BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

NEW BOOKS AND EDITIONS
PHYSICAL SIGNS IN CLINICAL SURGERY

By **HAMILTON BAILEY**; assisted by **ALLAN CLAIN**
 12th Edition. 8½ x 5½ in. 466 pages. 681 illustrations, many in colour
 38s. 6d., post 1s. 3d.

For this twelfth edition a thorough revision has again been made,
 with a new chapter on Supplementary Physical Signs added. Mr.
 Clain has rearranged the material so as to include a chapter on the
 Orbit, has combined the chapters on the Spine and Sacro-iliac Joints
 to include new matter, and has revised those concerning Fractures
 and Blood Vessels.

 14th Edition. 7½ x 4½ in. 660 pages. 190 illustrations and 13 plates
 in colour. 30s., post 1s. 3d.

This compact volume presents an epitome of the salient facts in
 surgical practice in such a manner that they may be easily referred to
 or revised. The latest revision has been very thoroughly carried out,
 and due weight has been given to the rapid advances made in surgery
 in recent years.

FERROMYN

(Ferrous Succinate)

A NEW ORGANIC IRON TABLET

*the latest and most significant advance
towards ideal oral iron therapy*

FERROMYN is an original and logical approach to the problem of iron absorption and utilisation in the treatment of hypochromic anæmias and brings oral iron therapy a step nearer the ideal.

This new iron preparation presents Ferrous Succinate, a bivalent iron salt prepared from succinic acid, which, together with glycine is essential for the synthesis in the red bone marrow of a porphyrin (haem) containing iron.*

Normal Hb. and serum iron levels were demonstrated over an average period of 24 days treatment with a group of hypochromic anæmia

patients with an average initial haemoglobin of 60%.

The controlled clinical trials with Ferromyn show an iron utilisation factor of 42% as compared with 14% Ferrous Sulphate and 28% Ferrous Gluconate.

This response was obtained with the low total average dosage of 2,604 mgm. available iron.

In comparison, the controlled group treated with Ferrous Sulphate required 42 days with an average dosage of 7,568 mgm. available iron to reach the same Hb. and serum-iron value.

AMOUNT OF AVAILABLE IRON ADMINISTERED	PREPARATION	IRON UTILISATION COEFFICIENT
2600 mgm 	FERROMYN	 42%
3180 mgm 	FERROUS GLUCONATE	 28%
7560 mgm 	FERROUS SULPHATE	 14%

FORMULA: Each tablet contains 150 mgm. Ferrous Succinate, providing 35 mgm. elemental iron.

NOW AN ACCEPTED TREATMENT . . .

Transvasin

Contains skin-penetrating esters of salicylic, nicotinic, and p-aminobenzoic acids. It brings real relief to deep-seated muscular rheumatism by simple inunction.

TRANSVASIN, a new preparation developed by Hamol S.A., our Swiss associates, and now available for prescription in this country, contains polar esters of salicylic, p-aminobenzoic and nicotinic acids. These esters readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on the skin.

It is now being widely prescribed, with highly successful results. There is evidence, also, that since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Nicotinic acid ethyl-ester	2%

Subjective warmth and glow

'ALGIPAN', the smooth non-greasy HISTAMINE cream, relies upon *methyl nicotinate* to ensure swift penetration of the cutaneous barrier. Simple inunction suffices to shepherd the Histamine content through the epidermis to the deeper tissues, where the resulting dilatation of arterioles and capillaries promotes a local increase in blood supply, accompanied by a reflex cessation of aching in underlying muscles.

To the patient, this is evidenced by a circumscribed surface 'flush' and warming glow, rapidly followed by disappearance of pain.

'Algipan' is of proven value in fibrositis and other manifestations of the 'rheumatic' syndrome.

for the menopausal patient

The association of methyltestosterone and ethinylœstradiol in Mepilin produces a more complete response in the treatment of menopausal disorders than can be obtained by the use of œstrogens alone.

