## How to give 'the very thing'

—when you don't know what he wants

TRUST A YOUNGSTER to have the right idea about money . . . to see it only in terms of what it will buy. That's why it is so completely right to give Midland Bank Gift Cheques. They're gay and cheerful and unmistakably Christmas-y; yet they can so easily be translated into 'the very thing' his heart desires because any branch will cash on sight Gift Cheques up to the value of £10. For that reason alone, Midland Bank Gift Cheques are surely 'the very thing' for *you* to give this Christmas. Anyone—repeat, *anyone*—can buy them at any branch of the Midland Bank and for any amount. They only cost 1/- plus the amount you want to give. If you'd like to know more about this unique Midland Bank service, ask or write for the colourful descriptive leaflet.

## ... a medical problem

**DANDRUFF** (*seborrhoeic dermatitis of the scalp*) is a medical problem which you can treat effectively. Although your patients may never think of asking your advice, your prescription for SELSUN Suspension can give them lasting relief from dandruff—quickly, easily and economically.

Just a few SELSUN applications relieve itching, burning and scaling symptoms. Once the scalp is restored to health, SELSUN keeps it free of scales from one to four weeks with each application.

SELSUN control lasts. 82% of patients in a clinical study had no recurrence of seborrhoeic dermatitis even after they had used SELSUN for two years.

Simple and pleasant to use, SELSUN is applied and rinsed out while washing the hair—it takes only about five minutes.

SELSUN Suspension is available, with complete directions for use in 2 fl. oz. and 4 fl. oz. bottles.

## CLINICAL ELECTROCARDIOGRAPHY

R. P. GRANT Head of the Section on Cardiodynamics  
National Heart Institute, Maryland

This is a practical book, covering all aspects of clinical electrocardiography and suitable for beginners as well as more advanced students. Sufficient theoretical material is included to make the clinical applications understandable, but this is kept to a minimum. The book shows how the vector method, which is thoroughly explained, makes clinical interpretation of tracings much easier.

For the beginner, this book eliminates the necessity for memorizing 'patterns' of the deflections on the various leads, thus greatly simplifying the learning of clinical electrocardiography. For the specialist, it provides the only method so far available for determining the value of follow-up tracings or for studying unfamiliar changes in one of the leads. The childhood electrocardiograms and the electrocardiographic aspects of congenital heart disease are also discussed. The book will therefore be of value to cardiologists as well as general practitioners and students of heart disease.

# The esters of NICOTINIC, SALICYLIC and p-AMINO BENZOIC acids bring relief to cases of arthritis and rheumatism

"Thank you, doctor"

**I**N CASES OF soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

*Patent pending*

### VARICOSE ULCERS

The non-adhering properties of Johnson's 'N-A' Dressings, used in conjunction with Gauze and JOHNSON'S POROUS ELASTIC ADHESIVE BANDAGES, prevent healthy granulating tissues from being disturbed when wounds are re-dressed. Dressing needs to be done less often and healing is quicker. The free passage of exudates is facilitated and there is no maceration of tissues.

### BURNS AND GENERAL PURPOSES

Johnson's 'N-A' dressings have been used in burn treatment and also for cuts and abrasions for which they have proved of particular value because of their non-adhering and non-macerating properties.

## PREVENTS MACERATION ALLOWS FREE DRAINAGE PROMOTES QUICKER HEALING

Johnson's 'N-A' Dressing is a pure rayon dressing which is non-adhering. This property, together with the essential requirement of allowing free drainage of exudates (resulting in freedom from maceration), makes this dressing superior to traditional materials. Johnson's 'N-A' Dressings are sterilized, unmedicated, and do not disturb healing tissues.

**Carnation Milk for infant feeding**

# The advantages of Standardisation

The diagram above shows the percentage of solids in Carnation Milk. The total solids are standardised, as required by law, to a minimum of 31%.

Of this figure 9% must be butterfat. Previous Carnation advertisements have demonstrated that, chemically and physically, ordinary milks cannot compete with the range of tolerance and digestibility of the proteins and butterfat in Carnation Milk. These superiorities in an infant food are enhanced by the uniformity obtained by standardisation.

