The Diseases of Occupations

DONALD HUNTER, M.D., F.R.C.P.

Physician, The London Hospital. Director of Department for Research in Industrial Medicine (Medical Research Council)

The British Medical Journal writes:—

A volume which far outshines in knowledge and in experience anything that has been produced before in this enormous field. It will become the standard work on the subject for a long time to come.

The Lancet writes:—

A remarkable book. . . . The well-known occupations and their health risks have been treated with impressive care and completeness. The book is almost as comprehensive as it is fascinating.

The Practitioner writes:—

This is a remarkable book and in writing it Dr. Hunter has rendered a signal service to British medicine.

JAMES PARKINSON

(1755-1824)

A bicentenary volume, edited by

MACDONALD CRITCHLEY

James Parkinson was born in 1755 and it is fitting that in this bicentenary year the original text of his monograph, *Essay upon the Shaking Palsy*, which first appeared in London in 1817, should once again be made available. In addition to its reissue here, this volume includes an account by Dr. J. Godwin Greenfield of the changing views up to the present day about the morbid anatomy of Parkinson's disease, and an article by Sir Francis Walshe on the clinical features of Parkinsonism with special reference to the relevant fundamental physiological issues. There is also a detailed biographical essay by Dr. W. H. McMenemey. *Illustrated. 15s.*

The case of *Blatella germanica* . . .

The cockroach has always sailed the seven seas, infesting ships' galleys and quarters, fouling food supplies, spreading disease and creating discomfort by its presence. Until a few years ago the control measures available rarely eliminated this very persistent pest, and had to be repeated at short intervals. But now, for the first time in history, seafaring cockroaches are being dealt with ruthlessly, by a revolutionary combination of insecticides and transparent lacquer.

The insecticides used in this remarkable development are aldrin and dieldrin, products of Shell, and much of Britain's great mercantile fleet is already 'de-cockroached' by dieldrin treatment. The surface layer of insecticidal crystals is constantly renewed from within the lacquer — even the friction caused by the movement of an insect over the surface has this replenishing effect.

However heavy the infestation, one lacquering with aldrin and dieldrin means 100% control — and a clean ship for at least two years.

Aldrin and dieldrin tackle insect pests with unrivalled effect and economy. Their surer kill is achieved with lower dosages. Their wider range includes many pests never before dealt with satisfactorily. Aldrin is fast becoming recognised as the best of all soil insecticides; dieldrin as the best control for weevils, beetles, flies, etc., on foliage. It is also extensively used as a residual spray against disease-carrying insects.

Have you a stubborn pest problem to be solved?

 to the focal point of
 soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed.* Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Nicotinic acid ethyl-ester	2%
Nicotinic acid n-hexyl-ester	2%

“Precisely, Mr. Baxter...”

... that puts the matter in a nutshell. One *can* say that I.Z.S. is the insulin of the moment ... particularly for a new diabetic. The thing to remember, gentlemen, is that I.Z.S. seems to have it both ways, so to speak. It gives you a rapid initial response, yet the one injection will usually control the blood sugar level adequately for up to 24 hours. This, as you will find, is a great advantage to your patient. There are, of course, a few patients who benefit more from a modification of the standard I.Z.S. In such cases, you can vary the proportions of the different forms of I.Z.S. in the injection. If you consider that quicker initial action is desirable, the patient can use more I.Z.S. amorphous in his syringe, or alternatively, add more I.Z.S. crystalline to prolong the effect of the injection. Any other questions?”

for the rapid relief of pain

The distress caused by the piercing, stabbing pains of neuralgia is quickly relieved by the rapid, smooth, analgesic action of HYPON TABLETS, enabling the practitioner to prescribe a safe means of meeting the patient's need. Menstrual pain is also effectively alleviated. Where the cause of distress is of a more chronic nature, as in rheumatism and sciatica, the adverse

effects of prolonged medication with codeine and salicylic therapy are eliminated by the inclusion in the formula of caffeine and phenolphthalein. HYPON TABLETS are already widely prescribed by members of the profession for their speedy and safe action with the almost complete elimination of gastric upset. Parallel with the relief from pain, febrile states are effectively reduced in conditions such as influenza, coryza and tonsillitis.

A new cough specific

BECANTYL

(Sodium 2:6 ditertiarybutylnaphthalene monosulphonate)

Suppresses cough with no undesirable side effects

Sodium 2:6 ditertiarybutylnaphthalene monosulphonate (Becantyl), a product of original research, is a new agent that is specific in suppressing cough. It is unrelated to morphine and guaiacol.

BECANTYL does not cause constipation, anorexia, drowsiness or any other undesirable side-effects; being devoid of side-effects, BECANTYL may be prescribed for children and the aged.

