SAFE AND EFFECTIVE

INTRAMUSCULAR IRON

BENGER LABORATORIES, who introduced the first intravenous iron preparation, now present a new and equally effective iron complex for intramuscular administration. ITS NAME IS IMFERON. The introduction of this new compound considerably simplifies the control of iron deficiency anæmias in both hospital and general practice.

Note these advantages . . .

★ **Imferon** is the first safe and effective iron preparation for intramuscular injection—equally suitable for general practice and hospital use.

★ **Imferon** produces a haemoglobin response identical with that obtained by saccharated oxide of iron. The response is thus predictable.

★ **Imferon** provides the equivalent of 100 mg. of iron per 2 ml. injection or 250 mg. of iron per 5 ml. injection; fewer injections are therefore necessary to administer the calculated total dose.

AMPOULES 2 ml. (100 mg. *Fe.*) boxes 10 and 100.

 to the focal point of
 soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Leadership in oral iron therapy

This new iron preparation presents Ferrous Succinate, the bivalent iron salt of succinic acid. Succinic acid, together with glycine is essential for the synthesis in the red bone marrow of a porphyrin (hæm) containing iron.

The controlled clinical trials with FERROMYN show a mean utilisation factor of 42% as compared with the mean utilisation factor of 28% with Ferrous Gluconate and 14% with Ferrous Sulphate.

A notable feature of this preparation is that the very favourable response is obtained with the minimum overall dosage of ferrous salt thus ensuring minimum risk of toxic reaction.

The range of FERROMYN preparations has been extended to include ELIXIR FERROMYN and ELIXIR FERROMYN 'B'.

soluble
penicillin

for successful ORAL therapy

To secure the most rapid and decisive results by mouth, the penicillin must be speedily absorbed to give a high initial destructive level (by far the most conclusive attack), followed by a sustained inhibitory level at the infected focus. This is undoubtedly best achieved with soluble **potassium** penicillin, which is absorbed from the alimentary tract with the greatest efficiency. It is this form of penicillin that is presented in Crystapen Tablets.

- ▼ Better absorbed than insoluble penicillin
- ▼ Produces *effective* blood and tissue levels more *consistently*
- ▼ Duration of activity equal to that of insoluble salts

Gentle reminder

In the ritual of antisepsis there can be no relaxation. In the operating theatre, in the labour ward, in the first-aid post, 'DETTOL' is a constant reminder that the greatest triumph over infection still lies in its prevention.

- Disintegrates faster than enteric coating
- High blood concentrations within 2 hours

New *Filmtab* ERYTHROCIN is less likely to alter normal intestinal flora than most other widely-used antibiotics. Prescribe *Filmtab* ERYTHROCIN for all susceptible coccic infections—even when the organism is resistant to other antibiotics. Bottles of 25, 100 (100 mg. and 200 mg.)

* Trade Mark for Abbott's film sealed tablets, patent applied for.

3.20 p.m. Five minutes later, *Filmtab* coating has already started to disintegrate. The tissue-thin film actually begins to dissolve within 30 seconds after the patient swallows tablet.

3.30 p.m. New coating is now completely dissolved. At this stage, ERYTHROCIN is ready to be absorbed, and ready to destroy sensitive cocci—including those resistant to most other antibiotics.

3.45 p.m. Now the *Filmtab* mushrooms out with all of the drug available for absorption. Note that enteric-coated tablet is still intact. Tests show that the new Stearate form definitely protects ERYTHROCIN against gastric acids.

4.00 p.m. With *Filmtab* (marketed only by Abbott) the drug is released faster, absorbed sooner. In the body, effective ERYTHROCIN blood levels now appear in less than 2 hours (instead of 4-6 hours as before).

For suppression of severe cough

'Physeptone' depresses the cough reflex in a manner comparable with that of diamorphine. It may therefore be prescribed with advantage for those cases of persistent cough which would normally be given diamorphine.

For this purpose, 'Physeptone' Linctus is issued containing 2 mgm. of Methadone (Amidone) Hydrochloride in each fluid drachm. The average adult dose is one teaspoonful (2 mgm.) every three or four hours, and this will control nearly every cough.

For children 'Physeptone' Linctus should be diluted with simple syrup in the proportion of one part linctus and seven parts syrup. One to two teaspoonfuls (0.25 - 0.5 mgm.) of this *diluted* linctus to be given according to the age of the child.

FOR MILD FORMS OF PAIN

"Aspirin and phenacetin are effective and useful, and a sedative effect is obtainable if a barbiturate is combined with them . . . The reputation of codeine as a pharmacologically useful drug is at present waning, for the analgesic effect of the compound tablet of codeine B.P. is probably due more to its content of aspirin and phenacetin than to the $\frac{1}{8}$ gr. (8 mg.) of codeine present. It is a weak analgesic even when given in full doses." (Brit.Med.J. 1952 (Oct. 25th) ii, p.928)

Tercin combines aspirin and phenacetin with a barbiturate. It is intended for the relief of all those mild forms of pain for which Tablets of Aspirin, Phenacetin and Codeine

TABILLIN in the new 'Foil-Pac'

This new method of packing protects each tablet until used — a most important consideration in oral penicillin therapy, which is now established as a satisfactory method of systemic administration.