The presence of methyltestosterone enables a reduction in œstrogen dosage to be made; thus undesirable side effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced. An increased feeling of confidence and well-being is produced which is both mental and physical.

Each teaspoonful (4 ml.) of Mepilin Elixir and each Mepilin Tablet contains ethinylœstradiol 0.01 mg. and methyltestosterone 3 mg.

Sanatogen as an aid in treatment of Psychosomatic Disorders

It is now widely recognised that a high percentage of all cases seen by the general practitioner today can be attributed wholly or partly to psychosomatic disorders. Though the symptoms may be diverse (rheumatism, headache, insomnia, dyspepsia, diarrhoea, effort syndrome, etc.), a common factor in the patients is their inability to withstand the pressure to which he or she is subjected.

A SUGGESTION FOR THE GENERAL PRACTITIONER

In the treatment of these psychosomatic disorders the general practitioner will find that Sanatogen protein nerve tonic is an extremely useful adjunct, particularly when dealing with patients who insist on a tonic, when strong suggestion is needed, or for people who are reluctant to accept a psychosomatic disorder as a diagnosis.

THE ROLE OF SANATOGEN

Sanatogen is 95% casein chemically combined with 5% sodium glycerophosphate, and has a vigorous tonic effect on the physical and nervous system. Three teaspoonfuls of Sanatogen t.d.s. (the normal dosage) provide the patient with 24 grams of protein daily, free from fat and cholesterol; whilst by reason of its glycerophosphate content it has a specific tonic effect on body and nerve tissue. Although Sanatogen is not prescribable owing to its high food value, it has been widely recommended by the profession for more than 50 years.

*A new Ganglionic
Blocking Preparation*

METHIUM CHLORIDE

The methonium compounds procure vasodilation through the autonomic nervous system, by blocking the vasoconstrictor impulses almost as effectively as does surgical excision of the ganglia. Their action has been described as "medical sympathectomy." The most satisfactory member of this series is hexamethonium chloride which, as a Warner product, bears the name *Methium Chloride*.

Compared with the many other hypotensive agents known to medicine, *Methium Chloride* has the advantages that it can be given by mouth in gradually increasing doses, that the safety margin is adequate and side-effects controllable, and there is no risk of bromide or iodide intoxication.

*in the treatment
of Hypertension*

Dosage:

As with other methonium salts, the individual dose varies from patient to patient, each of whom must be carefully examined and assessed in order to find the correct dosage.

Packing:

Methium Chloride is an S.I.V. poison, not subject to purchase tax. Bottles of 50 tablets are supplied in 125 mg. and 250 mg. strengths. Dispensing bottles of 500 tablets available in 125 mg. strength at 40/- and 250 mg. strength at 68/-. Literature giving full particulars and a trial supply of *Methium Chloride*, supplied on request.

Methium Chloride is listed in Category 1 of the Cohen Report and is therefore a recognized drug that can be widely prescribed under the N.H.S.

CHLOROMYCETIN

Originally introduced into medicine six years ago, Chloromycetin* has had 4 years' usage in general practice throughout the world and has proved itself to be unique amongst broad spectrum antibiotics in its outstanding efficacy. Chloromycetin has the following significant advantages:—

- * **BLOOD LEVELS INCREASE IN PROPORTION TO DOSAGE.** Chloromycetin is unequalled among present-day antibiotics for effectiveness and rapidity of absorption by mouth at all dosage levels. Serum concentration may be raised to any desired level simply by an appropriate increase in oral dosage.
- * **RAPID AND CONSISTENT RESPONSE.** Ability to adjust serum levels according to the grade and nature of infection means that response to Chloromycetin treatment is swift and consistent, and that the duration of treatment is reduced to a minimum. The facility with which Chloromycetin is absorbed probably also accounts for the low incidence of gastro-intestinal upset encountered during therapy.
- * **RESISTANCE RARELY DEVELOPS.** Development of resistance to Chloromycetin by the common pathogens is extremely rare, as is cross-resistance by organisms resistant to other antibiotics. Chloromycetin is "highly useful in the treatment of serious infections due to staphylococci that are resistant to penicillin and to the tetracyclines".
- * **OUTSTANDING TISSUE DIFFUSIBILITY.** Effective antibacterial levels are quickly obtained in virtually every body fluid following oral dosage. Chloromycetin readily penetrates tissue barriers and reaches therapeutically effective concentrations even in the relatively inaccessible cerebrospinal fluid.

