Cecil & Loeb's Medicine

By 172 American Authorities. Edited by RUSSELL L. CECIL, Professor of Clinical Medicine Emeritus, Cornell University; and ROBERT F. LOEB, Bard Professor of Medicine, Columbia University. 1,780 pages, 201 illustrations.

With a copy of the new (9th) edition of "Cecil and Loeb" on your desk you can be confident you have at hand the most up-to-date, complete, authoritative and useful one-volume reference book on medicine in the English language. This famous book has been drastically revised to bring it absolutely up to the minute, with scarcely a discussion not rewritten and improved.

Over 800 diseases are completely discussed as to ætiology, recognition, pathological physiology, examination methods, tests, diagnosis, prevention, prognosis and treatment. It reflects the very latest practices and concepts of modern medicine.

DEFICIENCY

ANAEMIA

FERROUS GLUCONATE has been shown to be more effective than ferrous sulphate in restoring a normal blood picture and is much less liable to cause side effects especially in the gastro-intestinal tract.

FERLUCON

..... (Irish J. Med. Sci. July 1954) showed that 50% of cases of hypochromic anaemia of pregnancy could not tolerate ferrous sulphate because of nausea. Intolerance to ferrous gluconate, however, occurred in only 10%. Comparing the haematological response to the two haematinics these authors found ferrous gluconate to be the better by some 30% to 40%.

FERLUCON ELIXIR is particularly suitable for children and infants, and extensive laboratory investigations have confirmed its high stability. Numerous cases of fatal accidental poisoning of children with ferrous sulphate have been reported. Enquiries instituted have so far failed to bring to light any cases of such poisoning with ferrous gluconate.

Usy hands need not suffer if you look after them with Crookes Hand Cream-rich, penetrating and ideal for counteracting the effect of soaps, detergents and the inevitable "overwashing" of hands. Most economical in use, the cream should be massaged well into the skin to soften and feed the nails and cuticles.

Crookes Hand Lotion - complementary to the Cream — is ideal for those who prefer a slightly less greasy preparation.

Both Crookes Hand Cream and Hand Lotion contain hexachlorophene, a new substance which combats micro-organisms of the skin bacterial flora, yet is bland and harmless to the skin tissue itself.

'Tried and trusted' is indeed an apt epithet for the Silver Salts. Over the years, they have been prescribed with confidence in a broad range of nasal infections . . . and this trust has been well founded, for recent research has proved beyond doubt that these salts exert their antiseptic action without damage to the ciliated mucous membrane. ARGOTONE Nasal Drops present silver vitellin in company with ephedrine hydrochloride, and thus serve a dual purpose: they disinfect and decongest the nasal passages. They reduce the swollen mucous membranes and restore permeability to the nasal sinuses. There is a wide scope for ARGOTONE Nasal Drops in the coming months of "peak infection."

The distress caused by the piercing, stabbing pains of neuralgia is quickly relieved by the rapid, smooth, analgesic action of HYPON TABLETS, enabling the practitioner to prescribe a safe means of meeting the patient's need. Menstrual pain is also effectively alleviated. Where the cause of distress is of a more chronic nature, as in

rapid relief of pain

effects of prolonged medication with codeine and salicylic therapy are eliminated by the inclusion in the formula of caffeine and phenolphthalein. HYPON TABLETS are already widely prescribed by members of the profession for their speedy and safe action with the almost complete elimination of gastric upset. Parallel with the relief from pain, febrile states are effectively reduced in conditions such as rheumatism and sciatica, the adverse influenza, coryza and tonsillitis.

Growing, recognition of the long-term cumulative toxic effects of barbiturates, and the well-known, insidious, psychic habituation to their use—matters of considerable concern to many Doctors—are now avoidable dangers through the formulation of Noctynol Tablets. The latter present:

MEPHENESIN, which, by diminishing reflex hyperexcitability, relieving nervous tension and anxiety, and promoting muscular relaxation, not only induces the composure essential to the onset of sleep, but also ensures that the sleep is restful and refreshing.

CARBROMAL and BROMVALETONE which, by synergism, act as effective hypnotics and quickly transform the mephenesin-induced sedation to hypnosis. Unlike the barbiturates, carbromal and bromvaletone are non-toxic and non-cumulative and, as elimination is comparatively rapid, they rarely give rise to 'hangover' and depression.

in smaller doses, NOCTYNOL Tablets act as a non-depressant calmative eminently suitable for daytime sedation.

In epilepsy, 'Mysoline' can maintain full control of the attacks. Internationally considered as a major advance in treatment, it enables patients to enjoy normal activity in a safe and healthy environment. For this reason 'Mysoline' can often be used with advantage in cases already controlled by other drugs, but in which a heightened interest and improvement in performance is desirable.

Advantages: * Active in all the manifestations of epilepsy especially grand mal and psychomotor.

★ Low toxicity.

* Usually free from hypnotic effect when treatment is established.

★ Beneficial effect on mental outlook and general well-being of patient.

Volume II

23rd Edition

The second volume of the Extra Pharmacopæia supplements the information in the first volume published in 1952, the two volumes forming a comprehensive work of reference on materia medica and allied subjects. The whole book has been revised, rewritten and reset. It has been compiled for general practitioners in pharmacy and medicine, for specialists and experts engaged in associated activities, for research workers and for students. The sections dealing with the analysis of drugs, clinical biochemistry, and bacteriological notes have been extended.

A descriptive Leaflet is available.

To-day, the new diabetic has many facilities to enable him to lead and enjoy a normal life. The introduction of I.Z.S. (Insulin Zinc Suspension) A.B. has greatly simplified the treatment of the majority of cases, one injection being sufficient to control the blood-sugar level for 24 hours.

