

Sympathetic control of *Enuresis*

METHEPH

(1-N-METHYLEPHEDRINE HYDROCHLORIDE)

The sympathomimetic action of METHEPH reduces uninhibited reflex contractions of the bladder. Enuresis is thereby controlled, usually in 3 to 4 weeks in children. With adults, longer treatment may be necessary. METHEPH, supplied in $\frac{1}{2}$ gr. tablets, has the following advantages over ephedrine:—

- ★ Blood-pressor action only about one-tenth.
- ★ Central nervous system not stimulated.
- ★ No secondary acceleration of respiration.

Literature and clinical samples gladly sent on request.

Basic N.H.S. cost
25 tablets .. 2/1d.
100 tablets .. 6/10d.

FIRST SAFE AND EFFECTIVE INTRAMUSCULAR IRON

BENGER LABORATORIES, who introduced the first intravenous iron preparation, now present a new and equally effective iron complex for intramuscular administration.

ITS NAME IS IMFERON. The introduction of this new compound considerably simplifies the control of iron deficiency anaemias in both hospital and general practice.

Note these advantages . . .

★ **Imferon** is the first safe and effective iron preparation for intramuscular injection—equally suitable for general practice and hospital use.

★ **Imferon** produces a haemoglobin response identical with that obtained by saccharated oxide of iron. The response is thus predictable.

★ **Imferon** provides the equivalent of 100 mg. of iron per 2 ml. injection or 250 mg. of iron per 5 ml. injection; fewer injections are therefore necessary to administer the calculated total dose.

AMPOULES 2 ml. (100 mg. Fe.) boxes 10 and 100.

AMPOULES 5 ml. (250 mg. Fe.) boxes 5 and 50.

Fully-descriptive literature on request.

DOCTORS WANTED BY THE ROYAL AUSTRALIAN AIR FORCE

The R.A.A.F. offers the ambitious doctor opportunities of financial reward, wide experience, and future security which he may not find in the home country.

Here are some of the advantages and conditions of service :

- ★ Commissioned rank of Flight Lieutenant on joining.
- ★ Age of applicants from 23 to 40.
- ★ First-class fares to Australia for successful applicants, their wives, and families.
- ★ Hospital experience and postgraduate training in R.A.A.F. and civil hospitals.
- ★ A generous pension scheme providing retiring allowance and covering invalidity or death during service.
- ★ PAY with allowances commences from date of embarkation. Examples as follows:

F/Lt. on joining (single)	£1,294	4	7	(married)	£1,508	13	4
S/Ldr.	£1,485	17	1		£1,700	5	10
W/Cdr.	£1,668	7	1		£1,882	15	10
G/Capt.	£1,951	4	7		£2,165	13	4
A/Cdre.	£2,334	9	7		£2,548	18	4

Spencer Antepartum-Postpartum Support

Do not overlook the Psychological effect of a SPENCER Support

A Spencer supports the breasts in position to improve circulation; protects inner tissues; helps prevent skin from breaking. Guards against caking and abscessing after childbirth.

During antepartum and postpartum periods—and especially in early ambulation—a Spencer exerts an important psychological effect. A Spencer's gentle but effective support increases the patient's confidence in her ability to "stay on her feet" and "move about."

Therapeutically, a Spencer Support helps to regain postural stability, helps replace organs in normal position, often relieves low-back pain. A Spencer offers protection to tissues affected by operative procedures without restricting natural muscle activity.

A qualified scientifically trained Fitter furnishes us with a description of the patient's body and posture, and detailed measurements. Then the support is individually designed, cut, and made at our Manufactory at Banbury. Within a short time the patient's support is delivered and adjusted by the Fitter.

For further information and Brochure on Spencer Supports write to :

FERROMYN

(Ferrous Succinate)

**THE NEW ORGANIC IRON—A COMPLETE RANGE AT
REDUCED PRICES**

50% reduced dosage

50% higher utilisation

30% reduction in price

This new iron preparation presents Ferrous Succinate, the bivalent iron salt of succinic acid. Succinic acid, together with glycine is essential for the synthesis in the red bone marrow of a porphyrin (hæm) containing iron.

