KAYLENE-OL

the satisfactory and palatable emulsoid of colloidal kaolin B.P. and liquid paraffin

Prescribed as a gentle laxative at bedtime. When stimulant purgatives act erratically or fail, Kaylene-ol will usually prove to be effective, especially when the bowel is hypertonic or spastic.

All the products of Kaylene (Chemicals) Limited are in Category 2 or Category 4 in the Ministry of Health's Classified List, and are therefore prescribable on Form E.C.10.

Supplied in 4 fl. oz. bottles.

Night coughing, which so often interrupts the patient's sleep, and that of other members of the family, can often be controlled by the prescription of Syrup Calcidrine. This widely accepted Abbott product combines the action of calcium iodide and ephedrine with the anti-spasmodic and sedative effect of Nembutal. Syrup Calcidrine provides an effective sedative and expectorant for coughs due to bronchitis, tracheal infection and inflammation of the upper respiratory tract. *Average dose 1 to 2 teaspoonsfuls every 2 to 4 hours.*

NOBECUTANE *the sterile plastic wound dressing* (Brit. med. J. 1954, 2, 37)

NOBECUTANE consists of an acrylic resin dissolved in a mixture of acetic esters. When applied to the dry skin the solvent evaporates leaving an elastic, transparent, and adhesive film.

NOBECUTANE has many advantages over conventional dressings. It is non-irritating, transparent, tough, pliable and durable and can be applied over joints where some degree of mobility is required.

NOBECUTANE is impervious to bacteria but permeable to air and water vapour and allows normal aqueous exhalation of the skin to escape. No maceration of the skin occurs.

NOBECUTANE is economical in use and results in a saving of at least 20% over the cost of conventional dressings. In addition it is welcomed by nursing staff who find it effects a considerable saving in time.

NOBECUTANE is available in 300 ml. spray containers, holding sufficient solution to dress 60-70 surgical wounds. It is also available in bottles of 50 ml. and 250 ml.

The case of *Blatella germanica* . . .

The cockroach has always sailed the seven seas, infesting ships' galleys and quarters, fouling food supplies, spreading disease and creating discomfort by its presence. Until a few years ago the control measures available rarely eliminated this very persistent pest, and had to be repeated at short intervals. But now, for the first time in history, seafaring cockroaches are being dealt with ruthlessly, by a revolutionary combination of insecticides and transparent lacquer.

The insecticides used in this remarkable development are aldrin and dieldrin, products of Shell, and much of Britain's great mercantile fleet is already 'de-cockroached' by dieldrin treatment. The surface layer of insecticidal crystals is constantly renewed from within the lacquer — even the friction caused by the movement of an insect over the surface has this replenishing effect.

However heavy the infestation, one lacquering with aldrin and dieldrin means 100% control — and a clean ship for at least two years.

Aldrin and dieldrin tackle insect pests with unrivalled effect and economy. Their surer kill is achieved with lower dosages. Their wider range includes many pests never before dealt with satisfactorily. Aldrin is fast becoming recognised as the best of all soil insecticides; dieldrin as the best control for weevils, beetles, flies, etc., on foliage. It is also extensively used as a residual spray against disease-carrying insects.

Have you a stubborn pest problem to be solved?

THE GENTLE ART OF *Sniffing*

In the age of snuff and elegance a suitable sniff was part of every gentleman's social equipment. Nowadays the art has declined until its continued existence depends entirely upon the efforts of a body of comparatively ineffective, albeit enthusiastic, amateurs. In order to retain at least some remnant of the more spacious days of the past, our technicians constructed a machine. With its aid even the most subtle sniffs can be captured, measured, and classified, and the volume of the average sniff determined. Thus it is that one of the nicest sniffs, the once-an-hour decongestive sniff, is standardized to a startling degree for the benefit of those who use the

highest utilisation

The therapeutic value of any preparation is in direct ratio to the amount absorbed and utilised. That FERROMYN is an improved form of iron medication is confirmed by achieving a utilisation factor of 40 per cent \pm 5. This figure is considerably higher than any obtained from contemporary oral iron preparations. The clinical response is in keeping with the above factor, realising a mean daily Hb. response of 1.2 per cent in 150 cases reviewed during a recent clinical trial.

