

NO CASH TO CARRY

Even when you're travelling in the United Kingdom, you'll have quite enough things to look after, without burdening yourself with large sums in cash. And you don't *need* cash—if you're carrying Midland Bank Travellers Cheques. They're safer and can be cashed, as required, at all Midland Bank branches; they are accepted by many hotels and stores; and at the larger stations, British Railways take them in payment of fares. Midland Bank Travellers Cheques can be obtained on demand at all branches of the bank, whether you are a customer or not.

PITMAN MEDICAL

SURGERY

Professors ALLEN, HARKINS, MOYER and RHODES

Under the editorship of four eminent American professors of surgery, contributors from all the leading medical schools in the United States join in this ambitious and outstanding book. The book is a complete survey of the teaching and practice of surgery in the United States today.

The book stresses principles as well as practice and throughout stresses a philosophy of surgery. It is profusely illustrated. That a book of this nature, consisting of 1500 pages, can be priced at the, comparatively, low figure of £5 10s. reflects the confidence felt in the future of this work by all connected with its writing and publication.

PRINCIPLES OF GYNAECOLOGY

By T. N. A. JEFFCOATE, M.D., F.R.C.S.(Edin.), F.R.C.O.G. Pp. viii+669+Index. 436 illustrations. 12 colour plates. 75s. net, by post 2s. 3d. extra.

This is primarily a *practical* work, and the author, a well-known teacher, has drawn on his vast experience to stress and clarify particularly those matters which, he admits himself, are difficult to master. With this eminently personal approach and the author's complete understanding of the reader's problems and its direct and fluent style, the book will carry the advanced student through and beyond the qualifying examinations and become invaluable to the qualified doctor in general practice.

BURNS—Pathology and Therapeutic Applications

By SIMON SEVITT, M.D., M.Sc., M.A., F.R.C.P.I., D.P.H. Pp. viii+336+Index. 85 illustrations. 37s. 6d. net, by post 2s. extra.

This book, the first to be devoted to the pathology of burns, interprets the significance of pathological findings and inter-relates pathology, clinical picture and treatment, not only in thermal burns, but in electrical, chemical and radiation burns. Its essentially modern and practical approach make the work of immense value to all medical men concerned with the burned patient, including surgeons and pathologists, and also to post-graduate students of surgery, pathology and medicine.

HANDBOOK ON HISTOPATHOLOGICAL TECHNIQUE

By C. F. A. CULLING, F.I.M.L.T., F.R.M.S. Pp. x+443+Index. 119 illustrations. 45s. net, by post 1s. 9d. extra.

This book is based on the syllabus for the Final Examination in Histopathological Technique of the Institute of Medical Laboratory Technology, and has been placed on the Institute's list of recommended books for students. It provides in complete and detailed form the practice of histopathological technique, covering a number of additional subjects, such as veterinary histology and museum technique.

AN INTRODUCTION TO MEDICAL LABORATORY TECHNOLOGY (Second Edition)

By F. J. BAKER, F.I.M.L.T., F.I.M.S.T., F.R.M.S., R. E. SILVERTON, A.I.M.L.T., F.R.M.S., and EVELINE D. LUCKCOCK, A.I.M.L.T. Pp. xvi+346+Index. 118 illustrations. 1 colour plate. 35s. net, by post 2s. extra.

This work is the result of the authors' wide personal experience in training student technicians in the laboratories of the Brompton Hospital. It has been written to conform with the requirements of the revised Intermediate Examination of the Institute of Medical Laboratory Technology and it has been added to the Institute's list of recommended books for students.

The principal change in this new edition is the use of English equivalents of the Paris Nomenclature. Whilst this nomenclature has been largely used throughout the text it has not been adopted in its entirety, as modifications will certainly be proposed in the near future. For this reason some of the more familiar terms of the Birmingham Revision have been retained and, where necessary, the equivalent term in the Paris Nomenclature is given in brackets.

