have pronounced advantages over either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

*Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

**The esters of NICOTINIC, SALICYLIC and
p-AMINO BENZOIC acids
bring relief to cases of
arthritis and rheumatism**

"Thank you, doctor"

IN CASES OF soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Extensive tests show that Hypon has the power not only to relieve pain but to do so very rapidly. Constipation, so often encountered following the administration of codeine is effectively counteracted by the addition of phenolphthalein. Caffeine offsets the depressing effects of aspirin and phenacetin. Hypon is invaluable where prolonged administration is called for (chronic rheumatic conditions for instance). Furthermore, the antipyretic

MODERN CONTRACEPTIVE TECHNIQUE presents a concise and compact survey of methods commonly used. There are notes on methods which have medical approval, and also on others which are medically contra-indicated.

MIRACLES OF MODERN ANAESTHETICS

With anaesthesia as it was even twenty years ago, many of to-day's operating procedures would have been unthinkable. Modern surgery is, in fact, largely made possible by modern anaesthetics. The revolution in anaesthesia forms the core of a series of articles specially written for The Sunday Times by RONALD WOOLMER, Director of Research in the Faculty of Anaesthetists in the Royal College of Surgeons, in which he traces the development of anaesthetics from their inception to the present day.

Succinate- Salicylate Therapy

*a safe and effective
treatment for
rheumatic disorders*

A SUCCINATE-SALICYLATE combination was found superior to acetylsalicylic acid in rheumatic states both on grounds of therapeutic efficacy and lower toxicity. Adequate amounts of the former could be administered with more lasting effect and with fewer and milder side effects. Furthermore, succinate-salicylate affects the disease process itself, as well as relieving painful symptoms, and does not abnormally increase prothrombin time even after prolonged dosage.

MARMITE

yeast extract

contains

Riboflavin (vitamin B₂) 1.5 mg. per oz.
Niacin (nicotinic acid) 16.5 mg. per oz.

In Pregnancy

During pregnancy the demands on all maternal resources are increased. Diet, therefore, assumes a particular importance during this period. Marmite, taken as a drink or in sandwiches, or used in cooking, is popular among expectant mothers and raises the level of the B vitamins in their diet.

In Geriatrics

The opinion has been expressed that the need for vitamins, especially those of the B complex, is increased in frail elderly persons. These essential nutrients seem to exert a beneficial effect even when the diet appears to be adequate. Marmite is a yeast extract containing all the known factors of the vitamin B group; it can easily be incorporated in the diet and is economical to use.
