SCIENCE FOR THE WORLD'S WELL-BEING

# Allergic conditions

**A more potent antihistaminic—rapid,  
strong, and prolonged in its action ...  
with no serious side-effects**

Of the many antihistamine compounds available today, Daneral is exceptional for its strong, rapid, and prolonged action. Even small doses are sufficient to counteract the histamine effects that occur in antigen-antibody reaction. Daneral also has a strong antispasmodic action; it also reduces capillary permeability.

It is exceptionally free of toxic side-reactions and has no pronounced action on blood-pressure or vascular resistance.

**Indications:** Extensive clinical trials have established the effectiveness of Daneral in most allergic conditions. It also has value in many conditions that have no clear allergic origin or tissue reaction.

In *hay fever* and vaso-motor rhinitis Daneral is especially effective. In *dermatology* it is used in urticaria and angioneurotic oedema; serum reactions; drug allergy; pruritus. In *general medicine* bronchial asthma and cardiac asthma are helped by Daneral.

# Eczema (INFECTIVE)

*Acute Infective Eczema before treatment*

*After 5 days' treatment (Cambison 0.5% twice a day)*

## **Steroid ointments are frequently successful in varieties of eczema that have resisted other therapy**

They have the advantage of being anti-allergic, anti-inflammatory and anti-pruritic. Even severe itching is usually relieved in a few hours, and hyperaemia, swelling, and exudation reduced during the first day of treatment.

Cambison ointment combines the steroid prednisolone with a two-fold protection against infection. Not only does it include the antibiotic neomycin, which is highly effective against staphylococci and streptococci, but also a quinolylurea compound with chemotherapeutic action particularly directed against gram-positive organisms. This combination widens the antimicrobial spectrum and enhances the antibacterial effect.

Cambison is indicated in cases of acute and chronic eczema and dermatitis, particularly where infection is present or threatened.

## **New ointment combines advantages of the corticosteroids with traditional ichthammol type therapy**

In chronic dermatoses, steroid ointments alone do not always effect radical cures.

**Tumeson** (Tumenol Prednisolone Ointment) combines the advantages of the corticosteroids with more traditional therapy.

It has two components:—

*Prednisolone 0.25%*, with its well-known anti-inflammatory and anti-allergic properties.

*Tumenol Ammonium*, a bituminous shale tar-oil similar to ichthammol, which is widely used in sub-acute and chronic skin conditions. As well as having an anti-inflammatory and antipruritic effect, it is a vasoconstricting agent with fungicidal and bacteriocidal properties.

Where a rapid, pronounced and sustained antipruritic and anti-eczematous action is called for, Tumeson is especially useful.

# Athlete's Foot

*Ringworm of the feet*

*After 7 days' treatment with Jadit*

## **An effective new treatment that is odourless and colourless**

Fungus infections of the skin—and particularly 'athlete's foot'—still remain a prevalent cause of distress and morbidity. The need for a reliable and cosmetically acceptable local treatment is greater than ever before.

The advantage of Jadit (chlorhydroxybenzoic acid butylamide) is that it provides a potent fungicidal action that is practically unimpaired in the presence of tissue protein. It is elegant, simple and safe.

## **For inflammatory and allergic mycotic reactions, hydrocortisone is added**

Jadit 'H' contains 0.5% of hydrocortisone, which has a reliable anti-inflammatory, anti-allergic and antipruritic action. In combination with Jadit's antimycotic action, hydrocortisone suppresses inflammatory reactions.

## *“But that’s just the point, Mr. Baxter...”*

... it’s quite important to remember the difference between the two. Globin insulin contains a foreign protein, globin, to modify the action of the insulin, whereas I.Z.S. contains no protein or peptide, other than the insulin itself. Let me stress once again, gentlemen, that the prolonged effect of I.Z.S. depends entirely on the appropriate adjustment of the particle size of the zinc insulin compound. It is because the effect of I.Z.S. is independent of any modifying protein, that allergic reactions following its use are practically unknown. That is precisely why I.Z.S. is so suitable as the single daily injection of insulin in about 90 per cent. of diabetic patients. Any other questions?”

# Anabolex

the protein anabolizing, non-virilizing steroid promotes  
—a return to appetite—an increase in weight—a sense of well-being

**P**ATIENTS who are run down or who are recovering from illness frequently suffer from faulty protein metabolism. They are in negative nitrogen balance. Protein, in effect, is being broken down and lost faster than it is being built up.

Anabolex (androstanolone) restores the physiological balance. Many clinical trials have shown that, following the administration of Anabolex, there is an immediate return of the body's capacity to build up protein. The patient feels better, eats better and gains weight.

Here, then, is a physiological "tonic" with a wide therapeutic range. The weakness, lassitude, lack of energy and interest associated with many pathological states may be rapidly overcome by the administration of Anabolex.

Anabolex can be safely given to patients of all ages and both sexes; in therapeutic doses, its virilizing properties are almost negligible. The only known contra-indication is prostatic carcinoma.