The controlled clinical trials with FERROMYN show a mean utilisation factor of 42% as compared with the mean utilisation factor of 28% with Ferrous Gluconate and 14% with Ferrous Sulphate.

A notable feature of this preparation is that the very favourable response is obtained with the minimum overall dosage of ferrous salt thus ensuring minimum risk of toxic reaction.

The range of FERROMYN preparations has been extended to include ELIXIR FERROMYN and ELIXIR FERROMYN 'B'.

TABLETS

EACH TABLET

CLINITEST and ACETEST

Reagent Tablets
for the detection of Glycosuria

Reagent Tablets
for the detection of Ketonuria

Both tests performed simultaneously in one minute!

CLINITEST

No external heating · No measuring of reagents

Approved by the Medical Advisory Committee of the Diabetic Association. The 'Clinitest' set, refills and accessories are all available under the N.H.S. on Form E.C.10. (Basic Drug Tariff Prices: Set 6/8 complete. Refill bottles of 36 tablets 2/4.)

CLINITEST HOSPITAL PACK

An invaluable time-saver in wards and clinics.
Write for details and hospital prices.

Specialists, General Practitioners, Clinics and Hospitals in all parts of the country have used and prescribed 'Clinitest' Reagent Tablets since 1947. Many valuable hours have been saved. Now after intensive research work and clinical trials the makers of 'Clinitest' Reagent Tablets have produced 'Acetest' Reagent Tablets for the detection of Ketonuria. With 'Clinitest' and 'Acetest' Reagent Tablets, reliable routine sugar and acetone tests can be carried out *simultaneously* in one minute!

The advantages of ACETEST Reagent Tablets

Quick and reliable, a single tablet provides all the reagents to perform a test. Low cost permits this tablet test to be used as a screening procedure or as a routine for diabetic patients. No danger of false positives with normal urine. No caustic reagents.

TO PERFORM A TEST:

- 1 Put 1 drop of urine on tablet.
- 2 Take reading at 30 seconds. Compare tablet to colour chart provided.
- 3 Record results as negative, trace, moderate or strongly positive.

Supplied in bottles of 100 tablets with colour scale.

'Acetest' Reagent Tablets (diagnostic nitroprusside tabs.) are also available under the N.H.S. on Form E.C.10. Basic Drug Tariff price 3/10 per bottle of 100 tablets (with colour scale).

Treatment of the Streptococcal Throat

'PONDETS' Penicillin are a new and ingenious vehicle for local oral penicillin therapy that combine the striking advantages of extreme palatability with prolonged action. Each 'Pondet' contains 5,000 international units of crystalline potassium penicillin-G in a delicious hard, fruit, toffee-like base that completely masks the bitter taste of penicillin.

Because of the nature of their hard base, 'Pondets' dissolve slowly and uniformly, supplying an uninterrupted high concentration of penicillin to infected areas of the oro-pharyngeal mucosa.

INDICATED in minor superficial oral infections due to penicillin sensitive organisms ranging from the 'Streptococcal Throat' to the less common Vincent's infection and recommended for routine prophylactic use following Tonsillectomy.

Individually wrapped in bottles of 20.

Children accept 'Pondets' as readily as a sweet, and they are particularly useful in controlling throat infections in juvenile communities.

Achromycin*
Tetracycline Lederle

way ahead

- *more rapidly absorbed*
- *quicker diffusion in body tissues*
- *greater stability*
- *more prolonged blood levels*
- *fewer side effects*

The medical profession has been quick to recognise that ACHROMYCIN represents a striking advance in antibiotic therapy. Not only is it a highly efficient drug, but it is also remarkably safe in use and simple to administer. In most cases, *oral* administration of ACHROMYCIN will secure high and prolonged levels in the blood and tissues that are all-important for therapeutic success.

