"Cutting

the lines of communication"

In psychosomatic

(stress or functional)

disorders

Bellergal Retard blocks the passage of excessive stimuli from psyche to soma via the autonomic nervous system.

Bellergal Retard

BY

SANDOZ

**1 tablet
night and morning
for
continuous control**

0.2 mg. total alkaloids of belladonna
0.6 mg. Ergotamine Tartrate B.P.
40 mg. Phenobarbitone B.P.

Ergotamine and belladonna suppress the peripheral effects of overstimulation of both sympathetic and parasympathetic divisions. At the same time central sedation with phenobarbitone renders the patient less reactive to mental and emotional stimuli.

Bellergal Retard acts at different levels (central and peripheral) to control the somatic manifestations of mental and emotional stress.

Bellergal Retard "cuts the lines of communication" between psyche and soma in psychosomatic disorders.

Focus on the better IRON prescription

With a high ferrous iron content
—approx. 65 mg. per tablet.

That normally gives optimal haemoglobin
response on three tablets a day.

That is smaller, so easier to swallow,
and can be chewed.

That is excellently tolerated even by
many intolerant of existing compounds.

That is stable yet uncoated.

That is safer in the home.
Being dull brown and *not* sugar coated,
Fersamal tablets are less likely to be taken,
in quantity or to attract the
attention of children.

That is economical—one tablet t.i.d.
costing about one penny a day.

You'll find all this in

FERSAMAL

1958 COLOUR TELEVISION IN MEDICINE

The Smith Kline & French Colour Television Unit, which sponsored demonstrations of medical and surgical procedures at London, Edinburgh, Manchester and Newcastle during 1957, is sponsoring another series of demonstrations this year.

Demonstrations are next to be given during the International Student Seminar of the British Medical Students' Association on September 19 and 20, when clinical and surgical procedures will be telecast.

Further meetings at which the Unit will be operating are as follows:

The surgical meeting of the Association of Anaesthetists of Great Britain and Ireland on October 29 and 30 at Liverpool.

The Annual Meeting of the Anatomical Society at Guy's Hospital, London.

The British Medical Association Annual Clinical Meeting in Southampton on December 5 and 6.

The services of the S K & F Colour Television Unit have not yet been fully taken up for 1959. British medical societies wishing to have it at their meetings are invited to address inquiries to: The Director, Medical Colour Television Unit.

EPILEPSY
 responds
 well to -

DIAMOX^{*}
 A C E T A Z O L A M I D E

Of all the applications of DIAMOX acetazolamide, few are more welcomed in clinical practice than is its value in epilepsy. Freedom from epileptic seizures has been observed in numerous cases of grand and petit mal following treatment with DIAMOX. The drug has shown an unusually beneficial effect on resistant cases of petit mal. It is effective when used alone and of particular value when used in combination with the usual anticonvulsants. Highly versatile, DIAMOX has long been recognised for its value in other conditions including cardiac oedema, glaucoma, premenstrual tension, toxæmias and oedema of pregnancy, drug-induced oedema, etc.

Available in oral tablets of 250 mg. (engraved). Bottles of 25, 100 and 1000. DIAMOX Acetazolamide Sodium Parenteral Vials of 500 mg.

today's new
MASTER PLAN
against
migraine

Each tablet contains
 ergotamine tartrate 2 mgm.;
 caffeine (alkaloid) 100 mgm.;
 cyclizine hydrochloride 50 mgm.
In bottles of 10 and 100

The prescribing of 'Migril' makes possible at last a *planned* attack upon the three predominant symptoms of migraine. Ergotamine is present at strength in 'Migril' for its specific effect upon the characteristic headache and ocular disturbances. Caffeine is present too, since it acts as a synergist to ergotamine. Frequently, however, ergotamine tends to evoke nausea and vomiting on its own account and can therefore worsen these aspects of the condition. For this reason, the potent, rapidly acting anti-emetic cyclizine is also included in 'Migril'—to overcome any tendency to nausea or vomiting, whether caused by the ergotamine or by the condition itself. And so successfully does cyclizine achieve this aim that truly effective oral doses of ergotamine can today be given—by means of 'Migril'.

Better relief for Arthritics—minimum side effects

In salicylate therapy BUFFERIN (Antacid Analgesic) has these two special advantages. It is *faster-acting*—twice as fast as ordinary aspirin. It is *better-tolerated*—even in large doses, as for arthritis.

According to a British survey, as many as 42% of arthritics are intolerant to aspirin. And in a blind trial among arthritics with a *proved* intolerance to aspirin, 70% had no gastric symptoms after taking large doses of BUFFERIN over periods of 4 to 16 months. (1)

In clinical tests, it was shown that BUFFERIN raises the salicylate blood level of humans more than 20% higher in *ten* minutes than ordinary aspirin does in *twenty* minutes.

