TO BE PUBLISHED THIS MONTH

A NEW (NINTH) EDITION OF

Price's Textbook of the Practice of Medicine

Edited by DONALD HUNTER

Dr Donald Hunter, who now edits Dr Price's world famous textbook, has in this new edition succeeded in combining the original purpose and scope of the book with the most modern outlook on medical practice. Although many entire sections have been completely rewritten and the remainder extensively revised, great care has been taken to ensure that the book remains the most comprehensive, authoritative and above all practical guide in a single volume for all who practise medicine.

The text has been completely reset and a whiter and more opaque paper has been used. By increasing the page size it has been possible to reduce the number of pages by 300. This edition will be much pleasanter both to handle and to read than any of its predecessors.

BLAKISTON'S NEW GOULD MEDICAL DICTIONARY

revised second edition

hard or soft cover 86s 6d

*A new catalogue of all
medical books is now
available from the publishers
McGraw-Hill House
London EC4*

Although based on Gould's famous Medical Dictionary, the Blakiston contribution is an entirely new work, reflecting advances in all the various branches of medicine. Over ninety specialists have contributed articles and definitions. The emphasis is on words in current usage; obsolete material, except when of historic importance, has been largely eliminated.

The new second edition incorporated 12,000 new words and 8,000 changes in definition. It includes modern terminology from chest surgery, virus diseases, haematology, immunology, microbiology, biochemistry, poliomyelitis, neurology, psychiatry, radiation medicine, steroid hormones, syphilology, cardiology, dentistry, veterinary science and organic medicinal chemistry. The antiarthritic compounds and the most recent terms in cancer and tumour medicine are fully covered.

Words from nuclear science now used by medical scientists are explained. There is a new table on isotopes, and the tables on hormones, enzymes and vitamins have been expanded.

THE SYNOPSIS SERIES for Students and Practitioners

The titles in Wright's Synopsis Series are not intended as textbooks. They conform rather to the abbreviated style of lecture notes, and they are therefore mainly of value as aids to the memory, as a means of orderly revision, as a help in systematising and ordering the knowledge gained from a good textbook, and as a means of rapid reference. The system of headings, indentions and so on which is followed has been carefully designed to clarify and simplify the subject-matter to the greatest possible degree.

"In these days of economy in prescribing"

Extract from a letter in the BRITISH MEDICAL JOURNAL, August 11th, 1956, p. 374

"A recent annotation in the Journal, on the treatment of constipation, incriminates liquid paraffin as a cause of lipoid pneumonia and as an obstacle to the absorption of fat-soluble substances such as carotene and to the healing of wounds. In these days of economy in prescribing . . . the biologically standardized form of senna . . . is cheaper by half than paraffin, is far easier to dispense, and there is no wastage of storage space."*

All the available evidence of the development of bacterial resistance points to the need for a safe and effective means of securing control of local infections without the employment of those antibiotics which are of greatest value for systemic use.

a new advance in wound therapy:

CICATRIN has advantages over existing modes of wound therapy for the following reasons:—

- ★ is bactericidal and bacteriostatic.
- ★ minimizes the risk of the development of resistant strains.
- ★ is effective against most of the pathogens including those resistant to penicillin and streptomycin.
- ★ Healing is stimulated by selected amino acids.
- ★ is not cyto-toxic.
- ★ is active in the presence of blood and tissue exudates.
- ★ is non-allergenic.

When prescribing, most doctors prefer short words. So to save your time, and because so much 'Sulphamezathine' is prescribed, we have registered the abbreviation 'S-MEZ'. You can now use this shortened version officially, knowing that 'Sulphamezathine' will be dispensed. 'Sulphamezathine'—or 'S-MEZ'; they both stand for sulphadimidine. But 'S-MEZ' is quicker to write, and actually cheaper to prescribe, than sulphadimidine.

Milk-alkali drip therapy without a tube

NULACIN

The most effective control of gastric acidity is milk-alkali drip therapy; the most convenient way of obtaining milk-alkali drip therapy is by sucking Nulacin tablets.

