# **"IMPROVED THERAPY FOR PEPTIC ULCER"**

**Extract reprinted from the American Journal of Gastroenterology. (1957) 28, 439.**

"The medication investigated is known as Roter tablets . . . The dosage employed in the treatment of gastric or duodenal ulcer was 2 tablets, taken three times a day with tepid water immediately after meals . . . this therapy is applicable to ambulatory patients."

## **SUMMARY**

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92 per cent of cases and roentgenological healing of the ulcer in 81 per cent. The average weight gain was 7.9 lbs. and occult blood disappeared from the stools in all of the six cases in which it was found.

"The benefit provided by the medication is attributed to the minute particulation of the bismuth subnitrate, produced by a special process of trituration in association with a synergistic antacid combination.

"The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases.

"There was no acid rebound in therapeutic dosage and no adverse effects were reported."

**WANDER**

*"timed-release tablets"*

## The *NEW* concept for relief of the Common Cold

In the common cold and postnasal drip, one "timed-release" TRIOMINIC tablet brings welcome relief of symptoms in minutes. Running noses stop, clogged noses open—and stay open for 6 to 8 hours. The patient can breathe again. 'Triominic' is not likely to cause secondary congestion, and it eliminates local overtreatment and consequent nasal pathology, such as commonly follow the use of topical decongestants in the form of sprays and nasal drops.\*

Each "timed-release" TRIOMINIC Tablet contains:

Phenylpropanolamine-HCl . . . . . 50 mg.  
Mepyramine maleate B.P. . . . . 25 mg.  
Pheniramine maleate . . . . . 25 mg.

'Triominic' Wander is Schedule 4.

**Dosage:** 1 tablet in the morning, afternoon and in the evening if needed. An average prescription is 12 tablets.

**Packs:** Supplied for dispensing in bottles of 50 and 250.

# THREE SIGNIFICANT DATES

---

**1949** It was found that treatment with synthetic vitamin E ('Ephynal') in large doses for at least three months gave symptomatic relief in many patients with intermittent claudication.<sup>1, 2, 3</sup>

**1953** A blind controlled study was carried out,<sup>4</sup> giving doses of 450 mg. natural vitamin E daily for only twelve weeks. The results threw doubt on previous findings, as there was no statistically significant difference between the results in patients on vitamin E and those on the placebo.

**1958** A more recent blind controlled study<sup>5</sup> has confirmed the original findings. The patients in this trial were given 600 mg. synthetic vitamin E ('Ephynal') daily and were treated for forty weeks. At this stage 13 out of 20 patients on vitamin E showed subjective and objective improvement whilst 2 out of 20 showed improvement in the placebo group.

This shows that, if treatment is persisted with, many patients with intermittent claudication improve on synthetic vitamin E.

**THE PROBLEM**

*To obtain high blood levels of theophylline easily*

**THE SOLUTION**

*Oral 'Theodrox'*

**THE RESULT**

*A full Therapeutic response*

For oral aminophylline therapy to be fully effective it is necessary to give a dose sufficient to produce high blood theophylline levels. However, because of gastric irritation vomiting often results. Alternative therapy with enteric coated tablets or suppositories is unreliable, and parenteral aminophylline is inconvenient.

The combination of dried aluminium hydroxide gel and aminophylline in 'Theodrox' ensures full therapeutic response with the minimum of gastric upset. Reproducible blood levels comparable with those obtained from intramuscular injection can be obtained.

*Rapid* adsorption of gastric hydrochloric acid is accepted as the most effective method of obtaining relief in peptic ulcer pain.

- \* In two minutes a single teaspoonful (3.5 mls.) of DROXALIN GEL will neutralise 50 mls. of N/10 HCl. This is *several times* the speed of acid adsorbents prepared by usual methods.

Using the well established Droxalin formulation a new and exclusive manufacturing technique has produced in DROXALIN GEL an antacid possessing this significant increase in initial acid adsorption. Fentazin is remarkably effective for the treatment of a wide range of psychiatric disorders. Fentazin is several times more active than older phenothiazines, and is effective in proportionately smaller dosage. Side-effects are greatly reduced: indeed, Fentazin in recommended dosage produces virtually no side-effects.

