GEIGY PHARMACEUTICAL COMPANY LTD  
Rhodes, Middleton, MANCHESTER

# The esters of NICOTINIC, SALICYLIC and p-AMINOBENZOIC acids

bring relief to cases of  
arthritis and rheumatism

**I**N CASES OF soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

\**Therapeutische Umschau*

With the advent of MILTOWN, relief of tension  
and anxiety can now be secured with a new  
degree of certainty... a new sense of security.  
MILTOWN is without question the most effective  
relaxing agent. It is particularly valuable  
where other tranquilizers are ineffective. It  
shows no significant side effects and is  
almost completely free from habit-forming  
tendencies. It is particularly valuable  
and for inducing calmness  
without narcosis by night.

# The case of *Thaumetopæa pityocampa...*

In Spain, where soil erosion is a major problem, pine trees are grown extensively to aid conservation. As mature trees are felled for timber young trees must be planted to replace them, in order to maintain the cover on the steep hillsides. The young replants are often destroyed by the larvae of the pine processionary moth, *T. pityocampa*.

'La processionaria' as the insect is known locally, has earned its name from its habit of invading the forests in columns.

As winter approaches, groups of larvae spin hibernation nests in the tree tops. The traditional method of control has been to collect these nests by hand and destroy them, but inevitably many

were missed and only partial control achieved.

Now a fresh approach has been made to the problem. The plantations of young trees are sprayed with the new Shell insecticide endrin, applied at very low concentration, either by air or from the ground. The effectiveness, persistence and economy of endrin are such that it has become the standard control when 'La processionaria' threatens Spanish pine forests with destruction.

Endrin, aldrin, dieldrin . . . these three advanced insecticides developed by Shell are complementary to each other. Between them they control most of the major insect pests which menace agricultural production and public health throughout the world. Have you an urgent pest problem in your area?

## PREGNANCY: meeting the inevitable iron deficiency

Progressive inroads are made on the maternal iron stores during pregnancy. The demand made is greatly increased during the third trimester, and there is little doubt that the exposition of a suitable form of iron is of definite clinical value. FERROMYN meets these important demands because it affords maximum bivalent iron from a minimum of ferrous salt, does not cause alimentary upset, has a high utilisation factor and will maintain a satisfactory haemoglobin level throughout term.

FERROMYN is supplied in four forms:

**FERROMYN TABLETS** Each tablet contains: Ferrous Succinate 150mgm.

**ELIXIR FERROMYN** Each teaspoonful contains: Ferrous Succinate 150 mgm.

**FERROMYN 'B' TABLETS** Each tablet contains Ferrous Succinate 150 mgm., Aneurine Hydrochloride 1 mgm., Riboflavin 1 mgm., Nicotinamide 10 mgm.

**ELIXIR FERROMYN 'B'** Each teaspoonful contains: Ferrous Succinate 150 mgm., Aneurine Hydrochloride 1 mgm., Riboflavin 1 mgm., Nicotinamide 10 mgm.

# *EFFECTIVE IMMUNISATION AGAINST WHOOPING COUGH*

**For six years**

**Whooping Cough Vaccine Glaxo**

**has been standardised**

**by mouse protection test**

**to the antigenic potency**

**now commended**

The prolonged field and laboratory investigations of the Medical Research Council (Brit. Med. J., 1956, 2, 454 24th August) have shown a correlation between the protection given by vaccines against whooping cough in children and against pertussis infection in laboratory mice. "It is concluded," says the Report, "that in future only those pertussis vaccines which have been shown, by the

intracerebral mouse-protection test, to have an adequate potency in relation to the British standard pertussis vaccine should be issued for use in children."

*This test has been used for six years with every batch of Whooping Cough Vaccine Glaxo (and combined antigens containing it) and the potency has been consistently demonstrated.*

**FIRST oral trichomonacide**

# **TRITHEON\***

BRAND OF AMINITROZOLE TABLETS TRADE MARK

**for male and female**

Because of their systemic action, TRITHEON tablets reach resistant trichomonads in their hiding places throughout the genito-urinary tract. Unlike local trichomonacides, TRITHEON tablets eradicate the organism in male and female as proved by negative culture.