The first synthetic antibiotic. A product of Parke, Davis original research.

1. The Royal Australian Air Force is offering commissioned rank to suitably qualified male medical practitioners who were eligible and have fulfilled their United Kingdom National Service. Successful applicants will serve as Medical Officers.

2. The duties are at Service Hospitals or R.A.A.F. Stations within Australia and/or overseas and include active clinical work.

3. Hospital experience and facilities for post-graduate work exist in R.A.A.F. Hospitals. Senior consultants and specialists visit these hospitals regularly, and post-graduate experience can be obtained with them and studies continued for high degrees and diplomas.

4. Applicants, between the ages of 23 and 40, must be British subjects of substantially European descent. They must be legally qualified medical practitioners entitled to be registered in the Commonwealth of Australia.

5. Successful candidates will be granted Short Service Commissions, on probation for a period of twelve months, with seniority as from date of appointment.

6. They will normally be granted the rank of Flight Lieutenant (Substantive). However, a candidate with former commissioned service in any of Her Majesty's Forces will be considered for appointment in either his former rank or such other rank as may be commensurate with his qualifications, experience and other attributes.

7. Duration of a short service commission is four years. On completion of the initial engagement an extension of three years may be granted and promotion subject to Service requirements.

8. An Officer serving on an extended short service appointment is eligible for appointment to a permanent commission.

9. Medical Officers appointed to permanent commissions may be granted up to 12 months' leave on full pay after six years' service. The purpose of this leave is to enable them to pursue special medical training, including study for post-graduate diplomas.

10. A pension scheme is available which provides a generous retiring allowance and also covers invalidity or death during Service. Officers who reach retiring age for rank held will receive benefits as follows:

20 years' service completed—Full pension.
15 " " " —Pro rata pension according to years completed.
10 " " " —Gratuity of 150% of contributions

11. Rates of retirement ages and allowances are supplied on application.

12. PAY AND ALLOWANCES. The following is the table of annual rates of pay and allowances for Medical Officers of the Royal Australian Air Force. All these rates are in Australian currency.

The removal of wax from the external auditory meatus can now be greatly simplified—by the use of Cerumol Ear Drops. Cerumol dissolves soft cerumen, disimpacts the hard wax plug, and a simple wiping or washing out is sufficient to remove debris. Cerumol is not injurious to the lining of the external auditory meatus or to the tympanic membrane.

Anti-bacterial, safe and efficient, Cerumol is an accepted product for use in a large number of hospitals and general practices throughout the country. It is included in Category No. 4 of the Classified List of Proprietary Preparations issued by the Ministry of Health, and may therefore be prescribed on N.H.S. form E.C.10.

PACKS:—For Surgery Use: 10 c.c. vial, separate dropper included (Basic N.H.S. price 2s. 8d.)
For Hospital Use: 2 oz. and 10 oz. bottles.

"Yes, I've checked these graduations most carefully...."

"....I've never yet found the slightest inaccuracy in a 'PYREX' Glass graduated Burette, or in fact in any 'PYREX' graduated vessel."

"Our work is rather special, so we always use Works Class A standard, but I am sure we'd be quite safe in using Works Class B at the lower cost. Of course we keep NPL Class A for all our research work."

"What about breakages?"

"Very few, Sir! You see, 'PYREX' can be made so much more sturdy and robust because of its low coefficient of expansion (actually 3.2×10^{-6})—and we never have breakage through heat, nor any sign of chemical attack."