*Anabolex is a  
registered trade mark*

**PRESENTATION:** In vials of 25 and 100 tablets, each tablet containing 25 mg. Androstanolone. Basic N.H.S. cost 20/- and 70/- respectively. Anabolex is exempt from purchase tax. Samples and literature will be gladly sent on application.

**INDICATIONS** Middle-aged or elderly people who are debilitated or "run down." Preparation for and recovery from planned surgery. Convalescent patients. Premature infants. The child or adolescent who is under weight. Anorexia, Asthenia, Malnutrition, Wasting diseases.

GLAXO INTRODUCE

# Neo-NaClex

## the one-dose-daily diuretic

Neo-NaClex (bendrofluazide) is an oral diuretic sufficiently potent and long lasting to give effective treatment with a single dose daily. In practice one 5 mg Neo-NaClex tablet daily could replace, for example, a twice daily dosage of 50 mg hydrochlorothiazide or two 500 mg chlorothiazide tablets daily. One dose of Neo-NaClex produces over twelve hours diuresis. Yet it is relatively free from significant side-effects and has minimum likelihood of causing potassium loss.

You can use Neo-NaClex for every diuretic purpose. Start treatment with one 5 mg tablet daily at breakfast. Leave a three day interval between each week of treatment. Start maintenance with one 2.5 mg tablet daily. Eventually one dose weekly may suffice. Of course, dosage will be varied to suit the individual. The once daily dosage of Neo-NaClex greatly reduces cost of treatment.

So for effective, economical diuresis from a single dose daily remember this newest oral diuretic.

# Aldactone

Brand of Spironolactone (SC9420)

The new therapeutic principle embodied in this drug effectively extends the control of *oedema and ascites* in

**Congestive Heart Failure**  
**Hepatic Cirrhosis**  
**The Nephrotic Syndrome**  
**Idiopathic Oedema**

Aldactone provides satisfactory relief of resistant or advanced oedema even when all other agents, alone or in combination, are ineffective or are only partially effective.

Aldactone blocks the effect of aldosterone which is the major cause of resistance to diuretics, and because of its different site and mode of action, Aldactone has a true and highly synergistic activity when used with a mercurial or thiazide diuretic.

# the first specific aldosterone – blocking agent

## Aldactone

*has the following advantages*

- Satisfactory relief where all other agents fail.
- Does not induce potassium loss.
- No serious toxic or side effects.
- Exerts true, striking, synergistic activity in a programme of treatment including mercurial or thiazide diuretics.
- Offsets the potassium loss from concomitantly administered mercurial or thiazide diuretics.

### *What physicians may expect of Aldactone*

It is fully expected that Aldactone will change present medical concepts of therapeutic limitations in the management of oedema. Many patients living in a greater or lesser state of oedematous invalidism can now be oedema-free. To others, gravely ill, Aldactone will be life-saving.

When Aldactone is used in a comprehensive therapeutic regimen, which includes a mercurial or a thiazide diuretic, a satisfactory diuresis and relief of oedema may be expected in approximately 85 per cent of oedematous patients who would not otherwise respond.

# NULACIN "has revolutionized the treatment of duodenal ulcer"

*"This new method of the administration of antacids (Nulacin) has revolutionized the treatment of duodenal ulcer... milk drip is no longer part of our therapeutic stock in trade."*

PROC. ROY. SOC. MED., December, 1958, 51, 1063

NULACIN tablets, when allowed to dissolve slowly in the mouth, provide intragastric milk-alkali drip therapy safely and effectively for both the bed-ridden and ambulant patient. They may be relied on to provide a treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity.

The safety and effectiveness of Nulacin therapy has been proven by "in vivo" clinical work carried out in many countries. References to this work include:—

## dieting : without distress

For many patients, weight reduction is essential — yet for themselves and their families it often becomes unbearable. Preludin allows patients safely to follow a prescribed diet with morale intact.

A recent trial of Preludin for childhood obesity states: "Phenmetrazine (Preludin), in the dosage given, was a highly effective weapon against obesity. The result of the experiment is the more remarkable when it is remembered that the children's diet was not restricted..."<sup>1</sup>

Preludin is now available in long-acting Tablongets — one lasts all day. Tablongets add new convenience and flexibility of prescription to Preludin's reliable appetite control.

## PRESCRIPTION CAN BE TAKEN ONCE EVERY EIGHT WEEKS

This is a rare medicine. It is only available six times a year, and it is not on the N.H.S. It involves a voyage which will cost your patient three figures. And it may make him so riotously young again that he will be involved in fights with husbands, or with the R.S.P.C.A. for trying to fell oxen with single blows. Indeed, he may never require your medical care again.