ACHROMYCIN is effective against Gram-positive and Gram-negative cocci, Gram-negative bacilli, certain protozoa, viruses and rickettsia. In terms of hospital economics, ACHROMYCIN helps to shorten hospital stay, simplifying nursing care and making beds available more quickly.

AN EFFECTIVE **ORAL** MERCURIAL DIURETIC

Effective diuretic therapy by oral administration is now made possible by MERCLORAN. One tablet three times daily, equivalent to 30 mg. mercury, is usually sufficient to keep cardiac patients free from oedema. When more intensive treatment is needed MERCLORAN, being well tolerated by the majority of patients, can be taken more often and in increased doses. The need for injection is thus frequently eliminated.

In severe cases, it is often desirable to initiate treatment parenterally, in which case the chemically related compound MERCARDAN (meralluride Sodium U.S.P.) is available.

REDUCTION OF HYPERMOTILITY

'Lergine' brand Tricyclamol Chloride, a new anti-cholinergic agent, markedly reduces gastro-intestinal motility and spasm, and diminishes gastric, pancreatic and intestinal secretions.

As an adjunct to the dietary treatment of peptic ulcer, 'Lergine' provides prompt relief of spasm and pain. In cases requiring added sedation 'Lergine' brand Compound, which contains tricyclamol and phenobarbitone, is advised.

'Lergine' has proved highly effective in relieving the pain and constipation associated with spastic or "irritable" colon, and is valuable in treating pylorospasm, ulcerative colitis, regional ileitis and some types of diarrhoea, for example that associated with pancreatic insufficiency.

'Lergine' and 'Lergine' Compound are each issued in bottles of 100 and 500, the former at prices of 17/6d. plus 3/3d. P.T. and 80/- plus 15/- P.T., and the latter at 19/6d. plus 3/8d. P.T. and 85/- plus 15/11d. P.T. each subject to the usual discount.

TABILLIN in the new 'Foil-Pac'

This new method of packing protects each tablet until used — a most important consideration in oral penicillin therapy, which is now established as a satisfactory method of systemic administration.

Tabillin offers these advantages:

- 1 Tabillins, being individually sealed, are protected against contamination and loss of potency.
- 2 Each dose of Tabillin is protected until required — therefore superior to liquid preparations.
- 3 Any quantity of Tabillin can be prescribed and dispensed without losing the advantages of individually-sealed protection. Wastage is eliminated.
- 4 Tabillins contain soluble penicillin which gives higher and more persistent blood-levels than do insoluble penicillin salts.
- 5 'Foil-Pac' Tabillins are economical. Available at no greater cost than unwrapped tablets.

*individually
sealed tablets
—detached
as required*

TABILLIN Whenever Oral Penicillin Therapy is indicated, Tabillin is the preparation of choice.
Penicillin Tablets B.P.

Tablets of 100,000, 200,000, 400,000 and 500,000 I.U. Containers of 10 and 100 tablets.

The question of *Largactil* dosage in mild psychoneurotic cases

RECOMMENDATIONS ON THE LEVEL OF DOSAGE AND DURATION OF TREATMENT

DAGENHAM, MONDAY. Although there have been many reports of the success of 'Largactil', the May & Baker brand of chlorpromazine hydrochloride, in the treatment of patients suffering from various psychoneuroses, there have also been reports of disappointing results which may have come about because of a failure (a) to select suitable patients for treatment, (b) to reach an adequate dosage level for the particular case, or (c) to persevere with treatment.

It is gradually becoming apparent that the patients who respond most favourably to treatment with 'Largactil' are those in whom tension, apprehension, anxiety and distress are most marked, rather than those with symptoms of depression. Full benefit from the treatment of those most likely to respond can only be achieved if dosage levels are determined individually for each patient, and the need for this individual approach is apparent from reports which indicate that there may be such extreme variations in effective dosage as from 30 mgm. to as much as 800 mgm. daily in some instances. These same figures, however, emphasize the general safety of the drug, an important advantage when "trial and error" methods are

advocated for arriving at the dosage most suited to any particular patient.