A New Approach to the Treatment of Coughs:

How CETAMIUM in New Vick Cough Syrup increases the effectiveness of known and tried medicaments

Nature and Action of Cetamium

Cetamium is a quaternary ammonium salt known chemically as cetylpyridinium chloride. It is best known as a compound with high bactericidal activity, but its other important property of lowering surface tension is of special interest in a cough syrup.

Reduced Surface Tension Aids Penetration of Oral Mucosa

The surface tension of Vick Cough Syrup is approximately 43 dynes per square centimetre as compared with that of distilled water, which is 72. This enables the syrup to penetrate into the crypts and crevices of the oral mucosa which water alone, or a normal syrup, will simply bridge over.

More Effective Action of Accepted Medicaments

The inclusion of Cetamium with time-tested, clinically proven expectorants—ammonium chloride, sodium citrate and glycerine—produces a syrup which brings these medicaments into contact with a more extensive area of the throat membranes than they normally reach, thus bringing more relief to irritated tissues where inflammation or infection may exist.

Active Ingredients

Cetamium	0.025%
Ammon. Chlorid.	1.00%
Sod. Cit.	4.00%
Acid Cit.	0.25%
Glycer.	3.75%

Suitable for Children: No Narcotic

Vick Cetamium Cough Syrup contains no narcotics or habit forming drugs. This fact, plus its delicious flavour, makes it particularly suitable for children.

No Nausea

There is evidence to suggest that Cetamium slightly accelerates stomach emptying action. It will be found that the tendency of syrupy expectorant mixtures to induce nausea, particularly in children, is virtually absent. Nor are there any other side effects.

Free Samples will be sent on request to:

Vick International Ltd., Dept. B, 215, Blackfriars Road, London, S.E.1

NAKURU WAR MEMORIAL HOSPITAL
Nakuru, Kenya Colony

The above hospital requires the services of a **FULLY QUALIFIED RADIOLOGIST** immediately, to be engaged on one of the two following alternative bases. The hospital is of modern construction, has 72 beds, is fully equipped with first class x-ray apparatus, and is served by 25 general practitioners, there being no other hospital facilities within a radius of 100 miles. The climate of Nakuru is healthy, and there are ample facilities for education, sport, etc., being situated in the centre of the European settled area. The alternative methods of engagement are (1) To enable a radiologist to establish a practice at the hospital by making available the x-ray room and apparatus at an agreed rental. The Board of Management would consider the payment of a guaranteed income over a period of three years, on a reducing basis, during the establishment of the practice. (2) On a basis of employment by the hospital on contract in accordance with the normal conditions appertaining to the appointment of a fully qualified radiologist to a post of this type. Under method 1, the minimum remuneration would be £2,500 per annum guaranteed for three years; under method 2 the salary would be £3,000 per annum. Preference will be given to applicants under the age of 35 years who are desirous of establishing themselves in the Colony, where there is ample scope for a capable man to build up a sound reputation, and full facilities will be granted to attain this end. For further particulars application should be made to the Secretaries, Nakuru War Memorial Hospital, P.O. Box 35, Nakuru, Kenya Colony. (3218)

UNIVERSITY AND RESEARCH

APPOINTMENTS, etc.

INSTITUTE OF OPHTHALMOLOGY
(University of London)

Applications are invited for the post of **FULL-TIME ASSISTANT PATHOLOGIST**. The essential duties are those of general routine clinical pathology but the post offers exceptional opportunities for research. Previous experience in ocular pathology is not necessary. According to age and experience the post will be either in the grade of Senior Lecturer, salary scale commencing at £1,250, rising by annual increments of £100 to £1,750 per annum, or of Junior Lecturer, salary scale commencing at £900, rising by annual increments of £100 to £1,100 per annum. The post requires membership of the appropriate super-annuation scheme. Family allowances are admissible. Applications, together with copies of three recent testimonials, should reach the undersigned not later than November 15, 1954.—C. F. Seath, Secretary, Institute of Ophthalmology, Judd Street, W.C.1. (3318)

