## Canned Strained Foods and Early Mixed Feeding

HOW OFTEN a mother looks questioningly when you recommend a varied diet for her baby. And no wonder! She is frequently wondering how to fit this new task into her already busy day.

Happily you can recommend with perfect confidence, the range of strained foods all ready prepared by Heinz. And when she asks, as mothers often do, whether Heinz Strained Foods are as nutritious as foods cooked at home, you can fully assure her there, too.

Heinz make meat broths, soups, vegetables, fruits and cereal—foods that expense, time or season often make it so difficult to prepare at home.

These foods come fresh to the Heinz factory and are prepared, cooked, strained and canned within a few hours by perfected modern methods. Inspections and tests take place at every stage.

Together, Heinz Strained Foods are a balanced team providing vital proteins, vitamins and minerals.

For a FREE booklet giving the exact nutrient values of Heinz Strained Foods please write to Dept. I.M., H.J. Heinz Company Ltd., Harlesden, London, N.W.10.

### BETTER THAN ANY

- BETTER ABSORBENT PROPERTIES
- LONGER EFFECTIVE LIFE
- WIDER RANGE OF APPLICATION

Calona possesses characteristics so far in advance of any other carbon dioxide absorbent as to make it essentially a new product ; it is prepared to the stringent specification of the B.O.C Research Laboratories.

Calona complies with the B.P. specification, except that the granule sizes are between 4 and 8 mesh (B.S.S.). This mesh size has been shown to give the best performance in Anaesthesia, compatible with low resistance to breathing. Though primarily produced for carbon dioxide absorption in Closed Circuit Anaesthesia, Calona is also most suitable for other medical applications, such as Oxygen Therapy, Basal Metabolism Estimation, Respirators, etc.

Calona is delivered in metal canisters with easy-flow pouring lips and airtight screw caps. These canisters are damp proof and not easily crushed . . . available in 1, 9 and 36 lb. sizes.

## USE-DEVELOPMENT

## and 'making them better'

It is hardly surprising that 'Fibro', Courtaulds' viscose rayon staple, is playing an increasing part in the wide range of textiles used by hospitals and the medical profession. After all, rayon is by its very nature a clean product—and compared to cotton, an inexpensive one, paid for in sterling.

There are other inherent advantages: rayon gauze is softer and kinder to the wound, and has greater absorbency than cotton. This also applies to rayon lint. Again, rayon net can be impregnated with petroleum compounds to form the 'tulle gras' dressing now so widely used in casualty treatment. And viscose rayon is one of the safest fibres to use in operating theatres because it reduces the risk of explosions caused by static electricity.

To make a better hospital blanket (which sounds comparatively easy) calls for research, experiment—and of course, extensive, practical, comparative testing in actual use. Such a blanket—a blend of wool and rayon—has in fact been produced. It is better because rayon withstands sterilizing conditions better than wool and the wool/rayon blend is less subject to shrinkage when washed. There are also pyjamas, tickings, linings, sheets, bedspreads, dusters, glass-cloths, bandages, elastic and crepe bandages, plasters, surgical wadding, uniform and overall fabrics, collars and cuffs: all these hospital articles contain rayon nowadays and each represents many patient hours of research. Few of the articles listed above could be accepted for general use until tested and approved by Ministries, surgeons, doctors, hospitals, commercial testing houses, and so on. Courtaulds' Use-Development Organization, often prime mover in developing or exploiting new uses for rayon, must therefore make its tests as stringent as any likely to be encountered: must not only anticipate a need, but also possible objections to the means used for its fulfilment. Who benefits? Obviously, doctors, surgeons and their patients. But also the nurses—rayon-blend uniforms are very flattering; and the taxpayer—rayon cuts costs as efficiently as it raises standards!

*Courtaulds have produced a booklet on the medical and hospital uses of viscose rayon and other products. If you are interested write for a copy.*

**NEW AND ORIGINAL ORGANIC-IRON TABLET**  
**FERROMYN**  
*(Ferrous Succinate)*

***the latest and most significant advance  
towards ideal oral iron therapy***

FERROMYN is an original and logical approach to the problem of iron absorption and utilisation in the treatment of hypochromic anæmias and brings oral iron therapy a step nearer the ideal.

This new iron preparation presents Ferrous Succinate, a bivalent iron salt prepared from succinic acid, which, together with glycine is essential for the synthesis in the red bone marrow of a porphyrin (haem) containing iron.\*

Normal Hb. and serum iron levels were demonstrated over an average period of 24 days treatment with a group of hypochromic anæmia

patients with an average initial haemoglobin of 60%.

The controlled clinical trials with Ferromyn show an iron utilisation factor of 42% as compared with 14% Ferrous Sulphate and 28% Ferrous Gluconate.

This response was obtained with the low total average dosage of 2,604 mgm. available iron.

