THE THYROID**A Physiological, Pathological, Clinical and Surgical Study**By T. LEVITT, M.A., F.R.C.S.(Eng.), F.R.C.S.(Ed.), F.R.C.S.I.
632 pages. 502 illustrations. £5 5s.

This book has been written for all who are interested in advancing the understanding of thyroid dysfunction, not only as an integral part of the complex endocrine system, but also in relation to the whole organism. It has been the custom for writers on thyroid disease to break down its manifestations into numberless discrete entities rather than to integrate them. Here in this book I am endeavouring to show my concept of the whole natural history of thyroid disease in its sequence from life to death.—Extract from Preface.

ULCERATIVE COLITIS**And Its Surgical Treatment**

By BRYAN N. BROOKE, M.Chir., F.R.C.S.

158 pages. 111 illustrations. 37s. 6d.

A provocative monograph that will stimulate fresh thought on this disorder. The author believes that further research will enable ulcerative colitis to be attacked medically in its early stages, thus reducing the number of surgical cases

PEPTIC ULCERBy C. F. W. ILLINGWORTH, C.B.E., M.D., Ch.M., F.R.C.S.E.
296 pages. 95 illustrations. 42s.

Peptic ulcer is treated in all its aspects and academic researches are well balanced with practical advice on diagnosis and treatment. Professor Illingworth has made a special study of this disease for many years and every chapter reflects the author's own opinions and a personal interest which covers diverse fields

INFANCY AND CHILDHOOD**By Professor ROBERT E. GROSS, Harvard University.
1,000 pages, 1,488 illustrations. 80s. (U.K. and Eire only.)

The first book on this important subject for many years. It covers abdominal and genito-urinary surgery; cardiac surgery and other operations within the thorax; operations in the neck; wringer injury to the arm, etc. It presents a brilliantly clear picture of present surgical practice at Boston Children's Hospital.

"This is a most important and useful book—and incidentally, as prices go nowadays, remarkably good value for money with its great size and lavish illustrations. No surgeon who treats children should be without it..."

THE BRITISH MEDICAL JOURNAL

"... But if his book sometimes evokes opposite opinions, it is nevertheless one which deserves to find an honoured place in all paediatric centres."

THE LANCET

"This large comprehensive volume of one thousand pages deals with every aspect of surgery of infancy and childhood. The principles and techniques of various surgical procedures are well described and the book is lavishly illustrated. ... As a book of reference this book could not be bettered for it is exhaustive and completely covers the whole range of children's surgery."

COUGH CONTROL

Cough is a respiratory reflex induced by irritation of the mucous surfaces of the pharynx or upper part of the trachea.

TAORYL, the powerful antispasmodic, combines peripheral sedation with a selective inhibitory action on the cough centre. Safe to use for long periods without addiction, it provides highly effective therapy in all cases of irritant and spasmodic cough. It is comparatively non-toxic, free from side effects in normal dosage, and readily administered to children.

Estimated to have been used in more than 10,000,000 clinical cases, aureomycin has been the subject of over 7,000 papers from world-wide sources in every branch of medical practice. Since 1949 the trend of these reports is towards lower dosages of aureomycin—a true broad-spectrum, uniformly active antibiotic.

THE NEW LOW-DOSAGE AUREOMYCIN SCHEDULE:

Aureomycin

Lederle

AUREOMYCIN, with its powerful action against an unprecedentedly wide variety of bacteria and virus-like organisms, has proved to be of great value in infectious conditions affecting the upper respiratory tract and the anatomically-connected middle ear.

AUREOMYCIN appears rapidly in the tissues of the ear, nose and accessory sinuses, and in the cerebrospinal fluid. When given intravenously, it attains maximum concentration in the plasma within 5 minutes, and does not favour the development of bacterial resistance.

In *severe acute otitis externa*, oral **AUREOMYCIN** shortens the period of pain and swelling. In *chronic suppurative cases*, local use of **AUREOMYCIN** drops, plus frequent cleansing of the ear, appear beneficial. **AUREOMYCIN** is indicated in cases of *fulminating otitis*, in all cases requiring *paracentesis*, or when there are signs of *extension beyond the middle ear*. In *acute pharyngitis*, **AUREOMYCIN** is highly effective whether or not exudate is present. In the treatment of *nasal and sinus infections*, oral **AUREOMYCIN** is carried by the fluids to the site, penetrates the cell membranes and sets up an antibacterial action in the involved tissues.

