TRITHEON^{*}

BRAND OF AMINITROZOLE TABLETS TRADE MARK

for male and female

Because of their systemic action, TRITHEON tablets reach resistant trichomonads in their hiding places throughout the genito-urinary tract. Unlike local trichomonacides, TRITHEON tablets eradicate the organism in male and female as proved by *negative culture*.

Clinical investigation has demonstrated that TRITHEON tablets administered orally eradicate trichomonads for **culture-proved cure** of more than 70 per cent of female patients whose husbands are treated simultaneously with TRITHEON tablets. Even when only the wife is treated, cures are effected in approximately one-third of the patients.

Dosage: One tablet three times daily for 10 days

Available: Bottles of 30, 100 and 1000 tablets; each tablet contains 100mg 2-acetylaminio-5-nitrothiazole

For
ANGINA PECTORIS

In 'Pentoxylon' the tranquillizing, bradycardic influence of 'Rauwiloid' brand alkaloid hydrochlorides of *Rauwolfia serpentina* is allied to the prolonged vasodilating effect of pentaerythrityl tetranitrate. This new combined therapy represents an important advance in the long term treatment of angina pectoris.

Although some patients will still occasionally require glyceryl trinitrate, in many others 'Pentoxylon' will provide complete relief from anginal attacks. It will also bring: "*gratifying reduction of anxiety and relief of apprehension . . .*"

North-West Med. (1955) 54: 34

Dose: 1 tablet four times a day, before meals, increased later if necessary.

'Pentoxylon' is available in tablets, each containing 1 mg. of 'Rauwiloid' and 10 mg. of pentaerythrityl tetranitrate, available in bottles of 25, 100 and 500.

The esters of NICOTINIC, SALICYLIC and

p-AMINO BENZOIC acids

bring relief to cases of
arthritis and rheumatism

"Thank you, doctor"

IN CASES OF soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

promises much in mental illness

The virtues of MILTOWN as a powerful yet safe tranquillizer in the psychoneuroses are already widely recognised. Preliminary experience with the drug in psychotic patients now indicates that it may play an important part in the treatment of mental disease. In a dosage higher than that used for the psychoneuroses, MILTOWN may benefit delusional, assaultive, noisy and hallucinated patients, restoring well-being, calmness and serenity. Some manic-depressives and hypomaniacs have also been favourably affected by the drug.

MILTOWN has been used successfully as a premedication in E.C.T. and as a valuable aid in psychotherapy. It has not been reported to elicit suicidal tendencies. The low incidence of side effects and a low toxicity are notable features in therapy with MILTOWN. The drug has been given over long periods to psychotic patients without ill effects.

MILTOWN is the one tranquillizer that relaxes both mind and body

These photographs, taken under ultra-violet light, give visible proof of the superb spreading power, and economy, of Ef-Cortelan Skin Lotion. To aid photography a fluorescent dye was added—usually the thin film of lotion is invisible after application.

Why the spreading power of Ef-Cortelan Skin Lotion counts so much

- It penetrates *deeply*. Therefore the $\frac{1}{2}\%$ lotion is as effective as a 1% ointment.
- It spreads *smoothly* without a hint of friction.
- It spreads *evenly*—a little goes a long way.

POLYBACTRIN

antibiotic powder spray

INVALUABLE IN ALL BRANCHES OF SURGERY

Polybactrin provides a unique and economical means of applying a combination of Zinc Bacitracin, Neomycin Sulphate and Polymixin 'B' Sulphate—the three antibiotics of choice for topical use. The antibiotics are presented in an ultra-fine powder form dispersed under pressure with a propellant, and unlike other means of powder insufflation in common use, there is no risk of contamination of the antibiotics by airborne pathogens obtaining entry into the unit by suction.

A FRACTIONAL RELEASE GIVES COMPLETE DISPERSAL OF POWDER OVER THE WOUND

1. The *Polybactrin* unit offers a new technique for topical application of antibiotic therapy, enabling an efficient, economical and dry coverage of the wound area to be made.
2. The extensive range of bactericidal activity afforded by the triad of bacitracin, neomycin and polymixin gives an extremely wide coverage of wound pathogens without the risk of inducing resistant strains of organisms.
3. *Ps. pyocyaneus*, particularly present in burns, is completely inhibited by polymixin, considerably reducing the healing time.
4. *Polybactrin* is not readily absorbed and there is no risk of systemic toxicity occurring.
5. The propellant gas is non-toxic and does not support combustion.
6. There are no contra-indications to the use of *Polybactrin*. Systemic therapy may be given concurrently if necessary.