An Introduction to Chest Surgery

GEOFFREY FLAVELL

Thoracic Surgeon, The London Hospital

October
320 pages
180 illustrations
30s. net

The need for a concise, comprehensive and yet readable account of modern chest surgery must have been felt increasingly by students, general practitioners and physicians as chest surgery has assumed an ever greater importance in modern medical practice.

This book covers fully the diagnosis and selection of patients for chest surgery and gives clear and often detailed descriptions of pulmonary, cardiac and oesophageal operations, and of pre- and post-operative treatment.

General practitioners will find invaluable the chapters on such subjects of everyday concern as lung cancer, pulmonary suppuration and the surgical management of tuberculosis, mitral stenosis and hiatus hernia.

The illustrations are an important feature and in addition to 52 text-figures there are 128 extremely valuable x-rays.

Recent advances in surgery have been fully considered in the preparation of this new edition, which has been more thoroughly and extensively revised than any of its predecessors. Much new material will be found in nearly every chapter, including accounts of many conditions, such as jejunal diverticulitis, volvulus of the stomach and meconium ileus, not previously described in this book. Three entirely new chapters have been written dealing with the grouping of symptoms in diagnosis; acute abdominal symptoms caused by vascular lesions; and intestinal obstruction in infants.

A SPENCER SUPPORT for Intervertebral Disc

In both conservative and surgical treatment of intervertebral disc, application of a back support is usually indicated.* We invite the surgeons' investigation of Spencer as an adjunct to treatment. Each Spencer is *individually designed, cut and made* for each patient—after a description of the patient's body and posture has been recorded and detailed measurements taken. Thus, individual support requirements are accurately met. The Spencer Spinal Supports shown incorporating rigid Spinal Brace were individually designed for both man and woman patients. Note exterior pelvic binder for added pelvic stability.

... and though there are many, perhaps too many—analgesics available to the practitioner, the balanced properties of Hypon make it a tablet far more effective than most. Extensive tests show that Hypon has the power not only to relieve pain but to do so very rapidly. Constipation, so often encountered following the administration of codeine is effectively counteracted by the addition of phenolphthalein. Caffeine offsets the depressing effects of aspirin and phenacetin. Hypon is invaluable where prolonged administration is called for (chronic rheumatic conditions for instance). Furthermore, the antipyretic

properties of Hypon tablets are of particular value in the treatment of the febrile states of influenza, tonsillitis...

to the focal point of
soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed.* Transvasin

not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

It is difficult to obtain therapeutically effective blood levels of theophylline by oral administration of aminophylline. They can, however, be achieved easily and reliably using 'Theodrox' tablets, which combine aminophylline with specially prepared aluminium hydroxide gel. The latter delays hydrolysis of aminophylline, and thereby avoids gastric irritation, an advantage which has been demonstrated by widespread clinical usage. As the aminophylline molecule is unchanged, there is no delay in onset of action, and 'Theodrox' is more effective than simple aminophylline therapy.

'Theodrox' is indicated in bronchial or cardiac asthma. It is also indicated as a diuretic in congestive heart failure, and as supplementary therapy in status asthmaticus and angina pectoris.

Each 'Theodrox' tablet contains gr. 3 aminophylline and gr. 4 dried aluminium hydroxide gel.

'Theodrox' with Phenobarbitone tablets contain in addition gr. 4 phenobarbitone.

PROCHLORPERAZINE MALEATE

'Stemetil' is advocated for the prevention of attacks of migraine or to lessen their frequency or severity; for this purpose it is given continuously in low dosage. It may also be used, in a higher dosage, at the prodromal stage, with a view to aborting the attack or relieving the symptoms. Choice of these two methods of use will depend on the frequency of the attacks. The drug is of prophylactic use in those cases wherein attacks of true migraine are induced by emotional upsets such as travelling or excitement. This is not to be confused with headache of psychogenic origin which is not true migraine and appears to be resistant to the drug. 'Stemetil' is also indicated in labyrinthine disorders including Ménière's syndrome, giddiness of other origins (except when due to streptomycin), and vomiting. Possible applications in psychiatry are being studied.