AUREOMYCIN has been reported to be effective in the following conditions frequently seen by otolaryngologists :

Laryngeal Infections
Otitis Externa
Otitis Media
Mastoiditis

Pharyngitis
Sinusitis
Tonsillitis

Throughout the world, in every field of medicine, **AUREOMYCIN** is recognized as the broad-spectrum antibiotic of choice.

WHICH WOULD YOU RATHER . . . ?

'DIBENCIL' ORAL SUSPENSION presents the newly developed salt of penicillin, N:N'dibenzylethylenediamine dipenicillin G, as a stable, pleasantly flavoured preparation ready for use. It is well tolerated and is readily accepted by the youngest child. Doses of 300,000 units (one large teaspoonful) taken every six hours, are usually sufficient for either prophylaxis or treatment of the milder infections caused by penicillin sensitive organisms. In severe infections it is usually advisable to supplement this dosage, initially, with penicillin by injection.

When it is a question of choice, oral penicillin therapy with the new **'Dibencil' Oral Suspension** is preferred because:—

- It is therapeutically effective.
- It is convenient for both doctor and patient.
- It is extremely palatable and free from the taste of penicillin.
- It is ready for use.
- It retains its potency at ordinary room temperature for at least 18 months.

NULACIN

for continuous,
maintained gastric
anacidity

It has long been recognized that the most rapid relief of the pain and discomfort of peptic ulcer and most rapid healing of the lesion are achieved when a continuous state of gastric anacidity is maintained.

Heretofore, this could only be attained with hospitalization and discomfort to the patient. Now, NULACIN offers all the advantages of continuous intragastric milk-alkali drip therapy without these attendant inconveniences, and achieves its end simply and effectively.

A NULACIN tablet placed between the cheek and the gum dissolves slowly and releases its contained medications at a rate that gives continuous neutralization of the acid gastric juice, and accomplishes this with considerably less antacid than is required by any other method employing oral administration.

INDICATIONS

NULACIN tablets are indicated whenever acid neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Dosage: Beginning half-an-hour after food a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly.

During the stage of ulcer activity, up to three tablets an hour may be required. During quiescent periods, for prophylaxis in peptic ulcer and for the relief of discomfort due to gastric hyperacidity, the dose of NULACIN is one or two tablets between meals.

NULACIN tablets are not advertised to the public and have no B.P. equivalent. May be prescribed on E.C.10. The dispensing unit of 25 tablets is free of purchase tax. (Price to pharmacists: 2/-.) Also available in tubes of 12.

NULACIN tablets are prepared from whole milk combined with dextrans and maltose, and incorporate:

Magnesium Trisilicate 3.5 grs. Magnesium Oxide 2.0 grs.
Calcium Carbonate 2.0 grs. Magnesium Carbonate 0.5 grs.

EMOTIONAL DISTURBANCE . . .

A close association has been shown to exist between certain emotional disturbances and changes in gastric function. Increased acid secretion has been observed to follow emotional reactions of a combative nature and the importance of controlling gastric acidity in the management of peptic ulcer is widely recognised.

'Aludrox' Amphoteric Gel, buffers gastric acid to a pH of 3.5 to 4.0, at the same time providing a protective gel barrier over the surface of the ulcer. Healing is thus able to proceed whilst the risk of alkalosis is avoided and normal digestion is unimpaired.

'ALUDROX'

'ALUDROX' is available in two forms: as an amphoteric gel (consisting of Aluminium Hydroxide Gel B.P.C. suitably flavoured and preserved) in 6 oz. and 12 oz. bottles and as tablets (each tablet containing dried Aluminium Hydroxide Gel B.P.C. 13 gr.) in boxes of 60.

Ovaltine in antenatal and postnatal care

THE INCREASED nutritional demands arising during the latter half of pregnancy and the ensuing period of lactation, call for a general fortification of the patient's diet.

'Ovaltine' is eminently suitable as an aid in meeting this need because it provides concentrated nourishment in a palatable and easily assimilated form. It is acceptable to the most capricious appetite, such as often occurs in pregnancy.