Clinical experience supports the value of BECANTYL in suppressing all types of cough, BECANTYL may be prescribed whenever the treatment of cough is indicated.

BECANTYL is presented in 4 fluid ounce, 40 fluid ounce, and 80 fluid ounce bottles.

Doctors everywhere have been quick to recognize the unparalleled merits of ACHROMYCIN tetracycline . . . and Lederle, in turn, have been quick to extend the range of ACHROMYCIN preparations, so that the antibiotic may be employed to fullest advantage. Today that range grows wider still, with the introduction of ACHROMYCIN Troches—a potent weapon in cases of bacterial invasion of the throat and mouth. Dissolved slowly in the mouth, the troches exert a powerful broad-spectrum action against numerous oral infections commonly met with in day-to-day practice.

**The reasonable alternative to diamorphine
for suppression of**

severe cough

'PHYSEPTONE' LINCTUS is comparable in effectiveness to diamorphine linctus as a suppressant of unproductive cough. Furthermore, it is free from the drawbacks of the latter—it carries negligible risk of addiction, does not constipate and seldom causes other side-reactions.

'PHYSEPTONE' LINCTUS has a direct suppressive action on the cough reflex. It is especially valuable in such conditions as bronchiectasis, pertussis, post-influenzal tracheitis, chronic passive pulmonary congestion and pulmonary tuberculosis.

'PHYSEPTONE' LINCTUS contains 2 gm. of methadone hydrochloride in each fluid drachm (the recommended adult dose). For children it should be diluted with simple syrup in the proportion of one part linctus and seven parts syrup—one to two teaspoonfuls (0.25—0.5 gm.) of this *diluted* linctus to be given according to the age of the child.

The problem of the recurring 30 per cent

OBLIVON

METHYLPENTYNOL

BRITISH SCHERING LIMITED, KENSINGTON HIGH STREET, LONDON, W.8

The time and trouble involved in dealing with the psychoneurotic patient is a constantly recurring problem in general practice. Oblivon is an entirely new drug which is specific for the reduction of nervous tension and the physiological accompaniments of fear and anxiety.

Administered three times a day it has a tranquillising effect on the anxious patient, reducing the mental tension and controlling the multiple physical symptoms of which the patient complains.

Unlike the amphetamines and the barbiturates, Oblivon is an entirely safe preparation. There are no contra-indications to the use of Oblivon, and it may confidently be given even to patients with cardiac, renal or hepatic disease.

To encourage rapid regeneration

TO HELP a speedy return to normal strength and vigour following the debilitating effects of disease or surgical operation, careful thought must be given to the patient's diet. It must provide maximal nutriment without taxing a delicate or impaired digestion. Furthermore, it must appeal to a capricious or fastidious taste.

'Ovaltine' taken morning and evening assists in meeting these exacting circumstances. Its contents of malt, milk, cocoa, soya, eggs and added vitamins provide bodybuilders of recognized quality; its meticulously controlled manufacture aims at retaining accessory factors essential for postsurgical and post-infectious recovery.

'Ovaltine', a balanced, comprehensive food beverage, is preferred by patients for its outstanding nutritional properties, its ease of assimilability and its delicious appetizing flavour.

Whenever there is a serious accumulation of excess fluid in the tissues—as in cardiac oedema—prompt action is called for.

DIAMOX Acetazoleamide speedily and safely procures the copious diuresis needed to relieve such conditions. The value of this potent oral diuretic is, however, by no means restricted to congestive heart failure. In glaucoma, for instance, striking results have already been obtained; while in oedema of pregnancy, renal oedema, emphysema and epilepsy, the use of DIAMOX has passed well beyond a merely exploratory stage. DIAMOX is now available in parenteral form for patients when the oral route is impracticable.

Syrup Calcidrine^{REGD}

can bring relief to Night Cough

SYRUP CALCIDRINE offers, in a palatable and well-tolerated combination, an effective cough sedative, with distinct antispasmodic properties.

The high iodine content of the product, as represented in calcium iodide, distinguishes it from the usual demulcents and expectorants. By combining the expectorant effect of iodine, the antispasmodic action of Ephedrine and the sedative action of Nembutal, a preparation is obtained which can be utilized to great advantage in the treatment of simple acute and subacute bronchial infections, especially where night cough prevents proper rest and sleep. Syrup Calcidrine is exceptionally well tolerated since its high iodine content

seldom produces any gastric disturbance or untoward effects. The vehicle of syrups of wild cherry and tolu, with aromatics, in which this combination is presented, makes it palatable and excellently suited for patients of all ages.

