## LUCOZADE

as an improved form of glucose therapy

Lucozade combines all the known qualities of glucose with a unique palatability. Hence its unusual versatility — as a revitalising drink, as a means of sustenance when solids cannot be tolerated, and as the ideal answer when the appetite is impaired. Lucozade will be tolerated by the most difficult patient.

Tissue-thin *Filmtab* starts to disintegrate within 30 seconds—makes **ERYTHROCIN** Stearate available for immediate absorption. Tests show Stearate form definitely protects drug from stomach acid. Patients get high inhibitory blood levels of **ERYTHROCIN** in 2 hours or less. Peak concentration is reached at 4 hours, with significant levels for 8 hours. Low in toxicity **ERYTHROCIN** is less likely to alter normal intestinal flora than most other antibiotics. **ERYTHROCIN** 100 or 200 mg. *Filmtabs* are available in bottles of 25 and 100. For little patients 60 cc. bottles of ready-to-use Oral Suspension.

to the focal point of  
soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin

not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Nicotinic acid ethyl-ester	2%
Nicotinic acid n-hexyl-ester	2%

# ADRENOXYL

(Adrenochromemonosemicarbazone)

## for medical and surgical conditions

*Clinically proven to reduce bleeding-time without effect  
on coagulation or blood pressure, and to have no undesirable side effects*

**ADRENOXYL**, a product of original research, reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillaries. Its effectiveness in diminishing blood loss has been demonstrated by clinical studies.

**ADRENOXYL** has no effect on coagulation. It neither increases nor decreases blood pressure.

**ADRENOXYL** is non-toxic, and there are no contra-indications to its use.

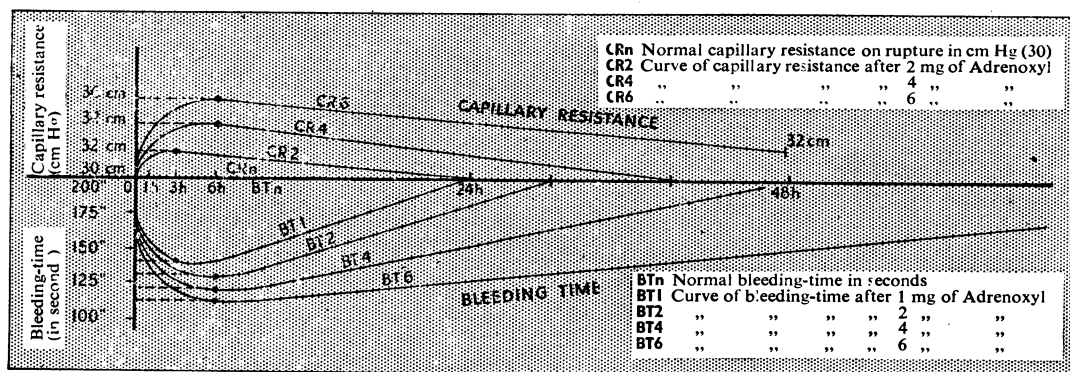

**ADRENOXYL** is indicated in the preventive and curative treatment of all types of capillary bleeding.

**ADRENOXYL** has been successfully used to diminish capillary bleeding in a wide range of surgical operations, and has proved particularly

useful in ear, nose, and throat surgery, ophthalmic surgery, thoracic surgery, gastro-intestinal surgery, plastic surgery and urogenital surgery. It has also been used successfully in many medical conditions associated with capillary haemorrhage or where capillary fragility is a feature.

**ADRENOXYL** may be administered by mouth or by subcutaneous or intramuscular injection. The oral form is for routine treatment, though when rapid action is desired the intramuscular route is recommended.

**ADRENOXYL** is now available in boxes of 6 or 50 ampoules: tubes of 25 tablets or bottles of 500 tablets.

**THERAPAS**, first synthesized in our laboratories in 1951, was introduced into tuberculosis therapy as an alternative to P.A.S. Detailed pharmacological studies have been published in this country (1), and Swiss workers have produced evidence (2) that calcium 4-benzamidosalicylate has a therapeutic action *per se*.

**Therapas** delays the emergence of streptomycin resistance. Its value in the treatment of genito-urinary tuberculosis is well established (3), (4), (5). Unlike P.A.S. (to which it is converted in the body) it has a slightly sweet, not unpleasant taste.

Effective though **Therapas** has been in these respects, it now appears from recent work (6) that it is of still greater importance. Preliminary trials have indicated that :

**Therapas**, in combination with isoniazid or streptomycin, gives satisfactory clinical and radiological results in the treatment of pulmonary tuberculosis.

