The new complete treatment for migraine—

ORGRAINE

In a recent clinical article (J.A.M.A., 1957, 163, 1115) it was stated that in a series of 2,511 cases in which 28 agents were tested in the symptomatic treatment of migraine, ergotamine tartrate was proved to be the most useful drug—and 81% of the patients showed improvement when ergotamine tartrate and caffeine were compounded with belladonna alkaloids.

Orgraine applies the same successful principles of treatment.

Composition (per tablet)			Action
Ergotamine Tartrate B.P.	1.0 mg.	→	constricts dilated cerebral arteries
Caffeine B.P.	100.0 mg.	→	potentiates ergotamine
Hyoscyanine Sulphate B.P.C. (1949)	0.0075 mg.	}	→ alleviates nausea and vomiting
Atropine Sulphate B.P.	0.0125 mg.		
Phenacetin B.P.	130.0 mg.	→	relieves residual occipital pain.

Tral

In Tral, Abbott introduces a convenient new anticholinergic that is:
Potent enough to block hypersecretion and hypermotility in peptic ulcer.
Selective enough to avoid the side effects resulting from unwanted anticholinergic action outside the gastro-intestinal tract.
Safe enough to permit the broad range of dosage so necessary if therapy is to be truly individualized.

A NEW PRODUCT FOR PEPTIC ULCER

More than 1,000 clinical trials have shown that Tral is not only adequate in its antisecretory-antimotility effects, but has perhaps the most highly specific post-ganglionic cholinergic blocking effect of any drug yet developed—at least to the degree that side effects have been strikingly fewer and milder than normally expected from anticholinergics.
It is supplied as Filmtab Tral (25 mg.) in bottles of 100 tablets.

The esters of NICOTINIC, SALICYLIC and p-AMINOBENZOIC acids bring relief to cases of arthritis and rheumatism

"Thank you, doctor"

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Turning

TETRACYCLINE

to the very best advantage

Medical history has already reserved a special place for ACHROMYCIN tetracycline because of its impressive therapeutic potency and remarkably broad spectrum. Now, with the advent of ACHROMYCIN V, the therapeutic merits of tetracycline are turned to still greater advantage. Presenting tetracycline in company with sodium metaphosphate, ACHROMYCIN V achieves swifter, more efficient, more complete absorption. As a result, the therapy becomes still more secure, without any increase in daily dosage or cost. Customary adult dosage is a single capsule (250 mg.) four times daily—though this may safely be increased in unusually severe conditions.

EAR WAX Removed this easy way

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing.

Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances.

Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane.

Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

FORMULA (Active Constituents per 100 c.c.):—*p*-dichlorobenzene B.P.C., 2 gm.; Benzocaine B.P., 3 gm.; Chlorbutol B.P., 5 gm.; Ol. Terebinth B.P., 15 c.c.

RELEASING the surplus

In cardiac oedema and other conditions where excess fluid accumulates in the tissues, DIAMOX acetazolamide can be relied upon to release the surplus promptly and safely. DIAMOX induces diuresis in a novel and highly efficient manner—by inhibiting the enzyme carbonic anhydrase. A single dose will induce a powerful diuretic response, persisting for six to twelve hours—and in many cases of congestive heart failure DIAMOX *alone* is capable of maintaining the patient oedema-free. As clinical experience of DIAMOX grows, more and more applications are revealed—including glaucoma, toxæmias and oedema of pregnancy, epilepsy and premenstrual tension. DIAMOX has also been used in emphysema, drug-induced oedema, renal oedema and obesity.

BUFFERED THEOPHYLLINE FOR THE PROPHYLAXIS & TREATMENT OF ASTHMA

'ENGLATE' combines theophylline sodium with glycine, which acts as a powerful buffer against gastric hydrochloric acid and thus reduces the precipitation of theophylline. Theophylline sodium glycinate causes less gastro-intestinal disturbances than other xanthine compounds and can therefore be prescribed in larger doses to obtain maximum theophylline activity.

