

One-dose-a-day sulphonamide therapy

'Bimez' combines the virtues of 'Sulphamezathine'

TRADE MARK

with persistent therapeutic blood levels

'Bimez', containing 'Sulphamezathine' and sulphadimethoxypyrimidine in the proportion of 3:1, provides persistent sulphonamide blood levels which are maintained by single daily doses. It has also the outstanding advantages of safety and efficiency which have made 'Sulphamezathine' widely popular. This new, long-acting sulphonamide is available in two convenient dosage forms, tablets and suspension.

'BIMEZ' TABLETS

For routine treatment. Each tablet contains: 'Sulphamezathine' (Sulphadimidine B.P.) 0.375 gramme; sulphadimethoxypyrimidine 0.125 gramme. Issued in containers of 12, 50 and 500.

FEATURES

1. *Absorption is rapid and complete as with 'Sulphamezathine'.*
2. *High blood levels.*
3. *Low toxicity.*
4. *Persistence, which makes single daily dosage practicable.*

'BIMEZ' SUSPENSION

Especially suitable for children and the elderly. A teaspoonful (3.5 ml.) is equivalent to one tablet. Issued in bottles of 30 ml.

Basic N.H.S. costs: 12 Tablets 3/8d. 30 ml. Suspension 4/-

“...Cedilanid is probably safest of all”

— British Encyclopaedia of Medical Practice, 6, 407

WILLIAM HARVEY (1578-1657).

Born in Folkestone. By finding how much blood the heart drove out at each beat, and measuring the rate of each beat, Harvey showed that in half an hour it must pump as much blood as there is in the whole body. So, by calculation, verified by careful dissection and experiment, he discovered the circulation of the blood, a fact upon which all modern physiology and medicine are based.

VASCULIT

verified

But for a more recent verification—

"Vasculit caused an increase in blood flow in the infused hand which averaged 57% . . . it may be anticipated that Vasculit will be capable of producing vasodilatation even in patients in whom therapeutic sympathectomy has been carried out".¹

MINOR DISORDERS AND SYMPTOMS.

The haemokinetic action of Vasculit is immediate in this group. Chilblains, cold hands and feet, night cramps, 'restless legs', acrocyanosis.

MAJOR DISORDERS AND SYMPTOMS

Vasculit promotes the formation of collateral circulation. Treatment should be continued over a period of weeks in these indications:—

Intermittent claudication, trophic changes (including gangrene), peripheral arteriosclerosis, Buerger's disease, Raynaud's disease.

Even in the major condition of Raynaud's disease, where spasm rather than obstruction plays the more important part, results are immediate, though treatment should be continued.

Contra-indication—recent myocardial infarction.

NOTABLE ABSENCE OF SIDE-EFFECTS.

Vasculit produces an immediate increase in peripheral blood flow. There is no change in the heart rate and no significant fall in blood pressure.

The pleasant subjective peripheral effects experienced are beneficial to the patient. Vasculit produces no undesirable side-effects.

Brit. Med. J., I, 1007 (1959)

SALURIC Regd.

CHLOROTHIAZIDE

***“The introduction of chlorothiazide is
probably the major advance in therapeutics
since the advent of penicillin . . .”***

Brit. Med. J., 1959, I, 1558

These illustrations and captions are taken from the film **DIURETIC THERAPY WITH 'SALURIC'**, produced by Film Surveys Ltd., London. The film is available for showing to medical audiences. Full particulars will be sent on request. Copyright of photographs is reserved on behalf of the patients. Reproduction is forbidden.

Chlorothiazide is manufactured in
England exclusively by the
Merck Sharp & Dohme Organisation.

MERCK SHARP & DOHME LIMITED
HODDESDON, HERTS 

"... his jugular venous pressure is raised. Mercurial diuretics by mouth make him sick. Other oral diuretics are ineffective The first injection of intramuscular mersalyl worked well, but succeeding doses were less effective."

"This is the same patient only one month later. He is back at work. Saluric is keeping him free of oedema."

".... on admission she was given the usual basic treatment for heart failure but two days later her urinary output was still low, and Saluric was given"

"She has gone back home This woman can be allowed a normal diet and can even take a little salt with her food."

Dramatic results in post-menopausal low back pain

Low backache in the post-menopausal woman is, far more often than was formerly realised, due to, or associated with, decalcification arising from reduced osteoblastic activity and matrix formation caused by oestrogen deficiency. Dianabol relieves the pain by correcting decalcification. It is also effective in preventing osteoporosis and produces remarkable improvement when the condition is established.

A TYPICAL CASE HISTORY

I am very impressed by the result of giving the new compound Dianabol. Four weeks ago I had an old woman of seventy years of age who had so much pain from osteoporosis that she was taking the weight of her body on her arms with these resting on her thighs. I prescribed Dianabol and at the end of one month she is completely free from pain and is able to get about with a brace.

DIANABOL

T.M.

methandrostenolone

NEW NON-VIRILISING ANABOLIC AGENT

DIANABOL produces the nitrogen retention and calcium deposition required for healthy bone and tissue formation.

It is indicated in cachexia of malignant disease, long-term surgery, recovery from chronic illness, corticosteroid-induced osteoporosis and under-developed children.

DOSAGE: Initially 15—20 mg. daily. For maintenance, 5—10 mg. daily or intermittently.

DIANABOL is available as 5 mg. tablets in 25's (Basic N.H.S. price 11s. 4d.), 100's and 500's.

A logical combination of*

**Pro-Banthine
with
Dartalan**

Pro-Banthine

When stress presents a major problem in the common gastro-intestinal disorders, both organic and functional, Pro-Banthine with Dartalan provides the logical solution. The combination of Pro-Banthine with Dartalan ensures specific and effective control of visceral motor disorders, especially when induced or aggravated by psychic tension or anxiety.

In a study of 120 patients, Pro-Banthine with Dartalan gave excellent results in over 90% of 47 patients with peptic ulcer and of 57 with functional disorders of the large bowel. Throughout the series, where psychic symptoms were present, specific improvement in such symptoms was noted in 95%.

AVAILABILITY:

Pro-Banthine with Dartalan (P1.S1.S4.) is available as a combined tablet of Pro-Banthine (Propantheline bromide) 15 mg. with Dartalan (Thiopropazine dihydrochloride) 3 mg. in bottles of 30, 100 and 500.

