# Relief of Rheumatic Pain in General Practice

## 1. Formulation of succinate overcomes toxicity of massive dosage of aspirin

Pain caused by all forms of rheumatism can now be relieved promptly by massive aspirin dosage *without fear of toxicity*. The Berex formulation of aspirin (3.7 gr.) and calcium succinate (2.8 gr.) has overcome this old problem so effectively that your patients can safely administer the drug themselves. Repeated visits to the surgery for supervision of administration are unnecessary.

## 2. Side-effects fewer and milder

Even after prolonged dosage, Berex produces no toxic effects. The prothrombin level is maintained and there is no hæmorrhagic tendency.\* Prolonged periods of relief can be enjoyed in safety. The patient is simply instructed to reduce the initial high dosage as soon as the pain diminishes. Side effects, if present at all, are fewer and milder.

c

## 3. Encourages tissue respiration

Experimentally, by Warburg test, it has been shown that the inhibitory action of salicylate on tissue respiration is completely offset when it is combined with succinate. Succinate encourages cellular respiration and stimulates the respiratory enzyme systems. It is to this stimulating action that the beneficial effect of succinate is attributed.

\* "No abnormal prolongation of prothrombin time even after 68 days of succinate-salicylate." "The results also show that this succinate-salicylate formulation combines safety and efficacy, permitting wide use both for treatment and maintenance without the excessive supervision required in many other forms of therapy."

# Treatment of DIABETES MELLITUS without injections

Rastinon «Hoechst» tablets provide an oral treatment for certain diabetic patients.

**EFFECTIVE** A number of patients on small regular doses of insulin have been found to be suitable for treatment with Rastinon «Hoechst» tablets. Clinical work throughout the world has shown that approximately a quarter of all diabetics can be stabilized on Rastinon «Hoechst» tablets. A few of the more recent references to the literature are given opposite.

**SAFE** The selection and stabilization of diabetic patients should be carried out under strict medical supervision. For those patients found to be suitable, Rastinon «Hoechst» tablets provide a safe form of therapy and many have now been on oral treatment for two years. No cases of proven dyshaemopoiesis or other serious side-effects due to the drug have been reported.

**SIMPLE** From 2 to 4 tablets a day are normally all that is required to replace the insulin with its concomitant syringe, needles, swabs, and often nursing assistance as well. The normal regime of urine examination and dietary control remains necessary.

**Packs:** bottles of 100 and 500 tablets.

The basic price to the National Health Service as dispensed from a 500 tablet bottle is 2.97d per tablet and the total cost to the National Health Service, with all allowances, is less than 4d per tablet.

Each tablet contains 0.5 G. of N-Butyl-N'-toluene-p-sulphonylurea; (Tolbutamide).

## CARNATION MILK for Infant Feeding

# The advantages of Homogenisation

1. Breast Milk

2. Carnation Milk diluted to  
whole milk standard

3. Cows' Milk

The reduced reproductions of photo-micrographs above (originally magnified 560 times) show a direct comparison between the fat globule size and distribution in breast milk, Carnation Milk and cows' milk. It will be seen that the homogenisation process given Carnation Milk breaks down the large globules of ordinary cows' milk and distributes them evenly.

The fat globules of ordinary cows' milk average 5 microns. Carnation globules after homogenisation average 1 micron, and this reduction in size increases the total number of fat globules by a minimum of 125 times. As only the total surface area of the globules has been increased and not the mass, the attraction between fat and serum exceeds gravitational force and a permanent emulsion is formed. Butterfat, therefore, cannot separate out.

### The advantages of homogenisation when prescribing Carnation Milk are:

- 1 Fat globule surface area available for enzymic action is increased as much as five times over that of ordinary milks.
- 2 Complete digestion of the butterfat is practically assured and the irritating effect of free fatty acids, so troublesome with ordinary milk, is eliminated.
- 3 Miscibility of the fat in Carnation Milk with
  - a Water during feed preparation and without subsequent fat separation.
  - b The contents of the upper digestive tract.
- 4 Reduction below full-cream value removes proportionately the important nutrients carried by butterfat. These are the vitamins A, E and K — the phospholipids and sterols of whole milk. Homogenisation renders a full-cream

milk superior for all infant feeding.

