SPECIFIC DESENSITISATION

is the key to ALLERGY TREATMENT

A remarkably high proportion of allergic conditions — especially those of complicated aetiology in which it is essential to track down the offending allergens — can be successfully treated with Bencard Desensitising Solutions.

The careful recording of the patient's case history, confirmed by the use of Bencard Skin Testing Solutions, enables the physician to prescribe accurately the correct desensitising solution. This method has been found to produce lasting benefit in 75% of those patients receiving only one course, and up to 95% including those who need a second or third course.

Desensitisation removes the cause of symptoms and is not merely palliative.

The Bencard Allergy Division has available a range of over 900 allergenic extracts for Skin Testing and the preparation of Specific Desensitising Solutions.

THE LATEST FILM ON ALLERGY

"ALLERGIC DISEASES IN MAN" a 16 mm. colour and sound film (800 ft.) is now available for showing to Medical audiences. It describes the latest conceptions of allergy and the Bencard Methods of diagnosis and treatment.

In many areas we can offer our own projector and operator.

Who's next?

Another rheumatic sufferer?

It is fortunate that an effective adjuvant in the treatment of this disease is available, bringing the patient prompt and effective relief from pain.

The value of salicylate in rheumatic disorders has long been recognised, but until recently its use was restricted by the toxic effects accompanying the necessarily high dosage.

In Berex, the combination of acetylsalicylic acid and calcium succinate enables toleration of massive aspirin dosage without lowering the prothrombin level, with encouragement of tissue respiration, and with less gastric disturbance.

BEREX has never been advertised to the public

SUMMARY OF STUDY ON SUCCINATE-SALICYLATE THERAPY*

A succinate-salicylate combination was found superior to acetylsalicylic acid in rheumatic states both on grounds of therapeutic efficacy and lower toxicity. Adequate amounts of the former could be administered with more lasting effect and with fewer and milder side effects. Furthermore, succinate-salicylate affects the disease process itself, as well as relieving painful symptoms and does not abnormally increase prothrombin time even after prolonged dosage.

Reliable ORAL Penicillin

• • • • • In 'DISTAQUAINE' V★ TABLETS, DC(B)L introduce a new *acid-stable* form of penicillin which, for the first time, puts oral penicillin therapy on a firm basis comparable with parenteral administration.

Unaffected by the gastric acid of the individual patient, the new preparation produces consistent and reliable blood levels and thus extends significantly the use of oral penicillin therapy to a large number of serious infections.

★ *Phenoxyethylpenicillin*

The solid line indicates the effect when 'Distaquaine' V tablets are taken before meals: the dotted line, when they are taken after meals: the three curves in each case represent the effect of 1, 2 & 4 tablets respectively.

'DISTAQUAINE' V TABLETS offer the following advantages over existing oral penicillin preparations:

- ★ UNAFFECTED BY GASTRIC ACIDITY
- ★ BETTER ABSORBED
- ★ CONSISTENT AND PROLONGED BLOOD LEVELS

to the focal point of
 soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

NULACIN

In the past, the successful treatment of many cases of peptic ulceration demanded hospital conditions. Now, by means of Nulacin Tablets, it is possible to control gastric hyperacidity without any inconvenience to the patient. By using Nulacin Tablets as directed, an ambulant patient can obtain all the advantages of intragastric milk-alkali drip therapy.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

To lessen the fear of mutilation . . . arrange for Prosthesis before mastectomy

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

'Edrisal'

THE DUAL-ACTION ANALGESIC

is an unsportsmanlike preparation that combats pain in a thoroughly unscrupulous manner. While seeming to play fair by presenting a front of reputable analgesics, aspirin and phenacetin, 'Edrisal' kicks the feet from under pain with the antidepressant 'Benzedrine'.

'Edrisal' is of particular value in 'rheumatic' pains, which frequently have their origin in emotional disturbances.

The dose is 2 tablets every 3 hours (more than 6 to 8 will not normally be required in 24 hours).

Each 'Edrisal' Tablet contains :

Amphetamine ('Benzedrine') sulphate - 2.5 mg.

Acetylsalicylic acid - 160 mg.

Blessed sight

Scrupulous care of the eyes is of vital importance *at every age* if the gift of sight is to be preserved to the end of life's span. If infection should strike, it must be countered promptly . . . safely . . . decisively. How imperative then is the right choice of therapy.

To-day, for a wide variety of ocular infections, ACHROMYCIN tetracycline provides the safe and logical treatment. While the antibiotic is wholly innocuous to the most delicate tissues, it is swiftly lethal to the invading organisms. Local measures with ACHROMYCIN Ophthalmic Ointment or Ophthalmic Powder Sterilized are often fully adequate; in severe cases, topical therapy is wisely reinforced by systemic treatment with one of the oral forms of the drug.