GUY'S HOSPITAL MEDICAL SCHOOL
London Bridge, S.E.1

Applications are invited for a **FULL-TIME RESEARCH FELLOWSHIP** in the Thoracic Surgical Unit for research on cardiovascular problems. It is desirable that applicants should possess a higher qualification in surgery. Salary within the range £850 to £1,100 per annum, according to the experience of the person appointed. Applications, with the names of three referees, should be sent to the Dean. (3704)

ROYAL COLLEGE OF PHYSICIANS

Applications are invited for a **LEVERHULME RESEARCH SCHOLARSHIP** value of £1,000 a year. The Scholarship will be for one year in the first instance and may be renewed for a maximum of three years. A scholar must satisfy the College that the major part of his time is spent on his research, but he may be allowed to hold another appointment. Scholars must devote themselves to the investigation of some problem related to disease as it occurs in man, in any branch of medicine. The work must be done in some established institution, preferably in the United Kingdom, in which full facilities for the research are available. Applications, accompanied by the names of two referees, should state details of the proposed work, the name of the individual under whom it is proposed to work and the Institution where the work is to be done. Application forms may be obtained from the Assistant Registrar, Royal College of Physicians, Pall Mall East, London, S.W.1. Applications for the Scholarship must be received not later than January 10, 1955. (3731)

UNIVERSITY OF BIRMINGHAM
Department of Experimental Psychiatry

SENIOR RESEARCH FELLOWSHIP IN NEUROPHARMACOLOGY
Applications are invited for the above post. The appointment offers full opportunities for research in pure and applied neuropharmacology, with special reference to the metabolic background of mental disorders. Related electrophysiological and neurochemical studies are in progress in the department, and there are excellent facilities for clinical trial in in-patient and out-patient material. Adequate laboratory space and technical assistance are available. The appointment is a senior one, and is renewable annually up to a maximum of five years. The salary (which will be within the academic range, and carry a minimum of £800 per annum) will be determined solely by the candidate's qualifications and experience. Applications, with names of three referees, should reach the Secretary, the Department of Experimental Psychiatry, Medical School, Birmingham, 15, not later than November 22, 1954. (3631)

UNIVERSITY OF LONDON KING'S COLLEGE

Applications are invited from graduates with medical qualifications for the post of **LECTURER IN ANATOMY**. The appointment will date from January 1, 1955. It will be on the Junior Lecturer scale of £600 by £50 to £750 with family allowances and F.S.S.U. benefits. Particulars and application forms should be obtained from the Registrar, Kings College, Strand, W.C.2, whom completed applications should reach by November 22. (3442)

SOCIETY OF APOTHECARIES OF LONDON
(M.M.S.A.)

The Mastery of Midwifery is designed to give evidence of intensive study and practical experience in *Ante-natal Care, Midwifery, and Infant Welfare* and their relation to *Hygiene and Preventive Medicine*. The possession of this Diploma will prove of value in private practice and also to candidates for appointments involving the special work described in the preceding paragraph. The tests imposed are stringent: the Examination, written, oral, and clinical, demands thorough and detailed knowledge gained by practical experience, and constitutes a definite endeavour to conduct *Maternal and Infant Mortality*. Examinations are held twice yearly in the months of May and November. Regulations and forms of application for admission to the Examination may be obtained from the Registrar, the Society of Apothecaries, Black Friars' Lane, E.C.4.

UNIVERSITY OF LONDON

A lecture entitled "**On the Excretion of 17-ketosteroids in Human Urine**," will be given by Dr. C. Hamburger (State Serum Institute, Copenhagen) at 5.15 p.m. on November 15, at Guy's Hospital Medical School, St. Thomas's Street, S.E.1. Admission free, without ticket.—James Henderson, Academic Registrar. (3549)