**Therapas** may be effective in delaying the emergence of resistance to either isoniazid or streptomycin.

**Therapas** can be used wherever P.A.S. is indicated, and is often better tolerated.

**Dosage:** **Therapas** may be administered in daily doses of 14 G.

## B-PAS WANDER PRODUCTS

These are now in unrestricted supply to provide the significant advantages of the newest clinically proven modification of PAS, i.e. B-PAS (4-Benzoylamino-2-hydroxybenzoic acid).

Extensive published reports based on the criteria of bacteriostatic levels, patient toleration and clinical results show that B-PAS (Wander) is a major contribution to the chemotherapeutic armamentarium against tuberculosis.

Calcium B-PAS (Wander) is virtually insoluble; hence its slower absorption and excretion, and ability to provide high blood levels of extended duration, but with relatively low dosage. In contradistinction to other forms of PAS, B-PAS (Wander) is entirely free from unpleasant taste. It is thus acceptable to patients in easily taken powder form, as well as in cachets if preferred. The powder form is supplied in convenient single-dose envelopes, or in bulk in any quantity.

**PACKS**—Powder: Tins of 150 and 500 x 3.5 g. envelopes.  
Cachets: „ „ 80 and 400 x 1.0 g.

To facilitate concurrent administration of B-PAS (Wander) and INAH, this product is formulated so that 12 Cachets daily in divided dosage provides 12 g. of Calcium B-PAS (Wander) plus 300 mg. of INAH.

**PACKS**—Cachets each containing 1 g. B-PAS (Wander)  
and 25 mg. INAH: Tins of 100 and 500.

## summer hazards

The warmer months of the year provide conditions suitable for the multiplication of bacteria on contaminated food and for the spread of contamination by flies; it is then that epidemics of bacterial food poisoning, bacillary dysentery and summer diarrhoea of infants are most frequent and widespread.

The organisms commonly responsible for such epidemics are sensitive to the combined action of streptomycin and sulphaguanidine.

The use of Guanimycin will rapidly eliminate the infecting organism and reduce the number of convalescent carriers.

Because many conditions of peptic ulceration are complicated by mental stress, anxiety and nervousness, the Searle Research Laboratories have combined the anticholinergic properties of "Pro-Banthine" with the sedation of the c.n.s. of phenobarbitone in tablets containing 15 mg. of each compound.

Phenobarbitone suppresses parasympathetic stimuli at their origin while "Pro-Banthine" forms a block at the autonomic ganglia and at parasympathetic nerve endings. # for infant feeding-

# Carnation Milk

The growing volume of clinical evidence, pointing to the unusual adaptability of unsweetened Evaporated Milk in infant feeding, suggests the presentation of this synopsis, for the convenience of physicians who may wish to keep in touch with this important development.

## WHAT IT IS

1. Unsweetened Evaporated Milk is pure whole milk from tuberculin tested dairy herds. It is concentrated to approximately double richness by the evaporation of water and has nothing added except *natural* Vitamin D<sub>3</sub>.
2. It is not to be confused with sweetened condensed milk, which contains about 40% of added cane sugar.
3. Unsweetened Evaporated Milk is standardised to meet the strict Government requirements of 31% minimum total solids, of which not less than 9% must be butterfat.
4. Carnation is of a known nutritional value. It is easily reconstituted to milk of ordinary richness by the addition of water. The consistency never varies.

## HOW IT SERVES

1. The natural reaction of the proteins to heat results in a granular curd similar to that of breast milk. Digestibility is therefore suitably ensured for *all* infants. Attenuation of the whey fractions greatly benefits those infants sensitive to milk proteins.
2. Carnation is a simple full cream milk, homogenized to present butterfat in a form tolerated by most infants. The globules, 2 microns in diameter, are permanently dispersed, and form a fine emulsion when water is added. Prematures and other fat intolerant infants usually take Carnation very satisfactorily.
3. Each fluid ounce of Carnation Milk provides not less than 33 i.u.'s of Vitamin D<sub>3</sub>. Clinical survey proves this quantity adequate for prophylactic purposes. Carnation Milk is a superior source of vital calcium, phosphorus and nitrogen.
4. Carnation Milk is universally obtainable, simple to use and SAFEST in inexperienced hands because of guaranteed sterility.

Carnation Feeding Charts and reprints of clinical investigations are available to the medical profession from: Medical Department, General Milk Products Ltd., Candlewick House, 116/126, Cannon Street, London, E.C.4.

# RAUWILOID

a purified and biologically

RAUWOLFIA SERPENTINA

RAUWILOID is not the crude Rauwolfia root. Rauwiloid represents the total hypotensive activity of pure whole Rauwolfia serpentina root, freed from inert matter and the undesirable side-effects of the yohimbine type alkaloids.