Each fluid ounce contains:

Calcium Iodide, B.P.C., 1934	7 grs.
Ephedrine Hydrochloride, B.P.	$\frac{1}{2}$ gr.
Codeine Sulphate, B.P.C., 1934	$\frac{1}{2}$ gr.
Nembutal (Pentobarbitone Sodium B.P.)	$\frac{1}{8}$ gr.
Alcohol, B.P.	28 min.
Syrup of Tolu, B.P.	36 min.
Syrup of Wild Cherry	115 min.

Syrup Calcidrine^{REGD.}

Average Adult Dose: 1 or 2 teaspoonfuls every 2 to 4 hours until relieved, then at longer intervals.

An easier way of removing EAR WAX

Hitherto, the removal of wax from the external auditory meatus has, commonly, necessitated two attendances by the patient—first for diagnosis and prescription of a suitable loosening agent—the second, two or three days later, for syringing. Now, by the use of Cerumol Ear Drops, wax can be removed, in the majority of cases in one visit. A few drops of Cerumol are instilled into the ear, and, while another patient is being seen to, the soft cerumen dissolves and the harder wax disimpacts. The resultant debris can then be cleared by gentle syringing. Only when the wax plug is abnormally hard, is it necessary for the administration of Cerumol to be prolonged and the patient told to return for syringing at a later date. In many cases, Cerumol can be instilled by patients in their own home and, as the wax has frequently been found to come out of its own accord, further visits are unnecessary. Cerumol is anti-bacterial, efficient, and harmless to the lining of the external auditory meatus or to the tympanic membrane. Accepted for use in a large number of hospitals and general practices, Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations, and may therefore be prescribed on N.H.S. form E.C.10.

CERUMOL EAR DROPS

Samples of Cerumol will gladly be sent to members of the Medical Profession, on application to the Distributors:

BARBITURATE AND MORPHINE ANTAGONISTS

**TWO** new products**MEGIMIDE** (BRAND OF BEMEGRIDE)
 β -ethyl- β -methylglutarimide

and

DAPTAZOLE (BRAND OF AMIPHENAZOLE)
2:4-Diamino-5-phenylthiazole hydrochloride

in Barbiturate Poisoning "MEGIMIDE" is "a barbiturate antagonist of real clinical worth. To omit to use it in the treatment of barbiturate poisoning is to run the risk of the broncho-pneumonia that is so often fatal in these cases." (*Lancet*, 1955, *i*, 181.) "DAPTAZOLE," itself a weak barbiturate antagonist, enhances the action of "Megimide."

"Megimide" and "Daptazole" administered together intravenously ensure safe, quick recovery from barbiturate intoxication without the risk of convulsions and secondary depression which often follow the use of other central analeptics.

in Morphine Administration "DAPTAZOLE," the new morphine antagonist, has recently been shown (*Brit. Med. J.*, 1955, *i*, 1367) to remove the risk of respiratory depression associated with high morphine dosage and to make tolerance or addiction unlikely.

"Daptazole" relieves respiratory depression by increasing the depth of respiration, while in some cases the vomiting and, in most cases, the constipation associated with morphine are also relieved.

in Barbiturate Anaesthesia "MEGIMIDE" is of value to lighten or terminate the anaesthesia of patients under the influence of barbituric anaesthetics.

Further details and supplies of "Megimide" and "Daptazole" available to the medical profession on request.

Growing recognition of the long-term cumulative toxic effects of barbiturates, and the well-known, insidious, psychic habituation to their use—matters of considerable concern to many Doctors—are now avoidable dangers through the formulation of Noctynol Tablets. The latter present:

MEPHENESIN, which, by diminishing reflex hyperexcitability, relieving nervous tension and anxiety, and promoting muscular relaxation, not only induces the composure essential to the onset of sleep, but also ensures that the sleep is restful and refreshing.

CARBROMAL and BROMVALETONE which, by synergism, act as effective hypnotics and quickly transform the mephenesin-induced sedation to hypnosis. Unlike the barbiturates, carbromal and bromvaletone are non-toxic and non-cumulative and, as elimination is comparatively rapid, they rarely give rise to 'hangover' and depression.

In smaller doses, NOCTYNOL Tablets act as a non-depressant calmative eminently suitable for daytime sedation.

Drip therapy without a tube

NULACIN

In the past, the successful treatment of many cases of peptic ulceration demanded hospital conditions. Now, by means of Nulacin Tablets, it is possible to control gastric hyperacidity without any inconvenience to the patient. By using Nulacin Tablets as directed, an ambulant patient can obtain all the advantages of intragastric milk-alkali drip therapy.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.
