

Now you can achieve

a positive nitrogen balance by infusion

When disease, injury, pre- or post-operative requirements make normal feeding impossible, Trophysan provides the nitrogenous materials the body needs for tissue replacement. It contains:

- 1 All the essential amino acids and glycine.
- 2 Trace minerals and vitamins to promote protein synthesis.
- 3 Sorbitol to ensure an adequate supply of energy.

Trophysan is available in a variety of concentrations, with or without sorbitol, to satisfy a wide range of individual requirements. It is usually administered by intravenous infusion, but can also be given by gastro-intestinal tube or subcutaneously.

OXYGEN THERAPY SETS ON EC 10 PRESCRIPTION

The Normalair Type C890 Domiciliary Oxygen Flow Selector is approved by the Ministry of Health for use at home and is included in the drug tariff.

Fool-proof and easily attached without tools to any standard oxygen cylinder, the Normalair C.890 provides an accurately-controlled and metered oxygen supply at 2 or 4 litres a minute.

The flow rate selected by simply turning a clearly marked knob is automatically maintained from 1980 p.s.i. to 30 p.s.i. and no re-adjustment is needed as cylinder pressure falls during use.

Full details are available in Leaflet C.890.

Weight	2½ lb.

Carefree Calendar Girl

In a very high percentage of cases Buscopan bridges what normally would be a painful monthly period. Except for the few 'difficult' cases, the patient can go about her usual business and social activities on a par with her more fortunate sisters. From the practitioner's point of view a regular prescription offers him the opportunity to dismiss the problem of spasmodic dysmenorrhoea. He can look forward to a welcome curtailing of consultations. Buscopan, unlike an analgesic, is a specific therapy and *not* symptomatic treatment. Its action is on the parasympathetic innervation of the uterus where it relieves the condition smoothly, promptly and without side-effects. Buscopan does not give rise to gastric upsets, has no effect on the higher centres and is excellently tolerated.

Deep skin penetration in Arthritis and Rheumatism

NICOTINIC, SALICYLIC AND
p-AMINO BENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment. For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

EFFECTIVE Over 1,000 published articles substantiate the clinical value of Rastinon (tolbutamide). Thousands of patients have been effectively controlled for more than three years.

SAFE No cases of dyshaemopoiesis, jaundice or other serious side-effects have been reported. Analysis of over 10,000 case histories shows Rastinon to be completely safe for suitable diabetics.

Rapid excretion precludes cumulative effects. The significant difference between Rastinon and all other available anti-diabetic agents is that there is virtually no danger of hypoglycaemic reactions as a result of Rastinon therapy.

SIMPLE One tablet by mouth once or twice a day is all that is necessary for maintenance. There is no added cost of treatment for the patient previously on insulin.

THE RESEARCH LABORATORY is the very centre of a great pharmaceutical company. Without it no discoveries could be made, no progress would be possible—it is the hub of all activity. For this is where ideas are conceived, experiments carried out, and results evaluated—in the hope that something will come to light to advance the frontier of medical knowledge another step.

300 graduate scientists—chemists, doctors, pharmacists—are employed by Hoechst in Frankfurt on pharmaceutical research alone. They work in ultra-modern laboratories, with all the equipment they could possibly need—inspired by the example of such illustrious predecessors at Hoechst as Emil von Behring and Paul Ehrlich, originators respectively of the first diphtheria antitoxin and Salvarsan.

Diabetic Neuropathies

- Complications involving the nervous system have long been recognized as a feature of diabetes. If the peripheral nerves are affected, administration of the whole vitamin B complex has been advocated. The therapeutic response to the entire B complex has been found to be considerably better than to thiamine alone. Although the parenteral route is recommended in the early stages of treatment, oral administration may be sufficient later.
- Marmite yeast extract supplies all known factors of the vitamin B complex in a palatable form. It can be incorporated readily in the diabetic diet and, as it contains only a negligible quantity of carbohydrate, it need not be taken into the dietary calculations.

“What will prescribing ‘FERROIDS’ do for me?” *(Asks the Physician)*

“It will give me the satisfaction of knowing that the results I expect will be obtained.”

‘Ferroids’, the new iron preparation of superb quality, raises hæmoglobin levels rapidly, effectively and with the utmost freedom from gastro-intestinal upset.

‘Ferroids’ removes the uncertainty as to whether a poor response to iron therapy is due to inadequate utilisation or to the patient’s failure to take a dose. ‘Ferroids’ will not cause gastro-intestinal discom-

fort and there is no reluctance on the part of the patient to take the tablet.

The patient will return to the doctor satisfied with the treatment that is prescribed.

The prescribing of ‘Ferroids’ has a negligible effect on prescription costs. On a dosage of 3 tablets a day, the basic N.H.S. cost per week is 1s. 2d., and even on the highest dosage of 8 tablets a day, which may be required for severe cases of anaemia, the basic N.H.S. cost per week is only 3s. 1d.

The Case of the Tidy Corpse

An odd corpse or two around the house is one thing; but when your better half finds herself knee deep in crime she is liable to take a sudden passionate interest in the vegetable garden. If you find she has prepared an onion bed 6 feet long by 2 feet wide and 6 feet deep, it's time to stand well back from high cliffs, or you may well end up with policemen drawing chalk lines round the body—*your* body.

You have been warned. Don't risk it. *Today* (for it may well be later than you think) buy a Minty bookcase... and put your murderers where they ought to be—'Inside':—condemned to stay neat, tidy and dust-free for life. Your wife will admire the elegant prison, which can expand to take in the entire criminal fraternity. What's more, she'll plant onions in the onion bed.

Minty bookcases are *sectional* and may be started from as little as £10.1.0—on deferred terms if you prefer. Only at Minty show-rooms can you see and buy Minty bookcases (and furniture); only by this *direct* selling from Minty to you can Minty offer you such fine furniture at such moderate prices. There are seven Minty show-rooms each within reasonably easy reach of most people, but if for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post orderings. Write to Dept. B.6. Minty Ltd., 44-45 High Street Oxford.

On
her
feet
all
day...

...yet never feels tired!

For the busy housewife, on her feet all day, varicose veins or even simple leg fatigue may become a major problem. Her long day's round of shopping, housework and catering for the demands of a growing family leaves her no time to 'put her feet up' and give her veins a rest.

For these patients Tru-Support stockings—combining the firm support of an elastic stocking with the light-weight elegance of nylon crepe—are an ideal aid to treatment. They provide the gentle vascular support that is required and yet retain the slender grace which means so much to fashion-conscious women. Tru-Support stockings, superbly strong yet fashionably fine, cost only 39/6 a pair.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s. per annum in the first year; £1,103 19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £600 12s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

Prescribing a Laxative

WHEN THE PHYSICIAN is called upon to prescribe a laxative, Andrews merits special consideration.

Andrews does not irritate the intestine and causes no griping or discomfort. Its laxative action is due to the presence of magnesium sulphate and other salts in balanced proportion. Their effect is to increase the fluid in the bowel by osmosis, and so induce easy, comfortable evacuation. Andrews has a pleasant taste and a refreshing effervescence which make it readily acceptable.

Andrews is particularly suitable for patients liable to digestive upsets. It is mildly antacid and allays gastric discomfort. It also improves the flow of bile, and helps to check biliousness and sick headaches.

No costive reaction results when Andrews is discontinued.

Andrews LIVER SALT

ACTIVE CONSTITUENTS:

<i>Tartaric Acid</i>	23%	<i>Sucros</i>	37%
<i>Sod. Bicarb</i>	23%	<i>Mag. Sulph.(B.P.Exsic.)</i>	17%

A medical sample is available free on request.