Who's next?

Another rheumatic sufferer?

It is fortunate that an effective adjuvant in the treatment of this disease is available, bringing the patient prompt and effective relief from pain.

The value of salicylate in rheumatic disorders has long been recognised, but until recently its use was restricted by the toxic effects accompanying the necessarily high dosage.

In Berex, the combination of acetylsalicylic acid and calcium succinate enables toleration of massive aspirin dosage without lowering the prothrombin level, with encouragement of tissue respiration, and with less gastric disturbance.

BEREX has never been advertised to the public

SUMMARY OF STUDY ON SUCCINATE-SALICYLATE THERAPY*

A succinate-salicylate combination was found superior to acetylsalicylic acid in rheumatic states both on grounds of therapeutic efficacy and lower toxicity. Adequate amounts of the former could be administered with more lasting effect and with fewer and milder side effects. Furthermore, succinate-salicylate affects the disease process itself, as well as relieving painful symptoms and does not abnormally increase prothrombin time even after prolonged dosage.

MEMORANDUM

Subject: Sleep

To: ALL DOCTORS

From: FOGARTYS OF BOSTON

"Sleeplessness is one of the commonest complaints in general practice," a doctor* wrote recently.

We, as pillow makers, would never be so rash as to guarantee to put your patients to sleep, but we *do* claim that their chances of sleeping soundly will be improved if they use our pillows.

These are filled with NATURAL materials—feather and down—which we believe to be superior to all synthetic fillings. Moreover, we "improve on nature" by processing the feathers and down in our own purifying plant, the most modern of its kind in Europe.

Some people sleep best on fairly firm pillows, others like to sink into downy softness. The wide range of Fogarty fillings caters for all tastes.

If you are interested—professionally or privately—in knowing more about *How to Buy Good Pillows*, please write for the informative booklet we have published under this title.

How they fought malaria

in Kasongo-Mumema

A victory of major importance was won against Malaria in 1951. Won at a region near Elizabethville in the Belgian Congo called Kasongo-Mumema. And this after the dry season, when the Sporozoite Index rises.

Between 3rd September and 15th December, 1951, weekly distributions of the new drug, 'Daraprim', were made. The results speak for themselves :

PLASMODIAL INDEX

	BEFORE						AFTER						
	3 Sept. 1951	24 Sept. 1951	1 Oct. 1951	22 Oct. 1951	19 Nov. 1951	17 Dec. 1951	3 Sept. 1951	24 Sept. 1951	1 Oct. 1951	22 Oct. 1951	19 Nov. 1951	17 Dec. 1951	
Proportion Infected	40/183	11/172	6/170	4/158	2/149	0/161	% Infected	21.9	6.4	3.5	2.5	1.3	Nil

On the 26th March 1952 the Index was still negative.

Evidence of this kind shows the major role that 'Daraprim' can play in suppressing malaria in a community.

THE ANTIHISTAMINE
WITH A DIFFERENCE

Allen & Hanburys announce the introduction of PIRITON, a most important advance in antihistaminic therapy. The advantages of Piriton lie in its high potency, low dosage, low incidence of side effects, and high order of safety.

SMALL DOSE . . . The effective dose of Piriton is one tenth to one fiftieth of that of most other antihistamines.

RAPID RELIEF . . . After a single dose, relief of symptoms may appear in some cases within 10 minutes, and in most cases within 30 minutes.

EASILY ADMINISTERED . . . Piriton is given orally, in doses of $\frac{1}{2}$ to 1 tablet three times a day, for the treatment of allergic manifestations, and by injection for the treatment and prevention of reactions due to penicillin, other parenteral medications, and blood transfusions.

COMBINED WITH CODEINE PHOSPHATE AND PHENACETIN

SOLUBLE ASPIRIN is now widely preferred to ordinary aspirin for general prescription.