It is suggested that the mild psychoneurotic should receive an initial dose of 75 mgm. on the first day, e.g., 1 x 25 mgm. tablet t.d.s., and that this dosage should be increased by 25 mgm. daily until an effective and tolerable dosage level is achieved. An upper limit of 200 to 300 mgm. is probably generally most effective but, because there may be a delay of some days before a response is apparent, doctors are strongly advised to persevere with treatment for at least 14 days. In many instances, *maximum* clinical improvement may not be seen until after 4 to 6 weeks of treatment. If 200 to 300 mgm. daily over 2 to 4 weeks has not produced significant improvement, further treatment is unlikely to do so.

One final point. When treatment is started with small doses of chlorpromazine, patients may complain of exacerbation of symptoms during the first few days. This is probably explained by the unaccustomed peripheral effects of the drug in the absence of adequate central effect and should be dealt with in most cases by increasing rather than by decreasing the dosage.

Any queries arising out of this announcement should be addressed to:

A perfect source of Vitamin C

RIBENA (*Syrupus Ribis Nigri B.P.C.*)
HIGH CONCENTRATION OF VITAMIN C—
REMARKABLE STABILITY

Four characteristics of Ribena make it
a perfect source of Vitamin C:

- 1 It contains a high concentration of Vitamin C—and it is very stable.
- 2 The vitamin is in its natural state. *
- 3 Ribena is very well tolerated even by sensitive stomachs. It is completely free from all cellular structure. It is suitable for infants almost from birth, for peptic ulcer cases, and for women suffering from "morning sickness"; they can take it when almost everything else increases discomfort.
- 4 In addition to its therapeutic values, it is delicious in its own right as sweet blackcurrant syrup.

* Following reports of unsatisfactory response to the therapeutic use of synthetic ascorbic acid in peptic ulcer cases, controlled tests using Ribena were instituted at various large British hospitals, with striking results. Clinical experience has also shown that in ulcerative gingivitis, the routine use of Ribena as an adjunct to local therapy has given more satisfactory results than that of the synthetic vitamin. The superiority is presumably due to the presence of other factors of the Vitamin C complex, possibly the Vitamin P, as well as mineral elements.

Therapeutic uses

Ribena is recommended for all conditions requiring Vitamin C implementation: namely, as a natural and rapid restorative from fatigue; for increasing resistance to local infection and colds; for expectant and nursing mothers; for infants from birth; for children and adolescents; in many dental conditions; in peptic ulcer cases; in fractures and wounds; in blood dyscrasias and hæmorrhagic states; in infections and fevers; and in many skin disorders.

Reports for doctors overseas

The makers of Ribena co-operated extensively with the Ministries of Food and Health during the war, a co-operation which still goes on to some extent even now. The Royal Forest Factory has attached to it a series of very fine laboratories where research into fruit juices and vitamins is conducted to an academic level, under the direction of an expert, lately in charge of the Fruit Products Section of the University of Bristol Agricultural Research Station. Reports of much of the work done are available, on application, to doctors and scientists overseas. These are likely to be of particular interest now that Ribena is being extensively exported.

Send for further information. A booklet entitled "Blackcurrant Juice in Modern Therapy: Natural Vitamin C" will be forwarded to you with pleasure; also details of a number of controlled tests made on the use of Vitamin C, if you will write to:—

Hay fever PROPHYLAXIS

Preliminary skin testing is available to determine to which pollen, or group of pollens, the patient is sensitive.

The Bencard Pollinarium, where collection of pollens for diagnosis, treatment and research is carried out.

Part of the allergen store at Park Royal where extracts and specimens of over 900 allergenic materials are available.

MANAGEMENT of hay fever is best accomplished by prophylaxis, and it is in January that "desensitisation" (hyposensitisation) courses should be begun to provide resistance during the pollen season.

The BENCARD Allergy Division

Bencard Skin Testing Solutions, enabling the physician to trace the cause of individual allergies, are supplied in standard outfits. Where sensitivity is to several pollen groups or certain individual pollens, it is a good plan to prescribe a Specific Desensitising Solution containing only extracts of three pollens. Where, however, sensitivity is mainly to grass pollens, standard Combined Pollen Vaccine (Bencard) is suitable. It is prepared for the pollens of 32 grasses, shrubs and trees (with grasses predominating) and is supplied as a complete course.