Thus, Nulacin is of great value in the treatment of peptic ulcer in the ambulatory patient, and in the prevention of ulcer relapse.

Nulacin tablets are prepared from whole milk combined with dextrans and maltose, and incorporate Magnesium trisilicate 3.5 grs; Magnesium oxide 2.0 grs; Calcium carbonate 2.0 grs; Magnesium carbonate 0.5 grs; Ol. menth. pip. q.s. Their shape, size and consistency are such that, when

they are allowed to dissolve slowly in the mouth, control of gastric acidity can be achieved. Up to three tablets an hour may be required to give continuous neutralization of the gastric contents.

Nulacin tablets are not advertised to the public, have no B.P. equivalent, and may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to Pharmacists is 2/-.) Also available in tubes of 12.

Nulacin is available throughout the British Commonwealth, in the U.S.A. and in many other countries. It is known as Nulactin in Canada and Sweden.

GASTRIC ANALYSIS. Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS. Same patients as in graph on left, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

OPERATION SAFETY

Give the lever a nudge with the elbow and out comes a comfortably warm spray, neither too hot nor too cold. It stays warm because you are using a Leonard Thermostatic Mixing Valve — the valve that *automatically* mixes hot and cold water and holds the temperature steady. The thermostat in the Leonard valve levels off all the ups and downs and gives a flow of warm water as smooth, as steady, as even as the tide over a weir.

Leonard Thermostatic Hot and Cold Water Mixing Valves are used in nearly all hospitals, and are specified more and more every day. They save water, save heat, save risk. Sales and service everywhere.

Leaflet No. D/93 gives full details. Write for a copy today.

PENIDURAL Oral Suspension

The word 'Penidural' is a registered trade mark.

JOHN WYETH & BROTHER LIMITED, Clifton House, Euston Road, London, N.W.1

Safe, Reliable, Effective

PENIDURAL Oral Suspension is a preparation of penicillin which is safely administered by mouth, reliably absorbed from the intestine and effectively produces therapeutic blood levels of the antibiotic. PENIDURAL is a palatable and stable preparation which is indicated in the treatment of infections caused by penicillin-sensitive organisms.

The ease of administration by the oral route with its safe, reliable and effective properties renders PENIDURAL an ideal chemotherapeutic agent for many diseases encountered in Medical Practice.

PENIDURAL Oral Suspension contains 300,000 units Benzathine Penicillin to each large teaspoonful (5 c.c.) and is supplied in bottles containing 60 c.c. Oral PENIDURAL is also available in tablets, each containing 200,000 units of Benzathine Penicillin.

Favoured Treatment

THE little luxuries extended to ailing children do not often include an ingratiating medicine. There is a need for palatable and harmless forms of the drugs given to young patients. Aspirin, one of the commonest, is, for instance, one of the most unpleasant, and can be harmful to the delicate gastric mucosa.

On the other hand, most children will readily take aspirin in the form of *Junior Paynocil*. These tablets are really pleasant to take; they disperse instantly on the tongue without water, and minimise the risk of gastric irritation due to aspirin.

**Junior
PAYNOCIL**

Junior Paynocil tablets each contain $2\frac{1}{2}$ grains of aspirin and $1\frac{1}{4}$ grains of glycine. Besides speeding disintegration and eliminating the unpleasant aspirin flavour, glycine confers on each aspirin particle a lubricant, demulcent and protective barrier.

Surgical and Orthopaedic Supports

An efficient system of support designed for use in the treatment of physical disability, deformity or disease. CAMP Supports are used for treatment in Abdominal Surgery, Spinal Conditions, Gynaecology and Obstetrics. The CAMP service includes belts designed for use in Emphysema, Spinal, Ante-natal and Post-natal conditions. Also Post-operation, Visceroptosis, Hernia, Pendulous Abdomen, Pelvic Traction and Cervical Traction. Camp Supports embodying dominant features not existing in other makes combined with correct anatomical design, give an adaptable rigid support with the required

pressure and uplift without constriction to organic function.