“Codis” is a codeine compound tablet of high quality that takes this important development into account.

The aspirin in Codis provides soluble calcium aspirin, which is formed immediately the tablet is dissolved in water. This

calcium aspirin will be more rapidly absorbed by the patient and is far less likely to cause gastric irritation.

Because of the ready dissolution and dispersion of the tablets, Codis will be found considerably easier to administer. Codis is suitable for prescription in all those cases which call for a codeine compound tablet.

An unusual degree of tolerance....

WELL tolerated by patients undergoing long-term aspirin therapy in rheumatic conditions; easily taken by those who are nauseated by crushed or dissolved aspirin, or who cannot swallow tablets. Paynocil presents aspirin in its most acceptable form.

Gastroscopic investigation has shown Paynocil to be superior to conventional aspirin and compound aspirin tablets in that it does not cause inflammation of the gastric mucosa, a constant danger with prolonged treatment.

Paynocil tablets are equally suitable for occasional analgesia. They disintegrate rapidly on the tongue and can be taken pleasantly at any time without water.

Covered by a coat

The virtually non-reactive alumina gel in Gelusil acts as a protective demulcent, soothing the irritated mucosa by coating the mucous membrane of the stomach. The gel being practically indestructible, protection and coating of the ulcer crater are assured as long as Gelusil remains in the stomach. Alumina gel tends to reduce acidity of the gastric contents. The other main constituent of Gelusil, magnesium trisilicate, also coats the area of ulceration, becoming gelatinous in consistency and localizing antacid action at the desired site.

Chloromycetin* is unique in being readily and effectively absorbed from the gastro-intestinal tract and producing blood-levels which rise proportionally with increase in dosage. This is a great advantage in severe infections where initially, high blood-levels are essential; a rapid response to treatment is a natural corollary. Owing to effective absorption, gastro-intestinal side-effects following the administration of Chloromycetin are reduced to a minimum.

for infant feeding—

Carnation Milk

The growing volume of clinical evidence, pointing to the unusual adaptability of unsweetened Evaporated Milk in infant feeding, suggests the presentation of this synopsis, for the convenience of physicians who may wish to keep in touch with this important development.

WHAT IT IS

1. Unsweetened Evaporated Milk is pure whole milk from tuberculin tested dairy herds. It is concentrated to approximately double richness by the evaporation of water and has nothing added except natural Vitamin D₃.
2. It is not to be confused with sweetened condensed milk, which contains about 40% of added cane sugar.
3. Unsweetened Evaporated Milk is standardised to meet the strict Government requirements of 31% minimum total solids, of which not less than 9% must be butterfat.
4. Carnation is of a known nutritional value. It is easily reconstituted to milk of ordinary richness by the addition of water. The consistency never varies.

Carnation Feeding Charts and reprints of clinical investigations are available to the medical profession from: Medical Department, General Milk Products Ltd., Candlewick House, 116/126, Cannon Street, London, E.C.4.

HOW IT SERVES

1. The natural reaction of the proteins to heat results in a granular curd similar to that of breast milk. Digestibility is therefore suitably ensured for all infants. Attenuation of the whey fractions greatly benefits those infants sensitive to milk proteins.
2. Carnation is a simple full cream milk, homogenized to present butterfat in a form tolerated by most infants. The globules, 2 microns in diameter, are permanently dispersed, and form a fine emulsion when water is added. Prematures and other fat intolerant infants usually take Carnation very satisfactorily.
3. Each fluid ounce of Carnation Milk provides not less than 33 i.u.'s of Vitamin D₃. Clinical survey proves this quantity adequate for prophylactic purposes. Carnation Milk is a superior source of vital calcium, phosphorus and nitrogen.
4. Carnation Milk is universally obtainable, simple to use and SAFEST in inexperienced hands because of guaranteed sterility.

