LUCIDIL

a new tranquilliser
that places a barrier between
emotions and circumstances

Patients suffering from psychoneuroses report that administration of LUCIDIL appeared to place a barrier between them and their external influences. They felt that even *their* problems had a solution. They became more sociable, more relaxed and better fitted for psychotherapy; and were at the same time enabled to pursue their normal activities.

LUCIDIL is benactyzine hydrochloride, a tranquillising agent with a specific action on the central nervous system.

LUCIDIL has no sedative or hypnotic effect, but its therapeutic action may help to pave the way to normal sleep by curbing chaotic thoughts. LUCIDIL does not cause addiction. A sense of well-being is commonly reported by patients taking the drug, but no extremes of behaviour have been observed.

LUCIDIL may be helpful in the treatment of psychosomatic disorders such as psychogenic asthma and dermatitis, and in compulsive alcoholism.

Contra-indications. LUCIDIL should be used with discrimination, and is unlikely to be of value in some conditions. It should not be used in manic-depressive psychoses, paranoid-compulsive or hysterical states. Endogenous depression does not respond to the drug. Frank psychosis is an absolute contra-indication.

Dosage. Normally, LUCIDIL is given in a dose of 1 or 2 mg. three or four times a day. The dose can be increased to 3 mg. if after a week or so a satisfactory response is not obtained.

Availability. LUCIDIL is available in sugar-coated tablets of 1 mg. in containers of 100 tablets.

Literature and clinical samples will gladly be sent to members of the medical profession on request.

AGAINST MALNUTRITION

'VIMALTOL', a delicious, nourishing vitamin preparation, has achieved wide popularity as a supplementary food item against malnutrition in infants, children and adults. It can be used with advantage whenever nutritional levels are unsatisfactory. It can also be usefully employed when vitamin intake is insufficient, for example, due to distaste for natural vitamin-bearing fruits and other foods.

'Vimaltol' is a quality product from the 'Ovaltine' Research Laboratories. Its balanced formula, which includes special malt extract, high vitamin potency yeast, halibut liver oil and iron, has been developed in the light of recent findings of dietetic science. 'Vimaltol' actively assists in growth and development and helps to raise resistance against the onset of infection.

For these reasons, it is widely prescribed for the young because of their higher metabolic requirements. It is highly palatable, readily assimilable and quickly available.

Standardized to contain in each ounce not less than 2,000 I.U.
Vitamin A: 200 I.U. Vitamin D:
0.4 mg. Vitamin B₁: 0.3 mg.
Vitamin B₂ (Riboflavin): 4 mg.
Niacin (P.P. Vitamin): 3.3 mg.

The two-phase action of Bidormal ensures steady sedation throughout the night.

As the effect of the short-acting barbiturate pentobarbitone, contained in the outer shell of Bidormal, begins to fade, the action of the butobarbitone, contained in the inner core, takes over smoothly ensuring calm, uninterrupted sleep for approximately eight hours.

The patient awakens refreshed without any trace of drowsiness, hangover or 'drugged' feeling.

In Barbiturate Poisoning

SOME MEDICAL OPINIONS

Treatment with 'Megimide' and 'Daptazole' represents a radical advance in the therapy of acute barbiturate poisoning. Prolonged deep anaesthesia can be abolished, and the patient brought into a state of light anaesthesia resembling therapeutic anaesthesia and with the same insignificant risk. (1955) *Lancet*, ii, 619

'Megimide' is a barbiturate antagonist of real clinical worth. To omit to use it in the treatment of barbiturate poisoning is to run the risk of the broncho-pneumonia that is so often fatal in such cases. (1955) *Lancet*, i, 181

Treatment with 'Megimide' and 'Daptazole' is quickly effective in reversing the most severe respiratory and circulatory depression accompanying barbiturate intoxication. (1955) *Brit. Med. J.*, i, 1238

The combination of 'Megimide' and 'Daptazole' is effective in severe barbiturate poisoning, and the intermittent method of administration provides a wide margin of safety.

The valuable properties of aminophylline can now be utilized to the full, simply and effectively—by the *oral* administration of 'Theodrox'. Carnation Milk *for infant feeding*The advantages of
Standardisation

The diagram above shows the percentage of solids in Carnation Milk.

The total solids are standardised, as required by law, to a minimum of 31%. Of this figure 9% must be butterfat.

Previous Carnation advertisements have demonstrated that, chemically and physically, ordinary milks cannot compete with the range of tolerance and digestibility of the proteins and butterfat in Carnation Milk. These superiorities in an infant food are enhanced by the uniformity obtained by standardisation.

Uniformity in practice means :—

1. Constant calorie value. 2. Accuracy and ease of measurement. 3. Control of intake where necessary. 4. Precision in dilution.
5. A milk of known value at all times — and available everywhere.

Other attributes of Carnation Milk are :

- Safety, because of sterilisation *after* the Carnation cans are sealed — Hypo-allergenic properties
- Homogenisation — Prophylactic D₃.

Milk-alkali drip therapy without a tube

NULACIN

The most effective control of gastric acidity is milk-alkali drip therapy; the most convenient way of obtaining milk-alkali drip therapy is by sucking Nulacin tablets.

Thus, Nulacin is of great value in the treatment of peptic ulcer in the ambulatory patient, and in the prevention of ulcer relapse.

Nulacin tablets are prepared from whole milk combined with dextrans and maltose, and incorporate Magnesium trisilicate 3.5 grs; Magnesium oxide 2.0 grs; Calcium carbonate 2.0 grs; Magnesium carbonate 0.5 grs; Ol. menth. pip. q.s. Their shape, size and consistency are such that, when

they are allowed to dissolve slowly in the mouth, control of gastric acidity can be achieved. Up to three tablets an hour may be required to give continuous neutralization of the gastric contents.

Nulacin tablets are not advertised to the public, have no B.P. equivalent, and may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to Pharmacists is 2/-.) Also available in tubes of 12.

Nulacin is available throughout the British Commonwealth, in the U.S.A. and in many other countries. It is known as Nulactin in Canada and Sweden.

Elastoplast Bandaging Technique

in the treatment of

Sprains

TWO SOLUTIONS of everyday first aid problems are illustrated below, using Elastoplast elastic adhesive bandages and plasters. The tidy, effective result is typical of the modern approach in the treatment of sprains.

SPLINT METHOD

in the treatment of Finger Sprains

The injured finger is strapped to an adjacent uninjured finger by two strips cut from a 1" wide Elastoplast Plaster. The strapping is applied transversely around the two fully extended fingers so that the interphalangeal joints are not covered. Lateral movement of the injured joint is impossible; but flexion and extension are unimpaired.

SUPPORT

for Sprained Wrist

Bandaging consists essentially of figure-of-eight turns round hand and wrist—alternate turns slit to accommodate the thumb.

Elastoplast elastic adhesive bandages (Porous) are available in 3 yard lengths and 2", 2½", 3" and 4" widths. (Prescribable on Form E.C.10)

Outside the British Commonwealth Elastoplast is known as Tensoplast

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- Aluzyme is not advertised to the public and may be prescribed on Form E.C.10