'Ovaltine' possesses galactagogue properties. It also aids in maintaining the strength and general well-being of the nursing mother.

The high quality of its natural ingredients—malt, milk, cocoa, soya and eggs—its content of added vitamins, and the strictly hygienic conditions of its manufacture combine to provide a first-class nutritional product which has long enjoyed the approval of obstetricians.

H O M M E L

A new, highly effective expectorant on an original basis

The principal constituent of 'HICOSEEN' is 2-Diethylaminoethyl-phenylethyl-acetate, synthesized by Hommel and for the first time clinically used. It acts broncholytically and at the same time sedatively on the cough reflex.

'Hicoseen' provides the basic requirements of anti-tussic therapy: repression of cough reflex and promotion of expectoration. These are accomplished with a very high degree of compatibility.

PHARMACOLOGY

Absence of side-effects, including drowsiness, is of outstanding importance. The respiratory centre not being acted on in any way, the cough reflex is probably influenced by a mechanism different from that of morphine alkaloids. 'Hicoseen' contains such a small dose of codeine phosphate that even high overdosage is innocuous.

COMPOSITION

2-Diethylaminoethyl-phenylethyl-acetate	0.1%
Codeine phosphate	0.08%
Guaiacol albuminate	5.25%
<i>in pleasantly flavoured syrup</i>	

INDICATIONS

Specific in cough irritation, bronchial catarrh, bronchitis, tracheo-bronchitis in emphysema and pulmonary tuberculosis.

DOSAGE

Adults: 2 to 4 tablespoonfuls; in cases of cough irritation 1 to 10 teaspoonfuls daily.

Children: according to age and number of cough paroxysms 3 to 5 tea- or dessertspoonfuls daily.

How often
are these
words heard
in your
surgery?

"DOCTOR, THAT'S JUST A WONDERFUL DIET you've given me, but where on earth can I get the protein foods from?..." If you have been shopping with your wife lately you will agree that this is a legitimate question and is, indeed, the root cause of patients failing to keep to a high-protein diet when one has been prescribed for them. It is a needless failure, for a high-protein intake can always be maintained by adding Sanatogen protein tonic to the patient's diet. Sanatogen is 95% milk protein combined with 5% sodium glycerophosphate, has a specific nutrient and tonic effect and a high rate of utilisation. The protein in Sanatogen contains a higher percentage of amino-acids than any other preparation and supplies all essential amino-acids together, thus permitting

tissue regeneration in accordance with the all-or-none dietetic law. Usually taken 3 times a day as a mixed drink in a little water or milk, Sanatogen can also be taken sprinkled on food or mixed in cooked dishes and is easily digested and most rapidly absorbed. Have you considered the use of Sanatogen for your high-protein diets?

The association of methyltestosterone and ethinylœstradiol in Mepilin produces a more complete response in the treatment of menopausal disorders than can be obtained by the use of œstrogens alone.

The presence of methyltestosterone enables a reduction in œstrogen dosage to be made; thus undesirable side effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced. An increased feeling of confidence and well-being is produced which is both mental and physical.

DOSAGE: Menopause and geriatric conditions: average cases—3 tablets or 3 teaspoonfuls daily. Premenstrual tension and dysmenorrhœa—2 tablets or 2 teaspoonfuls daily from 10th to 22nd day of the menstrual cycle.

For the Private Practitioner...

ELECTRONIC AIDS TO DIAGNOSIS

The new electrical recording equipment now being made by Ediswan provides the facilities of the modern physiological laboratory in an inexpensive form for use in the Private Practitioner's Surgery.

The equipment consists of four units; a direct writing pen oscillograph with up to four pen motors as required, an amplifier unit, a power supply unit and a switching unit.

All the units are fully portable, fitted with quickly detachable covers and carrying handles for transport.

Used in conjunction with various electro-mechanical transducers the equipment is suitable for the following applications.

*Electro-encephalography · Electro-cardiography
Electro-myography · Electro-phonocardiography*

The Private Practitioner will also find the Ediswan equipment particularly useful for recording patients reactions to Shock Therapy treatment, as an aid to differential diagnosis and for the estimation of progress in Poliomyelitis patients. Full details of the Ediswan Portable Electrical Recording equipment will be sent on request and our Technical adviser will be pleased to arrange demonstrations if required.

