RYOTOL

RYOTOL is lethal to *Ps. pyocyanea*, *Staphylococcus aureus*, *Proteus vulgaris* and *Streptococcus pyogenes* found in C.S.O.M. and Otitis Externa.

The presence of *Ps. pyocyanea* has been demonstrated in 90% of cases of chronically discharging ears. This gram-negative, highly resistant organism is unaffected by penicillin, sulphonamides and many other bactericides. It produces abundant pus and is therefore extremely troublesome.

RYOTOL Ear Drops are the outcome of clinical work on humans, following outstanding results obtained in the veterinary field.

Formula:
Monophenyl ether of ethylene glycol 2.0% w/v
Phenylmercuric Nitrate 0.1% w/v

REHABILITATION LITERATURE 1950-1955

a bibliographic review of the medical care, education, employment, welfare and psychology of handicapped children and adults.

compiled by E. C. GRAHAM and
M. M. MULLEN, *National Society*
for Crippled Children and Adults

The growing emphasis on rehabilitation as a fundamental part of treatment has brought with it an ever-increasing volume of literature. (This) tends to be somewhat scattered, and for this reason a key should be especially welcomed. This book is an annotated bibliography of over 5000 publications in the English language covering all phases of rehabilitation and all types of disorders. . . . Workers in rehabilitation should find it easy to turn up the literature within their own special sphere of interest, and, moreover, gain an idea of what is being done in related fields.

Schools of Psychoanalytic Thought [42s]

DR. RUTH L. MUNROE

Professor of Clinical Psychology
at the City College of New York.

"Ruth Munroe's book differs from most other comparative studies of psychoanalytic viewpoints as physiology differs from anatomy. It is a critical analysis of the ways in which personality can be understood via the unconscious in psychotherapy, and, like all good critiques, does some original theorizing of its own."

RELEASING the surplus

In cardiac oedema and other conditions where excess fluid accumulates in the tissues, DIAMOX acetazolamide can be relied upon to release the surplus promptly and safely. DIAMOX induces diuresis in a novel and highly efficient manner—by inhibiting the enzyme carbonic anhydrase. A single dose will induce a powerful diuretic response, persisting for six to twelve hours—and in many cases of congestive heart failure DIAMOX *alone* is capable of maintaining the patient oedema-free. As clinical experience of DIAMOX grows, more and more applications are revealed—including glaucoma, toxaemias and oedema of pregnancy, epilepsy and premenstrual tension. DIAMOX has also been used in emphysema, drug-induced oedema, renal oedema and obesity.

THE MALPRO MAMMARY PROSTHESIS

(As described in *Journal*, 16th Feb., 1957)

British and Foreign Patents Pending

The MALPRO is an entirely new idea for a mammary prosthesis, invented and perfected by a Mastectomy Patient, and has already been widely acclaimed by the Medical Profession. It is durable, washable and odourless, cannot deflate or "ride up" or become hard or uncomfortable. It conforms to body movements, perfect symmetry is maintained and the wearer can become entirely unaware of its presence. It can even be worn with boned strapless brassières used with décolleté gowns, sun frocks or swim suits. It requires no special fitting as it fits readily into the brassière cup and is made in three sizes to fit the small, medium or large sizes of any well-fitting brassière. Special sizes are made to order.

for the prompt and prolonged
relief of **ASTHMA**

ISO-BRONCHISAN was first produced in 1953 and offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating containing easily dissolved Isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, produces the prompt relief of bronchospasm. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long sustained antispasmodic action on the bronchial smooth muscle.

The "light diet" patient needs protein

KEEPING AN INVALID ON A LIGHT DIET may be no light matter to a busy housewife. Sick people tire quickly of milk foods—and in many cases there is a physical reaction against them.

Brand's Essence is a boon in sickness. It provides a useful protein supplement to the diet, in an ideal form for invalids: a fat-free, appetizing jelly that even the weakest system can rapidly absorb. Ready to serve in various ways, it is delicious just eaten with a spoon, spread on bread and butter, warmed up as a liquid, or mixed with milk.

Brand's Essence doesn't cloy—sick people often enjoy it when they can't take anything else. And it revives appetite amazingly.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

Brand's Essence

BEEF OR CHICKEN

"an approach to the ideal is provided by a slowly dissolving antacid tablet which is lodged between the gum and cheek. Thus, with each act of swallowing, alkali is carried down over the gullet to the stomach. It is remarkable how little is the quantity needed to depress effectively the concentration (pH) of gastric HCl. The first such tablet ('nulacin'). . ."

Practitioner, January, 1957.

NULACIN THERAPY

—Simple, safe, effective

A Nulacin tablet effectively depresses the concentration of gastric HCl in peptic ulcer and other conditions of hyperacidity. It also provides protection against gastric HCl to the otherwise unprotected oesophageal wall and in such conditions as oesophagitis and hiatus hernia.

SUPPLY. Nulacin tablets may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Basic price to N.H.S.: 2/-). Also available in tubes of 12.

the spasmolytic with a specific point of attack

Because the action of Buscopan is specifically upon the hollow organs of the abdomen and the genito-urinary tract it relieves spasm quickly and smoothly without giving rise to unpleasant side-effects. Cases of gastric or duodenal ulcer, renal and biliary colic and spasmodic dysmenorrhoea will respond readily to its action. Accurate differentiation between organic obstruction and spastic conditions is often obtained by the use of Buscopan.