In comparison, the controlled group treated with Ferrous Sulphate required 42 days with an average dosage of 7,568 mgm. available iron to reach the same Hb. and serum-iron value.

**FORMULA:** Each tablet contains 150 mgm. Ferrous Succinate, providing 35 mgm. elemental iron.

We probably shouldn't  
use this in a **Selsun\*** ad...  
REGD.

Not that it isn't a good painting—we like it. It's just that redheads, for some undoubtedly delightful reason, have come to be known as *unpredictable*. Quite adverse to this notion. SELSUN\* is *consistent* to a fault in its effectiveness against seborrhoeic dermatitis of the scalp.

Before we allowed a single bottle to wear the Abbott label, clinical investigators rounded up more than 400 patients (redheads included) and gave SELSUN a thorough trial. In reports now

in our literature, they found that SELSUN provided complete control in 81 to 87 per cent of all seborrhoeic dermatitis cases, and in 92 to 95 per cent of all common dandruff cases.

You'll find, too, that SELSUN gives more than fleeting relief of symptoms. Once the scalp is restored to a healthy condition (usually in four to six weeks), SELSUN keeps it free of scales *for one to four weeks* with each treatment. The often-dramatic results, the infrequency of use and the ease of application and removal make SELSUN a product patients will use—willingly.

SELSUN is available in 2 and 4 fl. oz. bottles.

## When the condition indicates aspirin . . .

. . . the prescription might often, more helpfully, read "VITASPRIN TABLETS." For Vitasprin contains not only *soluble aspirin*, for really prompt relief of pain, but also important additions of vitamin C and vitamin K.

### Why vitamin C?

Because many conditions that call for aspirin, e.g. mild infection, are improved by the further addition of vitamin C.

### Why vitamin K?

Because it offsets the tendency of aspirin to delay blood clotting and is therefore especially valuable after tooth extraction and other procedures involving blood loss.

“Have you  
considered  
Sanatogen  
for these  
patients?”

PROBABLY half the people in your surgery have symptoms which cause them real distress, and yet on examination you find no corresponding physical signs. Headache; backache; dyspnoea on exertion, possibly with left infra-mammary pain (effort syndrome); arthralgia; “neuritic” pains; flatulent dyspepsia; fatigue and insomnia—the symptoms vary, and are often multiple. The common factor is that all are aggravated by stress. You listen patiently; examine fully; and then reassure strongly. This is the essential treatment, and the physician’s old ally, Time, may do the rest. But there is no doubt that these patients expect (perhaps need) something to take—a tonic which will three times a day reiterate your words and reinforce them.

What do you usually prescribe? *Mist. Pot. Brom. et Nuc. Vom.*? Iron? Vitamins? Such medicines can be prescribed on E.C.10, and will provide the “bottle” which the patient needs.

But they cannot “build up” the patient as Sanatogen does.

To recommend a tonic that the patient has to buy needs some justification.

Sanatogen has such high food value that prescription on E.C.10 would not ordinarily be justifiable. It supplies 24 grams daily of first-class protein, all fully absorbed and utilised, for less than a shilling a day; the patient gets full value for money in food value alone.

But Sanatogen is much more than a food—it also possesses tonic properties. It contains 95% milk protein with 5% sodium glycerophosphate, chemically combined in a long and complicated process unique to Sanatogen. The end-product is a casein-glycerophosphate complex whose tonic properties have been proved by the trial of 50 years of experience.

# A Superior Buffered Analgesic

**'ALASIL' TABLETS**—the improved form of salicylate medication—provide the efficient analgesia expected from their content of aspirin. Their superior acceptability derives from their content of a reliable buffer which minimizes the tendency to gastric irritation sometimes caused by the use of aspirin alone.

## Advantages

'Alasil' is an advanced sedative and antipyretic; it does not tend to induce gastric irritation; because of its high tolerability, it may be used for long-term administration even to those with sensitive stomachs, and to children.

## Composition

'Alasil' Tablets contain the recognized antacid corrective, 'Alocol' (Colloidal Aluminium Hydroxide), which permits their sedative principle, acetylsalicylic acid, to exert its action with minimal risk of side-effects.

## Indications

# EFFECTIVE ORAL AMINOPHYLLINE

## THEODROX

*These charts show the increase in gastric tolerance following the oral administration of Aminophylline with aluminium hydroxide (Theodrox) compared with that of plain aminophylline.*

THEODROX provides a dependable method of oral administration of aminophylline in doses large enough to produce blood levels comparable with those following injection.

Previous investigations have shown that good response is obtained from aminophylline only if a certain concentration of the active component, theophylline, is attained in the blood. Because gastric irritation prevents giving oral doses large enough to produce this necessary blood level, the only dependable way of obtaining this end has been to resort to parenteral aminophylline.