IN CRISIS AND CONVALESCENCE

COMPLAN provides *complete* nourishment

After head injuries or strokes, and other catastrophes causing unconsciousness, tube feeding with Complan is the simplest, most effective way of keeping the patient fully nourished. It is the same Complan which is so beneficial from the cup during the recovery stage and to the convalescent at home.

Two or three cups daily of Complan (so very easily prepared) provide the high protein-vitamin-mineral intake to build up the patient to full health. In hospital or home, Complan is the simple complete answer to most feeding problems.

Anabolex

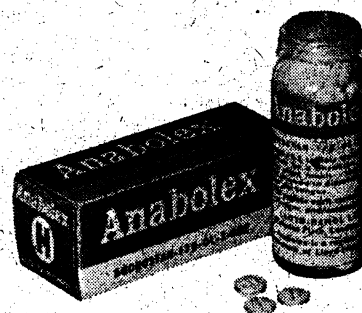

the protein-anabolizing steroid

restores normal protein metabolism

PATIENTS who are recovering from illness frequently suffer from faulty protein metabolism. They are in negative nitrogen balance. Protein, in effect, is being broken down and lost faster than it is being built up.

Anabolex (Androstanolone) restores the physiological balance. Many clinical trials have shown that, following the administration of Anabolex, there is an immediate return of the body's capacity to build up protein. The patient feels better, eats better and gains weight.

Anabolex can be safely given to patients of all ages and both sexes; in therapeutic doses, its virilizing properties are almost negligible. The only known contra-indication is prostatic carcinoma.

PRESENTATION:

In vials of 25 and 100 tablets, each tablet containing 25 mg. Androstanolone. N.H.S. prices are 20/- and 70/-.

INDICATIONS:

Convalescent patients. Premature infants. Asthenia. Malnutrition. Wasting diseases. Preparation for and recovery from planned surgery.

'ANABOLEX' is a registered trade mark of

RASTINON ...

*now provides the safest
oral treatment for 1¼ million
diabetics throughout the world*

The Rastinon combination of HIGH THERAPEUTIC EFFECTIVENESS, ABSOLUTE SAFETY and LOW COST cannot be matched by any other oral anti-diabetic agent.

EFFECTIVE

More than 1¼ million diabetics all over the world owe their well-being to Rastinon (tolbutamide). Its clinical value is substantiated by over twelve hundred published reports.

SAFE

Rastinon has gained world-wide acceptance in the treatment of suitable diabetics because of its outstanding safety. It has been more thoroughly investigated than any other oral anti-diabetic agent, yet no serious side-effects have ever been observed. *The incidence of side-effects is even less than with aspirin.* There is virtually no danger of hypoglycaemia as a result of Rastinon therapy.

SIMPLE

In many cases, one tablet by mouth once or twice a day is all that is necessary for maintenance.

ECONOMIC

A price reduction effective from 12th October cuts the cost of treatment for thousands of patients in the United Kingdom.

HOECHST

...AND THE SEARCH FOR NEW ANSWERS

The greatest pharmaceutical companies are those that are never satisfied with what they have achieved so far. Farbwerke Hoechst, A.G., the great German pharmaceutical company, is one of these companies. Although it has to its credit an outstanding list of medical discoveries—ranging from the first diphtheria antitoxin to the successful orally-administered anti-diabetic drug, Rastinon—it has never been content to rest on past successes.

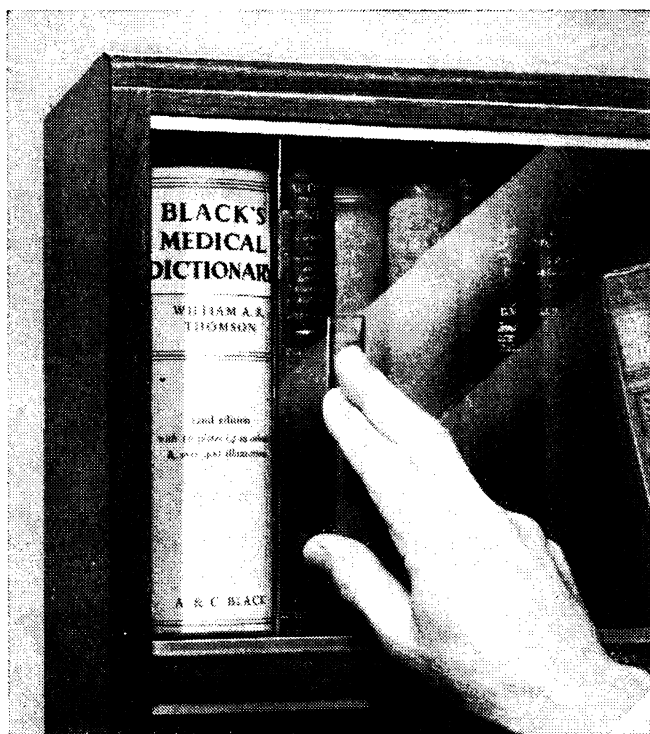

And recently it has again been preparing the ground for greater things. Between 1952 and 1957 Hoechst increased its expenditure on pharmaceutical research and has modernized and expanded its great laboratories at Frankfurt. Its outstanding team of over 300 graduate scientists—chemists, doctors, pharmacists—are at work on a number of pharmaceutical research projects of the first importance to world medicine.

The scientists at Hoechst today are carrying on a great tradition created by men such as Paul Ehrlich and Emil von Behring (whose work with Hoechst gained them each the Nobel Prize).

Almost every year, the restless search for new answers at Hoechst brings forth another new and more effective weapon against disease.

HOECHST

Are you a bookcase?

Symptoms

The symptoms vary. Sometimes an infuriated wife with a bad attack of *volumi dustus* is the only active irritant, but in severe cases a serious distortion of the *shelfi noktup* may result in its complete collapse, causing a possible fatal attack of hysterics on the part of the wife (or landlady) and severe shock to the patient.

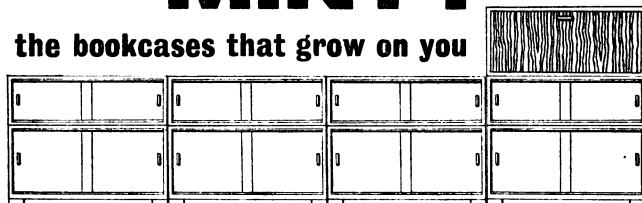

Treatment

The patient should, if possible, give up reading, but as this often leads to an alternative habit which may set up *Teevytwitch* or "Box Goggle", the patient is better advised to take the Minty treatment. This consists of installing a beautifully designed dust-proof bookcase which protects both the contents and the book "case". As the treatment is likely to be necessary until the Last Will & Testament stage, the expanding, "interlocking" Minty is recommended, as it offers an endless variety of space and arrangement, and, as the makers say, is always complete—but never finished. You can begin a Minty library for as little as £10.1.0—and on deferred terms, if you wish.