Urtication by switching with the common stinging nettle appears to have been an old Roman custom. When Julius Caesar landed, his soldiers had with them nettle seeds which they sowed for their own use as an epidermal stimulant and counter-irritant, to relieve stiffness and rheumatism caused by the already then notorious British climate.

The right diet at your fingertips

This filing box, designed for the consulting room desk, contains an indexed supply of diet cards for 16 different conditions. The cards are planned to include specimen daily menus which facilitate the patient's co-operation and save the doctor's time. This is one of the services offered free of charge to the medical profession by the Energen Dietary Service.

In special cases, clinical considerations often necessitate the preparation of a diet which takes into account the individual requirements of the patient. On receipt of the appropriate information from the practitioner, such diets can be specially constructed and sent through the post; or a consultation can be arranged with a senior dietitian.

The Energen Dietary Service is staffed by fully qualified dietitians, under close medical supervision. It offers independent information and assistance to the medical profession in all dietary and nutritional matters.

Requests for this Diet Card Filing Box or other inquiries should be addressed to:

'RAUWILOID + VERILOID'

'RAUWILOID + VERILOID' is a striking example of drug complementation. It combines in one tablet 1 mg. of 'RAUWILOID' brand alkaloid hydrochlorides of *Rauwolfia serpentina*, and 3 mg. 'VERILOID' brand alkaloids of *Veratrum viride*. 'RAUWILOID', by widening the margin between the effective therapeutic dose of 'VERILOID' and that producing side-actions, enables satisfactory hypotensive doses of 'VERILOID' to be given to most patients. The combination is ideal for relieving the symptoms of moderate to severe hypertension. It is effective, safe, and produces a minimum of discomfort to the patient.

'RAUWILOID' + HEXAMETHONIUM

'RAUWILOID' + HEXAMETHONIUM is a combination indicated in the treatment of severe, intractable hypertension. It increases the margin of safety of oral hexamethonium, as the dosage of this drug can be halved in some cases when given in combination with 'RAUWILOID', thus lessening side-effects. Furthermore, fluctuation of the blood pressure is minimized. Each tablet contains 1 mg. of 'RAUWILOID' brand alkaloid hydrochlorides of *Rauwolfia serpentina* and 250 mg. of hexamethonium chloride dihydrate.

Detailed literature is available on request.

'RAUWILOID' and 'VERILOID' are registered trade marks.

Research

The House of Wander continues to maintain its advanced position in pharmaceuticals and quality food products because the standardization of active ingredients during manufacture is backed by careful control and investigation in its extensive Research Laboratories.

In Quality

The Wander Research Laboratories have made useful contributions in the fields of dietetics, nutrition and vitamins. Their wide experience and up-to-date laboratory facilities help to maintain the high quality of Malt Extract and Cod Liver Oil (Wander), the vitamin content of which exceeds that of the analogous B.P. preparations.

Rx Malt & Oil (WANDER)

The special consideration of physicians when prescribing a malt and oil preparation is that of vitamin values. Comparative studies prove that to prescribe "Wander Brand" is to specify malt extract and cod liver oil of the finest possible quality.

In the Service of Medicine

Careful control and investigation help to maintain "Wander Brand" in the forefront of its class. Moreover, with all its special advantages, "Wander Brand" costs no more than some malt and oil preparations with a lower vitamin content.

A new concentrated glucose drink **CITROZE** (TRADE MARK) made with whole fresh lemons

Citroze is a new highly-concentrated glucose drink which offers all the virtues of pure glucose in a highly palatable form. It is deliciously and wholesomely flavoured with whole fresh lemons and is recommended for use during convalescence, and in cases of low vitality and poor appetite.

Citroze has an exceptionally high glucose content—not less than 10% after dilution. It does not cause flatulence, and can be taken either hot or cold. Citroze is to be diluted with two parts water or soda water. The price is 3/6 for an economical 26-oz bottle, which makes 4 pints of ready-to-drink Citroze, obtainable at all leading chemists.