Uniformity in practice means:—

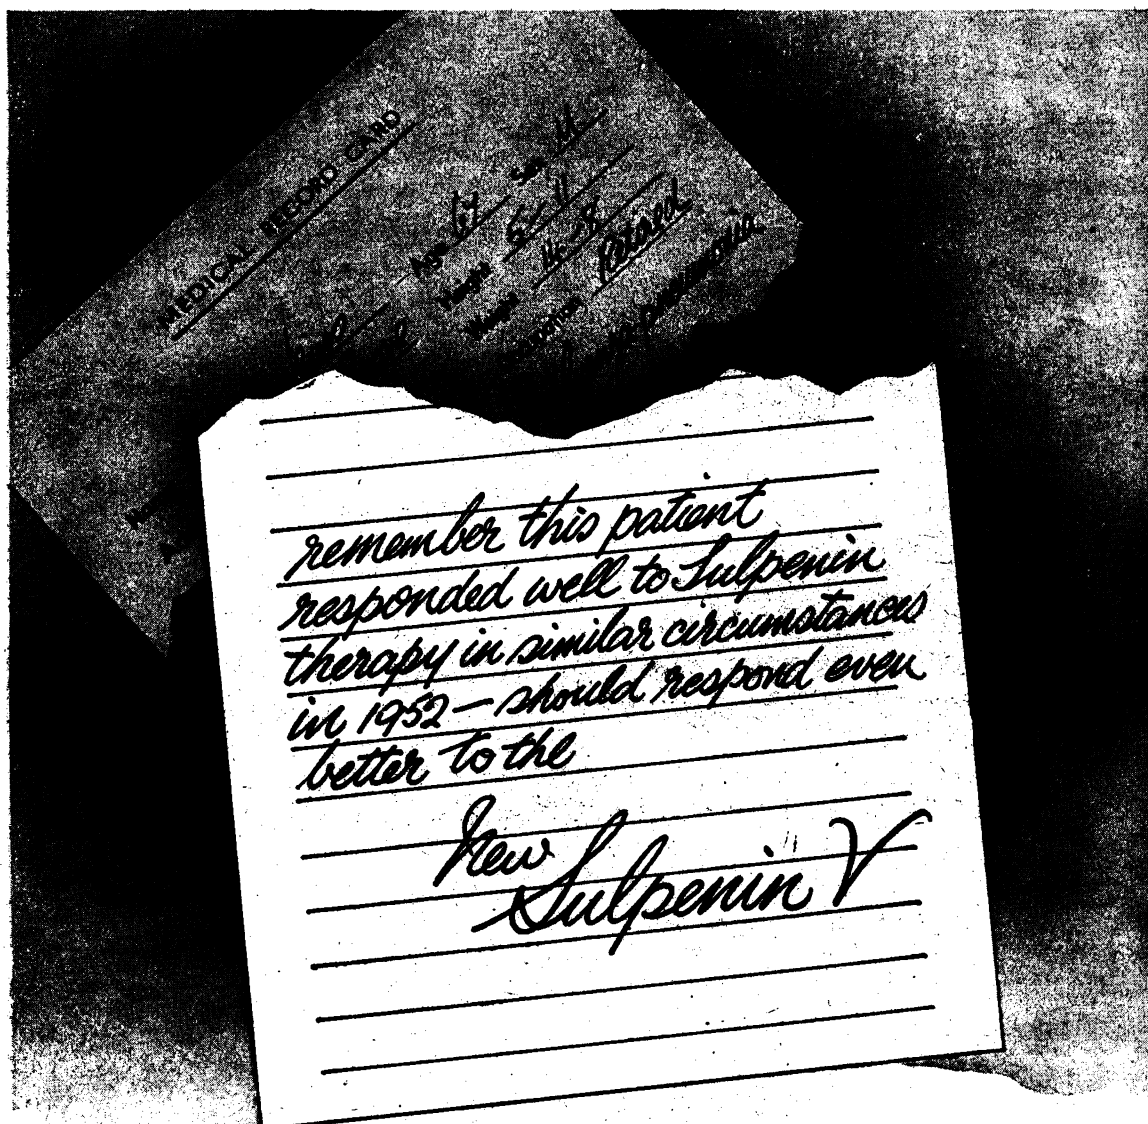

1. Constant calorie value.
2. Accuracy and ease of measurement.
3. Control of intake where necessary.
4. Precision in dilution.
5. A milk of known value at all times — and available everywhere.

Other attributes of Carnation Milk are:—  
— Safety, because of sterilisation after the Carnation cans are sealed —  
— Hypo-allergenic properties  
— Homogenisation — Prophylactic D<sub>3</sub>.