Only at Minty showrooms can you see and buy Minty bookcases (and furniture); only by this *direct* selling from Minty to you can Minty offer you such fine furniture at such moderate prices. There are seven Minty showrooms each within reasonably easy reach of most people, but if for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B7, Minty Ltd., 44-45 High Street, Oxford.

running noses...

*and nasal congestion
orally with*

'Triominic'

WANDER

**THE *NEW* CONCEPT FOR RELIEF OF
THE COMMON COLD**

Relief in minutes—lasts for hours

An orally administered decongestant has much better distribution to the mucous membranes of the respiratory tract than nasal sprays, drops and inhalants, and this "affords opportunity for shrinkage in areas that could not be approached by sprays, drops or actual topical application."*

'TRIOMINIC' "dries" and decongests nasal passages, combats allergic symptoms—with little likelihood of rebound congestion or pathological changes in the nasal mucosa, and without the risk of local overtreatment or "nose drop addiction." Especially valuable for night-time cough caused by postnasal drip.

* Arch. Otolaryng., 1954, 59, 48

Each "timed-release" 'TRIOMINIC' TABLET contains

Phenylpropanolamine-HCl .. 50 mg.

(norephedrine-HCl)

Mepyramine maleate B.P. .. 25 mg.

Pheniramine maleate .. 25 mg.

'Triominic' Wander is Schedule 4

Dosage: 1 tablet in the morning, afternoon and in the evening if needed. An average prescription is 12 tablets.

Packs: Supplied for dispensing in bottles of 50 and 250.

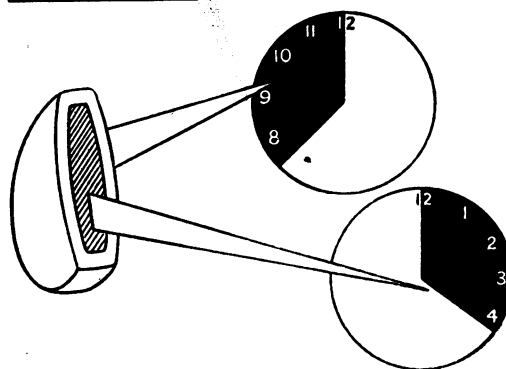

Price: N.H.S. Basic Price for 12 tablets (4 days' treatment) is 2s. 1d.

Also Available: 'Triominic' Syrup, for children and those adults who prefer a liquid medication, in bottles of 2 fl. oz. and 20 fl. oz. (dispensing). N.H.S. Basic Price for 2 fl. oz. is 2s. 6d.

'Triominic' "timed-release" tablets provide relief in minutes keep nasal passages clear for 6 to 8 hours.

FIRST

the outer layer dissolves within minutes to produce 3 to 4 hours' relief

THEN

the inner core disintegrates to give 3 to 4 more hours' relief

THUS

3 tablets daily "unblock around the clock"

THE WORLD'S MOST TRUSTED NAME IN SURGICAL DRESSINGS

Prescribing a Laxative

WHEN THE PHYSICIAN is called upon to prescribe a laxative, Andrews merits special consideration.

Andrews does not irritate the intestine and causes no griping or discomfort. Its laxative action is due to the presence of magnesium sulphate and other salts in balanced proportion. Their effect is to increase the fluid in the bowel by osmosis, and so induce easy, comfortable evacuation. Andrews has a pleasant taste and a refreshing effervescence which make it readily acceptable.

Andrews is particularly suitable for patients liable to digestive upsets. It is mildly antacid and allays gastric discomfort. It also improves the flow of bile, and helps to check biliousness and sick headaches.

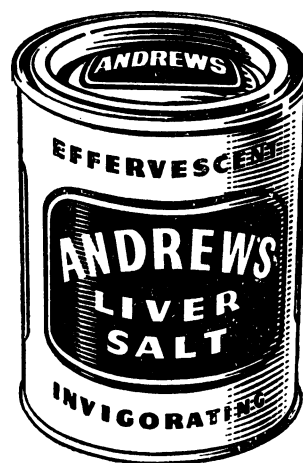

No costive reaction results when Andrews is discontinued.

Andrews LIVER SALT

ACTIVE CONSTITUENTS:

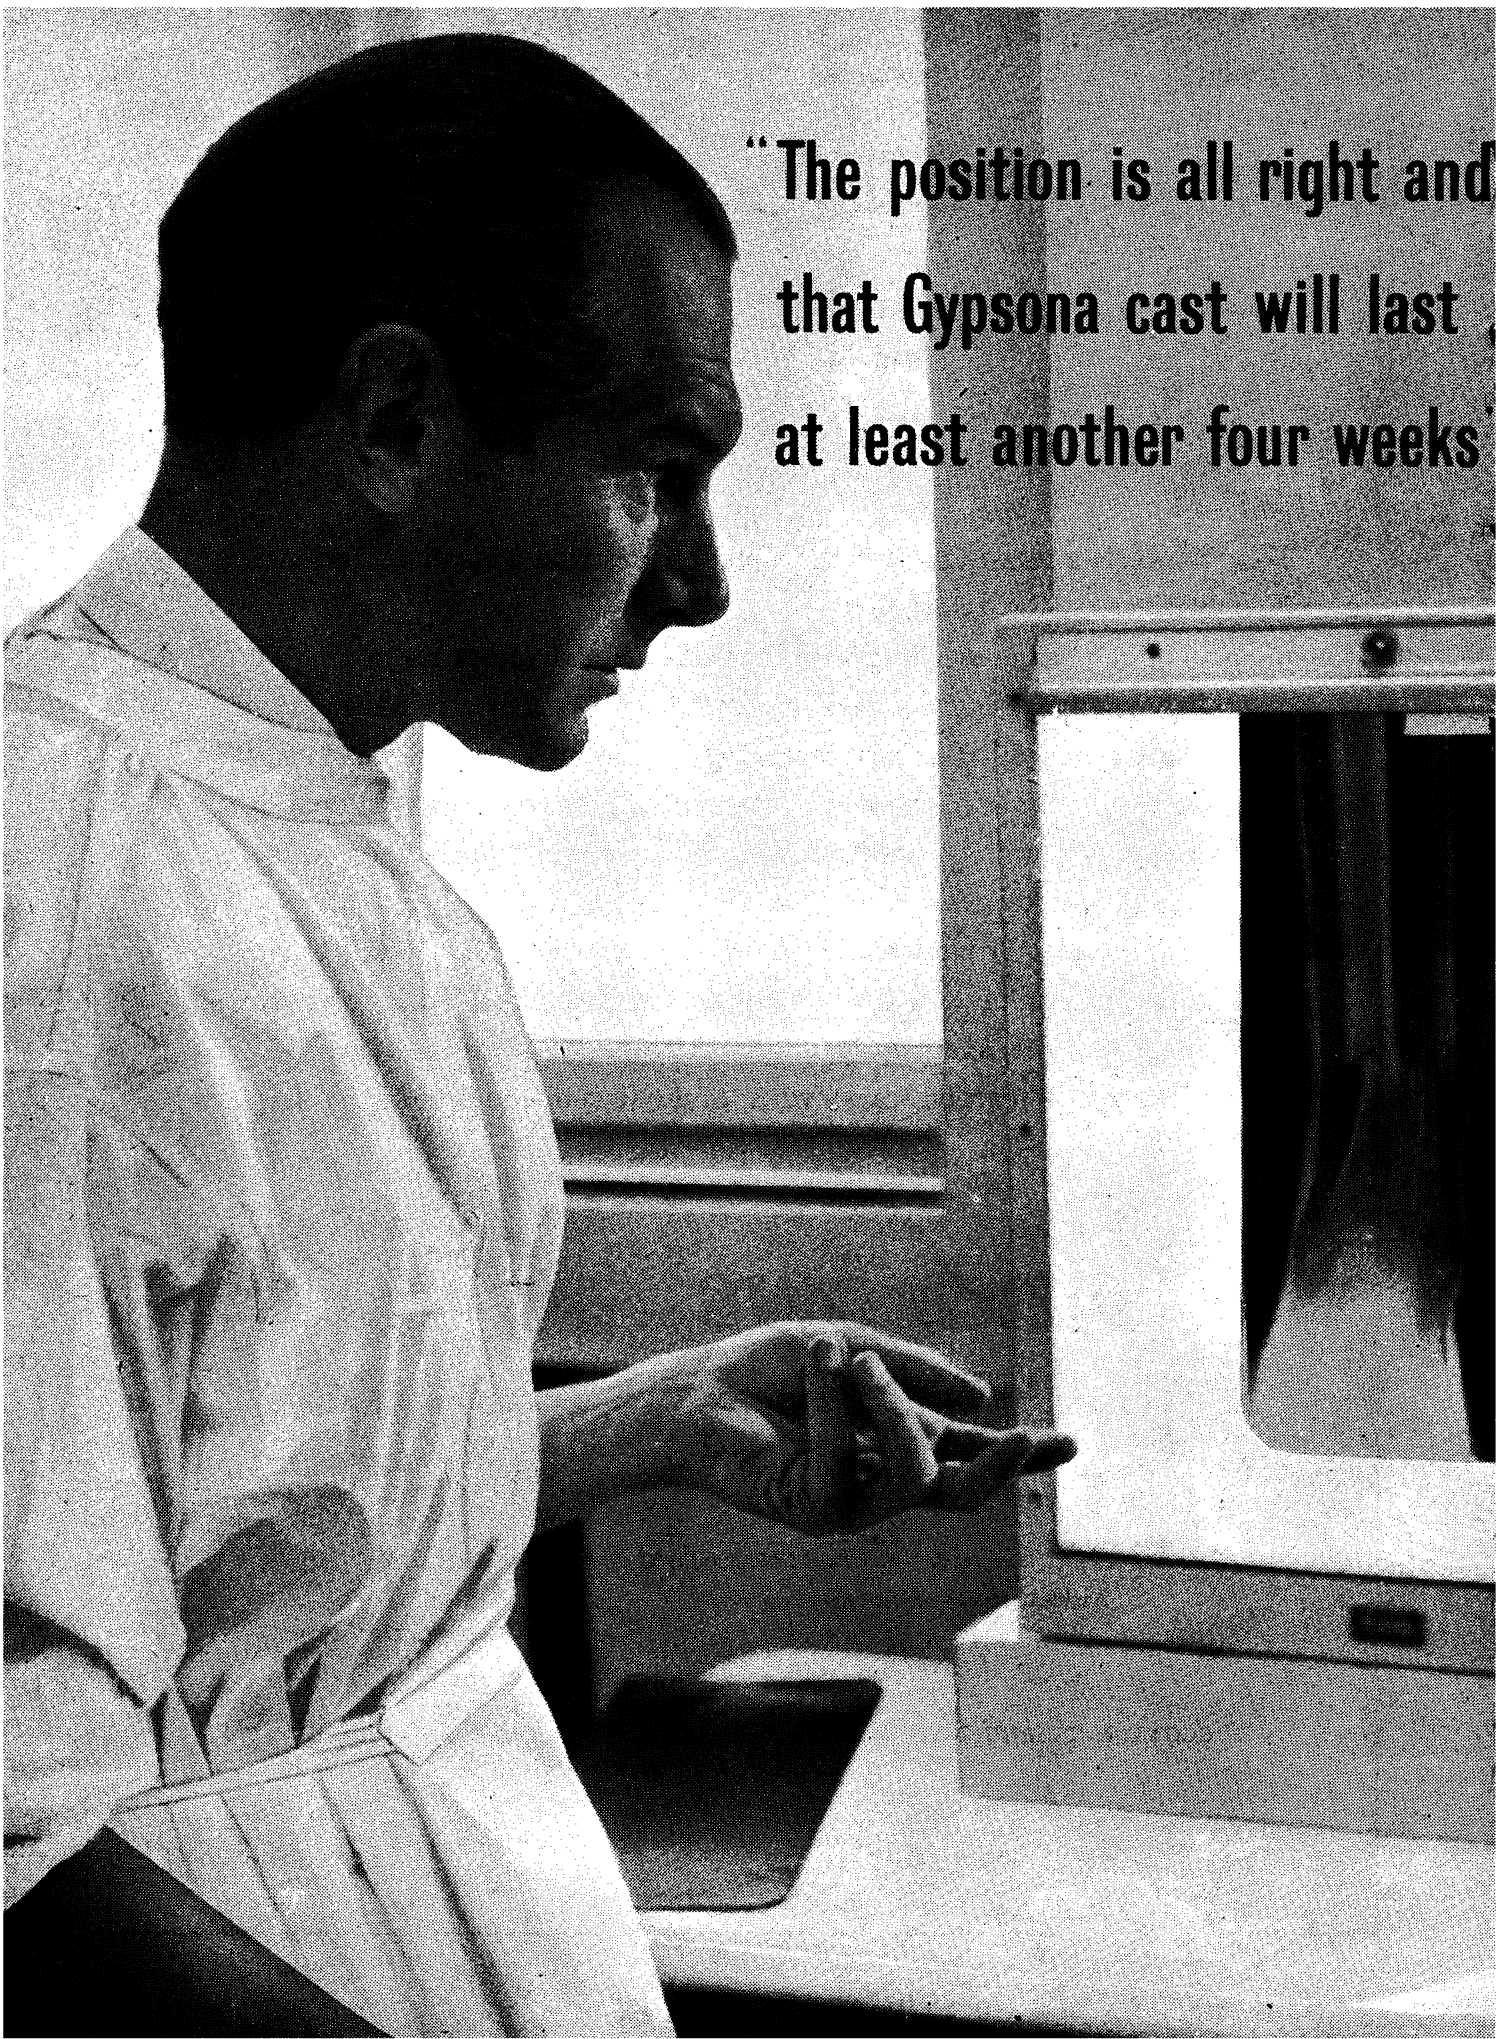

<i>Tartaric Acid</i>	23%	<i>Sucros</i>	37%
<i>Sod. Bicarb</i>	23%	<i>Mag. Sulph. (B.P. Exsic.)</i>	17%

high tolerance iron

The **FERROMYN**

Range

- ▶ **TABLETS**
- ▶ **ELIXIR**
- ▶ **CAPSULES**

High tolerance is the most important factor in the replacement of iron in the anaemic patient. By prescribing FERROMYN (Ferrous Succinate) the physician is well insured against risks of nausea and other symptoms of intolerance to iron.

The mild atoxic action of FERROMYN permits maximum absorption and utilisation of the readily available iron, and produces a haemoglobin response which quickly becomes evident in the clinical improvement of the patient.

Whether the physician prefers to administer iron in tablet, capsule, or liquid form, all three are available in the FERROMYN range.

Providing these outstanding advantages :

(i) disintegration is rapid (ii) intolerance is low (iii) haemoglobin response is 1%–2% per day.

FORMULA

FERROMYN: Each Tablet / Capsule / teaspoonful contains: Ferrous Succinate 150mg.

FERROMYN 'B': Each Tablet/Capsule/teaspoonful contains: Ferrous Succinate 150mg. Riboflavin 1mg. Aneurine Hydrochloride 1mg. Nicotinamide 10mg.

DOSAGE: One Tablet/Capsule/teaspoonful between meals or as prescribed.

Your patient will prefer
DECADRON
Trademark
 because unlike other steroids
 it promotes a *natural*
 sense of well-being

An unexpected but very acceptable finding has emerged during widespread experience with 'Decadron' in a great variety of disorders—patients report that they *feel* better. This healthy sense of *improvement* is particularly noticed by patients who have previously been treated with other steroids, and, as a result, their co-operation during a prolonged and difficult illness is much easier to obtain. Reduction in the incidence and severity of many of the side-effects associated with the older steroids (e.g., oedema and hypertension) has made possible the treatment of patients with cardiovascular disease, and the relative freedom from diabetogenic effect allows 'Decadron' to be given to diabetics when indicated. Thus, the discovery of 'Decadron' has increased still further the number of patients who may now be given the immense benefits of corticosteroid therapy.

'Decadron' (Dexamethasone) is now available in TWO strengths:
 'Decadron'-75 (0.75 mg.), green, half-scored tablets. 'Decadron' (0.5 mg.), yellow, half-scored tablets.
 The United Kingdom N.H.S. basic costs are: 7s. 8d. per 10 × 0.5 mg. tablets; 10s. 10d. per 10 × 0.75 mg. tablets.