Psychosomatic or somatopsychic?

The influence of emotional and physical strain in provoking a wide range of psychosomatic manifestations is well known to every medical practitioner. Indeed, the incidence of these disturbances has recently been rated as high as 15% in rural and 25% in urban practice.¹

No one would dispute the fundamental importance of simple psychotherapy which the family doctor is so well placed to dispense; yet he, himself, recognises the need for a more material adjunct, a tonic and restorative which will assist the nervous system as well as the organism as a whole. Sanatogen is an active nutrient tonic, and the choice of many physicians in such circumstances.

Conversely, the considerable effect of the general bodily health on the psyche merits consideration. That the mental outlook may be adversely affected by a poor nutritional state has long been recognised. Here again, the merits of Sanatogen as a high protein tonic nutrient are apparent.

Sanatogen is a protein-glycerophosphate complex; 95% casein rich in essential amino-acids; 5% sodium glycerophosphate, yielding most readily assimilable phosphorus. Because of its high nutrient value and accepted tonic and restorative effects on the entire nervous system, it is of signal value in all forms of physical and mental debility.

There is half-a-century of clinical confirmation of the successful prescription of Sanatogen in all types of asthenia and psychasthenia.

steady now

The ability of ARTANE to steady the hand and brighten the mind in Parkinsonism has been amply evidenced in hospital and general practice. ARTANE exerts a marked antispasmodic effect which relaxes spastic muscles and, indirectly, aids co-ordination. At the same time, it produces a mild cerebral stimulation and so combats the depression so characteristic of Parkinsonism. It decreases sialorrhoea with little or no accompanying oral dryness. Its low toxicity and relative freedom from side-reactions make ARTANE eminently safe for young and old, the ambulatory and the infirm, the hypertensive, the cardiac and the nephritic.

BARBITURATE AND MORPHINE ANTAGONISTS

*new products***MEGIMIDE** *β -ethyl- β -methylglutarimide***and****DAPTAZOLE***2:4-Diamino-5-phenylthiazole hydrochloride*

in Barbiturate Poisoning "MEGIMIDE" is "a barbiturate antagonist of real clinical worth. To omit to use it in the treatment of barbiturate poisoning is to run the risk of the broncho-pneumonia that is so often fatal in these cases." (*Lancet*, 1955, *i*, 181.)

"DAPTAZOLE," itself a weak barbiturate antagonist, enhances the action of "Megimide."

"Megimide" and "Daptazole" administered together intravenously ensure safe, quick recovery from barbiturate intoxication without the risk of convulsions and secondary depression which often follow the use of other central analeptics.

in Morphine Administration "DAPTAZOLE," the new morphine antagonist, has recently been shown (*Brit. Med. J.*, 1955, *i*, 1367) to remove the risk of respiratory depression associated with high morphine dosage and to make tolerance or addiction unlikely.

"Daptazole" relieves respiratory depression by increasing the depth of respiration, while in some cases the vomiting and, in most cases, the constipation associated with morphine are also relieved.

in Barbiturate Anaesthesia "MEGIMIDE" is of value to lighten or terminate the anaesthesia of patients under the influence of barbituric anaesthetics.

THIS WOMAN is six months pregnant; her haemoglobin concentration is low. It is important that she should not be anaemic at term, yet time is not on her side. There may be a delay of up to four weeks before any response is shown to oral iron therapy; and progress thereafter may not be rapid enough to secure a normal haemoglobin value in the time that remains.

A CLEAR CASE FOR 'IMFERON', new iron preparation for intramuscular injection. 'Imferon' can be relied upon to restore the haemoglobin concentration to normal levels in from 4 to 7 weeks.

Urtication by switching with the common stinging nettle appears to have been an old Roman custom. When Julius Caesar landed, his soldiers had with them nettle seeds which they sowed for their own use as an epidermal stimulant and counter-irritant, to relieve stiffness and rheumatism caused by the already then notorious British climate.

Over four years' usage in general medical practice throughout the world has established Chloromycetin* as today's foremost broad spectrum antibiotic. Among the significant advantages that have placed Chloromycetin in this unrivalled position are its rapidity and effectiveness of absorption, swift consistent response, outstanding tissue diffusibility plus a remarkable flexibility of treatment to meet varying clinical conditions. Development of resistance to Chloromycetin by the common pathogens is extremely rare and the facility with which it is absorbed accounts for the low incidence of gastro-intestinal upset.