Hence the importance of BUFFERIN in all salicylate therapy. Only BUFFERIN contains the antacid agents which:—

- ★reduce gastric upset to a negligible minimum (2) (3);
- ★actually speed the pain-relieving ingredient into the bloodstream (4) (5).

It acts faster. It is better tolerated. It contains no sodium.

THE BRITISH DRUG HOUSES LTD (MEDICAL DEPARTMENT) LONDON N1

From the beginning—

you can trust Carnation

When you prescribe Carnation Milk you are specifying the most dependable form of cow's milk for babies' feeds. Carnation Milk never varies — its composition is uniform, no matter what the season. Feeds can be easily modified to suit the individual baby.

Carnation is pure fresh cow's milk — nothing is removed but part of the water — nothing added but vitamin D. Perfect digestibility is ensured, by Carnation's special method of processing.

Today, more and more Hospital Milk Kitchens are using Carnation for preparing babies' feeds. This significant development is directly related to the outstanding success Carnation has

achieved over the whole range of infant feeding. You can trust Carnation absolutely because every tin is sterilised *after* it has been filled and sealed.

"The Feeding of Infants" — a book specially prepared for doctors — together with reprints of clinical investigations and Carnation feeding charts are available from: Medical Dept., General Milk Products Ltd., Bush House, Aldwych, London, W.C.2.

For the best start in life . . .

Carnation

ALREADY

*the most widely prescribed
diuretic in

'SALURIC' ORALLY *replaces mersalyl
and ALL other diuretics*

How supplied: 'Saluric' (Chlorothiazide) is supplied in 0.5 G. half-scored tablets in bottles of 100 and 500. The basic N.H.S. cost of an average week's treatment for a patient on maintenance therapy is 3/9d.

Chlorothiazide was discovered and developed in the Merck Sharp & Dohme Research Laboratories and is manufactured in England exclusively by the Merck Sharp & Dohme organisation.

Literature gladly supplied on request.

MERCK SHARP & DOHME LIMITED, HODDESDON, HERTS.

UNIQUE FAT STORAGE

Most of the advantages of 'TACE' are derived from its storage in body fat. Pharmacological evidence has been provided by articles published^{1,2}, and from results demonstrated by radio-autographs. Abundant clinical confirmation is also available.

No other oestrogen at present available has this property. Because 'TACE' is stored in body fat no sudden drop in oestrogen blood level occurs. The oestrogenic effect persists for up to 3 months after administration ceases.

High doses are unnecessary, since 'TACE' is metabolized by the liver to a more potent oestrogenic compound.

1. *Amer. J. Obst. Gynec.* (1952) 63:1361.
2. *Proc. Soc. exp. Biol.* (1953) 84:491.

Dose: 2 capsules daily for one month.

PACKS: 'TACE' is available as green capsules, each containing 12 mgm. chlorotrianisene dissolved in oil: Bottles containing 60 to 300 capsules. The basic N.H.S. costs are 18/4d. and 73/-.

Feeling of Well Being

The feeling of well being, so important to the patient, is characteristic of 'TACE' therapy.

Smooth Prolonged Action with Fewer Side Effects

Fat storage results in a steady release of oestrogen, providing a smooth action which persists for some time after administration has ceased.

Low Incidence of Withdrawal Bleeding

Owing to the gradual release of the fat stored 'TACE', no fluctuations occur in blood oestrogen levels. Withdrawal bleeding consequently is greatly diminished.

Simplicity of Dosage

'TACE' is given on a fixed dosage scheme. Higher dosage does not produce greater fat storage.

'TACE' is a registered trade mark of the Wm. S. Merrell Co., London. Distributed in Great Britain and Irish Republic by

Benefits your patients - reduces prescription costs

First in the field again with improvements to surgical stockings, Lastonet introduce a new kind of rubber into their elastic net. This innovation prevents the deterioration normally caused by exposure to light.

Lastonet Elastic Net Stockings—already widely prescribed by the medical profession for their exceptional comfort and efficiency—now have the added advantage of longer life and increased retention of their perfect made-to-measure fit.

The prescribing of Lastonet Stockings, while enhancing your patients' health and comfort, enables you to effect economies in prescription costs. Elastic Net stockings are, in fact, the lowest priced surgical hose available under the National Health Scheme.

LASTONET PRODUCTS LTD,
CARN BREA, REDRUTH, CORNWALL

Is she suitable for oral diabetic treatment?

Many diabetic patients have now been stabilised on Rastinon tablets and inevitably other diabetics are wondering if they, too, can look forward to "treatment without injections." It has been estimated that about a quarter of all diabetics at present taking insulin in one clinic in Great Britain could be well controlled on Rastinon instead. (Lancet, 1957, 2, 125)

SELECTION AND STABILISATION

The suitability of a patient can readily be determined in the diabetic clinic where selection and stabilisation are easily carried out. For those patients found to be suitable, Rastinon tablets provide a safe and effective form of therapy. No cases of proven dys-haemopoiesis or other serious side-

effects due to the drug have been reported.

