In Barbiturate Anaesthesia

SOME MEDICAL OPINIONS

'Megimide' rapidly terminates barbiturate anaesthesia without fasciculations or convulsions. 'Megimide' is a barbiturate antagonist of real clinical worth.
(1955) *Lancet*, i, 181

'Megimide' brings about a rapid recovery of consciousness in all cases of patients under light or deep barbiturate anaesthesia. Its greatest value is to reverse the depressant action on the respiratory centre. The use of 'Megimide' has simplified post-operative nursing of anaesthetised cases and is of particular value in a busy surgical ward, especially at night. We recommend its use in casualty, out-patient and dental surgery.
(1956) *Med. Proc.*, Vol. 2, No. 4, 198

Megimide is of value to lighten or terminate the anaesthesia of patients under the influence of barbiturate anaesthetics. With its use, broncho-pneumonia, hitherto the commonest cause of death, is no longer a danger.

POLYBACTRIN

antibiotic powder spray

INVALUABLE IN ALL BRANCHES OF SURGERY

Polybactrin provides a unique and economical means of applying a combination of Zinc Bacitracin, Neomycin Sulphate and Polymixin 'B' Sulphate—the three antibiotics of choice for topical use. The antibiotics are presented in an ultra-fine powder form dispersed under pressure with a propellant, and unlike other means of powder insufflation in common use, there is no risk of contamination of the antibiotics by airborne pathogens obtaining entry into the unit by suction.

A FRACTIONAL RELEASE GIVES COMPLETE DISPERSAL OF POWDER OVER THE WOUND

1. The *Polybactrin* unit offers a new technique for topical application of antibiotic therapy, enabling an efficient, economical and dry coverage of the wound area to be made.
2. The extensive range of bactericidal activity afforded by the triad of bacitracin, neomycin and polymixin gives an extremely wide coverage of wound pathogens without the risk of inducing resistant strains of organisms.
3. *Ps. pyocyanus*, particularly present in burns, is completely inhibited by polymixin, considerably reducing the healing time.
4. *Polybactrin* is not readily absorbed and there is no risk of systemic toxicity occurring.
5. The propellant gas is non-toxic and does not support combustion.
6. There are no contra-indications to the use of *Polybactrin*. Systemic therapy may be given concurrently if necessary.

FORMULA: Each pack contains: Neomycin Sulphate 750 mg. Polymixin 'B' Sulphate 150,000 units. Zinc Bacitracin 37,500 units. Propellant 83.5 g. Net contents 85 g.

Hepovite

**An enriched protein supplement
consisting of proteolysed liver, malt
and vitamins A and D.**

Hepovite contains:

- 1** Proteolysed liver supplying all the essential amino acids, hæmopoietic factors derived from the liver and activated by proteolysis and members of the vitamin B complex (including Vitamin B₁₂).
- 2** Malt extract, supplying carbohydrate & additional vitamin B₁.
- 3** Vitamins A and D.

Hepovite is indicated in:

- 1** Inadequate protein intake: *anorexia, dietary inadequacy e.g. in peptic ulcer diets, food allergies, children intolerant of milk.*
- 2** defective protein absorption: *gastro-intestinal disorders.*
- 3** increased protein loss and/or metabolism: *fevers and infections (including tuberculosis), nephritis, steatorrhæa & sprue, ulcerative colitis, wounds and burns.*
- 4** increased protein requirements: *pregnancy, lactation, pre- and post-operative states.*
- 5** in liver cirrhosis and other liver diseases.

Hepovite has the advantage of being:

- 1** administered by the oral route
- 2** palatable
- 3** soluble (can be taken in milk, soup, etc.)

'MYSOLINE' not only reduces the frequency and severity of epileptic attacks, but also produces a marked sense of well-being. The patient is encouraged to take a renewed and more vigorous interest in life and to become a self-supporting member of the community.

For these reasons it is often advantageous to use 'Mysoline' in cases already controlled by

other drugs, but in which a heightened interest and improvement in performance is desirable.

Universally acknowledged as a major advance, 'Mysoline' is indicated in all the manifestations of epilepsy.

Cases calling for an initial high bactericidal level of penicillin plus prolonged bacteriostatic action confront the doctor with the alternatives—one injection or several. Using a 'fortified' procaine penicillin, a number of daily injections may be necessary—yet with Triplopen one injection only is often sufficient. To this therapeutic action Triplopen adds the two administrative advantages of easy injection and exact dosage.