ASPIRIN INTOLERANCE IN RHEUMATOID ARTHRITIS

BUFFERIN- THE NEW BETTER TOLERATED ANALGESIC

**MOST SUCCESSFUL
ANSWER
YET DISCOVERED**

**BUFFERIN FAR
BETTER TOLERATED
BY ARTHRITICS**

**ACTS TWICE AS
QUICKLY AS ASPIRIN**

**NO EQUIVALENT
IN BRITISH
PHARMACOPOEIA**

Following last year's report¹ by the Joint Committee of the Medical Research Council and Nuffield Foundation, many practitioners have returned to aspirin therapy in place of cortisone. Effective therapy with aspirin and similar salicylates unfortunately has been hampered by the problem of gastric irritation, which affects as many as 42% of arthritic patients. Bufferin, the new analgesic which reduces gastric intolerance to a negligible minimum, is the most successful answer to the problem yet discovered.

Bufferin combines acetylsalicylic acid with the antacids aluminium glycinate and magnesium carbonate (gentle buffering acids which do not produce "acid rebound"), and is well tolerated even by arthritics. In blind trials amongst arthritics with proven intolerance to ordinary aspirin, 70% had no gastric symptoms after taking large doses of Bufferin over periods of 4 to 16 months². Previous studies amongst the general population showed that only 1 patient out of 238 had any distress after taking 10 grains of Bufferin.³

Not only is Bufferin better tolerated by the stomach than ordinary aspirin, but its pain relieving ingredient is absorbed twice as quickly into the blood-stream. Trials show that on an average the 10-minute salicylate level after taking Bufferin was more than 20% higher than the 20-minute level after taking ordinary aspirin.³

Bufferin is unique in incorporating aluminium glycinate and magnesium carbonate as buffering agents and has no equivalent in the British Pharmacopoeia or National Formulary. This fully justifies the prescription of Bufferin on E.C.10.

A PLATINUM-PROCESSED MOTOR SPIRIT

New BP Super

—the petrol with
more energy per gallon

Another success for The British Petroleum Company!

DURING THE LAST FEW WEEKS, motorists in this country have been enjoying their first experience of a platinum-processed spirit. And 'enjoying' is the word! Because this new BP Super is the petrol with more energy per gallon. It gives an immediate 'fillip' to performance. It doesn't

matter what sort of car you run, new or old — high or low compression — you get all these benefits from this new super motor spirit:—
More energy per gallon • Smoother, swifter acceleration • Greater freedom from engine-knock • More miles per gallon • Less engine deposits • Longer engine life

British Empire Trophy won on new BP Super

W. A. Scott-Brown used new BP Super in his two-litre Lister-Bristol and won the British Empire Trophy race for sports cars. But even if you are not a racing man — and whatever sort of car you drive — you will find new BP Super gives greater freedom from engine-knock and more energy per gallon.

Photograph by courtesy of "The Autocar"

For cars of today— and tomorrow

To produce the new BP Super, petroleum spirit is passed through a *catalyst impregnated with pure platinum. This reforms the petroleum molecules so that you get a smoother-burning petrol which gives greater freedom from engine-knock and has more energy per gallon. This means that while new BP Super is ideal for all cars now on the road it will also suit higher-than-ever compression ratios. New BP Super, because it is platinum-processed, opens the way to further progress in engine design.

*A catalyst is an agent which assists in producing a chemical change in other substances without being changed itself.

Livelier performance here and now

Have you driven on the new BP Super yet? You're missing a lot if you haven't. From the very first tankful you'll notice far more 'go' about your car's behaviour. And you'll keep on enjoying this livelier performance for a considerably longer period before your engine needs overhaul.

One more word about this platinum-processed petrol before you try it yourself. You don't have to pay a penny extra. New BP Super costs no more than ordinary premium-grade petrols produced by less advanced methods.

Give your car
MORE ENERGY PER GALLON!

Canned strained foods solve a mother's problem

It is an everyday matter for you to recommend early mixed feeding for baby, but mothers are often troubled by the difficulties of obtaining and preparing suitable fresh foods. Heinz Strained Foods will solve the problem.

Heinz are able to buy fruits and vegetables direct from farms—not always possible for town-dwelling mothers. And the Heinz cooking and straining equipment conserves the maximum amount of goodness in the foods.

Another point—there are 19 varieties of Heinz Strained Foods. These not only have the advantage of getting the baby's palate accustomed to different flavours—they also make it possible to provide a balanced, varied diet at all seasons of the year.

For a FREE booklet which gives the exact nutrient values of all 19 varieties of Heinz Strained Foods, please write to Dept. 1Q, H. J. Heinz Company Ltd., London, N.W.10.