A SIMPLE AND ECONOMICAL TREATMENT

From 1 to 3 tablets a day are normally all that is required in suitable

patients to replace the insulin. The usual regime of urine examination and dietary control remains necessary. The basic cost to the National Health Service of a week's treatment is on average between 3/6d. and 5/3d. **PACKS**

Bottles of 100 and 500 tablets. Each tablet contains 0.5G of N-Butyl-N'-toluene-p-sulphonylurea (tolbutamide). Fuller information on selection and stabilisation of patients, and references to the published work, on request. Rastinon tablets are made in England and are available in U.K. exclusively from:

The Tale of a Fee

Sir Harley Street, the famous 'Doc'
One day received a dreadful shock.
A massive crate, sent by Lord Pill
Arrived 'in payment of his bill.'
"By jove," said he, "this isn't proper,
The blighter's paid his bill in copper!"
He raised the lid—he rubbed his eyes—
Oh! what a rapturous surprise!
The explanation of his grin is
He's counting out 1,000 *Guinness*.
(He rather hopes his typist makes
Some more such fortunate mistakes).

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B Complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- *Aluzyme is not advertised to the public and may be prescribed on Form E.C.10*

How Heinz Baby Foods simplify mixed feeding

The days are gone when mixed feeding involved mother in hours of work, sieving and straining meat and vegetables for her baby's dinner.

To-day, she finds it much more simple and pleasant—when you recommend Heinz Baby Foods as soon as baby is 11 or 12 weeks old. Baby takes his food more readily from a calm and relaxed mother, and this should result in happy, contented mealtimes that both mother and baby enjoy. And, with the 24 varieties of Heinz Baby Foods, a mother can give her baby the very best fruits, vegetables and meats all the year round.

All the ingredients used by Heinz are carefully selected, prepared in scrupulously hygienic conditions, and specially cooked to retain the maximum nutritional value. Accustoming baby as early as possible to this wide range of foods, trains growing appetites along healthy lines.

Further information about Heinz Baby Foods will be gladly sent on request. Please write to: H. J. Heinz Company Limited, Harlesden, London N.W.10

Poliomyelitis-

...an effective pattern of protection

The increasing use of inoculation against Poliomyelitis does not dispense with the necessity for using other proved methods of prevention.

On the contrary—such methods should be more widely and more thoroughly applied.

'In Poliomyelitis epidemics, where a large proportion of the virus hosts are symptomless carriers—a vigorous health education programme.... directed at raising the standards of personal hygiene.... coupled with measures to raise individual resistance to Poliomyelitis virus infection by strengthening active immunity, offers best hope of success.'

For inactivating Poliomyelitis virus, 'Oxidising agents seem to be

the most active chemical disinfectants.'

'An oxidising agent of great potency is Domestos which, when used at concentration of from $\frac{1}{4}$ to 2 ozs per gallon, provides a level of available chlorine in the range 150 to 1,200 parts per million—sufficient to inactivate the Poliomyelitis virus.'

A pattern of protection against Polio is assured by using DOMESTOS, which 'destroys Poliomyelitis virus—

(a) For Lavatories. Overnight contact will destroy heavy soiling and give a free residual chlorine content which will inactivate virus contaminants. The exterior of the bowl and the seat which frequently come into contact with the hands of

children, should always be washed with a DOMESTOS solution.

(b) For the disinfection and cleaning of dishes, floors, kitchen surfaces, sinks, etc.

(c) For safeguarding against the infection of food by bluebottles, flies, vermin.

(d) For the disinfection of yards, paths, etc.

(e) For the disinfection and cleaning of clogged drains.

1. 'Topical Aspects of Poliomyelitis', 'Journal of the Royal Society of Health' Dec. 1956

2. World Health Organisation Technical Report Series, No. 81, 'Expert Committee on Poliomyelitis'.

3. Domestos Technical Report D.R. 82 A.

Charged with 4 fluid ounces of solution, this unit represents not only the simplest, quickest and most hygienic method of administering an enema, but also the most positive.

CLINICAL PATHOLOGY IN GENERAL PRACTICE

321 pages. Price 21s. (by post—inland and overseas 22s. 3d.)

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the *British Medical Journal*. Each article has been revised and brought up to date by its author. The book gives authoritative information on—

- available laboratory facilities
- reliable tests and which to use
- techniques for collecting and preserving specimens
- interpretation of results and significance of abnormal findings

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally no. less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held; provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners, and held normally for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £852 10s. by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.