Inability to take aspirin . . .

IT WAS RECENTLY reported (*Brit. med. J.*, 1: 444, 1957) that of 178 rheumatic patients, 25% could not take plain aspirin in adequate dosage.

Of this 25%, however, the great majority tolerated a modified aspirin such as Paynocil.

Not only are Paynocil tablets usually well tolerated by the stomach (even on the heavy dosage needed for rheumatoid arthritis), but they are extremely palatable, disintegrate instantly on the tongue without water, and cause no discomfort or unpleasant after-sensation.

Pixcyl and Psorox

Coal Tar has long been accepted as one of the most effective medications for use as a topical application in the treatment of Psoriasis.

The Genatosan tar fractions incorporated in Pixcyl, Psorox, Genisol and Sebigen, offer tar therapy without many of the disadvantages associated with crude coal tar. Extensively screened against sensitization, and in bases to suit each phase of the disorder, they offer the physician the three essential factors in his choice of an effective topical application that combine to give a suitable approach to Psoriasis.

Pixcyl, Psorox, Genisol and Sebigen are all available on E.C.10.

Pixcyl	Containing : Purified tar fractions (equivalent to crude coal tar) 3% Salicylic acid <i>B.P.</i> 1% Starch <i>B.P.</i> 11.5% Zinc oxide <i>B.P.</i> 11.5% Non-drying base.
---------------	---

Psorox	Containing : Purified tar fractions (equivalent to crude coal tar) 10% Salicylic acid <i>B.P.</i> 3% Ammoniated mercury <i>B.P.</i> 2% w/w Mixed paraffin base.

The original easy-to-take,
two-in-one tablet

for the prompt and prolonged
relief of **ASTHMA**

ISO-BRONCHISAN was first produced in 1953 and offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating containing easily dissolved Isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, produces the prompt relief of bronchospasm. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long sustained antispasmodic action on the bronchial smooth muscle.

ISO-BRONCHISAN

Prescribable on Form E.C.10.

IMMEDIATE RELIEF

PROLONGED ACTION

Each tablet contains Isopropyl-Nor-Adrenaline (Isoprenaline) sulphate gr. 4; Ephedrine hydrochlor. gr. 2.5; Theophylline gr. 2. In tubes of 20 tablets and bottles of 100 tablets. Tablets containing smaller quantities of the effective ingredients are now available for use in Paediatrics.

Obstetrician's Ode

When Obstetricians meet and chat
They talk of this and talk of that.
The treatment mentioned more than others
Is Guinness for the Nursing Mothers.
For Guinness is and Guinness was
The best galactagogue, because
Their cares and worries whisked away
Those Mothers thrive from day to day
(And hope their babes, the little tinkers,
Will also turn out Guinness drinkers !)

NOTE—The therapeutic dose for Lactating Mothers is increased considerably when dealing with Celebrating Fathers !

ANTIBIOTIC HAZARDS

"If lactobacilli can be established, they will certainly make it hard for staphylococci to take charge". *Lancet* Leading Article i (1954) 968.

Enpac, produced after years of research, establishes lactobacilli of solely human origin in the intestine.

Remarkable advance in the control of antibiotic side-effects

ENPAC is a new and unique preparation of antibiotic-resistant strains of *Lactobacillus acidophilus* in a vehicle of the vital growth factors necessary for the strains to become established and multiply in the human gut. When administered during oral antibiotic therapy, these strains replace the intestinal strains of *L. acidophilus*, and an important part of the bacterial flora is maintained intact.

- ★ PROMOTES an acid reaction in the intestine antagonistic to the proliferation of most pathogens
- ★ INHIBITS the multiplication of *Staphylococcus* and *Monilia* and related fungi, and prevents superinfections
- ★ CONTROLS the bacteriological side-effects of oral antibiotic therapy as well as certain intestinal disorders.