## TETRACYCLINE

## to the very best advantage

Medical history has already reserved a special place for ACHROMYCIN tetracycline because of its impressive therapeutic potency and remarkably broad spectrum. Now, with the advent of ACHROMYCIN V, the therapeutic merits of tetracycline are turned to still greater advantage. Presenting tetracycline in company with sodium metaphosphate, ACHROMYCIN V achieves swifter, more efficient, more complete absorption. As a result, the therapy becomes still more secure, without any increase in daily dosage or cost. Customary adult dosage is a single capsule (250 mg.) four times daily—though this may safely be increased in unusually severe conditions.

**PROCHLORPERAZINE MALEATE**

'Stemetil' is advocated for the prevention of attacks of migraine or to lessen their frequency or severity; for this purpose it is given continuously in low dosage. It may also be used, in a higher dosage, at the prodromal stage, with a view to aborting the attack or relieving the symptoms. Choice of these two methods of use will depend on the frequency of the attacks. The drug is of prophylactic use in those cases wherein attacks of true migraine are induced by emotional upsets such as travelling or excitement. This is not to be confused with headache of psychogenic origin which is not true migraine and appears to be resistant to the drug. 'Stemetil' is also indicated in labyrinthine disorders including Ménière's syndrome, giddiness of other origins (except when due to streptomycin), and vomiting. Possible applications in psychiatry are being studied.

# **'RAUWILOID'**

is essential  
for Hypertension

'Rauwiloid', a purified and standardised fraction of Rauwolfia serpentina alkaloids, can be considered a basic treatment for hypertension. It lowers blood pressure more effectively than phenobarbitone or its combinations with theobromine and is less likely to cause depression than reserpine.

#### **IMPORTANT**

'Rauwiloid' may require more than a week for a significant anti-hypertensive effect to develop. Any previous treatment, particularly barbiturate, should be gradually reduced over this period.

#### **In Mild to Moderate Hypertension**

In most cases 'Rauwiloid' will provide adequate control by itself. Combination therapy is not necessary.

#### **In Moderate to Severe Hypertension**

When a greater hypotensive effect is required, 'Rauwiloid' should be combined with veratrum in the form of 'Rauwiloid + Veriloid'. 'Veriloid' is a biologically standardised alkaloidal extract of Veratrum viride. Such a combination with 'Rauwiloid' enables adequate doses of veratrum to be given for a satisfactory hypotensive response.  
(See detailed literature).

#### **In Severe or Malignant Hypertension**

'Rauwiloid' used in conjunction with ganglionic blocking agents enables a smaller dose of the more potent medicament to be used, thereby minimising side-effects and decreasing the tendency for tolerance to develop.

'Rauwiloid' is available in 2 mg. tablets in bottles of 60 and 500.  
Dosage, two tablets at night.

'Rauwiloid' and 'Veriloid' are registered trade marks

## unrivalled speed of absorption

For rapid absorption Chloromycetin\* is unique among present-day antibiotics. Effective anti-bacterial levels at most sites of infection can readily be obtained by oral administration.

As blood-levels may conveniently be adjusted to control any grade of infection,

## A first-class combination

'SULMEZIL' V is a first-class combination of *two* drugs. Its two active ingredients, used together, cover a far wider range of bacteria than either used alone.

One constituent is Penicillin V, the acid stable form of penicillin which is rapidly and efficiently absorbed and gives consistent and reliable blood levels. This form of penicillin has proved to be markedly superior in these respects to other oral penicillin preparations.

Combined with Penicillin V is 'Sulphamezathine', which has been widely accepted for many years on ac-

count of its high potency coupled with low toxicity. It is undoubtedly the best sulphonamide for routine use.

'Sulmezil' V tablets present these two drugs in a single easily-administered form. Each tablet contains 60 mg. of Penicillin V (Calcium Salt) and 0.5 g. of 'Sulphamezathine'. In packs of 25, 100 and 500.

## ***your Cortisone travels far***

Ox-bile from Australia provides the starting material for Roussel's manufacture of cortisone, hydrocortisone, prednisone and prednisolone. For its synthesis into these corticosteroid drugs, the ox-bile is brought more than ten thousand miles to our extensive production plant at Stratford, London. Yet even now a long road lies ahead, for the complicated synthesis involves more than a score of chemical processes, and occupies a period of several months. At every point along this supply line, vast amounts of material are needed—in order to meet the demands for Cortisyl, HydroCortisyl, DeCortisyl and PreCortisyl, both from the United Kingdom and from all over the world.

