**When
nourishment
is the main problem . . .**

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolyzed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

no dandruff on this comb

Reports of clinical investigations with 400 patients show SELSUN to be effective in 92 to 95% of cases of common dandruff . . . and in 81 to 87% of all cases of seborrhoeic dermatitis of the scalp. SELSUN maintains a healthy condition of the scalp, keeps it free of scales, encrustations and other epithelial debris for one to four weeks with each application. Itching and burning are usually alleviated after the first two or three applications. One of the outstanding advantages of SELSUN, from the patient's viewpoint, is its simplicity of use.

Applied and washed out while washing the hair, it requires no special treatment periods; its prolonged control usually means less frequent applications. After each use, it leaves the hair clean and with no objectionable odour. Does not discolour the hair; leaves no resistant stains on linens.

SELSUN is available in 2 and 4 fl. oz. bottles, with directions for use.

The case of *Lucilia cuprina* . . .

Ever since man first herded sheep, blowfly 'strike' has been one of the deadliest menaces to the health of the flock. Blowflies deposit their eggs on the fleece and within a few hours maggots are eating into the flesh. Unless quick action is taken a valuable animal may meet an unpleasant death.

In recent years insecticides have been used with increasing effect to prevent blowfly attacks. Today, over the vast sheep rearing areas of the South African veldt, shepherds use dieldrin to protect their flocks from the locally dominant blowfly *L. cuprina*. Dieldrin, developed by Shell, is so persistent that one spraying, harmless to the sheep, gives full protection for 3 months, or longer. Grubs hatching from eggs laid on the fleece die before they can penetrate the skin.

Where dieldrin guards the flock, the constant watch for blowfly is unnecessary, and a major source of loss to the sheep farmer is eliminated.

Dieldrin is one of the newer Shell insecticides, effective against a very wide range of insect pests which attack crops or spread disease. Its exceptional persistence, surer kill and lower dosages are now in the service of agriculture and public health throughout the world.

Aldrin — another recent Shell development — is fast becoming recognised as the best of all insecticides for the control of pests in the soil.

Is there an urgent pest problem in your area?

DI-SIPIDIN

for NOCTURNAL ENURESIS

During the past twenty-five years Di-sipidin has become widely recognised in the treatment of diabetes insipidus and now, recently published clinical trials have pointed to its value in the control of certain adolescent and adult cases of nocturnal enuresis. Di-sipidin is a standardised preparation of the posterior lobe of the pituitary gland, specially made for use by nasal insufflation.

Drip therapy without a tube

NULACIN

In the past, the successful treatment of many cases of peptic ulceration demanded hospital conditions. Now, by means of Nulacin Tablets, it is possible to control gastric hyperacidity without any inconvenience to the patient. By using Nulacin Tablets as directed, an ambulant patient can obtain all the advantages of intragastric milk-alkali drip therapy.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

EXAMINATION, DIAGNOSIS, TREATMENT

Tyres — any tyres — must be expected to deteriorate in performance as their life draws to its close, and regular examination can help to avoid a sudden, if not untimely, end.

If, upon examination, you diagnose old age (recognizable by baldness of the crown, coupled with a propensity for letting things slide) we suggest new John Bull tyres as the very best treatment.

ACTIVE INGREDIENTS:-
 Acid. Benz. 4.820%
 Acid. Salicyl. 3.018%
 Benzalkonium Chloride .050%
 Cetyl Pyridinium Chloride .050%

SUBLAMIN has the following advantages:

The excipient evaporates quickly, leaving the therapeutic substances, in finely particulate form, in intimate contact with the affected areas. In consequence, the maximum destructive effect on the invading fungus is rapidly achieved. Being non-greasy SUBLAMIN obviates the need for dressings and will not promote the growth of secondary infective organisms. Its application is extremely simple.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

**HER MAJESTY'S OVERSEA CIVIL SERVICE
Medical Branch, Kenya**

Vacancies exist for **MEDICAL OFFICERS** for general duties in the Medical Department of Kenya. A vacancy also exists for a Medical Officer interested in parasitology. Successful candidates may be posted to any station in Kenya. During the earlier years of service an officer will be expected to carry out general medical and surgical duties, including a varying amount of public health administration. In most stations, even if remote from the larger towns, it is possible for an officer to maintain interest in any particular branch of medicine or surgery to which he is attracted. As far as possible the interests of an officer are considered when postings are made. The work of every medical officer is based on a hospital which may vary in size and facilities from a small district hospital meeting the needs of a comparatively primitive community to a large and modern provincial hospital. Appointments can be made on a permanent basis with pension (non-contributory) at age of 55, or on short-term contract with gratuity payable on satisfactory completion of service. Salary ranges from £1,116 to £1,836 a year; starting point is determined by experience, and four extra increments are given to successful candidates possessing the M.R.C.P., D.P.H., or other approved higher qualifications. Temporary cost-of-living allowance at the rate of 10 per cent of salary is also payable, subject to a maximum of £162 a year, making gross emoluments of £1,228 to £1,998 a year. Permanent Medical Officers are eligible to be considered at any time for promotion to super-scale posts in Kenya and other territories in medical administration or, if they possess higher qualifications and suitable experience, in specialist posts. Quarters are generally available at rental of 10 per cent of salary. Free passages in both directions for officer and wife, and up to cost of one adult fare for children. Taxation at local rates. Annual local leave permissible, and generous home leave granted after each tour of from 40 to 48 months. Education facilities are available. Candidates must possess medical qualification registrable in the United Kingdom and at least one year's post-graduate hospital experience. Application forms from Director of Recruitment, Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting Reference BCD 117/7/02).

RAUWILOID

a purified and biologically
tested extract of
RAUWOLFIA SERPENTINA

RAUWILOID is not the crude *Rauwolfia* root. Rauwiloid represents the total hypotensive activity of pure whole *Rauwolfia serpentina* root, freed from inert matter and the undesirable side-effects of the yohimbine type alkaloids.

RAUWILOID is not merely a single alkaloid of *Rauwolfia*. Rauwiloid provides the balanced action of the several potent alkaloids in *Rauwolfia*; reserpine, regardless of the brand name under which it is marketed, is only one of the desirable alkaloids in Rauwiloid.

RAUWILOID contains besides reserpine other active alkaloids such as Rescinnamine* reported to be equally hypotensive but less sedative than reserpine.

indications

Rauwiloid presents Rauwolfia in its optimal form for the treatment of essential hypertension. In a severe, malignant cases its greatest value lies in its ability to ameliorate the side-effects of the more potent anti-hypertensives.

Dosage is simple—two tablets nightly.
