiation. The calming influence of Rauwiloid makes it

possible for more patients to tolerate Veriloid, with less likelihood of side effects.

The average dose of Rauwiloid + Veriloid is one tablet three times daily, at intervals of not less than four hours, preferably after meals. This quantity may be increased to four tablets daily, especially after the response to Rauwiloid is fully apparent.

Supplied in bottles of 100 (approximately one month's treatment) and 500.

TERRA FIRMA

The treatment of hæmorrhoids rests on solid therapeutic grounds when it achieves relief without resort to narcotic or anæsthetic agents; these may mask the symptoms of more serious pathological conditions. Anusol* Suppositories give relief that is completely safe through decongestion, lubrication and protection. They remove inflammatory pressure on the nerve endings, soothe irritation and guard against the complications of bleeding and infection.

Another notable feature of Anusol Suppositories is the economy of the treatment. It is an impressive fact that Anusol Suppositories, dispensed from bulk by a chemist, are less expensive than their National Formulary equivalent. Anusol Suppositories may be confidently prescribed in the knowledge that they represent a most reliable and economical treatment for all uncomplicated hæmorrhoidal conditions.

Anusol Haemorrhoidal Suppositories are obtainable from all chemists in boxes of 12; also available in packages of 100 for dispensing only, free of purchase tax when prescribed either privately or on the N.H.S. The tax free package of 100 Anusol Suppositories is supplied to the chemist at 16s. 6d. net. Anusol Ointment is supplied to chemists in tubes containing approximately 1 oz.

Elastoplast in the treatment of effusion of the knee

A piece of Paragon adhesive sponge rubber is cut in a "horseshoe" shape to fit around the upper, lateral and medial borders of the patella. The edges of the sponge rubber are bevelled.

A 3" Elastoplast bandage is applied from above downwards extending as far above and below the rubber pad as is considered necessary to control effusion.

In some cases it may be desirable first of all to protect the popliteal space by a pad of cotton wool or sponge rubber.

The adhesive mass of Elastoplast is now rendered porous, permitting free evaporation of sweat. The price is unchanged.

When prescribing Elastoplast add "Porous Adhesive" to your script.

Diagnosis . . .

There is nothing really physically wrong with you (except a few local conditions) but you are overworked and need complete rest and relaxation. You need to forget the surgery for a month. You must put away those forms. You must not attend any committees for four weeks. You must take the following prescription to your local travel agents to be made up.

Rx...

One trip on board the Empress of Scotland leaving Liverpool December 15th or Southampton December 17th (two trips if accompanied by wife—poor soul she needs it probably more than you). Take many days of complete relaxation and sea air (ozone). Allow sunlight to reach the body on sun deck. Consume adequate quantities of proteins and calories in ship restaurant.

Take moderate amount of stimulant in bar. Feast your eyes on Rio and the South Atlantic. Indulge in light conversation with other passengers (no shop). Play a little bridge or canasta. Take a lot of sleep both on deck and in stateroom. Return January 18th.

The above diagnosis and prescription can be given to your patients who are suffering from a similar condition—but if you meet them on board they should be avoided for fear of undermining the treatment.

INDICATED IN

Feverish Conditions Teething Minor Muscular Pains and other ailments of Children

A SAFE AND ACCURATE DOSE OF ASPIRIN—There is little fear of an anxious mother giving too large a dose of Angiers Junior Aspirin for Children. Each tablet contains $1\frac{1}{2}$ grains of Aspirin.

IN AN EASY TO TAKE TABLET—The pleasant orange flavour and sweetening in this small pink tablet makes Angiers Junior Aspirin acceptable to children even if sucked or chewed.

WITH A SAFEGUARD AGAINST GASTRIC IRRITATION—The combination of di-calcium phosphate with the aspirin guards against any irritation caused by the acid effect of aspirin alone.

Acid. Acetylsalicylic. 1.25 grains. Di-Calcium Phosphate 1.50 grains, orange-flavoured and sweetened.

ANGIERS JUNIOR ASPIRIN for children

FOR ADULTS. A palatable tablet incorporating Di-Calcium Phosphate makes this preparation especially valuable for use by those adults to whom plain aspirin is unacceptable.

The to successful peptic ulcer therapy

WHENEVER continuous neutralization of gastric acidity is required—in active and quiescent peptic ulcer, gastritis, hyperacidity—NULACIN TABLETS are indicated.

The successful clinical behaviour of NULACIN TABLETS is accounted for by their composition and unique manner of use.

Dosage

Beginning half-an-hour after food a NULACIN TABLET should be placed in the mouth between the cheek and the gum and allowed to dissolve.

During the stage of ulcer activity up to three tablets an hour may be required. For follow-up treatment the suggested dosage is one or two tablets between meals.