I.Z.S. offers the following advantages over other prolonged action insulin preparations:—

- 1. No protein or peptide material present other than insulin itself.
- 2. Rapid onset with prolonged action.
- 3. It meets the needs of a higher percentage of diabetics.

I.Z.S. (Insulin Zinc Suspension) A.B. is supplied in vials of 10 c.c. containing 40 or 80 units per c.c.

PHENYLINDANEDIONE (DUNCAN)

By retarding prothrombin production, Phenylindanedione prolongs blood coagulation time. Extension of any thrombus formed is prevented, and clot elimination facilitated.

Superior to other anti-coagulants, Phenylindanedione readily maintains a therapeutic prothrombin level, its rapid action and excretion minimising accumulation and individual susceptibility.

Except in cases of hepatic or renal damage, risk of haemorrhage, or concurrently with salicylate, Phenylindanedione is indicated for thrombosis, embolism and thrombophlebitis.

Containers of 25, 100 and 500 scored tablets of 50 mg.

Scrupulous care of the eyes is of vital importance at every age
if the gift of sight is to be preserved to the end of life's span. If
infection should strike, it must be countered promptly . . . safely
. . . decisively. How imperative then is the right choice of therapy.

To-day, for a wide variety of ocular infections, Achromycin
tetracycline provides the safe and logical treatment. While the
antibiotic is wholly innocuous to the most delicate tissues, it is
swiftly lethal to the invading organisms. Local measures with
Achromycin Ophthalmic Ointment or Ophthalmic Powder
Sterilized are often fully adequate; in severe cases, topical
therapy is wisely reinforced by systemic treatment with one of
the oral forms of the drug.

On the dearth of Immortals

"O, King, live for ever!" the people cry. But under present imperfect arrangements even kings never quite manage to bring this off. The people's chances aren't too bright, either. Crown and sceptre, umbrella and briefcase, all have to be laid aside in time.

The analogy is not exact. National revenues, after all, go on. Private revenues are apt to dwindle and stop... Unless the breadwinner pauses in his breadwinning to think: to think ahead to the day when, incredibly but inevitably, someone else will be going through the papers in his writing desk, his deed box,

his office drawer marked "Private". To find what? With luck, a safeguard for the years to come. An assurance not only of capital today, but income tomorrow.

But seriously and urgently -

The SAFEGUARD POLICY means continuing security for your dependants when you are no longer on hand to see it. It means material comfort for them in the future; spiritual comfort for you in the present.

And all for a small additional premium to either Endowment or Whole Life Assurance.

Full particulars with illustrations of how the SAFEGUARD POLICY works, may be had in exchange for the date of your birth from

A distinguished arrival from France—

NORMANDIN COGNAC

TRADITION

LIQUEUR BRANDY

To everyone who appreciates rare quality, the arrival in this country of TRADITION Liqueur Brandy is important news. So named because it is especially blended by E. Normandin et Cie. to suit the traditional English preference for a pale, dry Cognac, TRADITION owes nothing to artifice. It derives its superb clean flavour wholly and solely from grapes grown at Chateauneuf, in the heart of the Cognac region, while its delicate amber colour is its natural inheritance from the oaken casks in which the years have mellowed it. Ask your Wine Merchant to tell you more about TRADITION -- to be informed about it is to enjoy it all the more.

TRADITION Cognac Liqueur Brandy Bottles: 57/6 each Half-Bottles: 29/3 each

FOR A SPLENDID 3-STAR LOREL Although TRADITION is not inexpensive, you can with an easy conscience spend on it what you sensibly save on LOREL an uncommonly excellent pure French Brandy which costs only 37/6 a bottle.

Perfect for Brandies-and-sodas.

TWO ORIGINALS—it is a bold claim! Yet consider the facts—one a Smoking Mixture which combines the rarest Yenidje with choicest Virginian;

another a Virginia Tobacco whose added touch of genius is a touch of finest cigar leaf. The surnames of both are the same—Balkan Sobranie. In the one or the other of these two famous brands is the final answer to present discontents and a friendship that will last a lifetime. Neither may be everybody's choice—the House of Sobranie is well content in a mass market world to continue to provide selective smoking pleasure for the discriminating few.

The Mastery of Midwifery is designed to give evidence of intensive study and practical experience in Ante-natal Care, Midwifery, and Infant Welfare and their relation to Hygiene and Preventive Medicine. The possession of this Diploma will prove of value in private practice and also to candidates for appointments involving the special work described in the preceding paragraph. The tests imposed are stringent: the Examination, written, oral, and clinical, demands thorough and detailed knowledge gained by practice experience, and constitutes a definite endeavour to combat Maternal and Infant Mortality. Examinations are held twice yearly, in the months of May and November. Regulations and forms of application for admission to the Examination may be obtained from the Registrar, the Society of Apothecaries, Black Friars' Lane, E.C.4.

In the severer forms of HYPERTENSION

RAUWILOID + VERILOID

RAUWILOID + VERILOID is a striking example of drug complementation. It combines in one tablet 1 mg. of 'Rauwiloid' brand alkaloid hydrochlorides of Rauwolfia serpentina and 3 mg. 'Veriloid' brand alkaloids of Veratrum viride. 'Rauwiloid', by widening the margin between the effective therapeutic dose of 'Veriloid' and that producing side actions, enables satisfactory hypotensive doses of 'Veriloid' to be given to most patients. The combination is ideal for relieving the symptoms of moderate to severe hypertension. It is effective, safe, produces a minimum of discomfort to the patient and exerts a prolonged antihypertensive action.

"The addition of 'Rauwiloid' makes 'Veriloid' easy to administer, more effective and practically does away with unpleasant side reactions'.