Milk-alkali drip therapy without a tube

NULACIN

The most effective control of gastric acidity is milk-alkali drip therapy; the most convenient way of obtaining milk-alkali drip therapy is by sucking Nulacin tablets.

Thus, Nulacin is of great value in the treatment of peptic ulcer in the ambulatory patient, and in the prevention of ulcer relapse.

Nulacin tablets are prepared from whole milk combined with dextrans and maltose, and incorporate Magnesium trisilicate 3.5 grs; Magnesium oxide 2.0 grs; Calcium carbonate 2.0 grs; Magnesium carbonate 0.5 grs; Ol. menth. pip. q.s. Their shape, size and consistency are such that, when

they are allowed to dissolve slowly in the mouth, control of gastric acidity can be achieved. Up to three tablets an hour may be required to give continuous neutralization of the gastric contents.

Nulacin tablets are not advertised to the public, have no B.P. equivalent, and may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to Pharmacists is 2/-.) Also available in tubes of 12.

Nulacin is available throughout the British Commonwealth, in the U.S.A. and in many other countries. It is known as Nulactin in Canada and Sweden.

GASTRIC ANALYSIS. Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS. Same patients as in graph on left, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

Elastoplast Bandaging Technique

in the treatment of

Sprains

TWO SOLUTIONS of everyday first aid problems are illustrated below, using Elastoplast elastic adhesive bandages and plasters. The tidy, effective result is typical of the modern approach in the treatment of sprains.

SPLINT METHOD

in the treatment of Finger Sprains

The injured finger is strapped to an adjacent uninjured finger by two strips cut from a 1" wide Elastoplast Plaster. The strapping is applied transversely around the two fully extended fingers so that the interphalangeal joints are not covered. Lateral movement of the injured joint is impossible; but flexion and extension are unimpaired.

SUPPORT

for Sprained Wrist

Bandaging consists essentially of figure-of-eight turns round hand and wrist—alternate turns slit to accommodate the thumb.

Elastoplast elastic adhesive bandages (Porous) are available in 3 yard lengths and 2", 2½", 3" and 4" widths. (Prescribable on Form E.C.10)

Outside the British Commonwealth Elastoplast is known as Tensoplast

A REALLY INVITING SOFT DIET MENU!

Egg poached in Heinz Strained Tomato Soup to begin with. And for the second course, Heinz Strained Apricots set into a mould with gelatine. Enough to make the most finicky patient's mouth water!

Few patients like the idea of a soft diet. But you'll find they do cheer up and take an interest when you tell them about Heinz Strained Foods.

These ready-to-serve, appetizing foods contain no spices or strong-flavoured seasonings. They are just freshly gathered fruits and vegetables, and choice meats, cooked to retain the maximum flavour and nutritional values. In fact the scientific care that goes into them makes them better than most home-prepared diets. The exact nutritional values of each variety of Heinz Strained Foods are set out in a special booklet. Please write for a free copy.

THEODROX

Simplifies

**oral aminophylline therapy . . .
by producing High Blood Levels
without gastric distress**

BLOOD LEVELS OF AMINOPHYLLINE (expressed as theophylline)
—produced by three methods

The valuable properties of aminophylline can now be utilized to the full, simply and effectively—by the *oral* administration of 'Theodrox'. The serious disadvantage associated with the oral dosage of *plain* aminophylline—acute gastric distress—has been overcome. A high blood level of the active component, theophylline—such as could be obtained satisfactorily only by parenteral administration—is now possible. 'Theodrox' contains aminophylline combined with specially prepared aluminium hydroxide, and gastric discomfort is reduced to a minimum. When a degree of sedation is also required, tablets of 'Theodrox' With Phenobarbitone (containing gr. $\frac{1}{2}$ phenobarbitone) are indicated.

'Theodrox' tablets each contain gr. 3 aminophylline, and both forms of 'Theodrox' are available in bottles of 25, 100 and 1,000.

INDICATIONS

For the treatment of Bronchial or Cardiac Asthma; as a diuretic in Congestive Heart Failure; as a supplement to emergency treatment in Status Asthmaticus; Angina Pectoris.