RAUWILOID is not merely a single alkaloid of Rauwolfia. Rauwiloid provides the balanced action of the several potent alkaloids in Rauwolfia; reserpine, regardless of the brand name under which it is marketed, is only one of the desirable alkaloids in Rauwiloid.

RAUWILOID contains besides reserpine other active alkaloids such as Rescinnamine\* reported to be equally hypotensive but less sedative than reserpine.

## *indications*

*Rauwiloid presents Rauwolfia in its optimal form for the treatment of essential hypertension. In severe, malignant cases its greatest value lies in its ability to ameliorate the side-effects of the more potent anti-hypertensives.*

Dosage is simple—two tablets nightly.

## OBLIVON

METHYLPENTYNOL

BRITISH SCHERING LIMITED, KENSINGTON HIGH STREET, LONDON, W.8

The time and trouble involved in dealing with the psychoneurotic patient is a constantly recurring problem in general practice. Oblivon is an entirely new drug which is specific for the reduction of nervous tension and the physiological accompaniments of fear and anxiety.

Administered three times a day it has a tranquillising effect on the anxious patient, reducing the mental tension and controlling the multiple physical symptoms of which the patient complains.

Unlike the amphetamines and the barbiturates, Oblivon is an entirely safe preparation. There are no contra-indications to the use of Oblivon, and it may confidently be given even to patients with cardiac, renal or hepatic disease.

## TRAINING MADE EASIER FOR THE COLOSTOMY PATIENT

Training is the key to normal living for the colostomy patient.\* SPENCER'S new colostomy support—*individually designed, cut, and made for each patient*—makes training easier, because:

- ★ Abdominal section opens instantly by means of zippers—facilitating the change of pads.
- ★ This section is lined with moisture-proof material—easily cleaned—protects outer clothing.
- ★ Spencer's co-relation of abdominal and back support improves posture, body mechanics.
- ★ Cosmetic results are appreciated by both male and female patients.

# Exactly The mixture as before

One of the reasons for the consistently good quality of John Bull tyres is the immense amount of trouble we take to ensure that every batch of rubber we prepare contains exactly the right proportions of exactly the right ingredients. This involves the testing, by a huge laboratory staff, of all raw materials both before and during processing. The functional tread of John Bull tyres is made from a specially soft, yet amazingly tough, rubber which really GRIPS the road surface. Absence of 'dither' and skid reduces surface abrasion, thus making John Bull an extremely long-wearing, as well as a very safe, tyre.

Obtainable only from garages

**15 years of clinical opinion  
supports the use of vaginal tampons**

---

# Why an applicator?

The function of the applicator in inserting the tampon at the upper end of the vaginal tract is of the greatest importance. It eliminates any handling of the highly-compressed soft surgical cotton, and ensures comfort and steady absorption. The correct position of the internal tampon avoids contact with both anal and urethral sources of contamination. Tampax tampons are simply and hygienically inserted in correct proximity to the cervix by means of a disposable 'applicator' tube, only  $\frac{9}{16}$ " diameter. The applicator is an integral part of tamponage and, therefore, results in a definite improvement in menstrual hygiene.

Clinical experience has proved the value of combining penicillin and 'Sulphamezathine' in the treatment of many bacterial infections. Since each supplies the possible deficiencies of the other, extra protection against a wide range of organisms and an enhanced anti-bacterial effect are obtained.

The advantages of combined 'Sulphamezathine' and penicillin therapy are now available in a single and convenient formulation — 'Sulmezil'.

'Sulmezil' Tablets each contain 0.5 gramme 'Sulphamezathine' Sulphadimidine B.P. and 150,000 units of 'Dibencil' benzathine penicillin.

'Sulmezil' Oral Suspension contains the same dosage of both drugs in each fluid drachm (3.5 c.c.). Ready for use, the suspension is pleasantly flavoured, and free from the characteristic taste of either penicillin or sulphonamide. It is therefore particularly suitable for children.

#### The further advantages of 'SULMEZIL'

- ★ Especially useful in mixed infections
- ★ Resistant bacteria less likely to occur
- ★ Minimum risk of toxic side-effects
- ★ Maximum convenience

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment. The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

#### Other Grades, Whole-time

##### (a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

## MEDICAL INFORMATION OFFICER

Applications are invited from registered Medical Practitioners for appointment to the post of Medical Information Officer to a progressive Ethical Pharmaceutical Company in North-West England. Applicants should have a sound clinical background, have kept themselves up to date and maintained a knowledge of, and interest in, the basic medical sciences; experience of clinical research would be an advantage. Duties involve the provision of medical information and supervision of correspondence on medical matters, and therefore ability to write clearly, simply, and concisely is essential. The post also carries responsibility for assisting in the organization and conduct of clinical trials of the Company's products, involving personal contact with outside clinicians and hospitals.