 Prices calculated on dispensing packs of 100 tablets.

Nicer than injection— just as effective!

Where injection is inconvenient or undesirable, 'Icipen' V provides adequate oral penicillin therapy—for about 2/9d. a day. Therapeutic levels are reached in 15 minutes, peak concentrations in half an hour. Clinical results are comparable to those obtained with intramuscular penicillin.

'Icipen' V is available as tablets or suspension. The suspension is pleasantly flavoured, and acceptable to children and old people. Each teaspoonful (3.5 ml.) of

prepared 'ICIPEN' suspension contains 150 mg. penicillin V, as calcium salt, available in bottles of 1 and 2 fl. oz. Basic N.H.S. costs when dispensed: 1 fl. oz. for a day's treatment for an infant, 1/6d; 2 fl. oz. for a day's treatment for a child, 3/-.

'Icipen' V 300 scored tablets contain the equivalent of 300 mg. penicillin V as potassium salt. In packs of 12, 100, and 500. Average basic N.H.S. cost for a day's treatment (3 tablets) is 2/9d.

IN MEDICAL EMERGENCIES.....

It is the general practitioner, rather than the Casualty Officer, who is called to treat the Home Emergency...

- * the patient who alarms his family by becoming confused after a few days of influenza...
- * the patient who cannot be roused in the morning, and who is known to have been taking barbiturates for sleeplessness...
- * the puerperal patient who suddenly becomes disorientated...
- * the post-gastrectomy patient whose convalescence fails to progress...
- * the cardiac case who does not improve on digitalis, salt-restriction and rest...

... these are merely a few examples of induced tissue deficiencies for which PARENTROVITE, containing massive concentrations of the B and C vitamins, may provide the answer.

The formula of PARENTROVITE is based on the fact that normal cerebral function depends on the oxidation of glucose, and that any interference with the underlying biochemical mechanisms can cause symptoms of mental disturbance. Severe infections, burns, trauma, surgical operations and stresses of all kinds can be as potent as drugs or alcohol in causing interference with the enzyme systems responsible for glucose oxidation and resultant failure of return to health.

To reverse such changes, and to restore normal cerebral function, massive doses of the B vitamins and ascorbic acid are needed—doses out of all proportion to normal nutritional needs. The vitamins are here used not as nutrients, but as potent drugs employed pharmacologically.