The Bencard range of pollen extracts for specific hyposensitisation is the largest in Great Britain and is set out in our Extended List of Allergens available on request.

A new colour sound film "Allergic Diseases in Man," describing the modern concept of Allergy, and skin testing and desensitisation techniques, will shortly be ready for showing to Medical Audiences.

High-speed pen recorders for medical use

SAFE—HIGH DEFINITION—NON-CLOGGING

Kelvin Hughes high-speed ink writing recorders are, by virtue of their design, perfectly safe for use in operating theatres. The ink is quick drying and does not clog, since it is immediately evacuated whenever the apparatus is switched off. Frequency responses of the recorders are very high, resulting in extremely good definition. Units can be adapted for use with existing chart tables.

Kelvin Hughes welcome enquiries from the Medical profession regarding any application of pen recording.

Radio-active wear detector brings to motorists
the biggest advance ever made in car lubrication

80% Less Engine Wear

with new BP Special Energol

'VISCO-STATIC' MOTOR OIL

UP TO 12% LOWER PETROL CONSUMPTION

Doubles the life of your engine

THIS IS WONDERFUL NEWS. You can save 80% of engine wear, cut petrol consumption and enjoy easier starting and greater reliability than ever before thought possible.

BP Special Energol is a new kind of motor oil introduced by Anglo-Iranian Oil Company for use in all four-stroke petrol engines in good condition. Tests in the laboratory and on the road prove that BP Special Energol cuts engine wear by 80% and actually doubles the life of your engine.

You also save substantially on petrol consumption — 5-10% on normal running and up to 12% on start and stop running such as a doctor does. BP Special Energol with all its advantages costs only 50% more than conventional premium oils. On petrol saving alone it more than repays the extra cost.

'Visco-static'?

BP Special Energol 'Visco-static' is quite unlike any conventional motor oil. It is as thin when cold as the lightest grade of lubricating oil at present sold. Yet it is as thick when hot as the grades normally recommended for summer use. This special property in an oil is what lubrication scientists have been striving after for many years. It means ideal lubrication at all temperatures *using only this one grade of oil* for all engines where S.A.E. grades 10W to 40 are normally recommended.

It is the reason why BP Special Energol

Radio-activity provides the proof

This picture shows a radio-active piston ring being fitted into the special wear research engine at the Sunbury Research Station of Anglo-Iranian Oil Company. When the engine is running, radio-active particles in the oil stream show the rate of engine wear while it is happening. By condensing years of wear tests into weeks, this equipment has provided exhaustive proof of the value of BP Special Energol.

not only reduces wear and petrol consumption but improves motoring performance and reliability in almost every way.

Easier starting than you have ever known

BP Special Energol flows freely even in extreme cold so that the engine will turn over more freely. Starting even in mid-winter is no more difficult than in high summer. Your battery lasts longer.

No oil starvation and less wear

Full lubrication begins from the first turn of the engine. Abrasive products on

the cylinder walls are washed away immediately. This saves an enormous amount of wear on both your piston rings and cylinder walls. BP Special Energol includes additives which give outstanding film strength, acid resisting properties and detergency.

Less oil consumption

By reducing wear, BP Special Energol also reduces oil consumption. It maintains ample viscosity for good lubrication even at the hottest parts of the engine, near the piston rings.

How to use BP Special Energol

BP Special Energol should not be mixed with conventional oils. The sump should be drained and refilled with the new oil and this should be repeated after the first 500 miles. Future oil changes should be after the normal mileage recommended by the makers of your car.

When not to use BP Special Energol

If your engine is worn and will shortly need overhauling, do not use BP Special Energol. The normal grades of BP Energol are still on sale and will help your engine to give the best possible service until it has been overhauled. Your garage manager will be glad to give advice if you are in any doubt.