Tabillin offers these advantages:

- 1 Tabillins, being individually sealed, are protected against contamination and loss of potency.
- 2 Each dose of Tabillin is protected until required — therefore superior to liquid preparations.
- 3 Any quantity of Tabillin can be prescribed and dispensed without losing the advantages of individually-sealed protection. Wastage is eliminated.
- 4 Tabillins contain soluble penicillin which gives higher and more persistent blood-levels than do insoluble penicillin salts.
- 5 'Foil-Pac' Tabillins are economical. Available at no greater cost than unwrapped tablets.

VITAMINS LIMITED

How doctors Save N.H.S. Money

At the Annual General Meeting of Vitamins Ltd., held recently in London, the Chairman, Mr. H. C. H. Graves, pointed out that doctors who wished to save the N.H.S. money could do so by prescribing Vitamins Ltd. specialities instead of the so-called "standard" equivalents.

In one case a 20 day course of treatment cost 3/6½d. if the V.L. speciality were used; but 5/7d. if the "standard" equivalents were used (particulars to the medical profession on application).

This was true, in greater or lesser degree, of all their preparations.

They heard many complaints these days of a feeling of frustration or of undue fatigue or of being under par. They heard of listless children or of infants who did not grow as quickly as they should. The N.H.S. would treat them and us if we actually became ill, but what about when they were not ill but just below par? It was in that twilight stage, that stage of betwixt and between, that most dramatic benefits could be found from the steady use of Bemax. How different many of the frustrated and listless would be on Bemax. If, like some recipes, Bemax were unpleasant and not easy of acceptance he could understand there being abstainers from its use, but on the contrary it was possible to take it in so many ways—with milk or fruit juice, in soup or sprinkled on cereal foods—that he found it incredible that anyone who had the opportunity should fail to give it a trial, and still more incredible to think that in these enlightened days anyone could be found to deny their children its benefits.

In particular, the new chocolate-flavoured Bemax—which had been proved on large-scale trials to be highly acceptable to children—removed the last possible objection to its use.

With the risk of an influenza epidemic in the offing it was vital that the nation should build up its resistance in time. Bemax was ideal for the purpose.

The report and accounts were adopted.

THE PALMER INJECTOR has stood up to severe clinical tests in many hospitals and clinics, and has been used for intramuscular as well as subcutaneous injection. It can be operated by either hand, singly, in any part of the body. A person making self-injection can inject either arm easily. It is therefore of particular importance to all diabetics. The base plate has been designed to gather the skin unaided in preparation for the injection. The speed of the needle and the controlled depth of the injection makes penetration 100% painless.

The No. 1 model, fitting any ordinary 1 cc. or 2 cc. syringe, gives varied penetration from zero to $\frac{3}{4}$ in. The No. 2 model gun gives penetration from zero to 2 in. and holds a 5 or 10cc. syringe. For further particulars write to:

High-speed pen recorders for medical use

SAFE—HIGH DEFINITION—NON-CLOGGING

Kelvin Hughes high-speed ink writing recorders are, by virtue of their design, perfectly safe for use in operating theatres. The ink is quick drying and does not clog, since it is immediately evacuated whenever the apparatus is switched off. Frequency responses of the recorders are very high, resulting in extremely good definition. Units can be adapted for use with existing chart tables.

Kelvin Hughes welcome enquiries from the Medical profession regarding any application of pen recording.

**There is no
varied diet problem
with Canned Strained Foods**

YOU can almost read a mother's thoughts when you recommend early mixed feeding for her baby! Can I get the foods—and prepare them properly? Will it take much time . . . ?

Fortunately, you can tell her about the range of Heinz Strained Foods. It includes chicken and meat broths, soups, vegetables, fruits and cereal—foods often difficult to prepare at home because of time, cost or season.

And these foods actually are even more nutritious than similar foods prepared at home. This is a thing mothers often query, as you know. Foods come fresh to the Heinz factory where they are cleaned, cooked, strained, canned and sterilised immediately, by scientific methods, and inspected at every stage.

Heinz Strained Foods are a balanced team providing vital proteins, vitamins and minerals. Nutritious, hygienic, ready to use, they solve varied diet problems completely and economically.

For a FREE booklet giving the exact nutrient values of these foods, please write to Dept. I.N., H. J. Heinz Company Ltd., London, N.W.10.

**This mattress has
saving ways**

Each spring (as the photograph shows) is interlocked, coil by coil, into the four adjoining ones to combine strength with exceptional gentleness. Each fine spring is supported by the combined strength of every other spring. So it never sags, never loses the power to yield comfortably to every movement. Patients' health, nurses' work, your money — that's what an Intalok saves.

Intalok springs are rustless—actually gain with repeated stoving. Existing hair mattresses can be converted to Intaloks cheaply.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners:* £425 per annum for the first post held; £475 per annum for the second and any subsequent post held.

(ii) *Fully registered practitioners:* £425 per annum for the first post held; £475 per annum for the second post held; £525 per annum for the third and any subsequent post held.

provided that a medical practitioner who has held house posts under (i) above whilst provisionally registered shall be remunerated at the rate of £525 per annum for each post held after obtaining full registration; and provided that in exceptional circumstances, subject to the consent of the Minister (in Scotland of the Secretary of State), the rates under (ii) may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

A deduction at the rate of £125 per annum shall be made from the remuneration of House Officers in respect of board and lodging and other services provided. Each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.