FORMULA: Each pack contains: Neomycin Sulphate 750 mg. Polymixin 'B' Sulphate 150,000 units. Zinc Bacitracin 37,500 units. Propellant 83.5 g. Net contents 85 g.

LUCIDIL

a new tranquilliser
that places a barrier between
emotions and circumstances

Patients suffering from psychoneuroses report that administration of LUCIDIL appeared to place a barrier between them and their external influences. They felt that even *their* problems had a solution. They became more sociable, more relaxed and better fitted for psychotherapy, and were at the same time enabled to pursue their normal activities.

LUCIDIL is benactyzine hydrochloride, a tranquillising agent with a specific action on the central nervous system.

LUCIDIL has no sedative or hypnotic effect, but its therapeutic action may help to pave the way to normal sleep by curbing chaotic thoughts. LUCIDIL does not cause addiction. A sense of well-being is commonly reported by patients taking the drug, but no extremes of behaviour have been observed.

LUCIDIL may be helpful in the treatment of psychosomatic disorders such as psychogenic asthma and dermatitis, and in compulsive alcoholism.

Contra-indications. LUCIDIL should be used with discrimination, and is unlikely to be of value in some conditions. It should not be used in manic-depressive psychoses, paranoid-compulsive or hysterical states. Endogenous depression does not respond to the drug. Frank psychosis is an absolute contra-indication.

Dosage. Normally, LUCIDIL is given in a dose of 1 or 2 mg. three or four times a day. The dose can be increased to 3 mg. if after a week or so a satisfactory response is not obtained.

Availability. LUCIDIL is available in sugar-coated tablets of 1 mg. in containers of 100 tablets.

Literature and clinical samples will gladly be sent to members of the medical profession on request.

Milk-alkali drip therapy without a tube

NULACIN

The most effective control of gastric acidity is milk-alkali drip therapy; the most convenient way of obtaining milk-alkali drip therapy is by sucking Nulacin tablets.

Thus, Nulacin is of great value in the treatment of peptic ulcer in the ambulatory patient, and in the prevention of ulcer relapse.

Nulacin tablets are prepared from whole milk combined with dextrans and maltose, and incorporate Magnesium trisilicate 3.5 grs; Magnesium oxide 2.0 grs; Calcium carbonate 2.0 grs; Magnesium carbonate 0.5 grs; Ol. menth. pip. q.s. Their shape, size and consistency are such that, when

they are allowed to dissolve slowly in the mouth, control of gastric acidity can be achieved. Up to three tablets an hour may be required to give continuous neutralization of the gastric contents.

Nulacin tablets are not advertised to the public, have no B.P. equivalent, and may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to Pharmacists is 2/-.) Also available in tubes of 12.

Nulacin is available throughout the British Commonwealth, in the U.S.A. and in many other countries. It is known as Nulactin in Canada and Sweden.

GASTRIC ANALYSIS. Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS. Same patients as in graph on left, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

(2 ACETYLAMINO -5- NITROTHIAZOLE)

for systemic therapy in Trichomonal Vaginitis

clinical evidence

Clinical investigations have shown that *Trichomonas vaginalis* can be eradicated by the oral administration of TRICHORAD.

dosage

A course of treatment consists of 1 enteric-coated tablet containing 100 mgm. TRICHORAD administered 3 times daily after meals for 10 days.

dual treatment

If the male partner is found to be a carrier, eradication of the parasite necessitates the simultaneous treatment of both the wife and the husband.

supplementary treatment

Whilst TRICHORAD tablets taken orally may produce a parasitological cure, concurrent local treatment with an efficient buffered trichomonacide such as PENOTRANE pessaries is essential to effect rapid symptomatic relief. Furthermore, PENOTRANE, being a fungicide, will counteract any associated monilial infection.

supplies

100 mgm. enteric-coated tablets are available in containers of 30 for 1 course of treatment and in dispensing packs of 600.

'ROVAMYCIN'

- * IS ACTIVE BY MOUTH * IS REMARKABLY WELL TOLERATED
- * DOES NOT INTERFERE WITH THE NORMAL INTESTINAL FLORA—
UNLIKELY TO RESULT IN THE DEVELOPMENT OF *CANDIDA* INFECTIONS OR STAPHYLOCOCCAL ENTERITIS.