Parentrovite

'broad spectrum' alone means little

The belief that breadth of activity is the ultimate criterion of an antibiotic has little validity today. The development of resistance in bacterial strains has rendered much broad-spectrum coverage totally ineffective. ALBAMYCIN T more than wins back the ground lost. Its tetracycline component provides the most all-embracing coverage of any single therapeutic agent... its novobiocin component augments that coverage with bactericidal intensity. Studies¹ show that when

combined, as they are in ALBAMYCIN T, tetracycline and novobiocin are not only effective against many strains of organisms resistant to either antibiotic used alone, but do much to delay development of resistant strains. It is this added density, this added intensity, of ALBAMYCIN T coverage that makes the therapy all the more decisive.

Each 5 cc. teaspoonful of the suspension contains 62.5 mg. novobiocin and 62.5 mg. tetracycline. Bottles of 60 cc.

Isoniazid and the B vitamins

In the course of isoniazid treatment of tuberculosis, adverse effects on the nervous system have been reported occasionally. Peripheral neuropathy or psychosis may arise, and it has been suggested that these side effects may be due to an antagonism between isoniazid and vitamin B factors. A good response to massive doses of the vitamin B complex has, in fact, been obtained in psychosis arising during isoniazid therapy.

Marmite yeast extract is a useful dietary supplement, providing all known factors of the vitamin B complex. Its pleasant taste ensures ready acceptance by the patient, while the nursing staff appreciate the ease with which Marmite drinks and sandwiches can be prepared.

a molecular complex of chloral hydrate
in tablet form **WELLDORM**

(dichloralphenazone)

'Welldorm' has all the advantages that make chloral hydrate one of the best hypnotics. It has none of the disadvantages—the nauseating taste and smell, the gastric irritation—that restrict the use of chloral in daily practice. 'Welldorm' induces, without excitation, calm deep sleep with no hangover effect. 'Welldorm' is ideally suited for both the very old and the very young, because it is one of the safest of all hypnotics.

'Welldorm' is presented as tablets each containing 10 grains dichloralphenazone in 25s and 250s. The basic NHS cost of 12 tablets (supplied from a dispensing pack) is 1'-. There is also available a 2½ grain strength for children at a basic NHS cost of 6d. for 12 tablets (supplied from a dispensing pack). Clinical samples will be sent on request.

TEEN-AGE PSYCHOSOMATIC DISORDERS

MARE NOSTRUM

BY

ADAM LEGGE-PULLAR, Q.K.

These disorders are liable to present in protean ways, but in general are characterized by non-specific dysfunction. Change of environment is often a good prescription. But it is as well to specify it in sufficient detail for the maximum benefit to be conferred. In the following case success was achieved by advising in what direction the patient should travel. And though it was not possible to advise her with whom she should go and come back (the latter looked after himself), it was possible to advise *without* whom, etc., etc.

Illustrative Case

Miss D.D., a debutante aged 18, complained of what she called a "beat" feeling (she had a general inability to express herself in plain English), together with the effects of insomnia and a possessive-compulsive mother. The latter, who accompanied the patient, was over-weight, over-jowled, over-jewelled, and overpowering. She described her daughter's condition as one of progressive loss of interest and increasing apathy, following a recent emotional experience with a trumpeter in a night-club. She (the daughter) was never in till dawn, and she (the mother) hardly slept a wink, worrying. And look at her hairstyle. (Fig. 1.)

Clinical Examination

showed some loss of weight and a general tendency to curl up with a box of chocolates and the books of Françoise Sagan and Kerouac. Auscultation revealed no positive evidence of the cardiac irregularity which the mother believed to exist, but there was a hint of auricular flutter and whispering pectoriloquy with an equivocal thrill before the diastolic pause. Examination of the nervous system showed only a slight abducent weakness (L), and some intention tremor.

Diagnosis

It was concluded that the patient was suffering from too many parties with constrictive encephalopathy secondary to the frustrations of adolescence.

Treatment

A change of environment was prescribed, *quant. suff. et stat.*, with special reference to a sea voyage to South Africa. The patient was advised to go alone, and take a typewriter in order to try and record her experiences.

Course and Further Prognosis

The patient's father bought her a round-trip ticket to Cape Town by Union-Castle. She returned after six weeks, a different girl. (Fig. 2.)

There had been perpetual sunshine, so that her mediastinal shift (a diagnosis made by her previous doctor, but which barely covered the facts) had sufficed both in the swimming-bath and out. The food had been "marvellous," and she had gained 12 lb. in weight.

She had slept "wonderfully." She had started to write a book called *Downbeat*, but found she could not spell "hopelessness," and had sold her typewriter to a journalist at the Mount Nelson Hotel in Cape Town. The fact that the journalist came back with her pleased her mother, because he had just inherited a diamond mine, and because it had caused, in her daughter, an amnesia for the trumpeter. The prognosis is the more favourable in that the young couple are about to be married and are returning to South Africa to live.

FIG. 1.—Miss D.D. before her trip to South Africa.

FIG. 2.—Miss D.D. A photograph taken on her return journey.

Discussion

The prevalence of adolescent deficiency disorders should serve to remind us that every Thursday at 4 p.m. a Union-Castle mailship leaves Southampton for southern sunshine, First Class and Tourist. The journey to Cape Town takes 13½ days. About twice a month Union-Castle ships leave London Docks for the Round Africa trip, calling at more than 18 ports, and taking nine luxury weeks for the journey. Every ship has a doctor on board who will take care of your patients (or you). The chefs are adept at catering for special diets.

Deep skin penetration in Arthritis and Rheumatism

NICOTINIC, SALICYLIC AND
p-AMINO BENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

*Therapeutische Umschau 1952, 8, 143

Key people need Invirin protection this winter

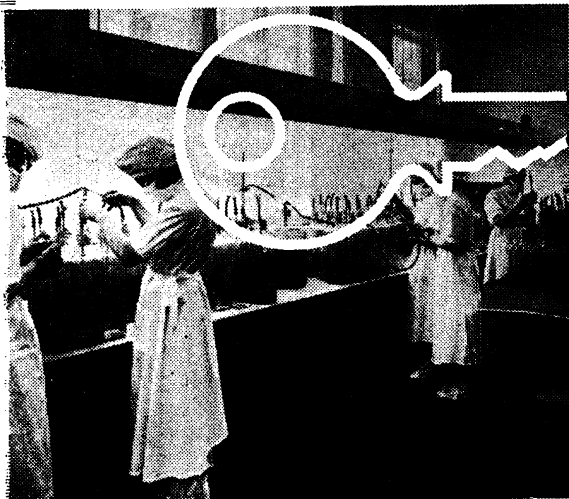

Key people, like Medical Officers of Health and their staffs, cannot afford to be absent because of influenza this winter. But protection can be afforded with INVIRIN—an up-to-date vaccine against virus influenza, made by Glaxo Laboratories Ltd.