Clinical investigation has demonstrated that TRITHEON tablets administered orally eradicate trichomonads for culture-proved cure of more than 70 per cent of female patients whose husbands are treated simultaneously with TRITHEON tablets. Even when only the wife is treated, cures are effected in approximately one-third of the patients.

**Dosage:** One tablet three times daily for 10 days

**Available:** Bottles of 30, 100 and 1000 tablets; each tablet contains 100mg 2-acetylamino-5-nitrothiazole

LITERATURE ON REQUEST

**Ortho Pharmaceutical Limited • High Wycombe • England**

TRITHEON is the original brand of 2-acetylamino-5-nitrothiazole tablets developed in the Ortho Research Foundation for the oral treatment of trichomoniasis

# EAR WAX Removed this easy way

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing.

Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances.

Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane.

Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

In Hypertension

# RAUWILOID

Reduces the pressure gradually and safely . . .

Of *proved* value in the treatment of mild to moderate hypertension, 'Rauwiloid' is a purified and standardized fraction of *Rauwolfia serpentina* in tablet form. It lowers elevated blood pressure *gradually*, slows the pulse rate, and so reduces cardiac effort. A calm, tranquil sense of well-being is induced, without drowsiness, and with little impairment of alertness. Dosage is not critical, and there are no important side-effects or contraindications. Mental depression is unlikely to be encountered when 'Rauwiloid' is used in the recommended dosage. It is the medicament of choice for hypertension in its early stages, in order to arrest progression.

'Rauwiloid' contains 2 mg. of the active hypotensive alkaloids of *Rauwolfia serpentina* per tablet, undesirable constituents of the crude root being excluded by the extraction process.

Dosage is simple—two tablets taken at bedtime.

Full literature on request.

RIKER

\*'Rauwiloid' is a registered trade-mark. Regd. Users:

RIKER LABORATORIES LIMITED  
LOUGHBOROUGH LEIC8

# 'Dettol' is active...

against both Gram-positive and Gram-negative micro-organisms.

Under standard conditions of test a dilution of 1 in 200 kills *Staph. aureus* in 10 minutes; a 1 in 500 dilution kills *Strep. pyogenes* in 10 minutes.

'Dettol' retains a high degree of efficiency in the presence of organic matter.

'Dettol' is not incompatible with soap, traces of which need not be removed before application.

'Dettol' is non-poisonous and non-staining.

'Dettol' is well tolerated by the skin and tissues.

---

#### INSTRUMENT 'DETTOL'

Instrument Dettol is widely used as a most effective and practical means of disinfecting surgical instruments—steel, stainless steel and plated, as well as glassware, rubber appliances and nylon sutures.

#### SURGICAL 'DETTOL'

Surgical Dettol is a specially formulated tincture for the surgical preparation

of the skin. It remains actively bactericidal for a considerable period after drying. It dries quickly and leaves a non-slippery surface. Bactericidal action is not adversely affected by the use of ordinary soap solutions. Surgical Dettol in clinical use has proved non-toxic and non-irritant when used in accordance with the directions.

SUPERS ENTERAL THERAPY

## PENICILLIN-V Lilly

THE  
*effective*  
 ORAL  
 PENICILLIN

Reports prove that Penicillin-V will give clinical results comparable with parenteral penicillin. The oral route is time-saving and painless. Blood levels are higher and more prolonged than with other oral penicillins. Penicillin-V is unique in that it is unaffected by the action of gastric acid. Whenever penicillin is indicated, Penicillin-V is the product of choice.

The average dose is one 125 mg. capsule four times daily, increased in severe infections.

'Pulvules' Penicillin-V Lilly each contains 125 mg. (200,000 units). Suspension Penicillin-V Lilly Paediatric, in bottles to make 60 cc. contains 62.5 mg. (100,000 units) per large teaspoonful.

# Syrup *Pholcodine*

## for cough suppression

Syrup Pholcodine is recommended for the treatment of irritating or unproductive cough. It has been found effective in treating cough caused by irritation of the upper respiratory tract, reflex cough arising from pleuro-pulmonary conditions, and coughs of nervous origin. The preparation does not give rise to gastric upset and there is no evidence of constipation or constriction of the intestine.

