## Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system

# SAFE AND EFFECTIVE

# INTRAMUSCULAR IRON

BENGER LABORATORIES, who introduced the first intravenous iron preparation, now present a new and equally effective iron complex for intramuscular administration. ITS NAME IS IMFERON. The introduction of this new compound considerably simplifies the control of iron deficiency anæmias in both hospital and general practice.

*Note these advantages . . .*

★ **Imferon** is the first safe and effective iron preparation for intramuscular injection—equally suitable for general practice and hospital use.

★ **Imferon** is well tolerated. Reactions of the kind which have been reported with saccharated oxide of iron have not been observed.

★ **Imferon** produces a haemoglobin response identical with that obtained by saccharated oxide of iron. The response is thus predictable.

★ **Imferon** provides the equivalent of 250 m.g. of iron per 5 ml. injection; fewer injections are therefore necessary to administer the calculated total dose.

As from Monday November 1, 1954, the restrictions imposed by the Ministry of Health, limiting the supply of AUREOMYCIN (Chlortetracycline) Hydrochloride, Crystalline *Lederle* to hospitals, are completely removed. As from that date doctors are free to prescribe AUREOMYCIN in general practice whenever required for private or National Health Service patients without restrictions. AUREOMYCIN is manufactured in the United Kingdom and is in adequate supply for doctors and hospitals. Technical literature on request. AUREOMYCIN (Chlortetracycline) is the original broad-spectrum antibiotic which combines potency with safety and economy. More reports have appeared on the excellent clinical results with AUREOMYCIN than on any other broad-spectrum antibiotic. There is a form of AUREOMYCIN for every purpose.

# A NEW ADJUVANT IN THE TREATMENT OF RESPIRATORY DISORDERS

Lloyd-Hamol Ltd., of London and Zurich, announce the launching in this country of Thoracin, a new decongestive salve for the symptomatic relief of coughs, colds and respiratory disorders.

*This diagram shows how Thoracin components penetrate the skin, are carried by the bloodstream to the alveoli and excreted there to exert their effect*

## FORMULA

Phenyl Ethyl Nicotinate	2.0%w/w
Guaiacol Furoate	5.0%w/w
Tetrahydrofurfuryl Salicylate	10.0%w/w
Camphor	3.0%w/w
Eucalyptol	2.0%w/w
Water-Miscible Base to	100.0%

► The Thoracin formula is based on the same principles that have made Transvasin so successful in the treatment of rheumatic conditions.

► Thoracin is composed of esters of substituted hydroxy aromatic derivatives.

► Thoracin achieves the effect of the classic counter-irritant remedies—poultices, plasters and cupping—without irritation of the skin.

► Thoracin contains a new ester of Guaiacol that is entirely free from the evil smell and irritant effect associated with this phenol derivative in its pure form. This ester easily penetrates the skin and is excreted in the alveoli, where it exerts its well-known action.

► Thoracin ensures vasodilation of the superficial skin vessels by the use of esters of nicotinic acid.

► Thoracin brings to the alveoli via the blood-stream the sedative, antispasmodic, and expectorant properties of camphor and eucalyptus.

THORACIN is available in 1 oz. tubes—basic price 2/6 plus 7½d. P.T. It is an ethical product, and is not advertised to the public. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. *Samples and literature will be gladly sent on application.*

## A NEW ORGANIC IRON TABLET

*the latest and most significant advance  
towards ideal oral iron therapy*

FERROMYN is an original and logical approach to the problem of iron absorption and utilisation in the treatment of hypochromic anemias and brings oral iron therapy a step nearer the ideal.

This new iron preparation presents Ferrous Succinate, a bivalent iron salt prepared from succinic acid, which, together with glycine is essential for the synthesis in the red bone marrow of a porphyrin (haem) containing iron.\*

Normal Hb. and serum iron levels were demonstrated over an average period of 24 days treatment with a group of hypochromic anemia

patients with an average initial haemoglobin of 60%.

The controlled clinical trials with Ferromyn show an iron utilisation factor of 42% as compared with 14% Ferrous Sulphate and 28% Ferrous Gluconate.

This response was obtained with the low total average dosage of 2,604 mgm. available iron.

In comparison, the controlled group treated with Ferrous Sulphate required 42 days with an average dosage of 7,568 mgm. available iron to reach the same Hb. and serum-iron value.

