

For Chronic Discharge of the Ear

RYOTOL

RYOTOL is lethal to *Ps. pyocyanea*, *Staphylococcus aureus*, *Proteus vulgaris* and *Streptococcus pyogenes* found in C.S.O.M. and Otitis Externa.

The presence of *Ps. pyocyanea* has been demonstrated in 90% of cases of chronically discharging ears. This gram-negative, highly resistant organism is unaffected by penicillin, sulphonamides and many other bactericides. It produces abundant pus and is therefore extremely troublesome.

RYOTOL Ear Drops are the outcome of clinical work on humans, following outstanding results obtained in the veterinary field.

Formula:
 Monophenyl ether of ethylene glycol 2.0% v/v
 Phenylmercuric Nitrate 0.1% w/v
 Phenyl-dimethyl iso-pyrazolone 5% w/v

CARNEGIES Solutions of

L-Noradrenaline

NOW AVAILABLE IN TWO FORMS IN 'SNAPULES'

(REGD.)

INTRAVENOUS SOLUTION for DRIP INFUSION
 This preparation is generally indicated for treatment of acute hypotension. It contains 1 mg. L-noradrenaline per ml. of solution and requires substantial dilution before intravenous infusion.

PRESENTATION "Snapules" of 2 mgm. in 2 ml., 4 mgm. in 4 ml., and ampoules of 16 mgm. in 16 ml.

EMERGENCY SOLUTION FOR INJECTION
 This preparation is designed for use only in extreme emergencies when the pulse is no longer palpable and immediate resuscitative measures are called for. It contains 100 µg. per ml. and does NOT require dilution before use.

PRESENTATION "Snapules" of 0.2 mgm. in 2 ml.

IN CASES OF SHOCK AND ACUTE HYPOTENSIVE STATES

In the treatment of shock the agent used should simulate the normal compensatory mechanisms as closely as possible. It has been shown that L-NORADRENALINE more closely approaches these ideal requirements than adrenaline, but has a toxicity only one-quarter of that of adrenaline.

Only Nulacin provides intragastric milk-alkali drip therapy for the ambulatory patient

"In view of the ineffectiveness of most of the tableted antacids, the milk alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy."

(*Medical Times* 1958, 1, 74)

NULACIN TABLETS have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. The effectiveness of Nulacin therapy has been established by clinical work in many countries. The following are a few references to the literature:

PROMPT

Biotexin promptly produces bactericidal blood levels far in excess of those achieved by other oral antibiotics

PERSISTENT

Biotexin maintains high antibacterial concentrations in the blood longer than other oral antibiotics

With any other oral antibiotic, divided doses must be given frequently to maintain continuous adequate effect, whatever the total daily dose decided upon. With Biotexin, since it is eliminated very slowly, increase of dose gives a substantial increase in blood level and duration of therapeutic effect. There is actually an advantage in giving fewer and larger doses at longer intervals.

bring relief to cases of
arthritis and rheumatism

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

EARLY

PHARMACOLOGY 'Deaner' is a new biochemical corrective which acts gradually and with a prolonged effect.

All available evidence indicates that 'Deaner' produces its effect through acting as a precursor of brain acetylcholine. Because of this unique action, it is a compound with an interesting range of applications. Additional recommendations will be made to Doctors as studies are completed.

'Deaner' is a Trade Mark.

AVAILABILITY 'Deaner' is available in tablets containing 25 mg. dimethylaminoethanol (deanol) as the para-acetamido benzoic acid salt. Bottles of 100, 500 Basic N.H.S. costs 22/- and 90/- respectively plus P.T. Basic N.H.S. cost of treatment is approximately 2/6 per week (2 tablets a day) plus P.T.

DOSE. Two tablets per day for two to three weeks, subsequently increased if necessary. The usual dose will often be 1 tablet, three times a day.

N.B. 'Deaner' requires at least two weeks for its full effect to develop. It is important that no assessment should be made until at least this period has been allowed to elapse.

metabolism**

PATIENTS who are recovering from illness frequently suffer from faulty protein metabolism. They are in negative nitrogen balance. Protein, in effect, is being broken down and lost faster than it is being built up.

Anabolex (Androstanolone) restores the physiological balance. Many clinical trials have shown that, following the administration of *Anabolex*, there is an immediate return of the body's capacity

to build up protein. The patient feels better, eats better and gains weight.

Anabolex can be safely given to patients of all ages and both sexes; in therapeutic doses, its virilizing properties are almost negligible. The only known contra-indication is prostatic carcinoma.

INDICATIONS: Convalescent patients. Premature infants. Asthenia. Malnutrition. Wasting diseases. Preparation for and recovery from planned surgery.

"IMPROVED THERAPY FOR PEPTIC ULCER"

Extract from the American Journal of Gastroenterology, (1957) 28, 439.

"The medication investigated is known as Roter tablets . . . The dosage employed in the treatment of gastric or duodenal ulcer was 2 tablets, taken three times a day with tepid water immediately after meals . . . this therapy is applicable to ambulatory patients."

SUMMARY

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92 per cent of cases and roentgenological healing of the ulcer in 81 per cent. The average weight gain was 7.9 lbs. and occult blood disappeared from the stools in all of the six cases in which it was found.

"The benefit provided by the medication is attributed to the minute particulation of the bismuth subnitrate, produced by a special process of trituration in association with a synergistic antacid combination.