**HER MAJESTY'S OVERSEA CIVIL SERVICE
Medical Branch, Kenya**

Vacancies exist for

MEDICAL OFFICERS

for general duties in the Medical Department of Kenya. Successful candidates may be posted to any station in Kenya. During the earlier years of service an officer will be expected to carry out general medical and surgical duties, including a varying amount of public health administration. In most stations, even if remote from the larger towns, it is possible for an officer to maintain interest in any particular branch of medicine or surgery to which he is attracted. As far as possible the interests of an officer are considered when postings are made. The work of every medical officer is based on a hospital which may vary in size and facilities from a small district hospital meeting the needs of a comparatively primitive community to a large and modern provincial hospital. Appointments can be made on a permanent basis with pension (non-contributory) at age of 55, or on short-term contract with gratuity payable on satisfactory completion of service. Salary ranges from £1,116 to £1,836 a year; starting point is determined by experience, and four extra increments are given to successful candidates possessing the M.R.C.P., D.P.H., or other approved higher qualifications. Temporary cost-of-living allowance at the rate of 10 per cent of salary is also payable, subject to a maximum of £162 a year, making gross emoluments of £1,228 to £1,998 a year. Permanent Medical Officers are eligible to be considered at any time for promotion to super-scale posts in Kenya and other territories in medical administration, or, if they possess higher qualifications and suitable experience, in specialist posts. Quarters are generally available at rental of 10 per cent of salary. Free passages in both directions for officer and wife, and up to cost of one adult fare for children. Taxation at local rates. Annual local leave permissible, and generous home leave granted after each tour of from 40 to 48 months. Education facilities are available. **THE OTAGO HOSPITAL BOARD
Dunedin, New Zealand
Department of Surgery
Orthopaedic and Traumatic Unit****SENIOR ORTHOPAEDIC REGISTRAR
Dunedin Hospital**

Applications are invited for the position of Senior Orthopaedic Registrar, to commence duties on January 1, 1956, or as soon as possible thereafter. The applicant must possess a higher qualification in surgery, and have had extensive experience in orthopaedic and traumatic surgery. His duties will include the teaching of medical students, nurses, and physiotherapy students. The appointment is for a minimum of one year and tenable up to three years, subject to termination by three months' notice in writing from either side. The salary payable under the Hospital Employment (Medical Officers) Regulations, 1952, and Amendments, is £806 5s. per annum, rising by annual increments of £57 10s. to a maximum of £921 5s. per annum, plus cost-of-living bonus of £81 per annum. A living-out allowance of £179 8s. per annum is payable in addition to the above salary if non-resident. Travelling expenses are payable as stated in the conditions of appointment. Application forms and conditions of appointment may be obtained from the office of this *Journal* or from the Office of the High Commissioner for New Zealand, 415, The Strand, London. Applications, stating age, qualifications, and experience, together with copies of testimonials and health and radiological certificates, will be received by the undersigned until 10 o'clock a.m. on Monday, November 21, 1955.—W. A. Williamson, Secretary, Otago Hospital Board, P.O. Box 946, Dunedin, New Zealand. (3129)

**HER MAJESTY'S OVERSEA CIVIL SERVICE
South Pacific Health Service****MEDICAL OFFICERS**

Required for general medical duties in the South Pacific Health Service, which includes posts in the Colony of Fiji, the British Solomon Islands Protectorate, the Gilbert and Ellice Islands Colony, and the British Service in the New Hebrides (Anglo-French Condominium). A selected candidate is normally posted to fill a particular vacancy in one of the above territories in the first instance, but he may be transferred to any station within the South Pacific Health Service. As a member of the Medical Branch of Her Majesty's Overseas Civil Service he is also eligible to be selected for transfer on promotion to other Colonial territories if he wishes when vacancies occur. Appointments can be made on a permanent basis with pension (non-contributory) payable normally at the age of 55, or on short-term contract with gratuity on satisfactory completion of service. Salary scale ranges from £F.960 per annum to £F.1,850 per annum (£F.111 equals £100 sterling); starting salary is determined according to qualification and experience. Pension is earned at the rate of 1/600th of the final pensionable emoluments for each completed month of service. The gratuity in respect of contract employment is payable on termination at the rate of £F.25 on a salary of £F.1,000 per annum or less, and at the rate of £F.37 10s on a salary over £F.1,000 for each completed three months of service. Quarters containing heavy furnishing if available are provided at low rental. Income tax at local rates. Free passages provided on appointment for officer, wife and children up to the cost of four adult passages and on leave up to the cost of three adult passages. Length of tour ranges from two to four years according to local conditions and length of service; leave is earned at the rate of four or five days for each completed month of service. In addition, mid-tour leave of three months in Australia or New Zealand is permissible in certain circumstances, on tours of three or four years in territories other than Fiji. There are schools in Fiji, but many officers stationed elsewhere send their children to school in New Zealand or Australia. Candidates must possess medical qualifications registrable in the United Kingdom. Officers appointed to certain posts may be required to tour the islands in relatively small craft as a regular part of their duties. Application forms can be obtained from the Director of Recruitment, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference BCD 117/162/01). (3641)