BP Special Energol is obtainable at all garages where you see the BP Shield. It is coloured red for easy identification and sold in sealed packages.

SPECIAL ENERGOL 'VISCO-STATIC' MOTOR OIL IS A PRODUCT OF ANGLO-IRANIAN OIL COMPANY

'Visco-static' is a trade-mark of Anglo-Iranian Oil Company Limited

NULACIN

for successful peptic ulcer therapy

Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer

Same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

NULACIN

is available throughout the British Commonwealth, in the U.S.A. and many other countries. It is known as Nulactin in Canada and Sweden.

NEUTRALIZATION of gastric hyperacidity has long been acknowledged as the first requirement of successful peptic ulcer therapy. In the past it has only been possible to achieve this with milk-alkali drip therapy under hospital conditions.

Now NULACIN provides all the advantages of milk-alkali drip therapy without the discomfort of a tube and without inconvenience to the patient.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

NULACIN tablets are not advertised to the public and have no B.P. equivalent. May be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to pharmacists is 2/-). Also Available in tubes of 12.

NULACIN tablets are prepared from whole milk combined with dextrans and maltose, and incorporate Magnesium Trisilicate 3.5 grs.; Magnesium Oxide 2.0 grs.; Calcium Carbonate 2.0 grs.; Magnesium Carbonate 0.5 grs.; Ol. Menth. Pip. q.s.

CHEMOTHERAPY OF TUBERCULOSIS

The concurrent use of PAS salts
and Isoniazid is now fully recognized as a major therapeutic measure
against all forms of tuberculosis.

'Aminacyl' PAS Salts

'Aminacyl' PAS products, with the exception of the Granulate (Ca PAS only), are available as either Sodium PAS B.P. or as the Calcium Salt.

They include whatever commonly used forms may be prescribed in terms of physicians' choice and patients' preference—

PACKS: *Cachets* 1.5 g. 100's 500's
2.0 g. 80's 400's
Dragées 0.5 g. (plain) 250's 1,000's
0.75 g. (enteric-coated) 250's 1,000's
Bulk Powder 1 kg. 5 kg.
Granulate (Ca PAS) .400 g. 2,000 g.

'Aminacyl' B-PAS (Calcium 4-Benzoyl PAS)

This new modification of PAS has the advantage of providing therapeutic effect comparable with that of Na and Ca PAS, but with smaller dosage. Furthermore, it is completely non-toxic, and is almost completely tasteless.

PACKS: 'Aminacyl' Ca B-PAS Powder: Tins of 150 and 500 envelopes each 3.5 g.
'Aminacyl' Ca B-PAS Cachets: Tins of 80 and 400 × 1 g.
'Aminacyl' Sodium B-PAS Cachets are also available in tins of 80 and 400 × 1.5 g.

'Pasinah' combined PAS/INAH Cachets

for convenient prescription of PAS and Isoniazid concurrently
'PASINAH' Cachets each contain 1.5 g. Na PAS (Sodium p-Aminosalicylate B.P.) and 17 mg. Isonicotinic Hydrazide.

PACKS: Standard Tins of 100 and 500. Details of institutional quantities on request.

The new
improved quality

'CETAVLON'

TRADE MARK

Cetrimide B.P.

Since the original introduction and development of 'Cetavlon' some ten years ago, I.C.I. has carried out extensive research on this outstanding bactericide and detergent. This has now led to the production of an exceptionally fine grade 'Cetavlon', enhanced in purity and potency. The new quality 'Cetavlon' shows increased bactericidal activity against

a wide range of Gram-positive and Gram-negative organisms, including *Ps. pyocyanea*. Non-toxic and non-irritant, even when applied to extensive raw areas, it is eminently suitable for the treatment of burns and wounds. In cases contaminated with dirt and grease, 'Cetavlon' is of particular value, since it is also a highly effective detergent.

Literature and further information available, on request, from your nearest I.C.I. Sales Office—London, Bristol, Birmingham, Manchester, Glasgow, Edinburgh, Belfast and Dublin.