The appointment is a permanent one carrying a salary commensurate with experience and qualifications, with membership of a contributory Pension Scheme, but in any case the commencing salary will not be less than £1,500 per annum. Applications will be dealt with in strict confidence.—Apply to Box 1744, B.M.J.

## BANK HOLIDAY, August 1, 1955

One post available for a doctor with experience in, or a leaning towards, orthopaedics.

## (b) MEDICAL OFFICERS OF HEALTH

For duties as under (a) and, in addition, to undertake the control of sanitation. They may be required to perform duties of Port Health Officer at an airport. Candidates for these posts should possess a Diploma in Public Health. A Diploma in Tropical Hygiene, though not essential, is desirable.

(c) **SLEEPING SICKNESS MEDICAL OFFICERS** Duties comprise the control of endemic and epidemic sleeping sickness by means of chemotherapy and chemoprophylaxis. Undertaking of epidemiological investigations is a routine aspect of this work and opportunities for original enquiry into the treatment and natural history of the disease are also available. The candidate should be prepared to undertake the control of other epidemic diseases as necessity arises and to interest himself in other aspects of rural health work. Duties would involve touring over a wide area.

## (d) MEDICAL OFFICER (Leprosy Service)

To tour extensively throughout the Northern Region of Nigeria, supervising and inspecting Provincial Leprosy Settlements, Segregated Villages and Treatment Centres, to carry out epidemiological investigations and treat African staff. There is opportunity of clinical research. Selected officers will assist Senior Leprosy Officer in the organization of leprosy control and in liaison with medical missions, and during Senior Leprosy Officer's absence he may be required to act as his relief.

Appointments may be made as follows: (a) On three years' probation for permanent and pensionable employment with retiring age of between 45 and 55. Pensions (which are non-contributory) are at the rate of 1/600th of final pensionable emoluments for each completed month of reckonable service. (b) From the National Health Service. Candidates may leave the National Health Service but retain their superannuation rights up to six years and receive a gratuity (taxable) of 20 per cent of the aggregate of their salary. Salaries, including pensionable expatriation pay for officers appointed under (a) or (b) range from £950 to £1,850 per annum, with prospects of advancement to posts carrying higher salaries (which may be before the officer reaches the top of the time scale, i.e., £1,850). (c) On short term contract (two tours of 18 to 24 months' duration) with inclusive salary of from £1,164 per annum, rising to £2,150 per annum; on completion of contract a (taxable) gratuity is paid at the rate of £37 10s. for each completed period of three months' service (including leave). Officers appointed under (a) or (c) are required to contribute to a widows' and orphans' pension scheme. Starting salary in all cases depends on experience and war service. Higher starting salaries are granted to doctors holding certain qualifications (F.R.C.S., M.R.C.P., D.P.H., etc.). A revision of salaries is being undertaken in Nigeria and officers selected would benefit from any increases granted. Permanent Medical Officers are eligible to be considered at any time for promotion to super-scale posts in the Northern Region of Nigeria and other territories in medical administration or, if they possess higher qualifications and suitable experience, in specialist posts. Quarters are provided at low rents. Free passages in both directions are provided for officer and his wife. Payment of the cost actually incurred on one outward and one homeward passage for each of two children under age of eighteen, subject to maximum of £75 in respect of the return journey for each child, is also granted. Income tax at low local rates. Local leave is permissible and generous home leave is granted after each tour of 18 to 24 months. The Northern Region of Nigeria has many attractions for Europeans. The climate is in the main hot and dry, and generally healthy for families. There are many recreational facilities, including riding and polo, tennis, golf and shooting, and the way of life of the 17 million Africans in the Region is interesting and often colourful. African leaders welcome the appointment of European doctors and are ready to assure them of a full career. Application forms from Director of Recruitment, Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference BCD 117/408/04). (7775)

## Registered Mental Hospital

President:

The Right Hon. The Earl of Derby, M.C.

Medical Superintendent:

W. V. Wadsworth, B.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation, the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.

ST. ANDREW'S HOSPITAL, NORTHAMPTON  
For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

**MOULTON PARK.**—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

**WANTAGE HOUSE.**—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

**BRYN-Y-NEUADD HALL.**—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

## Two weapons against Athlete's Foot

**and other fungal dermatoses**

The combined use of Mycil Ointment and Powder has proved to be highly effective in both prophylaxis and treatment of fungal dermatoses.

Mycil Ointment is formulated to ensure penetration of the active constituent, chlorphenesin, to the site of the infection.

Mycil Powder, used alone, prevents reinfection. Because of its adsorptive properties it is useful in combating the effects of excessive perspiration.

Both preparations are non-mercurial and odourless and may be used over long periods, if necessary, without adverse effects.