EACH NERVE STRETCHED

From neurasthenia to neuralgia, from headache to migraine, rheumatism and dysmenorrhea; the gamut of conditions associated with

pain falls upon the fertile soil of a neurotic disposition. Veganin* has been designed to bring about a prompt assault upon a revolt of nerves, and many mystifying nervous complaints surrender promptly when its sedative and analgesic treatment is brought to bear.

Veganin is an original product of constant high standard, guaranteed purity and proved reliability; it has never been advertised to the public and is available for prescription under N.H.S. rules; when so prescribed it is illegal to substitute any product for Veganin.

Veganin is obtainable from all chemists in tubes of 10 and 20 tablets; also available in bulk packages of 100 and 500 tablets for dispensing only, free of purchase tax when prescribed either privately or on the N.H.S. The tax free packages of 100 and 500 tablets are supplied to the chemist at 6s. 3d. and 27s. 1d. net, respectively.

SCAPHOID CAST***

GYPSONA IS RECOGNISED as the most economical plaster of Paris bandage on account of its exceptionally high plaster content. Moreover, every bandage is uniform and it is possible to determine beforehand how many are required for a particular cast.

This scaphoid cast was constructed with one 6 in. x 3 yd. and two 4 in. x 3 yd. Gypsona bandages. A slab was made with the 6 in. bandage and laid down the dorsum of the hand and forearm, and the cast was completed by applying the two 4 in. bandages round the forearm, wrist and hand—up to the distal joint of the thumb.

THEODROX

ADEQUATE ORAL AMINOPHYLLINE

The tables below show blood levels obtained after a single dose of aminophylline parenterally and a single dose of oral Theodrox. The blood levels produced by oral Theodrox compare favourably with those produced by parenteral administration of aminophylline.

Prior to the introduction of Theodrox the usefulness of oral aminophylline has been limited by failure to obtain adequate blood levels because of gastric intolerance. With Theodrox this difficulty is overcome and effective oral dosage is entirely feasible. Each tablet of Theodrox contains 3 gr. of aminophylline B.P. with 4 gr. of dried aluminum hydroxide gel, B.P.C.

In the form of Theodrox, aminophylline can be administered orally to produce results comparable with intravenous or intramuscular dosage, yet without the inconvenience and danger of parenteral administration.

Theodrox is supplied in containers of 25, 100 and 1,000 tablets.

Theodrox is also available as Theodrox with Phenobarbitone, each tablet containing in addition $\frac{1}{8}$ gr. of Phenobarbitone B.P.

A SAFE AND ACCURATE DOSE OF ASPIRIN—There is little fear of an anxious mother giving too large a dose of Angiers Junior Aspirin for Children. Each tablet contains $1\frac{1}{4}$ grains of Aspirin.

IN AN EASY TO TAKE TABLET—The pleasant orange flavour and sweetening in this small pink tablet makes Angiers Junior Aspirin acceptable to children even if sucked or chewed.

WITH A SAFEGUARD AGAINST GASTRIC IRRITATION—The combination of di-calcium phosphate with the aspirin guards against any irritation caused by the acid effect of aspirin alone.

Acid. Acetylsalicylic. 1.25 grains. Di-Calcium Phosphate 1.50 grains, orange-flavoured and sweetened.

ANGIERS JUNIOR ASPIRIN *for children*

FOR ADULTS. A palatable tablet incorporating Di-Calcium Phosphate makes this preparation especially valuable for use by those adults to whom plain aspirin is unacceptable.

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolyzed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

*It depends what
you mean by 'Banking'*

OF COURSE we safeguard money and cash cheques. But we go further. We maintain specialist departments whose functions, although not 'banking' in the usual sense, can nevertheless be used to very good purpose. These departments will, for example, act as an Executor, help with a customer's Income Tax problems, obtain currency for foreign travel. They will do many more things besides. But the moral of this multiplicity of functions is simply this: if you have any problem of finance or business, the chances are that we can help you deal with it. And that is what we mean by 'banking'.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years; £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.