INVIRIN is prepared from strains, isolated from recent epidemics of influenza. These strains are the ones most likely to be the cause of infections this winter. One simple INVIRIN injection, causing little

discomfort, is normally sufficient to provide a substantial degree of protection all through the peak risk period.

For maximum effectiveness, INVIRIN protection should be given in late September or early October. We urge you therefore, to communicate soon with Glaxo Laboratories Ltd., for full details of INVIRIN and of its low price when purchased in quantity by Public Health Authorities.

INVIRIN IN BRIEF

DESCRIPTION

Invirin is a bivalent vaccine of killed virus for immunisation against virus influenza. It is prepared from strains that have been isolated from recent epidemics: A/Singapore/1/57 and B/England/939/59.

ADMINISTRATION

After shaking to prepare, the adult dose of a single injection of 1 ml should be given deeply subcutaneously. Antibodies are produced after about 14 days after inoculation.

STORAGE

Protect from light and store in a refrigerator. Under these conditions the vaccine can be stored for 18 months.

How well do you know the Concerto in E \flat ?

... or any other famous work? Do you know every grace note—every subtle change in harmony? If you do, you are either an expert score reader, a regular concert-goer or the owner of an Avantic DL7-35 Power Amplifier.

This amplifier has been acclaimed by the critics (see *The Gramophone*, October 1956 and *Gramophone Record Review*, April 1957) as being faultless in design, construction and performance. It has a peak power output of 54 watts and a distortion content of less than 0.05% at 20 watts sine wave output. The power response at this level is linear from 30 c/s. to 20 kc/s. With a damping factor of 50 and a rise time of only 5 microseconds, an excellent transient response is assured.

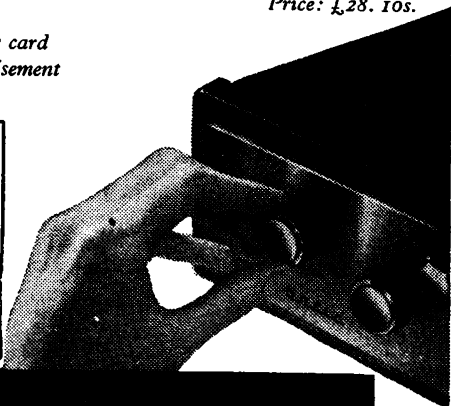

Price: 30 gns.

The Avantic SP21 Stereophonic Pre-amplifier Control Unit is now available for use with either one or two DL7-35 Amplifiers for monophonic or stereophonic reproduction. It has 6 separate inputs for each channel and 9 controls.

Price: £28. 10s.

On
her
feet
all
day...

...yet never feels tired!

For the busy housewife, on her feet all day, varicose veins or even simple leg fatigue may become a major problem. Her long day's round of shopping, housework and catering for the demands of a growing family leaves her no time to 'put her feet up' and give her veins a rest.

For these patients Tru-Support stockings—combining the firm support of an elastic stocking with the light-weight elegance of nylon crepe—are an ideal aid to treatment. They provide the gentle vascular support that is required and yet retain the slender grace which means so much to fashion-conscious women. Tru-Support stockings, superbly strong yet fashionably fine, cost only 39/6 a pair.

TRU-SUPPORT

The new fashion stocking

with true elastic support

PRETTY POLLY HOSIERY MILLS, SUTTON-IN-ASHFIELD, NOTTS.

New approach to PSORIASIS

Hitherto intractable—now good response to alphosyl

THOUGH modern medicaments have brought almost dramatic relief to many forms of skin affection, Psoriasis has so far remained intractable. Its aetiology continues to baffle investigation: many forms of tried therapy have yielded only partial or temporary results.

Now ALPHOSYL—after extensive clinical trials—shows promise of bringing total clearances in many cases of Psoriasis.

In ALPHOSYL, for the first time, are presented in combination two powerful and proved agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition itself and positive stimulation of the healing processes.

ALPHOSYL LOTION combines these two valuable agents in one preparation and has yielded good clinical results where other medications have failed.

Clinical Properties

ALPHOSYL LOTION

relieves the condition and promotes healing by breaking up the horny layer of psoriatic skin, removing non-viable tissue and combating both the scaling and underlying erythema and induration.

has produced successful results in cases of psoriasis when the whole of the body has been affected from scalp to toe, in cases of many years' duration or when tender areas such as the anogenital and sub-mammary regions are affected.

is notably safe to use. The potential hazards of other forms of treatment—arsenic, mercury, corticosteroids, X-rays—are avoided. No irritation has been observed in any case of psoriasis treated with ALPHOSYL, even those involving tender regions.

does not produce tolerance. Patients continue to benefit from prolonged therapeutic or maintenance applications.

is a welcome advance cosmetically, as it is pleasant to use, non-greasy, non-staining, and vanishes on application to the skin. It may be used freely on the scalp, and is ideal for day or night use.

The impressive successes obtained with ALPHOSYL indicate that it deserves a trial in all cases of Psoriasis—no matter how extensive the area of affection, how long the duration of the condition, or whatever the therapy previously used.

EMERGENCIES IN GENERAL PRACTICE

from the
British Medical Journal

470 Pages, cloth bound,
with full index

PRICE 25s. net

by post: inland and overseas 26s. 9d.

This book deals with medical emergencies in a wide sense: acute clinical emergencies requiring prompt and skilful treatment; conditions such as faints and fits and giddy turns, the careful elucidation of which may mean the difference to a patient between a life of activity and one of restriction; acute psychiatric states; accidents of treatment, such as dangerous reactions to drugs or collapse during anaesthesia; and emergency calls when the doctor is isolated, as on a ship.

It comprises 57 specially commissioned articles which appeared originally in the *British Medical Journal*.

The author of each is an acknowledged authority. This collection, now revised by the authors, will be of value not only to general practitioners but also to senior students, house-physicians, house-surgeons, and to those supervising their work in hospitals.