Because of these properties 'Rovamycin' is suitable for the treatment of the commoner infections, especially those of the lung, upper respiratory tract and middle ear. It is indicated also in the treatment of patients who are sensitized to penicillin or whose infections are due to staphylococci resistant to other antibiotics, and in non-specific urethritis. 'Rovamycin' is supplied as varnished tablets of 250 mgm. spiramycin base.

**OPENING A NEW
AND QUICKER RELIEF
FOR SKIN DISORDERS**

The effectiveness of

Hydro-Adreson Ointment

is due to

- ★ the hydrocortisone being included in
- ★ the **Neutral Base**, thus any skin irritation due to acidity or alkalinity is avoided.
- ★ **The Smooth and Pliable Consistency** which allows adequate coverage without additional injury from friction to already damaged tissue.

This special bland base is free from excessive greasiness.

The Hydrocortisone it contains is now the acknowledged treatment of choice in many skin disorders.

Hydro-Adreson effectively reduces hyperaemia and oedema, relieves pain, and dries up exudative areas. By rapidly relieving irritation the ointment reduces the risk of further damage and infection from scratching and speeds the healing of lesions.

Hydro-Adreson (hydrocortisone free alcohol) ointment is supplied in tubes of 5 gm. or 15 gm. in two concentrations of 1% (10 mg. per gm.) or 2.5% (25 mg. per gm.).

Cool-headed Therapy

It is often necessary to calm a feverish patient in addition to lowering his temperature.

Veganin is not only an antipyretic but also contains codeine phosphate to exert a sedative effect. The three ingredients of Veganin are carefully balanced to ensure maximum effect for the least dose. Under their synergistic influence, the patient is quickly soothed and his temperature safely reduced.

ACTIVE PRINCIPLES: *Acetylsalicylic acid 250 mg. Phenacetin 250 mg. Codeine phosph. 10 mg.*

DOSE: *1 or 2 tablets, 2 or 3 times a day, depending on the severity of the pain.*

PACKING: *Packs of 10, 20 and 50 tablets. Dispensing packs of 100 and 500 tablets available to chemists.*

CARNATION MILK FOR INFANT FEEDING

The digestibility of Carnation Milk

CURD FORMATION

1 Breast Milk

2 Carnation Milk diluted to
whole milk value

3 Pasteurised Milk

The milk in each flask has been curdled by the addition of pepsin. Whilst precipitating, the milks were stirred constantly. This simulated the conditions occurring in an infant's stomach. Breast milk and Carnation Milk remain liquid with a suspension of very fine curds. Pasteurised milk curdles into a solid mass. Boiled milk produces curds intermediate in size and texture between those of Carnation Milk and pasteurised milk.

Due solely to processing, Carnation Milk produces a unique curd formation — tensionless, flocculent. *The modification of cow's milk proteins essential for this curd formation occurs during the final sterilising — a process exclusive to evaporated milk.* This terminal heating induces:—

1 An increase in casein particle size together with expulsion of some "bound" water.

2 A change in the calcium salts in which there is a combining action with the phosphate ions to form colloid or semi-colloid phosphates of calcium.

These changes result in (a) soft curd properties when Carnation is acted upon by hydrogen ions in the range of gastric acidity, and (b) a reduced intensity of the

calcium-casein coagulating mechanism. The extreme range of digestibility and tolerance of proteins, as found in Carnation Milk, is the practical advantage at the disposal of all physicians who are concerned with infant feeding. Other highly desirable advantages to those prescribing Carnation are:—

- 1 Safety, because of sterilisation *after* the Carnation cans are sealed.
- 2 Hypo-allergenic properties.
- 3 Uniformity — due to standardisation of solids.
- 4 Prophylactic D₃.
- 5 Permanently emulsified butterfat.
- 6 Accuracy of measurement.

"The Feeding of Infants" — a book specially for doctors — together with reprints of clinical investigations and Carnation feeding charts are available from:— Medical Department, General Milk Products Limited, Bush House, Aldwych, London, W.C.2.

In Barbiturate Poisoning

SOME MEDICAL OPINIONS

The management of a case of prolonged barbiturate coma presents a serious problem in a busy over-crowded hospital. Our new method of treatment helps by bringing such a patient in two hours to a desired state of light anaesthesia—the "safe state"—from which spontaneous recovery to full consciousness usually occurs within eight hours.