NULACIN TABLETS are not advertised to the public and there is no B.P. equivalent. NULACIN is supplied in tubes of 25 and 12 tablets. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to Pharmacists . . . 2/-.)

Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer

Same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

"...cheer up! A soft diet needn't be dull!"

How often as a doctor you have to give this reassurance to patients who dread the tedium of a soft diet! When Heinz Strained Foods are included there's no loss of appetite through monotony, for Heinz make 17 different varieties*—meat broths, soups, vegetables, and fruits.

Heinz Strained Foods are eminently suitable for a Soft Diet because they contain no irritating seasonings and, although coarse fibres are removed, enough bulk remains to ensure the bowel's correct function.

Scientific cooking methods employed by Heinz conserve the nutritive values of these foods, make them actually more nutritious than similar home-prepared foods. So, with Heinz Strained Foods, it is a simple matter to provide the patient with protein, vitamins and minerals in an easily assimilable form.

For hospital use, Heinz Strained Foods are obtainable in 15½-oz. cans from the usual suppliers, or direct from H. J. Heinz Company Ltd., Harlesden, London, N.W.10.

EPHAZONE tablets

Rational, symptomatic treatment in Asthma & Bronchitis

Each tablet contains Ephedrine, the important anti-spasmodic for bronchial spasm, Theobromine, for its relaxing effect on the bronchial muscle and for stimulation of the coronary circulation, Phenazone, for its soothing effect on the higher centres, and Calcium gluconate, a readily absorbable calcium salt, for diminishing capillary permeability and checking the secretion of mucus.

These active ingredients with complementary effects in bronchial asthma are presented in the following proportions in the 'EPHAZONE' Tablet:

Ephedrine hydrochloride - - - ½ grain
Theobromine - - - ½ grain
Phenazone - - - 1 grain
Calcium gluconate - ½ grain

This preparation is sanctioned for prescription under N.H.S. Please write for sample and descriptive leaflet.

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolyzed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

NEW PUBLICATION

THIRD ANNUAL REPORT ON STRESS (1953)

by HANS SELYE and ALEXANDER HORAVA

This book, which will be essentially of the same volume and character as its two predecessors, is scheduled to appear in December, 1953.

Price \$10.00, plus 34 c. Mailing Charges

The object of the "Annual Reports on Stress" is to act as an index facilitating the task of keeping abreast of the rapidly growing literature concerning stress and the adaptive hormones, that is, the field originally outlined in the fundamental monograph "STRESS" by Hans Selye. This is accomplished by a survey of recent publications, at the end of each year, complemented by a general synopsis of the stress concept, with special emphasis upon the most recent acquisitions.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

Pensions are at the rate of 1/600th of final pensionable emoluments for each completed month of reckonable service. (b) From the National Health Service. Candidates may resign from the National Health Service but retain their superannuation rights during their time in Nigeria (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Colonial salary on leaving Nigeria at the end of their engagement. (c) On short-term contract (two to four years of 18 months' duration), with inclusive salary of from £1,087 per annum, rising to £2,000 per annum; on completion of contract a gratuity is paid at the rate of £57 10s. for each completed period of three months' service (including leave). Officers appointed under (a) or (c) are required to contribute to a widows' and orphans' pension scheme. Salaries, including pensionable expatriation pay for officers appointed under (a) or (b), range from £950 to £1,850 per annum. Starting salary in all cases depends on experience and war service. Quarters are provided at low rents. Free passages in both directions are provided for officer and his wife. Payment of the cost actually incurred on one outward and one homeward passage for each of two children under age of 18, subject to maximum of £75 in respect of the return journey for each child, is also granted. Income tax at local rates. Local leave is permissible, and generous home leave is granted for each tour of 18 months' duration. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Gt. Smith St., London, S.W.1 (quoting ref No. CDE.117/14/01).

Clearing congested passages

FENOX was introduced in the Autumn of 1951: now, after two years' widespread clinical use, its superiority over all other nasal decongestants is universally accepted.

For the symptomatic relief of the common cold and other catarrhal conditions Fenox—and only Fenox—offers all these advantages:

- Immediate and prolonged vasoconstriction
- No undesirable side-effects · Water-miscible and non-oily
- Same viscosity as mucus
- Non-irritant — adjusted pH and tonicity
- Suitable for both adults and children

'Pernivit' for chilblains

Pernivit has proved to be remarkably effective both in treatment and in the subsequent prevention of chilblains. It utilises the vasodilator properties of nicotinic acid and the effect of vitamin K in maintaining normal blood coagulability and vascular permeability. Irritation and inflammation are quickly relieved.

Dosage is from two to six tablets daily according to the severity of the case. The basic N.H.S. price of Pernivit is 2/- (Bottle of 50 Tablets). Literature and specimen packings are available on request. May be prescribed on form E.C.10.