Shortening the road to recovery

Among the legacies of shock, injury, burns, surgery, severe infection and other conditions of extra-ordinary physiological stress is a period when the body's defences are severely taxed. In such conditions tissue depletion of ascorbic acid and the B-complex vitamins often occurs, hindering antibody production and tissue repair. Such situations can be safely surmounted with STRESSCAPS—the new LEDERLE formula combining five essential factors in effective therapeutic amounts. One or two capsules daily will usually overcome the vitamin deficiency and prove the real value of STRESSCAPS in shortening the road to recovery.

Does Treatment create Abnormalities?

.....

“**I** GOT instant relief: digestion returned to normal within a week.” Such a report by a patient would certainly give his doctor satisfaction. But in a case of peptic ulcer, where the treatment has been with an antacid, have we the right to be so uncritically confident? All body functions are delicately balanced, and gastric function is no exception. In the period of symptoms, there may have been too much acid—an abnormality. A strong antacid will relieve pain, but if too much acid has become too little acid, we again have abnormality—an abnormality moreover, which may stimulate further acid secretion and eventually render permanent an otherwise temporary disability.

Such an abnormality cannot be accepted merely because it is not associated with symptoms. The pain of appendicitis can be killed with morphia, but this does not cure the appendicitis. Can one be sure that the patient's response to treatment with an antacid is not actually associated with a further disturbance of gastric function? Does the subjective response truly reflect the actual conditions in the stomach?

The one safe antacid therapy in the present state of knowledge is that which restores gastric acidity to normal and at the same time prevents autolytic digestion. The only satisfactory compound known to us which does this is Bismuth Aluminate $\text{Bi}_2(\text{Al}_2\text{O}_4)_3 \cdot 10\text{H}_2\text{O}$, now available to the medical profession under the name Bislumina. This preparation has been placed in Category 3 by The Ministry of Health Standing Joint Committee and is prescribable on Form E.C.10.

Night attack

The angina patient goes to bed in fear and may wake in agony. Peritrate prophylaxis can ease his mind considerably. Since Peritrate is a *long-lasting* coronary vasodilator, a single dose affords protection for as long as 4 to 5 hours . . . a considerable part of the night. Peritrate will not abort attacks completely — but it prevents attacks or reduces their severity in up to 80% of cases. Exercise tolerance is increased, nitroglycerin intake is reduced and very few side-effects occur.

CARNATION MILK
for Infant Feeding

The advantages of Homogenisation

1. Breast Milk

2. Carnation Milk diluted to
whole milk standard

3. Cows' Milk

The reduced reproductions of photo-micrographs above (originally magnified 560 times) show a direct comparison between the fat globule size and distribution in breast milk, Carnation Milk and cows' milk. It will be seen that the homogenisation process given Carnation Milk breaks down the large globules of ordinary cows' milk and distributes them evenly.

The fat globules of ordinary cows' milk average 5 microns. Carnation globules after homogenisation average 1 micron, and this reduction in size increases the total number of fat globules by a minimum of 125 times. As only the total surface area of the globules has been increased and not the mass, the attraction between fat and serum exceeds gravitational force and a permanent emulsion is formed. Butterfat, therefore, *cannot* separate out.

The advantages of homogenisation when prescribing Carnation Milk are:

- 1 Fat globule surface area available for enzymic action is increased as much as five times over that of ordinary milks.
- 2 Complete digestion of the butterfat is practically assured and the irritating effect of free fatty acids, so troublesome with ordinary milk, is *eliminated*.
- 3 Miscibility of the fat in Carnation Milk with
 - a Water during feed preparation and without subsequent fat separation.
 - b The contents of the upper digestive tract.
- 4 Reduction below full-cream value removes proportionately the important nutrients carried by butterfat. These are the vitamins A, E and K—the phospholipids and sterols of whole milk. Homogenisation renders a full-cream

milk superior for all infant feeding.

5 Feeding bottles are easily cleaned by even inexperienced mothers. The risk of bacteria entrapped in a fat film is eliminated.

6 The adaptability of Carnation because of homogenisation permits the use of *one* simple milk for *ALL* infant feeding, with the exception of specific intolerances to milk solids other than whey proteins.

Other attributes of Carnation Milk are:

- 1 Safety, because of sterilisation *after* the Carnation cans are sealed.
- 2 Hypo-allergenic properties.
- 3 Uniformity—due to standardisation of solids.
- 4 Prophylactic D₃.
- 5 Accuracy of measurement.