(1955) *Brit. Med. J.*, i, 1238.

'Megimide' is a barbiturate antagonist of real clinical worth. To omit to use it in the treatment of barbiturate poisoning is to run the risk of the broncho-pneumonia that is so often fatal in such cases.

(1955) *Lancet*, i, 181

Treatment with 'Megimide' and 'Daptazole' is quickly effective in reversing the most severe respiratory and circulatory depression accompanying barbiturate intoxication.

(1955) *Brit. Med. J.*, i, 1238

The combination of 'Megimide' and 'Daptazole' is effective in severe barbiturate poisoning, and the intermittent method of administration provides a wide margin of safety.

In the Service...

Research

The House of Wander continues to maintain its advanced position in pharmaceuticals and quality food products because the standardization of active ingredients during manufacture is backed by careful control and investigation in its extensive Research Laboratories.

In Quality

The Wander Research Laboratories have made useful contributions in the fields of dietetics, nutrition and vitamins. Their wide experience and up-to-date laboratory facilities help to maintain the high quality of Malt Extract and Cod Liver Oil (Wander), the vitamin content of which exceeds that of the analogous B.P. preparations.

The special consideration of physicians when prescribing a malt and oil preparation is that of vitamin values. Comparative studies prove that to prescribe "Wander Brand" is to specify malt extract and cod liver oil of the finest possible quality.

In the Service of Medicine

Careful control and investigation help to maintain "Wander Brand" in the forefront of its class. Moreover, with all its special advantages, "Wander Brand" costs no more than some malt and oil preparations with a lower vitamin content.

Pixcyl and Psorox

Coal Tar has long been accepted as one of the most effective medications for use as a topical application in the treatment of Psoriasis.

The Genatosan tar fractions incorporated in Pixcyl, Psorox, Genisol and Sebigen, offer tar therapy without many of the disadvantages associated with crude coal tar. Extensively screened against sensitization, and in bases to suit each phase of the disorder, they offer the physician the three essential factors in his choice of an effective topical application that combine to give a suitable approach to Psoriasis.

Pixcyl, Psorox, Genisol and Sebigen are all available on E.C.10.

Pixcyl	Containing : Purified tar fractions (equivalent to crude coal tar) 3% Salicylic acid <i>B.P.</i> 1% Starch <i>B.P.</i> 11.5% Zinc oxide <i>B.P.</i> 11.5% Non drying base.

SAFE SYMPTOMATIC RELIEF FOR THE ANXIOUS PATIENT

OBLIVON-C is a new, long-acting derivative of Oblivon in tablet form, with the same wide margin of safety and freedom from side effects. In the treatment of anxiety states OBLIVON-C gives day-long freedom from tension and creates a climate of confidence in which simple reassurance can be accepted.

presentation: *OBLIVON-C is presented as Ovets, each containing 100 mg. of methylpentynol carbamate. Containers of 100.*

dose: *1-2 100 mg. Ovets three times a day and 2-4 Ovets at bedtime.*

Favoured Treatment

THE little luxuries extended to ailing children do not often include an ingratiating medicine. There is a need for palatable and harmless forms of the drugs given to young patients. Aspirin, one of the commonest, is, for instance, one of the most unpleasant, and can be harmful to the delicate gastric mucosa.

On the other hand, most children will readily take aspirin in the form of *Junior Paynocil*. These tablets are really pleasant to take; they disperse instantly on the tongue without water, and minimise the risk of gastric irritation due to aspirin.

**Junior
PAYNOCIL**

Junior Paynocil tablets each contain $2\frac{1}{2}$ grains of aspirin and $1\frac{1}{4}$ grains of glycine. Besides speeding disintegration and eliminating the unpleasant aspirin flavour, glycine confers on each aspirin particle a lubricant, demulcent and protective barrier.

MICTINE*

Effective,
Non-Mercurial
Oral Diuretic

STRUCTURE

"Mictine," brand of aminometradine, is 1-allyl-3-ethyl-6-aminotetrahydropyrimidinedione. It avoids the undesirable side-effects associated with mercurial, xanthine or sulphonamide agents.