*Rx Syr. Pholcodine (Duncan)*

This preparation is pleasantly acceptable to children ( $\frac{1}{4}$  to 1 teaspoonful) and also effective for adults (1 to 2 teaspoonfuls). It has the advantage of containing 8 mg. pholcodine in each teaspoonful, which makes it *economical* to prescribe.

Available as bottles of 4, 16 or 90 fluid ounces.

## a powerful yet safe tranquillizing drug

Clinical trials in many countries have proved PACATAL to be highly effective in mental disturbances ranging from the psychoneuroses to the psychoses.

PACATAL reduces tension, makes the patient quieter, less confused—but still alert, objective, co-operative, amenable to psychotherapy.

NOW available in ampoules for parenteral administration.

In anaesthetic medication, PACATAL reduces tension and anxiety in the pre-operative period, provides smooth and safer induction and potentiates anaesthetics. Post-operatively PACATAL aids rapid recovery and reduces nausea and vomiting.

PACATAL can be administered with complete confidence, being of low toxicity and uniquely free from troublesome side-effects.

It is rapidly absorbed and quickly eliminated, thus ensuring against cumulative dangers.

Pacatal

is available in tablets for oral administration and ampoules for parenteral use.

*Tablets 25 mg. in bottles of 50 and 500.*

*Ampoules 2 ml., 25 mg./ml. in boxes of 10 and 50.*

WILLIAM R. WARNER & CO. LTD., POWER ROAD, LONDON, W.4.

## *The Anatomy of Goodness*

- 1 THE HEAD of a Guinness is produced solely by living yeast — the pedigree Guinness strain of yeast descended from that used to brew the first Guinness nearly 200 years ago.
- 2 THE COLOUR of Guinness comes entirely from the small proportion of roasted barley that is added to the malt.
- 3 THE TASTE of Guinness is given it by the barley both roasted and malt, and by yeast and hops. The last also supply the only preservative in Guinness.
- 4 THE GOODNESS of Guinness is due to the use of three natural wholesome ingredients — barley, hops and yeast alone. Nothing else is added. Nothing is done to impair their natural goodness.

group of  
lesions

**Zichol**

A cream containing 16% zinc oxide, 4% ichthammol and 2% camphor in a soothing, drying base, for use in the sub-acute stage when a little weeping may still be present but the area is mainly crusted, irritant and sore. Basic N.H.S. cost 2/- for 1 oz tube, 3/- for 2 oz tube.

**Pixcyl**

A cream containing purified fractions equivalent to 5% crude coal tar, 1% salicylic acid and 25% zinc oxide in a non-drying base, for use at the chronic stage. This is safer than the customary coal tar preparation. Basic N.H.S. cost 2/3 for 1 oz tube.

GENATOSAN LIMITED Loughborough, Leicestershire

# There's no mistaking the easier running

*and you get 80% less engine wear with*

## *BP Energol 'Visco-static' Motor Oil*

YOU CAN TELL the difference right away when you change to BP Energol 'Visco-static' motor oil. Your engine starts with ease and runs as freely as if it had warmed up already.

It isn't long either before you notice you're using less petrol. Motorists who keep careful logs report petrol savings of up to 12%. Savings are most marked on short-journey running.

These are just the first signs that BP Energol 'Visco-static' is a very different kind of oil. But the biggest benefit of all is the saving in engine wear. Tests with the new atomic-wear detector have proved that BP Energol 'Visco-static' reduces engine wear by 80%. Under normal driving conditions you can expect at least double the mileage from your engine before an overhaul is necessary.

### A different kind of oil

Just think! Easier starting, smoother

running, up to 12% less petrol and 80% less engine wear. How can an oil do all this? The answer is that BP Energol 'Visco-static' is a multigrade oil covering the range from SAE 10W to SAE 40. Its thickness varies far less with changing engine temperatures than that of conventional oils. This means it is free flowing when you start from cold so that oil circulation begins at once. And when the engine warms up, this oil has the same full body as a thick summer oil has in these hot conditions.