Because it is so safe, Fentazin may be used for the routine management of anxiety and tension states. Because it is so active, it is effective in even severe psychoses. Fentazin safely spans the field from anxiety to schizophrenia. Fentazin tablets contain 2 mg., 4 mg., or 8 mg. perphenazine. Supplied in bottles of 50 and 500 tablets of each strength. ### An advance in the therapy of diabetes

Rastinon tablets, developed by Farbwerke Hoechst A.G., of Frankfurt/M., under the research No. D860, have now an established place in the therapy of diabetes mellitus. The large volume of clinical work and the number of papers published, reflect the world-wide interest in Rastinon. This work clearly shows that for the suitable patient Rastinon tablets provide a form of therapy which is

### Simple, safe, effective and economical

Rastinon is not a "sulphonamide drug," has no anti-bacterial action and does not produce crystalluria. No cases of dyshaemopoiesis or other serious side-effects have been reported among the many thousands of patients satisfactorily controlled for more than two years.

The suitability of a patient for treatment with Rastinon tablets is readily assessed in the diabetic clinic and once stabilised no difficulties have been experienced in controlling the patient. An acute intercurrent infection may necessitate a temporary return to insulin therapy.

### DOSAGE

Once stabilised, from one to three tablets a day are normally all that is required to replace the insulin with its concomitant syringe, needles, swabs, and often nursing assistance as well. During the period of stabilisation it has been found that generally from four to eight tablets on the first day, three to six on the second and three to five on the third are sufficient.

The daily amount should be divided into two or three doses and taken during or after meals with a little fluid. Higher doses are not usually more effective and are not recommended as they may occasionally cause hypoglycaemic reactions. The normal regime of urine examination and dietary control remains necessary.

To lessen the possibility of the patient taking a tablet other than Rastinon in error, each tablet is en-

graved with the name Rastinon and the trade mark of the originators.

### PACKS

Bottles of 100 and 500 tablets—each tablet contains 0.5 G. N-Butyl-N'-toluene-p-sulphonylurea (tolbutamide). The basic cost to the N.H.S. of a week's treatment is on average between 3/6d. and 5/3d.

When you examine

# TAMPAX

please note . . .

How gentle its contact  
with the  
vaginal epithelium

**Please note also—**

*How easy it is for your patients to insert.*

*How flat Tampax expands to fit the vaginal canal.*

*How positive its wick action in absorbing the flux.*

*How dainty it is for your patients to remove.*

*How well it is adapted to individual needs.*

Fine surgical cotton forms the Tampax tampon—the kind a surgeon might use for a surgical dressing. Its contact with the resilient stratified squamous epithelium of the vaginal canal—ever protectingly moistened by its own transudate and by uterine secretion—is altogether gentle and non-irritant.

Yet its superior absorbency affords a safe margin of protection without bulky packing—compression of the tampon permitting easy insertion, and flat expansion conforming it to the vaginal cross-section. Indeed, so comfortable is Tampax *in situ*, (when correctly placed well within the introitus) that the user is hardly aware of its presence.

Designed by a physician, Tampax is supplied in two absorbencies (Regular and Super) to meet individual requirements. Its central stitching precludes the possibility of disintegration, and its positive “wick” action prevents any blocking of the flow.

The comfort, convenience, and freedom it affords your patients can reflect your own judgment as to the hygienic superiority of this internal form of menstrual protection.

**HAVE YOU EXAMINED TAMPAX RECENTLY?**

Professional samples and literature will gladly be supplied by Medical Department, Tampax Limited, Belvue Road, Northolt, Greenford, Middlesex.

***Tampax provides better physical management of menstrual hygiene***

Wyeth

Safe, consistent and remarkably effective against the majority of bacterial infections met with in practice, Evramycin\* offers you a rapidly active oral antibiotic with two outstanding features.

Firstly, nearly all pathogenic strains of staphylococci — even those resistant to other antibiotics — as well as streptococci and pneumococci are readily susceptible.