"The Feeding of Infants"—a book specially prepared for doctors—together with reprints of clinical investigations and Carnation feeding charts are available from: Medical Department, General Milk Products Limited, Bush House, Aldwych, London, W.C.2.

PRO-BANTHINE* FOR ANTI-CHOLINERGIC ACTION

A Combined Neuro-Effector and Ganglion Inhibitor

Pro-Banthine consistently controls gastro-intestinal hypermotility and spasm and the attendant symptoms.*

Pro-Banthine is an improved anti-cholinergic compound. Its unique pharmacological properties are a decided advance in the control of the most common symptoms of smooth muscle spasm in all segments of the gastro-intestinal tract.

By controlling excess motility of the gastro-intestinal tract, Pro-Banthine has found wide use¹ in the treatment of peptic ulcer, functional

diarrhoeas, and regional enteritis and ulcerative colitis. It is also valuable in the treatment of pylorospasm and spasm of the sphincter of Oddi.

It was found² that Pro-Banthine orally was an "inhibitor of spontaneous and histamine-stimulated gastric secretion" which "resulted in marked and prolonged inhibition of the motility of the stomach, jejunum and colon . . ."

Therapy with Pro-Banthine is remarkably free from reactions associated with para-sympathetic inhibition. Dryness of the mouth and blurred vision are less severe with Pro-Banthine than with certain other potent anti-cholinergic agents.

In the above series², "Side effects were entirely absent in single doses of 30 or 40 mg. . ."

Pro-Banthine Bromide (2'-diisopropylamino-ethyl xanthene-9-carboxylate methobromide) brand of propantheline bromide, is available in sugar-coated tablets of 15 mg.

For the average patient one tablet of Pro-Banthine (15 mg.) with each meal and two tablets (30 mg.) at bedtime will be adequate. Full literature is available on request. G. D. Searle & Co. Ltd., High Wycombe, Bucks. Tel. High Wycombe 1770.

ANXIETY STATE—*aids to diagnosis*

In a recent medical article*, the following symptoms and signs were put forward as aids to the diagnosis of the anxiety state. They are not diagnostic, but in association with other observations may suggest the diagnosis.

SYMPTOMS

Headache (often localized in the back of the head and neck).
Inability to read or think (inability to concentrate).
Insomnia, dizziness (often resulting from hyperventilation).
Palpitation and tachycardia (often resulting from hyperventilation).
Faintness (often resulting from hyperventilation).
Sense of tightness in the chest (often resulting from hyperventilation).
Anorexia (common), nausea, emesis, diarrhoea, aerophagia.
Abdominal pain, backache, pain and stiffness in the shoulder region.

SIGNS

Sighing, wearing of tinted glasses, bitten fingernails.
Axillary perspiration.

AIDS TO TREATMENT

In the treatment of anxiety and tension, no one disputes the fundamental importance of the simple psychotherapy which the General Practitioner is so well placed to dispense. Yet he, himself, generally recognises the need for a more material adjunct, a tonic and restorative, which will assist the nervous system as well as the organism as a whole. Sanatogen is an active nutrient tonic, and the choice of many physicians in such circumstances. Conversely, the considerable effect of a poor nutritional state on the mental outlook has long been recognised. Here again, the merits of Sanatogen as a high protein tonic nutrient are apparent. Sanatogen contains 95% casein and 5% sodium glycerophosphate; because of its high nutrient value and tonic and restorative effects, it is beneficial in many forms of physical and mental debility.

(PROC. ROY. SOC. MED., 1954 (MAR.), 47,215).

Scorbital is particularly useful for patients who need to take phenobarbitone for a prolonged period. The risk of an accumulation of hangover effects is minimised if Scorbital is prescribed instead of phenobarbitone.

'Infant Feeding
with Evaporated
Milk'.

Safety, simplicity and digestibility in

INFANT FEEDING

Safe—Libby's Evaporated Milk is fresh cow's milk concentrated, sealed in cans and sterilized so that it remains sweet and safe indefinitely. It cannot cause diarrhoea or other digestive symptoms due to bacterial contamination.

Simple—In making the formula, no boiling or straining of the milk is required. It is prepared simply by adding boiled water and granulated sugar.

Easily Digested—Digestibility depends upon low curd tension and small curd particle size.—The sterilization by heat of Libby's Milk is far more effective than is boiling in lowering curd tension.