BP Energol 'Visco-static' gives you better and cheaper motoring and it is for use all the year round. Decide to change now. Ask at garages where you see the BP Shield. BP Energol 'Visco-static' is obtainable in pint, quart and 1 gallon sealed containers.

### Do's and Don'ts with BP energol 'Visco-static'

Don't mix it with other oils.

Drain and refill with BP Energol 'Visco-static'. If you have been using a non-detergent oil you should run 500 miles, then drain and refill again.

Don't change to BP Energol 'Visco-static' if your engine will shortly need an overhaul. In such cases you should continue to use the normal grades of BP Energol, until it has been overhauled.

### Engine more lively, writes user

"On the run to London, a distance of 136 miles, with BP Energol 'Visco-static' in the sump, the engine was noticeably freer all the time, not only when warming up from cold. My wife and I both noticed how much more lively the car was. Acceleration too is improved."

**To lessen the fear of mutilation . . .  
arrange for Prosthesis before mastectomy**

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

# ADRENOXYL

## Reduces the mean bleeding-time

Adrenoxyl reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillary wall.

## A dry field at operation

Adrenoxyl has been successful in diminishing capillary bleeding in a wide range of surgical operations. It has proved particularly useful in ear, nose and throat, ophthalmic and plastic surgery. In plastic surgery of the face it has been reported that, post-operatively, there is less swelling and bruising when Adrenoxyl has been used.

## No side effects

Adrenoxyl does not have any side effects or contraindications. It does not affect blood coagulation, blood pressure or pulse rate and does not possess any sympathomimetic properties.

## In medical conditions

Adrenoxyl has been used with success in those medical conditions associated with capillary fragility.

*In the British Medical Journal (April 21st, 1956) a correspondent confirmed the value of Adrenoxyl in providing a dry field for the surgeon and in shortening the duration of the operation.*

## Packs

*Ampoules:* Boxes of 6 and boxes of 50.  
Each ampoule contains 0.75 mg. of adrenochrome monosemicarbazone dihydrate.

*Tablets:* Tubes of 25 and bottles of 500.  
Each tablet contains 2.5 mg. of adrenochrome monosemicarbazone dihydrate.

The best results are obtained when both tablets and ampoules are used.

# LUCIDIL

a new ■ tranquilliser  
 that places ■ a barrier between  
**emotions and ■ circumstances**

Patients suffering from psychoneuroses report that administration of LUCIDIL appeared to place a barrier between them and their external influences. They felt that even *their* problems had a solution. They became more sociable, more relaxed and better fitted for psychotherapy, and were at the same time enabled to pursue their normal activities.

LUCIDIL is benactyzine hydrochloride, a tranquillising agent with a specific action on the central nervous system.

LUCIDIL has no sedative or hypnotic effect, but its therapeutic action may help to pave the way to normal sleep by curbing chaotic thoughts. LUCIDIL does not cause addiction. A sense of well-being is commonly reported by patients taking the drug, but no extremes of behaviour have been observed.

LUCIDIL may be helpful in the treatment of psychosomatic disorders such as psychogenic asthma and dermatitis, and in compulsive alcoholism.

**Contra-indications.** LUCIDIL should be used with discrimination, and is unlikely to be of value in some conditions. It should not be used in manic-depressive psychoses, paranoid-compulsive or hysterical states. Endogenous depression does not respond to the drug. Frank psychosis is an absolute contra-indication.

**Dosage.** Normally, LUCIDIL is given in a dose of 1 or 2 mg. three or four times a day. The dose can be increased to 3 mg. if after a week or so a satisfactory response is not obtained.

**Availability.** LUCIDIL is available in sugar-coated tablets of 1 mg. in containers of 100 tablets.

Literature and clinical samples will gladly be sent to members of the medical profession on request.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent **★** testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

**★ SERVICE MEMBERS** may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

#### Other Grades, Whole-time

##### (a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held; provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodgings and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodgings at the time of submitting their applications, where this is not stated in the advertisement.
