Anxiety, frustration, and similar manifestations of nervous or emotional stress are known to play a vital role in the aetiology of peptic ulcer and other gastro-intestinal disorders. Effective treatment of these conditions, therefore, should do more than provide transient relief of distressing local symptoms—it should also act decisively at the primary source of the trouble. 'STELABID' now places in the hands of the practitioner the means of implementing this essential dual approach to therapy.

... but for doctors who want to prescribe the most active tetracycline so far introduced into medicine, it's simpler to write LEDERMYCIN.

LEDERMYCIN demethylchlortetracycline surpasses other tetracyclines in so many ways—lower dosage, greater stability, higher therapeutic blood levels, fewer side effects. LEDERMYCIN maintains effective antibacterial action for as long as 48 hours after stopping dosage—giving added protection for the patient. These are virtues proved in clinical trials and supported by continually increasing prescription in both hospital and general practice.

highly effective in infantile diarrhoea

NEW ENTERFRAM

kaolin with Framycetin

ENTERFRAM, combining the adsorbent, demulcent action of Kaolin with the bactericidal effect of Framycetin, is highly effective in infectious diarrhoea. Framycetin is active against all the bacterial pathogens normally found in gut infections—including staphylococci resistant to other antibiotics. Available evidence shows that it is not absorbed from the gut, so that its action is purely local. Bacterial resistance to Framycetin is rare indeed, and patient sensitivity unknown. Whenever diarrhoea poses clinical problems, ENTERFRAM will be found to be rapidly, safely effective. The pleasantly flavoured vehicle and the safe, local action of the antibiotic make ENTERFRAM especially suitable for children.

MILESTONE IN DERMATOLOGY

ORAL

Griseofulvin is a Glaxo research development. Extensive experience with this substance in Britain, the U.S.A. and elsewhere has shown that griseofulvin, when given by mouth, will produce quite remarkable and consistent activity against dermatophyte infections of the skin, hair and nails. Infections even of many years duration have made a striking response to this unique substance.

"A new era in the therapy of the common mycotic infections of the human skin, hair and nails may be at hand with the discovery of the almost unbelievable therapeutic effectiveness of the oral antibiotic, griseofulvin."

Containers of
10, 100, 1000

Medomin presents the surety of hypnosis through the barbituric acid nucleus. One tablet taken 1/2-1 hour before retiring will give 6-8 hours natural sleep. Because of the rapid breakdown and elimination of this barbiturate there is a fresh awakening with no clouding of the mind. Medomin thus represents a genuine advance in hypnotic therapy. Its action is positive and yet so smooth and free from side effects that it may safely be given to children.

'209 patient-nights on Medomin and 79 patient-nights on butobarbitalone are reported on. Results tell strongly in favour of Medomin (91 per cent very good response as compared to 58 per cent with control sedative). Out of the 209 there were only two cases of "hangover-like" symptoms.' WHEN BARBERS PULLED TEETH

IN 1399 Henry IV awarded a London barber 6d a day to draw the teeth of the poor without charge. So began the second stage of our state dental service. (The first was already thriving in the hands of the Public Executioner, who pulled teeth as a handy punishment for minor offences.)

We have come far since then. The law no longer claims our teeth, and neither does the barber. These days everyone wants us to keep our teeth, and to keep them healthy. We know too that the earlier we start our children in good dental habits—by teaching them the C D E F rule for good teeth—the more promise we give them of healthy teeth both now and in adult life.

C **CLEANING** Often and thorough, to remove food particles that can cause decay. After each meal if possible.

D **DENTIST** No longer barberous. Regular visits to catch any trouble early.

E **EXERCISE** Lots of chewing—apples, celery, chewing gum, raw vegetables. Helps to clean teeth, promotes flow of saliva (nature's mouthwash); stimulates gums, aids proper jaw development.

F **FOOD** Plenty of milk, butter, cheese and eggs: rich in minerals and vitamins for strong teeth and healthy gums.

RASTINON

PROVIDES COMPLETE ORAL CONTROL
without risk of hypoglycaemia

WHEN ELDERLY DIABETIC PATIENTS *live alone* they can be a special source of concern because nobody will know of their distress or come to their assistance should hypoglycaemia occur.

It is reassuring to know that a large number of these patients* can now be controlled *orally* with RASTINON (tolbutamide)—without the risk of hypoglycaemia.

In patients in whom maintenance dosage has been established, RASTINON lowers the blood sugar to normal levels but almost never beyond that point, regardless of dosage. RASTINON is a true euglycaemic agent.

In many cases, one tablet by mouth once or twice a day is all that is necessary for maintenance. Thus, even with patients not capable of accurate self-injection, correct dosage is possible.

There is no added cost of treatment for the patient previously on insulin.

* Over 1,250,000
diabetics all over the
world owe their well-being
to RASTINON. The rate
of response increases

**new synthetic analgesic
more powerful than morphine**

NARPHEN is chemically 2'-hydroxy-5,9-dimethyl-2-phenethyl-6,7-benzomorphan; its 'Approved Name' is phenazocine.

NARPHEN is a quick-acting and potent analgesic that is more powerful than morphine and pethidine. Early reports show that Narphen is from 3 to 10 times more effective an analgesic than morphine.

NARPHEN produces less respiratory depression, less hypotension, and less nausea and vomiting than morphine.

NARPHEN appears to produce addiction more slowly than morphine and the effects of withdrawal are less intense.

NARPHEN is available in boxes of 10 and 100 ampoules each containing 2 mg. per 1 ml. ampoule.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s. per annum in the first year; £1,103 19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held; provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £600 12s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

BRITISH MEDICAL ASSOCIATION

LIBRARIAN

Applications are invited for the post of Librarian to the Association. Candidates must be Chartered Librarians and a University degree will be considered a further recommendation. Experience of Medical Librarianship is essential.

The successful applicant will be required to take up duties on November 1, 1960, and on the retirement of the present Librarian—early in 1961—will take charge of this important Medical Library, which is shortly to be extensively reconstructed.

The post is superannuable, subject to satisfactory medical examination.

The salary scale will be £1,600 by £75 to £2,200; initial salary within the stated scale will depend upon the qualifications and experience of the candidate appointed.

Applications, giving details of age, education, and experience, together with the names of not more than three persons to whom reference may be made, should be sent to the Secretary, British Medical Association, B.M.A. House, Tavistock Square, London, W.C.1 (from whom further particulars may be obtained), by September 10, 1960.

For charges of CLASSIFIED ADVERTISEMENTS kindly refer to page 54

J. ment. Sci. (1960) 106, 732.

"Melleril is a useful and relatively potent
phenothiazine with an activity similar in the majority
of instances to chlorpromazine. The main differences
seem to be in the paucity of side-effects with Melleril,
particularly the lack of extrapyramidal
and liver complications."