Secondly, treatment is relatively free from side-effects — allergy is rare; anaphylaxis, agranulocytosis, staphylococcal enteritis and troublesome minor symptoms are unknown.

## A new route for salicylate therapy

Algesal balm has only one active principle, the newly-synthesised compound, diethylamine salicylate, which differs from other salicylates in that it is *not* a counter-irritant nor a rubefacient.

Diethylamine salicylate has been shown to penetrate the skin in significant quantities and this discovery has opened up a new route for salicylate therapy.

The site of action of salicylates taken by mouth is still not known for certain and some authorities suggest that it may be peripheral, at the site of the pain'. Percutaneous salicylate therapy thus has immense possibilities; and Algesal is proving to be a most valuable

remedy for the relief of local tissue pain by inunction.

The indications for Algesal fall naturally into four groups: rheumatism, closed inflammatory conditions, pain following trauma of different kinds, and certain painful conditions of unknown aetiology — e.g., chilblains and idiopathic night cramps.

Algesal is a non-staining white cream with a pleasant smell of lavender. It contains 10% diethylamine salicylate, in a vanishing cream base specially formulated to assist skin penetration.

Samples and literature will gladly be sent on request to the manufacturers, E. G. H. Laboratories Ltd., Peru Street, Adelphi, Salford 3.

## Sunshine and Warmth... for people of all ages

So many people would feel all the better for the stimulating warmth and sunshine provided by Philips Health Lamps. For instance, when used under medical guidance, these lamps are often remarkably successful in treating rheumatic complaints and debilitated conditions.

*Two types of lamp are available, both requiring a signed medical certificate to enable the patient to purchase.*

### Philips Ultra-violet **SUNLAMP** (Made in Holland)

Philips Sunlamp gives the blessing of "Mountain sunshine"—a boon in convalescence and, as many doctors know, is useful for treating skin troubles, such as psoriasis. Price: £5.17s.6d. (including goggles).

### Philips Infra-red **INFRAPHIL** (Made in Holland)

Philips Infraphil was installed in the medical centres at the last two Olympic Games. It is most valuable in alleviating the pain of arthritis, rheumatism and muscle-strain. Infraphil Infra-red lamp costs only £3.3s.0d. (as illustrated). De-luxe model "A" Price: £4.4s.0d.

## "He's such a problem, Doctor . . . . !"

In every other respect a normal healthy child, he has never been dry at night, with the result that he has acquired undeservedly the label "difficult".

As he grows older his shame and embarrassment will become more acute as those around him become less tolerant of his disability.

In his case, as in the case of many others, Di-sipidin, by controlling enuresis symptomatically on strictly physiological lines, offers a real prospect of an early return to normal function with a consequent restoration of confidence and self-respect.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

★*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

The Medical Research Council invite applications for Rockefeller Travelling Fellowships in Medicine for the academic year 1959-60. These Fellowships are provided from a fund with which the Council have been entrusted by the Rockefeller Foundation of New York. They are intended for graduates resident in this country who have had some training in research work in clinical medicine or surgery, or in some other branch of medical science, and who are likely to profit by a period of work at a centre in the United States or elsewhere abroad, before taking up appointments for higher teaching or research in the United Kingdom. Fellowships held in the United States will normally have a maintenance allowance at the rate of \$3,000 per annum for a single Fellow, and \$4,200 per annum for a married Fellow. Provision will be made for travelling and other approved expenses, and a small family allowance will also be available. Further particulars of these Fellowships and forms of application may be obtained from the Secretary, Medical Research Council, 38, Old Queen Street, Westminster, S.W.1, to whom applications should be sent not later than December 31, 1958. The closing date for other Medical Research Council Travelling Fellowships previously announced, including United States Public Health Service Fellowships, has now been similarly extended until December 31, 1958. **THE ERNEST AND MINNIE DAWSON  
CANCER TRUST****A COMPETITION FOR GENERAL MEDICAL  
PRACTITIONERS**