'ENGLATE' syrup is specially recommended for children up to 12 years in preference to tablets.

CODIS AND SOLUBILITY

THE GREAT ADVANTAGE of Codis is that it provides a codeine compound tablet in which the aspirin content is soluble in water. (The codeine constituent is also soluble, and the phenacetin is in very fine suspension.)

This is achieved by careful compounding and preparation, resulting in tablets which are quickly absorbed and well tolerated—even in cases of proven intolerance to ordinary (insoluble) aspirin.

To ensure stability and easy identification, the tablets are wrapped in moisture-proof distinctive gold foils of 10 tablets each (dispensing size), or boxes containing five foils of 4 tablets each (public size).

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, the entire Vitamin B Complex should always be administered concurrently.

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

NULACIN

provides milk-alkali drip
therapy without a tube

Maintains continuous control of gastric acidity

Until a few years ago, maintained continuous control of gastric acidity was impossible without hospitalization and discomfort to the patient.

Then a unique treatment in the form of Nulacin tablets was evolved to achieve this desirable state—simply, effectively and without attendant disadvantages. In the ensuing period Nulacin therapy has been amply tried and proved by numerous clinical studies and by therapeutic use in many countries.

A Nulacin tablet placed in the mouth between the cheek and the gum dissolves slowly and releases its contained medicaments at a rate that gives continuous neutralization of the acid gastric juice. Nulacin accomplishes this without any danger of causing alkalosis or other side-effects. The results are comparable with those of intragastric milk-alkali drip therapy.

INDICATIONS: NULACIN tablets are indicated whenever neutralization of the acid gastric contents is required: in active and quiescent peptic ulcer, gastritis and other conditions of gastric hyperacidity.

Dosage: Beginning half-an-hour after food, a Nulacin tablet should be placed in the mouth between the cheek and the gum and allowed to dissolve.

During the stage of ulcer activity, up to three tablets an hour may be required. During quiescent periods, for prophylaxis in peptic ulcer and for the relief of discomfort due to gastric hyperacidity, the dose of Nulacin is one or two tablets between meals.

NULACIN tablets are not advertised to the public and have no B.P. equivalent. They may be prescribed on E.C.10. The dispensing unit of 25 tablets is free of purchase tax. (Basic price to N.H.S. . . . 2/-). Also available in tubes of 12.

NULACIN tablets are prepared from whole milk combined with dextrans and maltose, and incorporate magnesium trisilicate 3.5 grs.; magnesium oxide 2.0 grs.; calcium carbonate 2.0 grs.; magnesium carbonate 0.5 grs.; Ol. Menth. Pip. q.s.

GASTRIC ANALYSIS Superimposed basal fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS Same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

EMERGENCIES IN GENERAL PRACTICE

from the British Medical Journal

470 Pages (cloth bound), with full index

This book deals with medical emergencies in a wide sense; acute clinical emergencies requiring prompt and skilful treatment; conditions such as faints and fits and giddy turns, the careful elucidation of which may mean the difference to a patient between a life of activity and one of restriction; acute psychiatric states; accidents of treatment, such as dangerous reactions to drugs or collapse during anaesthesia; and emergency calls when the doctor is isolated, as on a ship.

It comprises 57 specially commissioned articles which appeared originally in the *British Medical Journal*.

The author of each is an acknowledged authority. This collection, now revised by the authors, will be of value not only to general practitioners but also to senior students, house-physicians, house-surgeons, and to those supervising their work in hospitals.

PAINFUL GUT

'Merbentyl' relieves painful spasm of the gut without the side-effects (changes of heart rate, mydriasis, cycloplegia, dry mouth, etc.) associated with other natural and synthetic anticholinergic agents. 'Merbentyl' both blocks the parasympathetic nerve endings and directly relaxes smooth muscle, thus it is an ideal remedy in functional bowel upsets and effectively allays painful spasm in organic diseases.

MERBENTYL