5 Feeding bottles are easily cleaned by even inexperienced mothers. The risk of bacteria entrapped in a fat film is eliminated.

6 The adaptability of Carnation because of homogenisation permits the use of one simple milk for ALL infant feeding, with the exception of specific intolerances to milk solids other than whey proteins.

### Other attributes of Carnation Milk are:

- 1 Safety, because of sterilisation after the Carnation cans are sealed.
- 2 Hypo-allergenic properties.
- 3 Uniformity — due to standardisation of solids.
- 4 Prophylactic D<sub>3</sub>.
- 5 Accuracy of measurement.

"The Feeding of Infants" — a book specially prepared for doctors — together with reprints of clinical investigations and Carnation feeding charts are available from: Medical Department, General Milk Products Limited, Bush House, Aldwych, London, W.C.2.

Oral Diuretic

## STRUCTURE

"Mictine," brand of aminometradine, is 1-allyl-3-ethyl-6-aminotetrahydropyrimidinedione. It avoids the undesirable side-effects associated with mercurial, xanthine or sulphonamide agents.

## ACTION AND EFFECTIVENESS

"Mictine" is believed to act by inhibition of sodium ion absorption in the renal tubule. In therapeutic dosage it has not caused any effect on glomerular filtration rate, renal plasma flow, cardiac output, heart rate or blood pressure, nor any alteration in the blood or blood-forming tissues or in renal or hepatic function. In a group of unselected patients 70 per cent. may be expected to respond to "Mictine".

## TOLERANCE

"Mictine" is not toxic at therapeutic dosages. On the other hand, side-effects do occur such as headache and gastro-intestinal symptoms. These are reduced to a minimum if an interrupted dosage scheme is adopted.

## ADMINISTRATION

"Mictine" is indicated in the maintenance of an oedema-free state in any patient requiring diuretic therapy and the effecting of initial diuresis in all patients but those with severe congestive failure. For these purposes the dosage is one to four tablets daily in divided doses *during meals* on alternate

days or on three successive days followed by four days without therapy. "Mictine" is not intended to produce initial diuresis in more severe congestive failure; however, "Mictine" may be given when other diuretics are contra-indicated, or if tolerance to them has developed.

Available in bottles of 25, 100 and 500 tablets each containing 200 mg. aminometradine.

# Equaprin

PREVENTS PAIN

---

Equaprin offers a unique approach towards the ideal analgesic for the control of chronic pain that may arise in conditions such as tension states, menstrual disorders, influenza and rheumatoid arthritis. It prevents pain from reaching troublesome proportions by dealing with not just the somatic but also with the psychological aspects of the problem, thus enabling your patients to face up to continuing with their normal mode of life.

Equaprin is a logical combination of the safe, selective sedative and muscle relaxant, meprobamate, with that re-established and accepted all-purpose analgesic, aspirin. Used together, both compounds have a complementary action, and preliminary clinical observations confirm that *Equaprin is more effective in more cases* than either constituent used alone.

### **Research**

The House of Wander continues to maintain its advanced position in pharmaceuticals and quality food products because the standardization of active ingredients during manufacture is backed by careful control and investigation in its extensive Research Laboratories.

### **In Quality**

The Wander Research Laboratories have made useful contributions in the fields of dietetics, nutrition and vitamins. Their wide experience and up-to-date laboratory facilities help to maintain the high quality of Malt Extract and Cod Liver Oil (Wander), the vitamin content of which exceeds that of the analogous B.P. preparations.

The special consideration of physicians when prescribing a malt and oil preparation is that of vitamin values. Comparative studies prove that to prescribe "Wander Brand" is to specify malt extract and cod liver oil of the finest possible quality.

### **In the Service of Medicine**

Careful control and investigation help to maintain "Wander Brand" in the forefront of its class. Moreover, with all its special advantages, "Wander Brand" costs no more than some malt and oil preparations with a lower vitamin content.