BUT curd particle size is an even more important index of digestibility than is curd tension, as shown by Doan and co-workers in the United States. Libby's Evaporated Milk, reconstituted with water and curdled with rennin, which approximates conditions occurring in the infant's stomach, remains liquid with suspension of extremely fine curds, similar to human milk, and much finer than curd from boiled or any other kind of cow's milk.

Each specimen was curdled by the addition of rennin. During the precipitation the milks were stirred constantly to simulate conditions in a baby's stomach.

If you have to provide for your own retirement—here's a book that will help you.

The last Budget brought good news of tax concessions for those who have to make their own retirement arrangements. 'The Northern' have devised two new plans to make the most of these important new tax reliefs.

Before you make your own plans, you should in your own interest consult 'The Northern'. Their informative and very helpful booklet "Two New Ways to Provide for Your Retirement" will answer *all* your questions. Get your

A cough elixir for the relief of coughs associated with the upper respiratory tract

Over many years this elixir has proved to be one of the best of its kind in the treatment of troublesome and irritating coughs, and particularly acute and chronic bronchitis and cough associated with pulmonary tuberculosis. A $\frac{1}{4}$ grain of Codeine Phosphate in each fluid drachm has a mild analgesic effect and also helps to induce sleep. The cough reflex is depressed by the action of the Codeine and combined with Terpin Hydrate, Menthof and Pine Oil, together with other essential oils, the resulting elixir assists expectoration, is distinctly sedative and engenders a warming and soothing feeling immediately a dose has been taken.

ELIXIR OF TERPIN WITH CODEINE (WOOLLEY)

FORMULA: Codeine Phosphate B.P., $\frac{1}{4}$ grain. Terpin Hydras B.P.C., $\frac{1}{4}$ grain. Menthof B.P., $\frac{5}{32}$ grain. Oil of Pumlilio Pine B.P.C., $\frac{1}{24}$ minim. Eucalyptol B.P.C., $\frac{1}{16}$ minim. Glycerin B.P., 20 minims. Syrup B.P., 15 minims. Alcohol B.P. 90%, a sufficiency. Flavour and colour, a sufficiency. Water to 1 fluid drachm. **DOSE:** 1 to 2 teaspoonfuls diluted with water.

RYOTOL for Chronic Discharge of the Ear

because

RYOTOL is lethal to *Ps. pyocyanea*, *Staphylococcus aureus*, *Proteus vulgaris* and *Streptococcus pyogenes* found in C.S.O.M. and Otitis Externa.

The presence of *Ps. pyocyanea* has been demonstrated in 90% of cases of chronically discharging ears. This gram-negative, highly resistant organism is unaffected by penicillin, sulphonamides and many other bactericides. It produces abundant pus and is therefore extremely troublesome.

RYOTOL Ear Drops are the outcome of clinical work on humans, following outstanding results obtained in the veterinary field.

Formula:
Monophenyl ether of ethylene glycol 2.0% v/v
Phenylmercuric Nitrate 0.1% w/v
Phenyl-dimethyl iso-pyrazolone 5% w/v
in a stabilised non-irritant base.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners:* £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners:* £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum. If the post is resident a deduction of £170 per annum is made.

HER MAJESTY'S OVERSEA SERVICE
Kenya**MEDICAL OFFICERS**

with qualifications registrable in United Kingdom required for general duties.

Successful candidates may be posted to any station in Kenya. During earlier years of service an officer will be expected to carry out general medical and surgical duties, including varying amount of public health administration. In most stations, even if remote from larger towns, it is possible to maintain interest in any particular branch of medicine or surgery to which the officer is attracted.

The work of every medical officer is based on a hospital which may vary in size and facilities from small district hospital, meeting needs of comparatively primitive community, to large and modern provincial hospital.

Appointments can be made on permanent basis with pension (non-contributory), or on short-term contract with gratuity (taxable) payable on satisfactory completion of service. Normal retiring age is 55. Salary ranges from £1,284 to £2,115 a year, starting point determined by experience. Four extra increments given to successful candidates possessing the F.R.C.S., M.R.C.P., D.P.H., or other approved higher qualifications.

Permanent Medical Officers are eligible to be considered at any time for promotion to super-scale posts in Kenya and other territories in medical administration or, if they possess higher qualification and suitable experience, in specialist posts.