Now there is clinical proof that when aminophylline is combined with a specially prepared aluminium hydroxide, the stumbling block of gastric irritation can be virtually eliminated, and massive oral doses can be tolerated to produce consistent blood levels comparable to those obtained by parenteral administration. (1) (2).

Theodrox is supplied in containers of 25, 100 and 1,000 tablets, each tablet containing Aminophylline, B.P. 3 gr. and Dried Aluminium Hydroxide Gel, B.P.C., 4 gr.

Theodrox is also available as Theodrox with Phenobarbitone, each tablet containing in addition  $\frac{1}{2}$  gr. of Phenobarbitone B.P.

- 1 It contains a high concentration of Vitamin C—and it is very stable.
- 2 The vitamin is in its natural state. \*
- 3 Ribena is very well tolerated even by sensitive stomachs. It is completely free from all cellular structure. It is suitable for infants almost from birth, for peptic ulcer cases, and for women suffering from "morning sickness"; they can take it when almost everything else increases discomfort.
- 4 In addition to its therapeutic values, it is delicious in its own right as sweet blackcurrant syrup.

\* Following reports of unsatisfactory response to the therapeutic use of synthetic ascorbic acid in peptic ulcer cases, controlled tests using Ribena were instituted at various large British hospitals, with striking results. Clinical experience has also shown that in ulcerative gingivitis, the routine use of Ribena as an adjunct to local therapy has given more satisfactory results than that of the synthetic vitamin. The superiority is presumably due to the presence of other factors of the Vitamin C complex, possibly the Vitamin P, as well as mineral elements.

## Therapeutic uses

Ribena is recommended for all conditions requiring Vitamin C implementation: namely, as a natural and rapid restorative from fatigue; for increasing resistance to local infection and colds; for expectant and nursing mothers; for infants from birth; for children and adolescents: in many dental conditions; in peptic ulcer cases; in fractures and wounds; in blood dyscrasias and hæmorrhagic states; in infections and fevers; and in many skin disorders.

## Reports for doctors overseas

The makers of Ribena co-operated extensively with the Ministries of Food and Health during the war, a co-operation which still goes on to some extent even now. The Royal Forest Factory has attached to it a series of very fine laboratories where research into fruit juices and vitamins is conducted to an academic level, under the direction of an expert, lately in charge of the Fruit Products Section of the University of Bristol Agricultural Research Station. Reports of much of the work done are available, on application, to doctors and scientists overseas. These are likely to be of particular interest now that Ribena is being extensively exported.

Send for further information. A booklet entitled "Blackcurrant Juice in Modern Therapy: Natural Vitamin C" will be forwarded to you with pleasure; also details of a number of controlled tests made on the use of Vitamin C, if you will write to:—

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment. The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Some advertisements in this issue, submitted before the revised salary scales were communicated to hospital authorities by the Ministry of Health, may quote the old scales, but the scales set out below nevertheless apply throughout the N.H.S. Hospital Service, as from 1st April, 1954.

#### Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

#### Other Grades, Whole-time

##### (a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners:** £425 per annum for the first post held. £475 per annum for the second and any subsequent post held.

(ii) **Fully registered practitioners:** £425 per annum for the first post held; £475 per annum for the second post held; £525 per annum for the third and any subsequent post held.

provided that a medical practitioner who has held house posts under (i) above whilst provisionally registered shall be remunerated at the rate of £525 per annum for each post held after obtaining full registration; and provided that in exceptional circumstances, subject to the consent of the Minister (in Scotland of the Secretary of State), the rates under (ii) may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

A deduction at the rate of £125 per annum shall be made from the remuneration of House Officers in respect of board and lodging and other services provided. Each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement. (28/5/54)

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigations; the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

**OCCUPATIONAL THERAPY** is a special feature of the hospital, and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

**GERIATRIC UNITS** for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

**GLAN-Y-DON** is the hospital's convalescent home, overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed, and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.

## ST ANDREW'S HOSPITAL, NORTHAMPTON

For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

Penicillin with 'Benemid'

*for oral administration*

Penicillin plasma concentrations can be increased 2 to 10 times and maintained for a much longer period with 'PENBENEMID'—the new oral "repository" penicillin.

'PENBENEMID' provides plasma levels comparable in amplitude and duration to the levels obtained with procaine penicillin administered intramuscularly—with the significant advantage of oral administration. 'PENBENEMID' gives adequate protection against the majority of infections due to penicillin-susceptible organisms.

'PENBENEMID' allows freedom from injection without sacrificing therapeutic efficacy.

For adults, three tablets every 8 hours give comparable over-all plasma concentrations in a 24-hour period to the usual single-dose intramuscular injection. (Children's dosage in proportion.)

Each tablet contains 100,000 units of potassium penicillin G and 0.25 G. of 'Benemid'.

Supplied for dispensing in specially sealed vials of 12 tablets.