The unique CAMP single-pull adjustment operates through self-locking buckles to the precise degree required.

THE CAMP-VARCO PELVIC TRACTION

system is designed to avoid the complications of thrombophlebitis, swollen ankles and knees. The Traction Belt has been developed for use in the treatment of low-back injuries and has been applied with good results in cases of herniation of the nucleus pulposus in the lumbar intervertebral spaces. Also for the relief of minor fractures of the lumbar and sacral vertebral appendages and of the pelvis, and in Spondylolisthesis.

CAMP CERVICAL TRACTION

The CAMP "Angle-Flexion" Head Halter has been designed and constructed to operate at a recommended angle of 35 degrees from the horizontal, that is, with the patient in a recumbent position and head supported on an approximately 4 in. deep pillow. It can be used effectively in the treatment of conditions arising from Brachial-Plexus Syndrome, "Slipped Disc," Osteoarthritis (hypertrophic and atrophic), Spondylitis, Stiff Neck, strains, sprains, etc.

 particularly in the hostile, aggressive or agitated patient, in whom 'Largactil' produces tranquillity without depression. The child becomes accessible to psychotherapeutic measures and responsive to normal guidance.
- 3** CONTROL OF PAIN AND DISTRESS
 before and after surgical procedures, in burns and fractures. 'Largactil' not only enhances the actions of analgesics, narcotics and sedatives but also relieves the apprehension and tension associated with pain.

The ever widening recognition of the value of 'Largactil' has resulted in steadily increasing production, enabling us to make still further reductions in the prices of all preparations. Substantially reduced prices have been in operation since 18th August, 1956.

ARE ANTACIDS HARMFUL?

.....

IT is normal to regard antacids as harmless substances. Dosages of "one to three tablets four to six times a day" seem reasonable and safe. Whether the patient is to take four tablets or eighteen is left to him. And, presumably, if it requires eighteen to remove the symptoms, eighteen are taken. But is the patient doing himself harm?

The nature of peptic ulcer is obscure but it is probable that a substantial proportion of all people are constitutionally disposed to ulcers under certain conditions. One of the factors may be that their acid-secretory mechanism is over-efficient, and, given the right stimuli, produces a degree of acidity which in some way leads to the formation of an ulcer. The initial stimulus may be complex but in making himself comfortable the patient will almost inevitably reduce the acidity below normal. He will thus provide a new stimulus to secretion, and, by following such a regimen over a period, so exaggerate his constitutional condition that even when the original stimulus is removed he continues to over-secrete acid. Thus a temporary disorder becomes a permanent disability. The patient becomes another chronic ulcer case.

Although some of this argument may be conjectural, it is almost always wrong to reduce acidity below normal. The one safe therapy in the present state of knowledge is that which restores the acid level to within the normal tolerance and at the same time inactivates the pepsin. The only satisfactory compound known to us which does this is Bismuth Aluminate $\text{Bi}_2(\text{Al}_2\text{O}_4)_3 \cdot 10\text{H}_2\text{O}$, now available to the medical profession under the trade name Bislumina. This preparation has been placed in Category 3 by The Ministry of Health Standing Joint Committee and is prescribable on Form E.C.10.

MICTINE*

Effective,
Non-Mercurial
Oral Diuretic

STRUCTURE

"Mictine," brand of aminometradine, is 1-allyl-3-ethyl-6-aminotetrahydropyrimidinedione. It avoids the undesirable side-effects associated with mercurial, xanthine or sulphonamide agents.

ACTION AND EFFECTIVENESS

"Mictine" is believed to act by inhibition of sodium ion absorption in the renal tubule. In therapeutic dosage it has not caused any effect on glomerular filtration rate, renal plasma flow, cardiac output, heart rate or blood pressure, nor any alteration in the blood or blood-forming tissues or in renal or hepatic function. In a group of unselected patients 70 per cent. may be expected to respond to "Mictine".

