... so often it is unacceptable to a patient ... particularly when the stomach is in a weakened state.

## but everybody can drink Lucozade

Here is Glucose in an exceptionally palatable form — acceptable no matter how weak the patient may be, even after an operation. Its flavour never cloyes — but succeeds in stimulating the appetite. Altogether it is a most valuable drink and one of which the medical profession is making full use.

## for the rapid relief of pain

The distress caused by the piercing, stabbing pains of neuralgia is quickly relieved by the rapid, smooth, analgesic action of HYPON TABLETS, enabling the practitioner to prescribe a safe means of meeting the patient's need. Menstrual pain is also effectively alleviated. Where the cause of distress is of a more chronic nature, as in rheumatism and sciatica, the adverse

effects of prolonged medication with codeine and salicylic therapy are eliminated by the inclusion in the formula of caffeine and phenolphthalein. HYPON TABLETS are already widely prescribed by members of the profession for their speedy and safe action with the almost complete elimination of gastric upset. Parallel with the relief from pain, febrile states are effectively reduced in conditions such as influenza, coryza and tonsillitis.

# A NEW ADJUVANT IN THE TREATMENT OF RESPIRATORY DISORDERS

Lloyd-Hamol Ltd., of London and Zurich, presents to the medical profession a new decongestive salve, Thoracin, for the symptomatic relief of coughs, colds and respiratory disorders.

This diagram shows how Thoracin components penetrate the skin, are carried by the bloodstream to the alveoli and excreted there to exert their effect.

## FORMULA

Phenyl Ethyl Nicotinate	2.0% w/w
Guaiacol Furoate	5.0% w/w
Tetrahydrofurfuryl Salicylate	10.0% w/w
Camphor	3.0% w/w
Eucalyptol	2.0% w/w
Water-Miscible Base to	100.0%

► The Thoracin formula is based on the same principles that have made Transvasin so successful in the treatment of rheumatic conditions.

► Thoracin is composed of esters of substituted hydroxy aromatic derivatives.

► Thoracin achieves the effect of the classic counter-irritant remedies — poultices, plasters and cupping — without irritation of the skin.

► Thoracin contains a new ester of Guaiacol that is entirely free from the evil smell and irritant effect associated with this phenol derivative in its pure form. This ester easily penetrates the skin, and is excreted in the alveoli, where it exerts its well-known action.

► Thoracin ensures vasodilation of the superficial skin vessels by the use of esters of nicotinic acid.

► Thoracin relieves reflex spasm of the pectoral muscles by the use of the tetrahydrofurfuryl-ester of salicylic acid.

► Thoracin brings to the alveoli via the bloodstream the sedative, antispasmodic, and expectorant properties of camphor and eucalyptus.

THORACIN is available in 1 oz. tubes — basic price 2/6 plus 7½d. P.T. It is an ethical product, and is not advertised to the public. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. *Samples and literature will be gladly sent on application.*

## Two outstanding preparations

# Parentrovite

A new injectable preparation of B-vitamins and vitamin C in high concentration designed especially for treatment of the patient who is toxic, possibly with coma or delirium, from

*overdosage with narcotics or barbiturates, excessive consumption of alcohol, viral or bacterial infections.*

In all these circumstances there is derangement of intracellular metabolism, involving inactivation of the B vitamin enzyme systems and severe depletion of body stores.

Recovery may be speeded by, and may even depend upon, the restoration of normal intracellular metabolism by means of high blood concentrations of the vitamins concerned.

To achieve this aim, ampoules are available in pairs of 5 c.c. for intravenous injection in acute conditions, and in smaller volumes for intramuscular injection in less urgent cases or for maintenance therapy.

## FORMULA

After a series of trials, the following formula has been adopted.

For intravenous injection.		INTRAVENOUS (I.V. 250)	
Aneurine hydrochloride	....	250 mg.	—
Nicotinamide	....	160 mg.	—
Riboflavin	....	4 mg.	—
Pyridoxine	....	50 mg.	—

Ascorbic acid (as sodium ascorbate)	....	—	500 mg.
		5 ml.	5 ml.
		10 ml.	

