St Ivel stimulates the appetite

St. Ivel is a delicious cheese and has an immediate appeal to jaded appetites. The skill of the cheese-maker together with scientific control of manufacture have been used to produce a cheese which activates and stimulates the complex psychological and physiological mechanisms associated with appetite, deglutition, and digestion.

It is a valuable food to include in the diet after an oral course of antibiotics or the sulpha drugs.

Q1

CONFINE D to 'C.B.' again?

For some youngsters "confined to bed" is all too common a sentence at this time of year. Yet the period of convalescence can be shortened, often considerably, by a *reconstructive* tonic such as Minadex. By replenishing the blood's reserves of iron and by ensuring an adequate intake of protective vitamins A and D, Minadex staves off fatigue and fortifies resistance to infection through the *natural* mechanisms. And the cost per patient? On average, about 2d. per day.

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin

not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

ADRENOXYL

(Adrenochromemonosemicarbazone)

for medical and surgical conditions

*Clinically proven to reduce bleeding-time without effect
on coagulation or blood pressure, and to have no undesirable side effects*

ADRENOXYL, a product of original research, reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillaries. Its effectiveness in diminishing blood loss has been demonstrated by clinical studies.

ADRENOXYL has no effect on coagulation. It neither increases nor decreases blood pressure.

ADRENOXYL is non-toxic, and there are no contra-indications to its use.

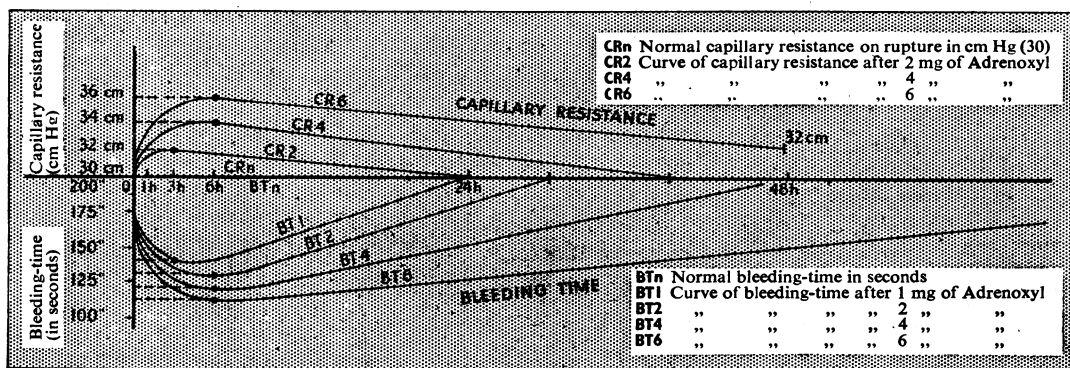

ADRENOXYL is indicated in the preventive and curative treatment of all types of capillary bleeding.

ADRENOXYL has been successfully used to diminish capillary bleeding in a wide range of surgical operations, and has proved particularly

useful in ear, nose, and throat surgery, ophthalmic surgery, thoracic surgery, gastro-intestinal surgery, plastic surgery and urogenital surgery. It has also been used successfully in many medical conditions associated with capillary haemorrhage or where capillary fragility is a feature.

ADRENOXYL may be administered by mouth or by subcutaneous or intramuscular injection. The oral form is for routine treatment, though when rapid action is desired the intramuscular route is recommended.

ADRENOXYL is now available in boxes of 6 or 50 ampoules: tubes of 25 tablets or bottles of 500 tablets.

This graph gives evidence of the effect of Adrenoxyl on capillary resistance and bleeding-time

LIL-LETS

the new vaginal tampon without applicator

A tampon which has been successfully marketed on the Continent during the last five years has now become widely accepted in this country under the name LIL-LETS.

Following extensive clinical trials, LIL-LETS have won the support of leading gynæcological opinion. Samples will be sent to medical practitioners on request.

LIL-LETS have these main advantages:

LIL-LETS need no applicator. By inserting the tampon with the fingers, the risk of bruising is eliminated.

LIL-LETS assist personal hygiene. At 1/6 for 10 they are so much cheaper than other leading tampons that women will be encouraged to change them often. They are easily carried about and easily disposed of.

LIL-LETS are highly absorbent. They absorb almost ten times their own weight in moisture and swell sideways, not lengthways. They are, therefore, really safe.

LIL-LETS are individually wrapped. Each tampon is sealed in a transparent cover. There is no risk of soiling or infection when it is carried loose.

To the epileptic child, 'Mysoline' therapy brings new-found confidence and alertness, by completely controlling the attacks, or by sharply reducing their frequency and severity, *without* causing undesirable hypnotic effects during established treatment. A further notable feature of this new anticonvulsant is that treatment with it is very often followed by a marked improvement in general behaviour and sociability.

Combining high efficacy with low toxicity, 'Mysoline' is of outstanding value in grand mal and psychomotor epilepsy. Some workers have also reported substantial or complete control of attacks in many cases of petit mal.

On the wall of St. Dunstan-in-the-West in Fleet Street is the first clock showing minutes ever to be made. It was also the first clock to have two dials. It was made in 1671.