Quarters at rental varying from £30 to £78 a year according to size and type, and furniture at rate varying from £15 to £36 a year. Free passages in both directions for officer and wife and up to cost of one adult fare for children. Taxation at local rates. Annual local leave permissible and generous home leave granted after each tour of from 24 to 45 months. Educational facilities available.

Application forms from Director of Recruitment, Colonial Office, Great Smith Street, London, S.W.1 (quoting BCD 117/7/02). (5217)

OVERSEA (Wanted)

ENGLISHMAN, 30, SINGLE, ONE TOUR Colonial Service, Nigeria, requires post as Company or Estate Medical Officer in Tropics.—Box 2969, B.M.J.

UNIVERSITY AND RESEARCH APPOINTMENTS, etc.**MEDICAL ASSISTANT**

Applications are invited from registered medical practitioners for the position of an Assistant to the Medical Adviser of Bengel Laboratories Limited. The doctor appointed, who need not necessarily have had any experience of the type of work involved, will assist in the carrying out of all the duties of the medical department. These include the initiation and follow-up of clinical trials of the Company's products, advising on the medical aspects of marketing, maintaining an information service, and assisting in the preparation of medical films, etc. The work is varied and interesting, and will involve close liaison with the other medical men employed by the Company.

The successful applicant will be expected to live reasonably near to Holmes Chapel. It is not possible to give the commencing salary exactly, as it will vary considerably according to the age and experience of the applicant, but it will not be less than he might expect to receive in clinical work, and as a guide the lower limit that has been set is £1,000 per annum.

This position, which is pensionable, carries excellent prospects and calls for imaginative ability as well as a sound clinical background. Applications should be sent to the Secretary, Bengel Laboratories Limited, Holmes Chapel, Cheshire, from whom further particulars can be obtained. (6550)

THE UNIVERSITY OF MANCHESTER

Applications are invited for the full-time post of **LECTURER IN NEURO-SURGERY** Salary on a scale rising to £2,000 per annum according to qualification and experience. Duties to commence as soon as possible. The successful applicant will be required to work in the Department of Neuro-Surgery in the Manchester Royal Infirmary, and the Board of Governors of the United Manchester Hospitals may be prepared to negotiate an honorary contract (ungraded) with the person appointed. Applications should be sent, not later than December 31, 1956, to the Registrar, the University, Manchester, 13, from whom particulars and forms of application may be obtained. (6200)

SIR ALFRED FRIPP MEMORIAL FELLOWSHIP

Applications are invited for the Sir Alfred Fripp Memorial Fellowship in Child Psychology tenable at Guy's Hospital. The Fellowship is open to medically qualified men or women under the age of 35, preferably with experience in Paediatrics as well as in Psychological Medicine. Stipend £250 per annum. The appointment is for two years and may be held concurrently with a part-time appointment at Guy's or elsewhere. Applications should be forwarded to the Dean, Guy's Hospital Medical School, S.E.1 (from whom copies of the regulations may be obtained), together with the names of three referees, not later than 15th December, 1956. Candidates should submit with their applications particulars of their previous career and a definite scheme of advanced study or research to be carried out during the tenure of the Fellowship.

THE UNIVERSITY OF SHEFFIELD

A graduate, with suitable training in physiology, biochemistry, pharmacology or chemistry, is required to assist in research in the Department of Pharmacology and Therapeutics, on the effect of drugs on gastric function. Salary in the range of £550 to £750, depending on qualifications and experience. The appointment will be for one year initially, renewable for a further two years. Applications, with details of age, qualifications and experience, and the names and addresses of two referees, should be sent to the Registrar by January 12, 1957. (6459)

• THIRD COLLECTION

with classified contents list to volumes 1, 2 and 3
548 pages. Price 25s. (by post—inland 26s. 6d., overseas 26s.)

This is the third collection of Refresher Course articles for General Practitioners. The sixty articles first appeared in the *British Medical Journal*. Each article is written by an authority in his subject and has been revised to bring it up to date. Their purpose is to remind the practitioner of what is old and well established and to tell him of new developments. The book will also be of service to the specialist who wishes to keep in touch with other branches of medicine, and to students preparing for final examinations. A cumulative classified contents list of all three books in the Refresher Course for General Practitioners series adds to the usefulness of this volume.