EMERGENCIES IN GENERAL PRACTICE

from the
British Medical Journal

470 Pages, cloth bound,
with full index

PRICE 25s. net

by post : inland 26s. 9d., overseas 26s. 6d.

This book deals with medical emergencies in a wide sense: acute clinical emergencies requiring prompt and skilful treatment; conditions such as faints and fits and giddy turns, the careful elucidation of which may mean the difference to a patient between a life of activity and one of restriction; acute psychiatric states; accidents of treatment, such as dangerous reactions to drugs or collapse during anaesthesia; and emergency calls when the doctor is isolated, as on a ship.

It comprises 57 specially commissioned articles which appeared originally in the *British Medical Journal*.

The author of each is an acknowledged authority. This collection, now revised by the authors, will be of value not only to general practitioners but also to senior students, house-physicians, house-surgeons, and to those supervising their work in hospitals.

have pronounced advantages over either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

ADRENOXYL

Reduces the mean bleeding-time

Adrenoxyl reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillary wall.

A dry field at operation

Adrenoxyl has been successful in diminishing capillary bleeding in a wide range of surgical operations. It has proved particularly useful in ear, nose and throat, ophthalmic and plastic surgery. In plastic surgery of the face it has been reported that, post-operatively, there is less swelling and bruising when Adrenoxyl has been used.

No side effects

Adrenoxyl does not have any side effects or contraindications. It does not affect blood coagulation, blood pressure or pulse rate and does not possess any sympathomimetic properties.

In medical conditions

Adrenoxyl has been used with success in those medical conditions associated with capillary fragility.

In the British Medical Journal (April 21st, 1956) a correspondent confirmed the value of Adrenoxyl in providing a dry field for the surgeon and in shortening the duration of the operation.

SOCIETY OF APOTHECARIES OF LONDON (M.M.S.A.)

The Mastery of Midwifery is designed to give evidence of intensive study and practical experience in Ante-natal Care, Midwifery, and Infant Welfare and their relation to Hygiene and Preventive Medicine. The possession of this Diploma will prove of value in private practice and also to candidates for appointments involving the special work described in the preceding paragraph. The tests imposed are stringent; the Examination, written, oral, and clinical, demands thorough and detailed knowledge gained by practical experience, and constitutes a definite endeavour to combat Maternal and Infant Mortality. Examinations are held twice yearly, in the months of May and November. Regulations and forms of application for admission to the Examination may be obtained from the Registrar, the Society of Apothecaries, Black Friars' Lane, E.C.4.

TRAINING IN PSYCHIATRY AT MCGILL UNIVERSITY

The Department of Psychiatry, McGill University, Montreal, has a limited number of openings for training, and applications are now being considered for July 1. Applicants must have graduated from an approved medical school and have had a general internship of one year. The four-year Diploma Course provides general basic preparation during the first two years. The last two years provide special patterns of instruction for those: (a) planning to enter the field of general hospital, community or university psychiatry; (b) preparing themselves for a career in child psychiatry; (c) intending to enter the field of research psychiatry. Credit may be allowed for previous training. Shorter periods of instruction may be arranged, as well as instruction in special fields. Full training in psychoanalysis also may be undertaken within the Department of Psychiatry by suitably prepared candidates. Separate application for this training is required. All those accepted for training are assigned to one of the seven teaching centres in Montreal. These positions carry with them board and lodging, or, in lieu of lodging, a living-out allowance, together with an honorarium ranging from \$60 to \$150 a month, denoting upon the clinical position to which the applicant is assigned. For those in the advanced years of the course, clinical positions carrying higher salaries are available. In several centres additional emoluments of \$1,800 a year are available, mainly in the form of bursaries, these being issued under certain conditions in regard to which information will be given on request. Applicants should write to the Chairman of the Department of Psychiatry, McGill University, Montreal, Canada. (7063)