"The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases.

"There was no acid rebound in therapeutic dosage and no adverse effects were reported."

EAR WAX *Removed this easy way*

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing.

Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances.

Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane. Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

New For non-productive cough **Tessalon Perles**

Selective inhibition of the cough reflex

Tessalon has a unique mode of action as a cough depressant. It acts both by reducing the sensitivity of the pulmonary stretch receptors which form the starting point of a cough, and by depressing the transmission of afferent cough impulses.

*Dose: One 100 mg. Perle (Capsule) 3 or 4 times daily swallowed whole. If necessary this dose may be doubled.
Packages: Perles containing 100 mg. nonaethylene-glycolmonomethylether-p-n-butylamino-benzoate in 25's, 100's, and 500's.*

SURGICAL ELASTIC STOCKINGS

OF EXCEPTIONAL QUALITY

COLBY PRODUCTS, LTD., specialise in the manufacture of high quality Surgical Hosiery and can be counted upon to supply stockings which will give firm support with comfort and a good appearance. Their full normal range includes hose in Superfine Nylon Yarn, Nylon Yarn, Nylon Net and Elastic Yarn.

Nylite is an entirely new addition to the Colby range. It is a lightweight surgical stocking knitted from Nylon Elastic Yarn, which will give reliable support with more than ordinary comfort as it has a particularly soft texture. The stocking is handsome as well as efficient, with a matt finish, that allows it to be worn (in the closed toe style) without over-hose.

Nylite may be prescribed under the National Health Service.

An Appeal for Cancer Research

The Imperial Cancer Research Fund is the pioneer cancer research organization and was brought into being in 1902 by the Royal College of Physicians and Surgeons to undertake systematic investigations into the causes, prevention, and cure of cancer.

At present, in laboratories at Mill Hill, and at Lincoln's Inn Fields, the Fund employs twenty qualified experts in scientific research and fifty expert technicians and assistants. Visiting research workers from all over the world visit the Fund's laboratories.

Present-day cancer research calls for a very considerable expansion of the Fund's activities. New laboratories, adjoining the Royal College of Surgeons, are shortly to be built. In this undertaking, the Fund, which receives no official help and relies upon the public for support, is facing an immense task. A sum of £1,000,000 is needed to build and equip the laboratories, which will be the most advanced cancer research centre in Europe.

GOVERNMENT OF WESTERN NIGERIA

Applications invited from male doctors for following posts in the Medical Department of the Western Region of Nigeria:

SENIOR PATHOLOGIST

to organize and be responsible for a Regional Laboratory Service. Most hospitals in the Region have small laboratories attached where routine work is performed, but the more complicated tests, sections, etc., will be his concern at a Central Regional Laboratory. Officer selected will also be responsible for organization and training of African technicians, and will supervise the work of technicians in outstation laboratories, which will involve travelling. Candidates should possess medical degree registrable in United Kingdom and preferably a higher qualification in pathology, also at least five years' experience in laboratory work.

PATHOLOGIST

who will be based at Adeoyo Hospital and be responsible for routine laboratory work and such other duties as may be delegated by the Senior Pathologist. Candidates must possess relevant experience.

Appointments (of one or two tours) may be:

(a) on short-term contract with gratuity (taxable) at rate of £37 10s. for each completed period of three months' service (including leave), payable on satisfactory completion of appointment. Salary for Senior Pathologist £2,448 a year, Salary scale for Pathologist £1,290 to £2,286 a year.

or (b) from National Health Service with retention of superannuation rights and gratuity (taxable) of 20% of aggregate salary, payable on completion of appointment. Salary for Senior Pathologist £2,040 a year, and scale for Pathologist £1,086 to £1,950 a year.

Entry points in both salary scales determined by qualifications and experience. In addition, the Pathologist receives supplementary pay of £120 a year.

Quarters provided at low rental. Taxes at local rates. Annual leave permissible: generous home leave after each tour of 18-24 months. Free return passages for officer and wife. If Officer is domiciled in United Kingdom return passages are provided for children under 18 years up to maximum of £450 in any one tour. (For officers domiciled elsewhere the amount will be decided by Government of Western Nigeria.) Should an officer use less than the maximum amount allowed, the remainder may be used to enable wife to visit children in officer's country of domicile.

ST. ANDREW'S HOSPITAL, NORTHAMPTON
for Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet apparatus, and a department for Diathermy and High-frequency treatment. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

**"Cutting
the lines of communication"
in psychosomatic
(stress or functional)
disorders**

Bellergal Retard blocks the passage of excessive stimuli from psyche to soma via the autonomic nervous system.

Bellergal Retard

BY

SANDOZ

**1 tablet
night and morning
for
continuous control**

0.2 mg. total alkaloids of belladonna
0.6 mg. Ergotamine Tartrate B.P.
40 mg. Phenobarbitone B.P.

Ergotamine and belladonna suppress the peripheral effects of overstimulation of both sympathetic and parasympathetic divisions. At the same time central sedation with phenobarbitone renders the patient less reactive to mental and emotional stimuli.

Bellergal Retard acts at different levels (central and peripheral) to control the somatic manifestations of mental and emotional stress.

Bellergal Retard "cuts the lines of communication" between psyche and soma in psychosomatic disorders.