Ingredients:

Dextrose mono-hydrate 30%, sugar, lemon juice, citric acid and benzoic acid

TRADITION

LIQUEUR BRANDY

To everyone who appreciates rare quality, the arrival in this country of TRADITION Liqueur Brandy is important news. So named because it is especially blended by E. Normandin et Cie. to suit the traditional English preference for a pale, dry Cognac, TRADITION owes nothing to artifice. It derives its superb clean flavour wholly and solely from grapes grown at Chateauneuf, in the heart of the Cognac region, while its delicate amber colour is its natural inheritance from the oaken casks in which the years have mellowed it. Ask your Wine Merchant to tell you more about TRADITION — to be informed about it is to enjoy it all the more.

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent **★** testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £525 per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

SINGAPORE ANTI-TUBERCULOSIS ASSOCIATION

Applications are invited for the appointment of a **CHEST PHYSICIAN**

to the Royal Singapore Tuberculosis Clinic. The appointment is for three years with the option of further periods of three years. The commencing salary is S.\$1,200 per month, rising to S.\$1,600 per month, with a further S.\$100 per month cost-of-living allowance. Annual increments are by S.\$50 per month annually. (Sterling equivalent £1,675 per annum, rising to £2,230 per annum. Cost-of-living allowance: £140 per annum. Increments £70 per annum.) Passages will be paid both ways for a three-year agreement and one month's full-pay leave will be granted for each year of service. There is also a provident fund, to which the officer subscribes five per cent and the Association ten per cent of the salary: contributions to this are realizable on both counts after five years' service: after less than five years' service those paid by the employee are refunded, plus interest accrued. Applicants should have a higher qualification and not less than one year's exclusive experience of tuberculosis of the chest. Special experience might entitle the applicant to a higher starting salary than that mentioned above. Further information can be obtained from the Secretary, N.A.P.T., Tavistock Square, London, W.C.1, or from the Medical Director, S.A.T.A., Singapore. 2. (5061)

UNIVERSITY OF CEYLON

Applications are invited for the posts of

(a) PROFESSOR OF PARASITOLOGY
(b) PROFESSOR OF BACTERIOLOGY

Preference will be given to experienced university teachers. The salary scale attached to the post of a Professor is Rs.14,400, rising by six annual increments of Rs.600 to a maximum of Rs.18,000 per annum. The Council may appoint at any point on this scale according to qualifications and experience. Rent allowance (at present 15 per cent of salary in the case of a married man and 7½ per cent of salary in the case of an unmarried man, subject to a maximum of Rs.130 per mensem and Rs.65 per mensem respectively) and cost-of-living allowance (approximately Rs.95 per mensem) will be paid. An overseas allowance of not more than one-third of salary, as the Council may determine, may also be paid. First-class passage for a Professor, his wife, and not more than three children will be provided. The posts are not pensionable, but the Professors will become contributors to the University Provident Fund, contributing 5 per cent of salary and the University adding 10 per cent. Half salary may be paid from the date of embarkation. The appointments will be for a period of four years in the first instance, but may be renewed up to the age of 55 or 60. The revision of salaries is at present under discussion and the salary scale of a Professor will probably be Rs.15,000, rising by four annual increments of Rs.600 and four annual increments of Rs.900 to a maximum of Rs.21,000 per annum. Further particulars and information as to the method of application may be obtained from the Secretary, Association of Universities of the British Commonwealth, 36, Gordon Square, London, W.C.1. Registered Mental Hospital

President : The Right Hon. The Earl of Derby, M.C.

Medical Superintendent :

W. V. Wadsworth, M.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation, the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.

ST. ANDREW'S HOSPITAL, NORTHAMPTON
for Nervous and Mental Disorders

President: The Earl Spencer, Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Piomière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

ANGINA PECTORIS

*MYCARDOL is a long-acting nitrite used in the routine control of angina pectoris. It gives prolonged protection against severe attacks, improves exercise tolerance and reduces the need for repeated doses of trinitrin—in some cases eliminating it altogether. Low toxicity makes this drug especially suitable for continuous long-term symptomatic treatment.