The purpose of the Ernest and Minnie Dawson Cancer Trust, which came into being in 1955, is to arrange competitions between selected general medical practitioners and to give big financial prizes to such practitioners who from time to time make what is considered to be the most valuable contribution to the early diagnosis, prevention and treatment of cancer and to knowledge of its causes. The second competition, which will close on May 1, 1959, will take the form of a thesis on cancer. The subject matter is at the discretion of the entrant, and may relate to cancer in various sites or cancer of one organ; it must also lay emphasis on one or more of the following: (a) early diagnosis; (b) causes; (c) prevention; and (d) treatment. All entries must contain original thought and observation, and be the result of personal endeavour. The competition is open to doctors mainly engaged in general practice who practise and/or reside in Lancashire or Yorkshire; and the maximum prizes offered are £1,500 (first) and £500 (second), subject to the merit of the entries submitted. Entry forms and detailed conditions of entry may be obtained from the Clerk to the Trust, The Ernest and Minnie Dawson Cancer Trust, 89a, Fishergate Hill, Preston, Lancs.—E. **UNIVERSITY OF ST. ANDREWS****POSTGRADUATE COURSE IN ANATOMY  
AND PHYSIOLOGY**

Graduates in Medicine and Surgery are invited to make application for a Course in Anatomy and Physiology (including Biochemistry) to be held in the Pre-clinical Departments of St. Salvador's College, University of St. Andrews, from October, 1959, to March, 1960. The number of graduates accepted for this course will be small. They will be attached to, and expected to take some part in the work of, the Anatomy and Physiology Departments. Instruction will be given, formally and informally, in systematic, practical and applied aspects of Anatomy, Physiology, and Biochemistry, and students will be afforded opportunity of gaining experience in methods to be individually selected. They will be required to take part in tutorial discussions both with members of staff and with medical undergraduates, and to make themselves familiar with current teaching. The Anatomy Department is responsible for the teaching of Histology, and has particular interest in Bone, Arthrology, Heart and Central Nervous System. The Department of Physiology and Biochemistry operates a course in Applied Physiology and Biochemistry for senior medical students, and is equipped to supervise techniques in Neurophysiology and Neurochemistry, Protein and Carbohydrate Chemistry, and various aspects of medical Biophysics. The fee for the course will be £36. Applications should be submitted before May 1, 1959, to the Dean of the Faculty of Medicine, University of St. Andrews, Queen's College, Dundee, from whom further information may be obtained.

**UNIVERSITY OF ST. ANDREWS****COMBINED CLINICAL AND MEDICAL  
SCIENCES COURSE**

Graduates in Medicine and Surgery are invited to make application for a Combined Clinical and Medical Sciences Course to be held in Queen's College, Dundee, from October, 1959, to March, 1960.

All those taking the Combined Clinical and Medical Sciences Course will have:

(1) A clinical attachment in the special subject of their choice. In 1959-60 the following subjects will be offered.

General Surgery	Respiratory Diseases
General Medicine	Obstetrics
Cardiology	Gynaecology
Cardiovascular Surgery	Paediatrics
Endocrinology	Psychiatry
Dermatology	Ophthalmology
Haematology	Oto-rhino-laryngology
Infectious Diseases	Orthopaedics

(2) A supervisor who would guide their reading and laboratory work in relation to their specialty; and

(3) All would attend the medical sciences course.

The number accepted for this educational programme will be small and only one or at the most two candidates will get an attachment in each special subject. The Eastern Regional Hospital Board will give the successful candidate an honorary clinical assistantship within the Unit where he is studying the special subject of his choice. The Supervisor will not only guide the reading and laboratory work of the student but will in appropriate cases allow him to take part in current research programmes. The objective of the medical sciences course which all the postgraduates, whether medical, surgical, or other specialists, will follow is to bring the postgraduate student up to date on current trends in the medical sciences which are of importance to future medical developments.

In addition to this course, the Medical School offers weekly open postgraduate lectures by distinguished visitors and a course of lectures on scientific methods which postgraduate students in the school will be free to attend.

The fee for the course will be £36. Applications should be submitted before May 1, 1959, to the Dean of the Faculty of Medicine, University of St. Andrews, Queen's College, Dundee, from whom further information may be obtained.