NEW COLUMBUS SUCTION POLISHER

minimises dust-borne cross infection

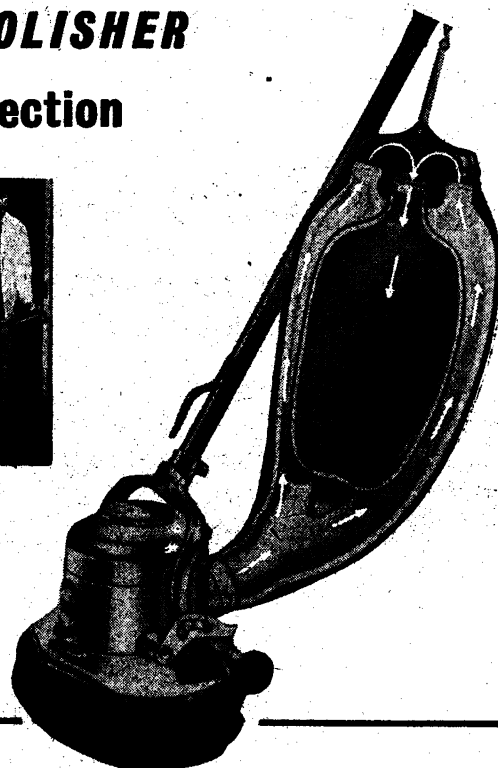

PROVED BY LABORATORY TESTS

The Columbus suction polisher and cleaner, which has been successfully used in hospitals for 25 years, now incorporates new two-stage dust control that traps 98% of all floor dust and dirt. The white arrows indicate the direction of dust flow into the bag . . . up through twin protected channels . . . into the inlet at the top of the bag . . . and down in a controlled flow into a disposable paper bag. Notice how, instead of entering the bag at the bottom, as in ordinary cleaners, the dust and dirt enter at the top, thereby preventing drop back or fall-out, and also making removal of the disposable bag much more hygienic.

Literature on this new Columbus machine, including details of hospital laboratory tests reported in "The Lancet," will be forwarded on request.

COLUMBUS

Suction Polisher-Cleaner,
2-brush, 3-brush and 4-brush
models.

For SUB-ACUTE and Chronic dermatoses **TAR + HYDROCORTISONE**

combined in

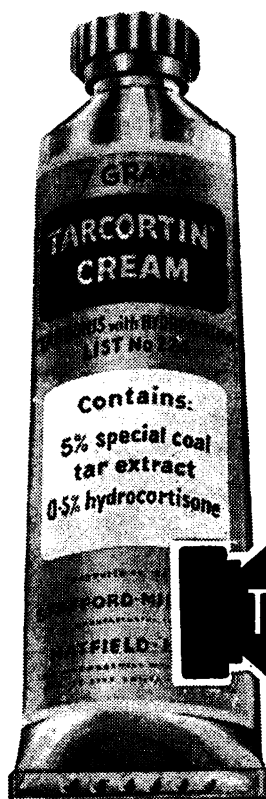

TARCORTIN

CREAM

**have pronounced advantages over
either medicament alone**

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

*Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

TARCORTIN CREAM

is supplied in 7 gm.
and 15 gm. tubes,
containing 0.5% Hydrocortisone
in a special coal-tar extract.

** Literature available on request.*

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s. per annum in the first year; £1,103 19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held; provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £600 12s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

THE BAHRAIN PETROLEUM COMPANY LIMITED

Applications invited for the position of

SURGEON

in their air-conditioned Staff Hospital in the Persian Gulf, to commence February 1, 1960.

The candidate appointed will be in charge of all surgery at the Company's European Hospital, and Surgical Consultant at the Company's Asian Hospital, responsible to the Chief Medical Officer, and will also be required to do some general practice in common with the Company's other medical staff. The hospital is well-equipped with a modern operating theatre and a British nursing staff.

Candidates should hold F.R.C.S., and have had good experience of general operative surgery, having held a post of Surgical Registrar for at least two years at a recognized British hospital. Experience of obstetrics would be an advantage but is not essential.

A generous commencing salary will be paid dependent on qualifications and experience, in addition to which free air-conditioned accommodation and a living allowance will be provided. An initial kit allowance, medical attention, pension and provident funds, paid home and local leaves are also provided with passage paid for the former and generous assistance towards the latter.

Applicants are requested to apply in writing to "MED." Caltex Services Limited, Caltex House, Knightsbridge Green, London, S.W.1, for an application form, giving at the same time a short outline of their experience.

Applications are invited for one Senior Lectureship, one Lectureship and one Senior Demonstratorship in Physiology. The salary range for a Senior Lecturer is £A.2,200 to £A.2,600 per annum, or if medically qualified is £A.2,300 to £A.2,850 per annum. The salary range for a Lecturer is £A.1,500 to £A.2,100 per annum, and for a Senior Demonstrator is £A.1,280 to £A.1,450 per annum. Commencing salaries will be fixed according to qualifications and experience. Superannuation is provided by a scheme similar to the F.S.S.U. in Great Britain. Conditions of appointment can be obtained from the Secretary, Association of Universities of the British Commonwealth, 36, Gordon Square, London, W.C.1. Applications close in Australia and London on November 16, 1959. (3720)

Oversea (Vacant)—contd.**THE OTAGO HOSPITAL BOARD**
Department of Obstetrics and Gynaecology,
Dunedin Hospital, New Zealand

Applications are invited for the position of **VISITING ASSISTANT OBSTETRICIAN AND GYNAECOLOGIST, Dunedin Hospital**. Applicants must hold a higher qualification in obstetrics and gynaecology with corresponding post-graduate experience. The salary payable in accordance with the Hospital Employment (Medical Officers) Regulations and will be dependent on the appointee's qualifications and experience and will be one of the following rates: £410 per annum, £500 per annum, £590 per annum. Subject to appointment by the University of Otago, there will be further remuneration as a Lecturer in Obstetrics. The hours of duty of the appointment will be 7 to 10½ hours per week and private practice will be permitted. Conditions of appointment for the position may be obtained from the office of the High Commissioner for New Zealand, 415, The Strand, London, or the undersigned. Applications, on the form of application attached to the conditions of appointment, stating age, qualifications and experience, together with the names and addresses of persons to whom confidential reference may be made, and health and chest certificates, will be received by the undersigned until 10 o'clock a.m. on Monday, December 14, 1959.—W. A. Williamson, Secretary, Otago Hospital Board, P.O. Box 946, Dunedin, N.Z. (3626)

UNIVERSITY COLLEGE HOSPITAL OF THE WEST INDIES

Applications are invited for the following vacant posts at the above Teaching Hospital with effect from January, 1960:

SENIOR REGISTRAR or REGISTRAR in the Division of Orthopaedics