# Pattern for Today

Today, the preference is for oral rather than parenteral treatment—provided it is as effective. Penicillin-V has precisely this advantage, giving clinical results consistently comparable with injectable penicillin. It achieves this end because, unlike penicillin-G, it is remarkably stable in gastric secretion. Penicillin-V gives higher blood levels than other oral penicillins and is more potent, dose for dose. When penicillin is indicated, let Penicillin-V-Lilly be the choice.

*Average Dose:* 125mg. (200,000 units) four times daily, increased in severe infections.

## RELEASING the surplus

In cardiac oedema and other conditions where excess fluid accumulates in the tissues, DIAMOX acetazolamide can be relied upon to release the surplus promptly and safely. DIAMOX induces diuresis in a novel and highly efficient manner—by inhibiting the enzyme carbonic anhydrase. A single dose will induce a powerful diuretic response, persisting for six to twelve hours—and in many cases of congestive heart failure DIAMOX *alone* is capable of maintaining the patient oedema-free. As clinical experience of DIAMOX grows, more and more applications are revealed—including glaucoma, toxæmias and oedema of pregnancy, epilepsy and premenstrual tension. DIAMOX has also been used in emphysema, drug-induced oedema, renal oedema and obesity.

## For expectant and nursing mothers

THE VALUE of 'Ovaltine' for the pregnant and nursing mother has long been recognized by physicians. This delicious food beverage has many qualities which make it eminently suitable for inclusion in the mother's diet.

'Ovaltine' contains malt, milk, cocoa, soya, eggs and added vitamins. It provides concentrated nutriment in a palatable form which appeals to the most capricious appetite, and it is easy to digest and assimilate. In addition, it stimulates the supply of breast-milk and helps to keep the mother strong and healthy during the nursing period.

You can confidently recommend your patient to take 'Ovaltine' during pregnancy and when she is breast-feeding her baby.

## VITAMINS LIMITED

# "British medicine is the cheapest in the world"

## *Vitamins Beat Inflation*

The Annual General Meeting of Vitamins Ltd., was held in London in September.

The Chairman Mr. H. C. H. Graves said that net Group Trading Profit for 1956-7 after providing for taxation was £190,409 (£106,169).

The suggestion that if the National Health Service floundered on the financial rocks, it would be due to the high cost of drugs was the reverse of the truth: many standard drugs cost the Exchequer more than the corresponding proprietary. He would go farther by stating that British medicine was the cheapest in the world.

It had nothing to fear from the European Free Trade Area. He would also venture to say that the British peoples were the healthiest in the world—they were certainly never healthier. Was this realised by the man in the street? Did he realise when he paid his shilling for a prescription that he was buying the finest that medicine could provide at the cheapest cost—now and ever? He may have gazed in wonder at the name of a new drug which saved his life or the life of his nearest and dearest, but he seldom connected this with the name of the Pharmaceutical Industry of this country and the leading place its discoveries had earned it in the world of scientific research. Mr. Graves was proud of his Company's contribution to the high renown of the Pharmaceutical Industry.

### **SOME PRICES EVEN REDUCED**

At one time we seemed to get a twist of the inflationary spiral in alternate years. It now seemed to be in alternate months. The rhythm reminded him of the well known dance band leader's—"slow, slow, quick, quick, slow." The inflationary rhythm would seem to be "coal, transport, gas, electricity, wages"—"coal, transport, gas, electricity, wages"—interrupted only by an occasional discordant bump when postal and telephone charges and such-like were added. In such an atmosphere the Company could fairly congratulate itself on not only holding its prices stable, but in many cases—materially reducing them. The main products—Vitamins, the subject of the Company's name were cheaper than ever before and it was clear, therefore, that their excellent results had cer-

tainly not been achieved by taking part in the inflationary rhythm.

The role of Bemax, as the best-known vitamin-mineral-protein food in the world, continued to be appreciated and understood by doctors and dietitians, by nurses and mothers as it had been for over a quarter of a century past.

If, like some regimes, Bemax were unpleasant and not easy of acceptance he could understand there being abstainers from its use. On the contrary, Bemax with milk or fruit juice, in soup or sprinkled on cereal foods was so delicious and added such zest to life that he really found it incredible that anyone who had the opportunity should fail to give it a trial, and still more incredible to think anyone, these days, could be found to deny their children its benefits and the protection which it afforded.

The report and accounts were adopted.

The original easy-to-take,  
two-in-one tablet

for the prompt and prolonged  
relief of **ASTHMA**

ISO-BRONCHISAN was first produced in 1953 and offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating containing easily dissolved Isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, produces the prompt relief of bronchospasm. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long sustained antispasmodic action on the bronchial smooth muscle.