What is this notable nostrum, this tremendous tonic, this bountiful Buck-U-Uppo? In a dozen words:-  
*A trip in the 'Windsor Castle,' with treatment in its Health Spa.*

No, seriously... on the 'Windsor Castle,' for the first time in the history of British passenger shipping, there is a complete Health Spa, where passengers can take positive steps towards superfitness. A medical man is in charge, and he will welcome any communication from a passenger's family doctor. He can give advice for courses of health-therapy during the voyage, a final check-up at the end of the voyage, and a written report to the passenger's doctor at home.

The 'Windsor Castle' Spa is intended for passengers who have allowed their standard of fitness to get below par, and especially those who carry too much weight. The Spa is equipped to provide treatment also for people who may have rheumatic conditions, gout or bronchitis. It could be of value to men suffering from ailments encouraged by the strenuous business life of today, such as high blood pressure, coronary heart disease or duodenal ulcer. And it may well be beneficial to others recuperating after an illness or an operation.

The 'Windsor Castle' Health Spa will consist of:

1. Diagnostic Unit with facilities for full clinical examination, with X-ray and

electrocardiograph. Certain laboratory work can also be carried out, including prothrombin estimations.

2. Treatment Centre divided into:

a) Hydrotherapy containing Sauna (Finnish Dry Heat Bath) as illustrated above, Vichy Douche, aerated bath and needle bath.

b) Physiotherapy including expert massage, and also treatment by faradism, short wave diathermy and wax bath.

**Physiotherapist.** A physiotherapist is being employed, who is fully trained in hydro- and physiotherapy and who has full knowledge of exercises suitable for chronic bronchitis or convalescent cases.

**Diet.** Advice on eating and drinking will

be given by the doctor in charge of the Clinic. When necessary special diet, for reducing or building up, will be provided.

### **Notification of the Medical Profession.**

The doctor of the Clinic wishes to co-operate with the doctors of passengers who are travelling, and will be pleased to continue prescribed treatments, if a letter is sent to the Union-Castle Medical Department previous to sailing. The passenger's own doctor will also be notified regarding any treatment given on the ship.

The Health Spa on the 'Windsor Castle' will, of course, be in addition to the excellent hospital and general medical facilities. These are provided on all Union-Castle ships. In the treatments in the Spa the emphasis will be on positive health and prevention of illness, and passengers would be encouraged to go there with a view to having guidance on raising their general level of fitness.

Any enquiries may be addressed to the Chief Medical Officer, the UNION-CASTLE Mail Steamship Company Limited, Chief Passenger Office, Rotherwick House, 19/21 Old Bond Street, London, W.1. He will send you a copy of the leaflet "The Windsor Castle Spa", which amplifies the information above, and has many more Savignac drawings in it.

## ST. ANDREW'S HOSPITAL, NORTHAMPTON

For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This registered hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological, and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in grounds of the various branches can be provided. **MOULTON PARK.**—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

**WANTAGE HOUSE.**—This is a reception hospital in detached grounds, with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department of Diathermy and high-frequency treatment. It also contains laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

**BRYN-Y-NEUADD HALL.**—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 34354 (3 lines)), who can be seen in London by appointment.

## Almacarb

TRADE MARK

ALMACARB tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel made by an entirely new process. (Brit.Pat. 812503) Aluminium hydroxide gel has been used for some years as an antacid in suspension, but until the introduction of Almacarb no means had been discovered by which its full acid-neutralising capacity could be retained through the process of drying and tableting. In Almacarb the full antacid potential is retained and its action is rapid and sustained. ALMACARB—dosage. One tablet to be chewed as an initial dose, and thereafter one tablet to be sucked slowly at frequent intervals. ALMACARB is presented as peppermint-flavoured tablets, each containing 0.375 g. of aluminium hydroxide-magnesium carbonate co-dried gel.

### THE NEW IMPROVED ANTACID TABLET

In strips of ten foil-wrapped tablets in cartons of 40 tablets at 3/- and 200 at 12/-.  
Basic N.H.S. prices subject to purchase tax.

THE BRITISH DRUG HOUSES LTD. (MEDICAL DEPT.) LONDON. N.1

## Have you received your copy of MODERN CONTRACEPTIVE TECHNIQUE?

This practical manual on contraception has already proved invaluable to many doctors in advising their patients. It presents a concise and compact survey of methods commonly used, together with notes on methods which have medical approval, and also on others which are medically contra-indicated. If you have not yet received a copy, you are invited to write for one now.

### *The case against 'natural' methods*

Medical opinion generally agrees that the practice of so-called "natural" methods of contraception (coitus interruptus, coitus reservatus, etc.) can have an adverse effect on physical and mental health. One of the principal reasons why these unreliable methods are used is the slight loss of sensitivity experienced with protectives (condoms).

This problem has now been almost entirely overcome by the introduction of Durex Gossamer, a new kind of lubricated protective. Durex Gossamer, is treated with Sensitol, "a non-wet, non-messy" lubricant which substantially increases the level of sensitivity. *Samples of Durex Gossamer protectives on request.*