TOLERANCE

"Mictine" is not toxic at therapeutic dosages. On the other hand, side-effects do occur such as headache and gastro-intestinal symptoms. These are reduced to a minimum if an interrupted dosage scheme is adopted.

ADMINISTRATION

"Mictine" is indicated in the maintenance of an oedema-free state in any patient requiring diuretic therapy and the effecting of initial diuresis in all patients but those with severe congestive failure. For these purposes the dosage is one to four tablets daily in divided doses during meals on alternative

THE NEPHRON UNIT

days or on three successive days followed by four days without therapy. "Mictine" is not intended to produce initial diuresis in more severe congestive failure; however, "Mictine" may be given when other diuretics are contra-indicated, or if tolerance to them has developed.

Available in bottles of 25, 100 and 500 tablets each containing 200 mg. aminometradine.

getting started again

Two features of the common "bilious" attack are biliary stasis and constipation. Rational therapy should attack both aspects of the condition, permitting the normal process of digestion to get started again.

Veracolate cholagogue-evacuant does this by combining bile salts therapy with a mild purgative action. The bile salts stimulate the production and flow of bile, while the cascara and phenolphthalein assist evacuation of the intestinal tract.

Active principles: Sodium taurocholate and glycocholate, 1.07 gr., ext. cascara sagrada, 1.00 gr., phenolphthalein 0.50 gr., oleoresin capsicum 0.04 gr.

Dose: One tablet 3 times a day or 2 at night.

Packing: In bottles of 50 and 100 tablets. Bottles of 500 tablets supplied to chemists.

has stood the test of time

Soaks more readily than hand-rolled bandages.

Sets firmly in four to five minutes.

Stronger yet less brittle than ordinary plaster.

Casts have porcelain-like surface.

Casts are porous.

Trimmed edges do not crumble and casts have a neat appearance.

Casts may be bivalved, or cut open

and sprung apart without loss of strength.

Exact number of bandages for a particular cast can be determined beforehand.

Special interlocked woven cloth permits easy moulding.

High plaster content—90% of plaster by weight.

Will keep for a very long time without deterioration when stored in a dry place.

The absence of loose powder and the non-fray edges of the specially-woven leno cloth base of Gypsona bandages provides a distinct advantage over hospital-made bandages.

In performance, the superiority of Gypsona is even more marked. The high plaster content is fixed to the fabric by a special process, and there is a negligible loss of plaster when the bandage is soaked. A surprisingly small amount of material will produce a cast which is light, but of great strength.

Gypsona is by far the most economical plaster for the modern functional treatment of fractures.

Two weapons against Athlete's Foot and other fungal dermatoses

The combined use of Mycil Ointment and Powder has proved to be highly effective in both prophylaxis and treatment of fungal dermatoses.

Mycil Ointment is formulated to ensure penetration of the active constituent, chlorphenesin, to the site of the infection.

Mycil Powder, used alone, prevents reinfection. Because of its adsorptive properties it is useful in combating the effects of excessive perspiration.

Both preparations are non-mercurial and odourless and may be used over long periods, if necessary, without adverse effects.

'Infant Feeding
with Evaporated
Milk'.

Safety, simplicity and digestibility in

INFANT FEEDING

Safe—Libby's Evaporated Milk is fresh cow's milk concentrated, sealed in cans and sterilized so that it remains sweet and safe indefinitely. It cannot cause diarrhoea or other digestive symptoms due to bacterial contamination.

Simple—In making the formula, no boiling or straining of the milk is required. It is prepared simply by adding boiled water and granulated sugar.

Easily Digested—Digestibility depends upon low curd tension and small curd particle size.—The sterilization by heat of Libby's Milk is far more effective than is boiling in lowering curd tension.

BUT curd particle size is an even more important index of digestibility than is curd tension, as shown by Doan and co-workers in the United States. Libby's Evaporated Milk, reconstituted with water and curdled with rennin, which approximates conditions occurring in the infant's stomach, remains liquid with suspension of extremely fine curds, similar to human milk, and much finer than curd from boiled or any other kind of cow's milk.