# A logical treatment for coughs and colds

*A decongestive salve, Thoracin, for the symptomatic relief of coughs, colds and respiratory disorders*

Most doctors would agree that an externally applied remedy that passes through the skin direct to the bloodstream would have marked advantages over an oral preparation that may upset the digestive apparatus.

The decongestive salve, Thoracin, has just these advantages. Thoracin contains a new ester of guaiacol. This ester, being fat- and water-soluble, easily penetrates the skin, passes into the bloodstream and is quickly carried to the root of the trouble—the alveoli, bronchioles and bronchi of the lung.

Thoracin causes a vasodilation of the superficial skin vessels by the use of esters of nicotinic acid. It achieves the effect of the classic counter-irritant remedies—poultices, plasters and cupping—without irritation of the skin.

Thoracin contains the tetrahydrofurfuryl ester of salicylic acid, which relieves the pain caused by reflex spasm of the pectoral muscles. It also brings to the alveoli via the bloodstream the sedative, antispasmodic and expectorant properties of camphor, eucalyptus, and guaiacol.

## ***Especially suitable for children***

Thoracin is available in 1 oz. tubes, price 4/3. It is not advertised to the public. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. The cream vanishes instantly and does not mark or stain clothing.

# THORACIN

Made by the makers of Transvasin

*Thoracin can be safely used on the most delicate skins, so it is particularly suitable for children. It is always easier to apply a soothing ointment locally to a child than to administer a dose of medicine.*

## HOW THORACIN WORKS

*The esters in Thoracin pass through the skin to the blood vessels and are carried to the heart and thus on to the lungs. Here they are excreted through the bronchial passages and come out in vaporized form through the nose and throat, easing congestion, loosening mucus and soothing irritation*

## Droxalin palatability in peptic ulcer

IN PEPTIC ULCER, carefully regulated medication is often interrupted by the patient's distaste for an acid adsorbent. Bland and palatable, DROXALIN TABLETS overcome this difficulty. The patient's ready acceptance of DROXALIN is also of particular value in treating Hyperacidity and Sickness of Pregnancy.

DROXALIN combines the two most preferred acid adsorbents—Aluminium Hydroxide and Magnesium Trisilicate. Pleasantly flavoured, the DROXALIN tablet has none of the grittiness or the metallic taste usually associated with Aluminium Hydroxide therapy.

DROXALIN gives quick relief from pain by rapid acid absorption\* without danger of secondary acid rise or other harmful side effects.

DROXALIN TABLETS are hygienically packed in film seals of six, enabling patients to put them in pocket or handbag.

### ACTIVE INGREDIENTS

Gelat. Alumin. . . . . 2.5 gr.  
Mag. Trisil . . . . . 2.5 gr.

# GLAXO ASIAN INFLUENZA VACCINE PRODUCTION

Priority production of an Asian influenza vaccine is going on at two Glaxo units. Initially this product is being distributed by the Ministry of Health but it is hoped shortly to make supplies available towards meeting prescription demands.

## MAKING THE VACCINE

**1** The virus from which the Glaxo vaccine is prepared. Influenza Virus A (Asian strain) designated A/Singapore/1/57. Photomicrograph of particles x 34,000.

**2** Inoculation of fertile hens' eggs with the virus.

**3** Harvesting of virus fluid. The virus is killed with formalin and suspended on aluminium phosphate.

**4** The potency of the final vaccine is standardized by haemagglutination.

# Is there a 'Bronco' in the house ?

"Yes, dear. We use Bronco like your Mummy."

"Why, Auntie?"

Thinking of the vitally important reason—that Bronco, though so gentle, does not disintegrate like an over-soft tissue and is, therefore, perfectly hygienic—Auntie said:

"Bronco is safest and best, dear—especially for little girls and boys!"

★ The 1/3d. Bronco roll gives you 500 sheets—two hundred more than most rolls of over-soft tissue.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.  
Canvassing in any form will disqualify.

★*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.