**CLOCKWORK REGULARITY.**

Normal bowel action is a fine thing to possess. It is, perhaps, the most sought after talisman against ill-health in the world. No wonder, then, if its temporary suspension leads from a mild despondency even to black despair. But in such a crisis panic measures are to be avoided—the taking of harsh purgatives eschewed.

Success in the restoration of the much-cherished habit lies in the regular persuasive stimulus of soft bulk—such as is provided by 'PETROLAGAR.' Gently and unobtrusively, 'PETROLAGAR' arranges for normal physiological evacuations and secures the return of 'clockwork regularity.'

PHYSIOLOGIC REHABILITATION OF THE CONSTIPATED BOWEL

SIX QUESTIONS ON SENOKOT

Q. — *What are the particular properties of Senokot?*

A. — Senokot is the first preparation of senna which contains the total active principles of the pod. It is standardised for laxative activity (through biological and chemical assays) and, being a dry preparation, remains stable.

The Granules contain cocoa, malt and sugar and are delicious to take plain or as a drink. The Tablets are unflavoured.

Q. — *Why is Senokot better than B.P. preparations of senna?*

A. — With B.P. preparations, a considerable amount of the activity present in the pods is lost in the extraction. Moreover, B.P. liquid preparations vary greatly in potency and deteriorate on storage.

Q. — *How does Senokot work?*

A. — The senna glycosides (active ingredients) are absorbed from the small intestine into the bloodstream and are partly excreted into the large intestine. Here they are acted upon by B. Coli enzymes, and the resulting substances stimulate peristalsis through a neuro-muscular action on the lower bowel.

Q. — *Why is Senokot referred to as a "natural laxative"?*

A. — Because Senokot provides "a good imitation of normal defaecation" (*Lancet*, 1952, 1,655). Its action is very similar to that of the natural mechanism.

Q. — *Why is Senokot preferable to salines and liquid paraffin?*

A. — Senokot neither disturbs the digestive processes of the small intestine nor upsets the chemistry or functions of the lower bowel. This is in sharp contrast to the action of salines, which absorb water from the system, and that of liquid paraffin, which encourages faulty habits and washes out fat soluble vitamins. A possible carcinogenic effect of liquid paraffin has recently been described. (*Brit. J. Cancer*, 1954, 8,231).

Q. — *Why is Senokot prescribed for chronic constipation?*

A. — When the dose required for a normal bowel action is taken regularly, a natural rhythm is established. The dose can then be gradually reduced and finally discontinued. That is why Senokot has gained its reputation as a "valuable ally in the treatment of chronic constipation" (*Practitioner*, 1953, 170,266).

Senokot is reserved exclusively for professional use

The combined use of Mycil Ointment and Powder has proved to be highly effective in both prophylaxis and treatment of fungal dermatoses.

Mycil Ointment is formulated to ensure penetration of the active constituent, chlorphenesin, to the site of the infection.

Mycil Powder, used alone, prevents reinfection. Because of its adsorptive properties it is useful in combating the effects of excessive perspiration.

Both preparations are non-mercurial and odourless and may be used over long periods, if necessary, without adverse effects.

RAUWOLFIA SERPENTINA

RAUWILOID is not the crude Rauwolfia root. Rauwiloid represents the total hypotensive activity of pure whole Rauwolfia serpentina root, freed from inert matter and the undesirable side-effects of the yohimbine type alkaloids.

RAUWILOID is not merely a single alkaloid of Rauwolfia. Rauwiloid provides the balanced action of the several potent alkaloids in Rauwolfia; reserpine, regardless of the brand name under which it is marketed, is only one of the desirable alkaloids in Rauwiloid.

RAUWILOID contains besides reserpine other active alkaloids such as Rescinnamine* reported to be equally hypotensive but less sedative than reserpine.

indications

Rauwiloid presents Rauwolfia in its optimal form for the treatment of essential hypertension. In severe, malignant cases its greatest value lies in its ability to ameliorate the side-effects of the more potent anti-hypertensives.

Dosage is simple—two tablets nightly.

STRAINED AND HOMOGENISED MEATS, FRUITS AND VEGETABLES—IN GLASS JARS

Weaning is always a perplexing process for the mother. *What* to give is comparatively simple. *How* to give it—or more important still, how to prepare it—is more difficult because of the small quantities involved and the need for strict hygiene. Spoonfoods are the solution to this problem. Many varieties are available and they are packed in convenient quantities in glass jars. The jars are sealed and sterilised, so ensuring very high protection. Because the foods are packed in glass jars, they are likely to overcome the objections which so many mothers have to “tinned foods” for babies.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment. The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consulant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

ST. ANDREW'S HOSPITAL, NORTHAMPTON

For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

CHESHIRE

Registered Mental Hospital

President:

The Right Hon. The Earl of Derby, M.C.

Medical Superintendent:

W. V. Wadsworth, B.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation, the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.

NERVOUS DISORDERS

The vitamins of the B complex are known to be of importance in maintaining the health of the human nervous system. While severe cases of vitamin B deficiency resulting in nervous disease are not commonly encountered in this country, minor nervous disorders may arise from a prolonged shortage.

As a source of the B vitamins that can easily be administered regularly, Marmite yeast extract has been found to be particularly useful.