A Rubefacient

Balm with an

important

difference *

Cremalgin

(for treatment of rheumatism, fibrositis and allied complaints)

On average 100,000 prescriptions for rubefacient balms are written *monthly* — testimony enough to their efficacy.

But the cost to the Health Service is disturbing, particularly in the light of the urgent need for economy.

What then is the solution?

The answer can be found in Cremalgin, a rubefacient cream identical in formula and quality, *yet 50% less costly than the best methyl nicotinate creams currently prescribed.

This vital contribution to N.H.S.

economy is made possible by the issue of dispensing packs and by realistic costing and production methods. That the need for such an economy is foremost in the minds of the medical profession is clearly shown by the fact that no fewer than 4,000 doctors have already received samples of Cremalgin at their own request.

Methyl Nicotinate 1.0%.

Glycol Salicylate 10.0%. Histamine Dihydrochloride 0.1%.

Capsaicin 0.1%. Excipient q.s.

Wholesale chemists can now supply Cremalgin in 1 oz. dispensing tubes at 21/- per doz. and in 1 lb. dispensing jars at 19/6 per unit.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners:* £425 per annum for the first post held; £475 per annum for the second and any subsequent post held.

(ii) *Fully registered practitioners:* £425 per annum for the first post held; £475 per annum for the second post held; £525 per annum for the third and any subsequent post held.

provided that a medical practitioner who has held house posts under (i) above whilst provisionally registered shall be remunerated at the rate of £525 per annum for each post held after obtaining full registration; and provided that in exceptional circumstances, subject to the consent of the Minister (in Scotland of the Secretary of State), the rates under (ii) may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

A deduction at the rate of £125 per annum shall be made from the remuneration of House Officers in respect of board and lodging and other services provided. Each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

(Queen Square)
(The National Hospital, Queen Square, and the Hospital for Nervous Diseases, Maida Vale)

A Full-time Course in Clinical Neurology will be held at the National Hospital, Queen Square, for ten weeks beginning on January 3, 1955, consisting of lectures and demonstrations in medical neurology, anatomy and physiology of the nervous system, methods of examination, neuro-pathology and psychology. The lectures are given at 12 noon and 2 p.m. daily and arrangements can be made for students to attend these without entering for the full course. Applications should be made, in writing, to the Dean, Institute of Neurology (Queen Square), The National Hospital, Queen Square, W.C.1. (5448)

INSTITUTE OF NEUROLOGY
(Queen Square)

Two Courses of Clinical Demonstrations open to postgraduates will be held at the National Hospital, Queen Square, on Wednesdays at 4 p.m. from January 5 to March 16, 1955, inclusive, and on Saturdays at 10.30 a.m. from January 8 to March 19, 1955, inclusive. The fee for attending either of these courses is one guinea. Application for a ticket should be made to the Dean, Institute of Neurology (Queen Square), The National Hospital, Queen Square, W.C.1, and a remittance to cover the fee enclosed. Only postal applications will be considered. (5449)

ELECTROENCEPHALOGRAPHY

A Course for postgraduates in the technique and clinical application of Electroencephalography will be held jointly at the Institutes of Psychiatry and Neurology from January 3 to March 11, 1955. For further particulars apply to the Dean, Institute of Psychiatry, Maudsley Hospital, Denmark Hill, S.E.5, or the Dean, Institute of Neurology (Queen Square), The National Hospital, Queen Square, W.C.1. (5450)

EDINBURGH POSTGRADUATE BOARD FOR MEDICINE**GENERAL SURGERY**

A three months' course of postgraduate Surgery suitable for surgeons requiring a refresher course in the current outlook on general surgery or for graduates preparing to specialize in surgery, starts on March 21 and September 26, 1955. The programme has been re-organized so as to provide co-ordinated clinical and systematic instruction in general surgery wards and specialized surgical units in Edinburgh. Fee £31 10s.