## CHEMOTHERAPY OF TUBERCULOSIS

The concurrent use of PAS salts  
and Isoniazid is now fully recognized as a major therapeutic measure  
against all forms of tuberculosis.

### 'Aminacyl' PAS Salts

BRAND

'Aminacyl' PAS products, with the exception of the Granulate (Ca PAS only), are available as either Sodium PAS B.P. or as the Calcium Salt.

They include whatever commonly used forms may be prescribed in terms of physicians' choice and patients' preference—

<b>PACKS: Cachets</b>	1.5 g. ....	100's	500's
	2.0 g. ....	80's	400's

<b>Granulate (Ca PAS)</b>	.....	400 g.	2,000 g.

### 'Aminacyl' B-PAS <sup>(Calcium 4-Benzoyl PAS)</sup>

BRAND

This new modification of PAS has the advantage of providing therapeutic effect comparable with that of Na and Ca PAS, but with smaller dosage. Furthermore, it is completely non-toxic, and is almost completely tasteless.

**PACKS:** 'Aminacyl' Ca B-PAS Powder: Tins of 150 and 500 envelopes each 3.5 g.  
'Aminacyl' Ca B-PAS Cachets: Tins of 80 and 400 × 1 g.  
'Aminacyl' Sodium B-PAS Cachets are also available in tins of 80 and 400 × 1.5 g.

### 'Pasinah' combined PAS/INAH Cachets

BRAND

for convenient prescription of PAS and Isoniazid concurrently  
'PASINAH' Cachets each contain 1.5 g. Na PAS (Sodium p-Aminosalicylate B.P.) and 17 mg. Isonicotinic Hydrazide.

**PACKS:** Standard Tins of 100 and 500. Details of institutional quantities on request.

**something NOTABLE**

**... in antibiotic therapy**

Unique chemical composition is far from being the only noteworthy feature of ACHROMYCIN Tetracycline. This new antibiotic is more stable, more readily soluble and more easily absorbed from the gastro-intestinal tract than any of the broad-spectrum antibiotics in current use.

ACHROMYCIN is unsurpassed in its antibacterial range. But still more important is the fact that extensive clinical trials have shown ACHROMYCIN to be completely free of undesirable side-effects. The drug can therefore be given with safety, even for prolonged periods.

These and many other merits combine to make ACHROMYCIN an invaluable addition to the antibiotic armoury.

Safety measures devised for our protection are now commonplace and readily accepted. In chemotherapy, few will deny that one of the most important of the safety measures is the careful and critical selection by the manufacturer of drugs that combine maximum therapeutic activity with minimum toxicity. Nowhere is this better seen than in the case of 'Sulphatriad'.

When sulphonamide therapy is indicated, the prescription of 'Sulphatriad' for young and old has been clinically proved and accepted as a practice with a wide safety margin and range of effectiveness. *Detailed literature is available on request.*

Normal bowel action is a fine thing to possess. It is, perhaps, the most sought after talisman against ill-health in the world. No wonder, then, if its temporary suspension leads from a mild despondency even to black despair. But in such a crisis panic measures are to be avoided—the taking of harsh purgatives eschewed.

Success in the restoration of the much-cherished habit lies in the regular persuasive stimulus of soft bulk—such as is provided by 'PETROLAGAR.' Gently and unobtrusively, 'PETROLAGAR' arranges for normal physiological evacuations and secures the return of 'clockwork regularity.'

To meet this situation the vegetable protein of the oat flour in Trufood Cereal Food has been supplemented by milk proteins and the addition of valuable mineral salts. In this way the total protein has been raised to 6.05 grammes per ounce or 21.4%, and the casein and lactalbumin form a valuable complement to the biological value of the total protein.

When we decided to introduce a flavoured form of Bemax—in addition to the plain Bemax you've known for so many years—it was children's interests we had specially in mind. So it was mainly children we asked to choose the flavour. The result of our poll showed chocolate an easy winner... so Chocolate-Flavoured Bemax it is.

Needless to say, Chocolate-Flavoured Bemax has the same valuable content of protein, B group vitamins and minerals as plain Bemax—which, of course, is still quite unchanged. In many restricted diets there is a tendency for certain essential nutrients to be deficient. Such shortages may arise with patients who are on special diets, for example, in cases of obesity, gastric troubles or diabetes, and also with old people living alone.