Also available for intramuscular injection.

# Omnivite forte

A preparation in tablet form for the continuation treatment of the *alcohol addict*. All the vitamins known to be concerned in intracellular metabolism are present in amounts found by clinical trial to be effective.

Further details of both these preparations may be obtained on request.

## FORMULA. Each tablet contains:

Success in the restoration of the much-cherished habit lies in the regular persuasive stimulus of soft bulk—such as is provided by 'PETROLAGAR.' Gently and unobtrusively, 'PETROLAGAR' arranges for normal physiological evacuations and secures the return of 'clockwork regularity.'

# CHLOROMYCETIN

Originally introduced into medicine six years ago, Chloromycetin\* has had 4 years' usage in general practice throughout the world and has proved itself to be unique amongst broad spectrum antibiotics in its outstanding efficacy. Chloromycetin has the following significant advantages:—

- \* **BLOOD LEVELS INCREASE IN PROPORTION TO DOSAGE.** Chloromycetin is unequalled among present-day antibiotics for effectiveness and rapidity of absorption by mouth at all dosage levels. Serum concentration may be raised to any desired level simply by an appropriate increase in oral dosage.
- \* **RAPID AND CONSISTENT RESPONSE.** Ability to adjust serum levels according to the grade and nature of infection means that response to Chloromycetin treatment is swift and consistent, and that the duration of treatment is reduced to a minimum. The facility with which Chloromycetin is absorbed probably also accounts for the low incidence of gastro-intestinal upset encountered during therapy.
- \* **RESISTANCE RARELY DEVELOPS.** Development of resistance to Chloromycetin by the common pathogens is extremely rare, as is cross-resistance by organisms resistant to other antibiotics. Chloromycetin is "highly useful in the treatment of serious infections due to staphylococci that are resistant to penicillin and to the tetracyclines".
- \* **OUTSTANDING TISSUE DIFFUSIBILITY.** Effective antibacterial levels are quickly obtained in virtually every body fluid following oral dosage. Chloromycetin readily penetrates tissue barriers and reaches therapeutically effective concentrations even in the relatively inaccessible cerebrospinal fluid.

The first synthetic antibiotic. A product of Parke, Davis original research.

# The new PENICILLIN COMPOUND

'PENIDURAL' is the new ready-for-use fluid oral penicillin, containing 300,000 units to each large teaspoonful (5 c.c.). It will retain its full potency in aqueous suspension for two years at room temperature, and is thus ideal for treatment both in hospital and home.

*Extract from*

*Editorial of the British Medical Journal, dated  
11th April, 1953, page 823.*

"A standard dose of 300,000 units of 'Penidural' was given, and after a single dose a therapeutic blood concentration was invariably found after 3 hours. When the dose was repeated at six-hour intervals a cumulative effect was observed, with continuous maintenance of a therapeutic concentration."

The introduction of this pleasantly flavoured liquid penicillin banishes the need for any tedious mixing. The patient merely has to pour out the specified dose.

*Supplied in bottles of 60 c.c.*

*Below is a diagram based upon recent work as reported in the British Medical Journal, April 11th, 1953, pp. 805 and 823.*

118 Patients (101 children and 17 adults) were given, irrespective of age and weight, 300,000 units of 'PENIDURAL'. No less than 100% showed therapeutic blood levels after 3 hours.

is available throughout the British Commonwealth, in the U.S.A. and many other countries. It is known as Nulacin in Canada and Sweden.

NEUTRALIZATION of gastric hyperacidity has long been acknowledged as the first requirement of successful peptic ulcer therapy. In the past it has only been possible to achieve this with milk-alkali drip therapy under hospital conditions.

Now NULACIN provides all the advantages of milk-alkali drip therapy without the discomfort of a tube and without inconvenience to the patient.

#### INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

NULACIN tablets are not advertised to the public and have no B.P. equivalent. May be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to pharmacists is 2/-). Also Available in tubes of 12.

## 15 years of clinical opinion supports the use of vaginal tampons

---

chafing is eliminated  
and there is no local irritation  
or internal inflammation

---

The chafing and itching of the vulva and thighs often associated with the use of external pads for menstrual hygiene is eliminated by changing to vaginal tampons (1). Women greatly appreciate the increased comfort and sense of freedom.

Over the past 15 years observers (1-5) have noted that tampons do not give rise to irritation of the cervix or vagina. One (5) found that cervical erosions present at the initial examination were often improved and never aggravated by the change to internal protection. No erosion, vaginitis or cervicitis is caused by this form of menstrual guard (3).

Another observer (2) stated categorically that she found no evidence that vaginal tampons are prejudicial to health. Some gynaecologists use them deliberately in cases of trichomonas and monilia infections for treatment, or in other conditions for the prevention of additional contamination by extra-vaginal pathogens (4-6). Intelligently used, vaginal tampons represent a decided advance in feminine hygiene. They may be recommended with confidence.

## "Effico" Tonic and the National Health Service

The Joint Committee on Prescribing has placed "EFFICO" Tonic in Category 3/4, and thus it is freely available, at the discretion of the doctor, for prescription on Form E.C.10 provided only that the price is reasonable.

In this matter of price "EFFICO" need not fear comparison with any equivalent preparation. When prescribed on Form E.C.10, the cost of an 8 fl. oz. bottle of "EFFICO" Tonic averages less than 3/6,

and after making allowance for the 1/- paid by the patient, the cost to the State is normally under 2/6.

"EFFICO" retails to private patients for 3/- plus 6d. Purchase Tax, or the appropriate Dispensing Fee.

The well-balanced "EFFICO" formula has proved itself in clinical use and can confidently be prescribed where a good tonic and digestive stimulant is indicated.

## 3-FOLD THERAPY *penetrates deeply*

Deep-seated pain due to rheumatic conditions and after injuries often needs intensive treatment. The Thermasseur provides 3-fold therapy—soothing warmth, gentle massage and infra-red emissions.

The massaging sphere, in stimulating the circulation and breaking down adhesions, also accelerates the absorption of waste matter. It is thus likely to prove commendably beneficial in cases of rheumatism and fibrositis, and indeed testimony proves this to be the case. The Thermasseur can be manipulated all over the body and can safely be advised to patients for self use.

**FEATURES** ● Operates from A.C. mains at low voltage ● Portable in strong box ● 6 ft. lead and 2-way adaptor plug ● Massaging sphere can be dismantled for sterilizing ● 12 months' guarantee. ● Price £4 19s. 6d. complete, inc. tax.

**CETYL PYRIDINIUM CHLORIDE**  
 NOW INCORPORATED INTO **PROCIDETS**

Cetyl pyridinium chloride (C.P.C.) is one of the most outstanding bactericidal compounds introduced into medicine. Procidents\* make a perfect vehicle for this powerful bactericide. Its addition to the sodium propionate in Procidents Lozenges arms the practitioner with a double-barrelled weapon against many bacterial and fungal infections of the throat, mouth and gums. By reducing surface tension, C.P.C. carries the germicidal action of Procidents deeply into the folds and crevices of the mouth and pharynx. The germicidal value of Procidents is such that  $\frac{1}{4}$  of a Lozenge rapidly kills *Streptococcus pyogenes* in a 20 c.c. saliva solution. Procidents are non-toxic, non-irritating, and, containing benzocaine, give immediate relief from soreness in the throat and mouth. Indicated for preventing and treating numerous infections, such as tonsillitis, pharyngitis, laryngitis, etc., and other inflammatory conditions of the mouth and throat.

Issued in cartons of 18 Lozenges—metal-foil sealed. Clinical samples and technical literature available on request.