MEDICAL SCIENCES

A three months' course in Applied Anatomy, Physiology, Pathology, Bacteriology and Biochemistry will begin on June 27, 1955. This course is suitable for postgraduates wishing to take the Primary Fellowship Examination, as a final preparation in these subjects. Considerable basic knowledge is highly desirable prior to taking this course. Fee £31 10s.

Two courses in the Basic Sciences (Anatomy, Physiology, Pathology, including Bacteriology) will be conducted by the Fellows of the Royal College of Surgeons and others, under the aegis of the Edinburgh Postgraduate Board for Medicine. These courses, comprising lectures and demonstrations, will begin on February 14 and October 24, 1955, and continue for ten weeks. Fee £26 5s.

INTERNAL MEDICINE

Courses lasting 12 weeks, suitable for graduates wishing a refresher course, or to specialize in Medicine, begin of March 28 and September 26, 1955. These courses consist of 320 hours' instruction, comprising lectures, clinical demonstrations and ward visits. Fee £31 10s.

Additional instruction in Clinical Paediatrics is arranged in conjunction with the course in Medicine, in which there is a small fee; the numbers are limited.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

The twenty-second fortnight Refresher Course for General Practitioners will start on May 2, 1955. Fee for graduates not claiming expenses from Government sources, 10 guineas.

Applications for enrolment should be addressed to the Director of Postgraduate Studies, Surgeons' Hall, Edinburgh, 8.

Applicants for courses, except general practitioners, should supply particulars of qualifications and postgraduate experience.

LONDON HOSPITAL MEDICAL COLLEGE**COURSES IN ADVANCED SURGERY**

An evening Postgraduate Course in Surgery for the Final Examination of the F.R.C.S. will be held at the London Hospital from March 14 to April 25, 1955. The course will be held on Monday and Wednesday evenings from 6.30 p.m. to 8.30 p.m. with the exception of Monday, April 11, and will be limited to 18 students. Applications should be made to the Dean, from whom further particulars can be obtained. The fee for external candidates will be 16 guineas and for "Old Londoners" 10 guineas.—H. B. May, M.D., F.R.C.P., The Dean, The London Hospital Medical College, Turner Street, E.1. (5447)

UNIVERSITY OF LONDON

Institute of Obstetrics and Gynaecology
(Incorporating the teaching facilities of Queen Charlotte's Maternity Hospital, Chelsea Hospital for Women and the Department of Obstetrics and Gynaecology at Hammersmith Hospital)

Applications are invited from graduates with a registrable qualification for

ENROLMENT FOR THE SPRING TERM
(March 7 to June 4, 1955)

Graduates attend each of the constituent hospitals in turn for clinical work, and attend lectures and special demonstrations at all three hospitals. Enrolment fee £3. Tuition fee £36 a term. General practitioners wishing further experience in obstetrics may be accepted to attend the course at Queen Charlotte's Maternity Hospital for shorter periods—i.e., two to four weeks. They will be allowed to do normal deliveries and will have the opportunity of attending the combined classes of lectures and demonstrations at the three hospitals of the Institute. Ministry of Health grants are payable to approved general practitioners attending for a period of two weeks. During the winter vacation, graduates may attend the practice of the hospital. Fee £1 per week. A refresher course for General Practitioners will be held from February 28 to March 5, 1955. Hostel accommodation is available at Queen Charlotte's Hospital and at Hammersmith Hospital. Further particulars can be obtained from the Secretary, Institute of Obstetrics and Gynaecology, Chelsea Hospital for Women, Dovehouse Street, London. (5480)

Educational and Lectures—contd.

Practices, Partnerships negotiated. Assistants with and without view. Trainees, Locums supplied.—25, Malden Lane, Strand, W.C.2. Telephones: TEMple Bar 9011. Night: Walton-on-Thames 1785.

The three constituents of 'Franol' combine to give effective symptomatic relief in chronic bronchitis which is so often given the diagnostic label of "asthma and bronchitis".

The theophylline and ephedrine help to control the cough by their antispasmodic action and to relax the bronchial musculature. The 'Luminal' brings undisturbed rest at night and relieves the feeling of tenseness and anxiety which often attends these conditions.