ACTION AND EFFECTIVENESS

"Mictine" is believed to act by inhibition of sodium ion absorption in the renal tubule. In therapeutic dosage it has not caused any effect on glomerular filtration rate, renal plasma flow, cardiac output, heart rate or blood pressure, nor any alteration in the blood or blood-forming tissues or in renal or hepatic function. In a group of unselected patients 70 per cent. may be expected to respond to "Mictine".

TOLERANCE

"Mictine" is not toxic at therapeutic dosages. On the other hand, side-effects do occur such as headache and gastro-intestinal symptoms. These are reduced to a minimum if an interrupted dosage scheme is adopted.

ADMINISTRATION

"Mictine" is indicated in the maintenance of an oedema-free state in any patient requiring diuretic therapy and the effecting of initial diuresis in all patients but those with severe congestive failure. For these purposes the dosage is one to four tablets daily in divided doses *during meals* on alternate

THE NEPHRON UNIT

days or on three successive days followed by four days without therapy. "Mictine" is not intended to produce initial diuresis in more severe congestive failure; however, "Mictine" may be given when other diuretics are contra-indicated, or if tolerance to them has developed.

Available in bottles of 25, 100 and 500 tablets each containing 200 mg. aminometradine.

VAPOMIST solves

a penetrating problem . . .

A MAJOR OBSTACLE to the efficacy of nasal sprays has always been the lack of power to penetrate where there is a heavy congestion of mucus.

In VapoMist—a new product of Vick research—this obstacle has been overcome by Cetamium—a penetrating agent which lowers surface tension. Cetamium—the Vick Trade name for Cetylpyridinium Chloride—is already known to you as a bactericidal compound. Cetamium helps the medicaments in VapoMist—including the vasoconstrictors, Ephedrine and Phenylephrine Hydrochloride—to penetrate quickly to swollen nasal mucosa, giving faster and more thorough relief than could otherwise be achieved. This relief continues for up to four hours or more.

Bactericidal advantages of Cetamium

Cetamium has another important advantage. Its strong germicidal action reduces the number of secondary invaders in the nasal region.

Handy to carry . . . Easy to use

VapoMist will be found beneficial in all cases of nasal congestion due to head colds, catarrh, rhinitis, coryza, sinusitis and hay fever. A great advantage is that it can be used anywhere—anytime—just remove the cap, hold to each nostril in turn and squeeze. This convenience in use will prove particularly useful to patients who have experienced difficulty in placing drops in the nostrils. VapoMist is mild, pleasant and safe for adults and children.

Active Ingredients: CETAMIUM* 0.04%, PHENYLEPHRINE HYDROCHLORIDE 0.25%, EPHEDRINE SULPHATE 0.25%, SODIUM PHOSPHATE MONOBASIC 1.12%, SODIUM PHOSPHATE TRIBASIC 0.07%.

*Cetamium is Vick trade-mark for Cetylpyridinium Chloride.

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum. If the post is resident a deduction of £170 per annum is made.

HER MAJESTY'S OVERSEA SERVICE
Kenya**MEDICAL OFFICERS**

with qualifications registrable in United Kingdom required for general duties.

Successful candidates may be posted to any station in Kenya. During earlier years of service an officer will be expected to carry out general medical and surgical duties, including varying amount of public health administration. In most stations, even if remote from larger towns, it is possible to maintain interest in any particular branch of medicine or surgery to which the officer is attracted.

The work of every medical officer is based on a hospital which may vary in size and facilities from small district hospital, meeting needs of comparatively primitive community, to large and modern provincial hospital.

Appointments can be made on permanent basis with pension (non-contributory), or on short-term contract with gratuity (taxable) payable on satisfactory completion of service. Normal retiring age is 55. Salary ranges from £1,284 to £2,115 a year, starting point determined by experience. Four extra increments given to successful candidates possessing the F.R.C.S., M.R.C.P., D.P.H., or other approved higher qualifications.

Permanent Medical Officers are eligible to be considered at any time for promotion to super-scale posts in Kenya and other territories in medical administration or, if they possess higher qualification and suitable experience, in specialist posts.

Quarters at rental varying from £30 to £78 a year according to size and type, and furniture at rate varying from £15 to £36 a year. Free passages in both directions for officer and wife and up to cost of one adult fare for children. Taxation at local rates. Annual local leave permissible and generous home leave granted after each tour of from 24 to 45 months. Educational facilities available.

Application forms from Director of Recruitment, Colonial Office, Great Smith Street, London, S.W.1 (quoting BCD 117/7/02). (5217)