## ORGRAINE

Composition (per tablet)		Action
Ergotamine Tartrate B.P.	1.0 mg.	→ constricts dilated cerebral arteries.
Caffeine B.P.	100.0 mg.	→ potentiates ergotamine.
Hyoscyamine Sulphate B.P.C. (1949)	0.0875 mg.	→ alleviates nausea and vomiting.
Atropine Sulphate B.P.	0.0125 mg.	
Phenacetin B.P.	130.0 mg.	→ relieves residual occipital pain.

In a recent clinical article (J.A.M.A., 1957, 163, 1115) it was stated that in a series of 2,511 cases in which 28 agents were tested in the symptomatic treatment of migraine, ergotamine tartrate was proved to be the most useful drug—and 81% of the patients showed improvement when ergotamine tartrate and caffeine were compounded with belladonna alkaloids. Orgraine applies the same successful principles of treatment.

## Operation Safety . . .

Give the lever a nudge with the elbow and out comes a comfortably warm spray, neither too hot nor too cold. It stays warm because you are using a Leonard *thermostatic* mixing valve—the valve that *automatically* mixes hot and cold water and holds the temperature steady. The thermostat in the Leonard valve levels off all the ups and downs

and gives a flow of warm water as smooth, as steady, as even as the tide over a weir.

Leonard *thermostatic* hot and cold water mixing valves are used in nearly all hospitals, and are specified more and more every day. They save water, save heat, save risk. Sales and service everywhere.

## A REALLY INVITING SOFT DIET MENU!

Egg poached in Heinz Strained Tomato Soup to begin with. And for the second course, Heinz Strained Apricots set into a mould with gelatine. Enough to make the most finicky patient's mouth water!

Few patients like the idea of a soft diet. But you'll find they do cheer up and take an interest when you tell them about Heinz Strained Foods.

These ready-to-serve, appetizing foods contain no spices or strong-flavoured seasonings. They are just freshly gathered fruits and vegetables, and choice meats, cooked to retain the maximum flavour and nutritional values. In fact the scientific care that goes into them makes them better than most home-prepared diets. The exact nutritional values of each variety of Heinz Strained Foods are set out in a special booklet. Please write for a free copy.

Here are 20 varieties from which Soft Diets can be planned:

**THE NUFFIELD FOUNDATION****DENTAL FELLOWSHIPS AND SCHOLARSHIPS**

The Nuffield Foundation invites applications, from citizens of the United Kingdom, for Fellowships and Scholarships in Dentistry. To help the advancement of teaching and research in the United Kingdom on dental health and disease, the Foundation is prepared to award a number of Fellowships. (i) To enable selected men and women with dental qualifications to receive such additional training in pure and applied science as is desirable to fit them for an academic career in dentistry (but not to obtain a medical qualification); and (ii) to enable selected university graduates in medicine and science to receive training that will qualify them to undertake teaching and fundamental research on dental health and disease. The Foundation is also prepared to award a limited number of Scholarships to assist students of outstanding ability attending a university dental school to devote one or two years to further studies of the basic sciences. All applications must first be endorsed by the executive authority of the appropriate dental or medical school or scientific faculty of a university in the United Kingdom. They must be received by the Foundation by March 1 in the case of Fellowships, which are awarded once a year, and by January 31 and June 30 in the case of Scholarships, which are awarded twice a year. Copies of the conditions of both Fellowships and Scholarships and the application forms are obtainable from the Director, the Nuffield Foundation, Nuffield Lodge, Regent's Park, London, N.W.1.—L. Farrer-Brown, Director of the Nuffield Foundation. (9703)

ST. ANDREW'S HOSPITAL, NORTHAMPTON  
for Nervous and Mental Disorders

President: The Earl Spencer, Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet apparatus, and a department for Diathermy and High-frequency treatment. It also contains laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

## Isoniazid and the B vitamins

In the course of isoniazid treatment of tuberculosis adverse effects on the nervous system have been reported occasionally. Peripheral neuropathy or psychosis may arise, and it has been suggested that these side effects may be due to an antagonism between isoniazid and vitamin B factors. A good response to massive doses of the vitamin B complex has, in fact, been obtained in psychosis arising during isoniazid therapy.

Marmite yeast extract is a useful dietary supplement, providing all known factors of the vitamin B complex. Its pleasant taste ensures ready acceptance by the patient, while the nursing staff appreciate the ease with which Marmite drinks and sandwiches can be prepared.