## RESTRICTED DIETS

Among the essential nutrients which may be deficient in these circumstances are the vitamins of the B complex. In order to increase the vitamin B complex content of the diet and thus counteract this type of deficiency, Marmite is often recommended. Marmite is a concentrated yeast extract, which provides riboflavin and nicotinic acid, and also folic acid, pantothenic acid, pyridoxin, biotin, choline, inositol and p-aminobenzoic acid.

## This mattress pays for its keep

In the Intalok system springs never get tired. They'll still be as lively after ten, twenty years. Not only are the springs of extra fine high tensile steel—they are also interlinked (as the photograph shows) coil by coil. They help one another with every weight. A mass of sensitive steel springs with the combined strength of the whole mattress in each. It's as firm and as gentle as a doctor's hands. Many, many years of precious rest are stored in its springs.

*Intalok springs are rustless — gain with repeated stoving—existing hair mattresses can be converted to Intaloks cheaply.*

A Rubefacient

Balm with an

important

difference \*

# Cremalgin

(for treatment of rheumatism, fibrositis and allied complaints)

On average 100,000 prescriptions for rubefacient balms are written *monthly* — testimony enough to their efficacy.

But the cost to the Health Service is disturbing, particularly in the light of the urgent need for economy.

What then is the solution?

The answer can be found in Cremalgin, a rubefacient cream identical in formula and quality, *\*yet 50% less costly than the best methyl nicotinate creams currently prescribed.*

This vital contribution to N.H.S.

economy is made possible by the issue of dispensing *packs* and by realistic costing and production methods. That the need for such an economy is foremost in the minds of the medical profession is clearly shown by the fact that no fewer than 4,000 doctors have already received samples of Cremalgin at their own request.

*Methyl Nicotinate 1.0%.*

*Glycol Salicylate 10.0%. Histamine Dihydrochloride 0.1%.*

*Capsaicin 0.1%. Excipient q.s.*

Wholesale chemists can now supply Cremalgin in 1 oz. dispensing tubes at 21/- per doz. and in 1 lb. dispensing jars at 19/6 per unit.

**Overseas (Vacant)—contd.****NAKURU WAR MEMORIAL HOSPITAL**  
Nakuru, Kenya Colony

The above hospital requires the services of a **FULLY QUALIFIED RADIOLOGIST** immediately, to be engaged on one of the two following alternative bases. The hospital is of modern construction, has 72 beds, is fully equipped with first class x-ray apparatus, and is served by 25 general practitioners, there being no other hospital facilities within a radius of 100 miles. The climate of Nakuru is healthy, and there are ample facilities for education, sport, etc., being situated in the centre of the European settled area. The alternative methods of engagement are (1) To enable a radiologist to establish a practice at the hospital by making available the x-ray room and apparatus at an agreed rental. The Board of Management would consider the payment of a guaranteed income over a period of three years, on a reducing basis, during the establishment of the practice. (2) On a basis of employment by the hospital on contract in accordance with the normal conditions appertaining to the appointment of a fully qualified radiologist to a post of this type. Under method 1, the minimum remuneration would be £2,500 per annum guaranteed for three years; under method 2 the salary would be £3,000 per annum. Preference will be given to applicants under the age of 35 years who are desirous of establishing themselves in the Colony, where there is ample scope for a capable man to build up a sound reputation, and full facilities will be granted to attain this end. For further particulars application should be made to the Secretaries, Nakuru War Memorial Hospital, P.O. Box 35, Nakuru, Kenya Colony. (3218)

**"ANY QUESTIONS?"**

(second volume)

FOR TEN YEARS a number of experts have each week constituted a Brains Trust for answering questions sent to the

**BRITISH MEDICAL JOURNAL**

from all over the world.

The second volume of "Any Questions?" complements the 1st volume, of which 10,000 copies have been sold. Subjects covered lightly in the 1st volume, such as "Marital Problems" and "Immunization," receive more detailed treatment in the new volume.

Please reserve your copy now as the edition is limited. The book is bound in cloth, fully indexed, small enough to fit the pocket, and quite indispensable to the general practitioner in his daily work.