**AS USED AT THE STOKE
MANDEVILLE HOSPITAL**

The Levit Bath Lift enables the infirm and those incapacitated by paralysis, rheumatism and similar conditions to get into and out of the bath with minimum difficulty and, in all but the most severe cases, without assistance. It consists essentially of a seat, or platform, which can be raised to the top of the bath or gently lowered to the bottom by water pressure, whilst supporting a weight up to a maximum of 35 stone. A leaflet giving complete description will be gladly sent on request.

THE UNIVERSITY OF SHEFFIELD

FACULTY OF MEDICINE

Dean—J. G. McCRIE, O.B.E., T.D., M.B., F.R.C.P.Ed.

The University grants Degrees in Medicine and Surgery (M.B., Ch.B., M.D., Ch.M.) and in Dental Surgery (B.D.S., M.D.S.). It also grants a Diploma in Public Health (D.P.H.), a Diploma in Microbiology (Dip. Microbiol.), and a Diploma in Dental Surgery (L.D.S.). These are all open to men and women on equal terms. The Session 1956-57 begins on October 8.

Lectures and laboratory courses are given in the University, whilst clinical instruction is provided in the general and special Hospitals in the City. A number of resident hospital appointments are open to qualified students of the School, both male and female.

HALLS OF RESIDENCE.—FOR MEN: Crewe Hall, Clarkehouse Road, Sheffield, 10; Ranmoor House, Fulwood Road, Sheffield, 10; Stephenson Hall, Oakholme Road, Sheffield, 10. FOR WOMEN: University Hall for Women, Endcliffe Vale Road, Sheffield, 10, and Annexes.

Particulars of the Halls may be obtained from the Wardens.

SCHOLARSHIPS.—A number of Entrance Scholarships are open to students wishing to enter the Faculty of Medicine. There are also Postgraduate Scholarships.

Entries to the Medical and Dental Schools are strictly limited in order to ensure adequate lecture and laboratory accommodation for all students. The relatively ample number of hospital beds available renders the facilities for clinical instruction unusually large.

Prospectuses containing details of the Medical and Dental Schools may be obtained, respectively, from the Dean of the Faculty of Medicine and the Director of Dental Studies; and one giving particulars of Scholarships from the undersigned.

A. W. CHAPMAN, Registrar.

ST. ANDREW'S HOSPITAL, NORTHAMPTON

for Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department for Diathermy and High-frequency treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

CHEADLE ROYAL, CHEADLE, CHESHIRE

Registered Mental Hospital

President:

The Right Hon. The Earl of Derby, M.C.

Medical Superintendent:

W. V. Wadsworth, B.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation, the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.

Counter hypertension with

RAUWILOID+VERILOID

. a safe yet powerful
combination

The standardized hypotensive alkaloids of *Rauwolfia serpentina* ('Rauwiloid') and *Veratrum viride* ('Veriloid') together provide a most effective and safe oral treatment for moderate to severe degrees of hypertension. 'Rauwiloid' widens the margin between the emetic and the antihypertensive doses of 'Veriloid', and enables therapeutic doses of 'Veriloid' to be given in almost every case of hypertension. This combination of drugs exerts a steady and prolonged hypotensive effect, and produces the minimum of discomfort to the patient.

"The addition of 'Rauwiloid' makes 'Veriloid' easy to administer, more effective and practically does away with unpleasant side-actions".

Amer. J. Med., (1954) 17:629

'Rauwiloid + Veriloid' tablets each contain 1 mg. of the alkaloids of *Rauwolfia serpentina* and 3 mg. (by biological assay in terms of reference standard) of those of *Veratrum viride*. The starting dosage is one tablet three times daily. The tablets are available in bottles of 100 and 500.

Full literature on request.

'Rauwiloid' and 'Veriloid' are registered trade-marks. Regd. Users:
