

# A sunscreen for both short and long U/V

## Uvistat Cream in Photodermatoses

The longer wavelengths (above 320 m $\mu$ ) of the ultraviolet spectrum are important in the initiation of light reactions in photosensitive patients.

Paraaminobenzoate sunscreen creams absorb only in the narrow normal sunburn region of the spectrum (290-310 m $\mu$ ).

UVISTAT CREAM absorbs over a wide range (250-350 m $\mu$ ) when applied to the skin in a cosmetically acceptable vanishing cream.

UVISTAT CREAM affords protection in acute solar eczema, chronic polymorphic light eruptions and prurigo aestivale. It is also indicated in lupus erythematosus, herpes labialis, rosacea and other dermatoses aggravated by light. It causes neither irritation nor sensitisation.

UVISTAT CREAM containing 10% 2-hydroxy-4-methoxy-4'-methylbenzophenone in a vanishing cream base, is available in 50 gm. tubes.

Spray treatment applies the full potency of Terra-Cortril directly on to the inflamed area. Its effect is immediate because the action is not retarded by a base.

Infection is prevented, inflammation and pain reduced, scar tissue development decisively checked and the healing process accelerated. Spray treatment prevents softening of surrounding tissue sometimes caused by dressings or ointments. The spray has a soothing effect much welcomed by patients.

Patients and nurses will find it easy and simple to use. Any part of the body can be sprayed in a few seconds.

Dressings may not be required. Spray treatment can be used with modern exposure techniques.

**WHY '302'?**

This new addition to the Pasinah range of concurrent PAS-Isoniazid products has been designed specifically to encourage, throughout treatment, patients' fullest co-operation in order to obviate the known dangers which may result from default in taking medication.

**ADVANTAGES**

- Total 24-hour intake in a single convenient pack.
- Only 6 cachets per 24 hours, to provide 12 g. Sodium Aminosalicylate B.P. and 300 mg. Isoniazid B.P.
- Flexibility of single dosage maintained:
  - 3 cachets twice daily
  - or 2 cachets three times daily
  - according to your instructions.
- Acceptability improved, because smooth cachets without sharp edges make swallowing easier; because the number to be taken on each occasion is reduced to a minimum:  
*never more than 3 cachets per single dose.*

**FORMULA**

Each 'Pasinah-302' cachet contains:  
Sodium Aminosalicylate B.P. 2 g.

## THE DISTILLERS COMPANY LIMITED

The 83rd Annual General Meeting of The Distillers Company Limited will be held in the North British Hotel, Edinburgh, on Friday, the 9th day of September, 1960, at 12.15 p.m. The following are excerpts from the Statement by the Chairman, Sir Graham Hayman, which has been circulated with the Report and Accounts for the year ended 31st March, 1960.

### GENERAL OBSERVATIONS ON TRADING

Once again I am able to report that the results for the year constitute a new record in earnings, and the total value of the Group's turnover exceeded £233,000,000, representing an increase of 11% over the previous year. Although nearly all branches of the Company have contributed to this result, by far the major proportion is attributable to increased sales of Scotch Whisky. The Industrial Group has also had a satisfactory year with 27% increase in earnings, and the return on capital employed compares favourably with its leading competitors.

Turning to the Accounts, the trading profit of the Group amounts to £30,419,758, compared with £24,989,991 last year, and income from trade investments totalled £2,373,590 against £1,788,997, so that our total income was £6,014,360 higher than last year, at £32,793,348. The credit for the increase can be apportioned broadly between our potable and chemical interests in the proportion in which they have contributed to our profits in the past, our major potable interests showing an increase of about £4,500,000, and our industrial divisions, including their part of income from trade investments, recording an advance of well over £1,000,000.

Interest on loan stocks has been reduced by a further repayment of £1,000,000 and now requires £649,509, and the profit attributable to outside shareholders in Subsidiary Companies is somewhat larger at £533,715, so that the profit of the Group after all charges amounts to £31,610,124, compared with £25,693,778 last year. Taxation this year requires £14,743,700, leaving a net profit of £16,866,424—almost £3,700,000 more than last year.

There is a substantial credit below the line in respect of taxation reserves no longer required and, of the total available for appropriation, £5,698,134 has been retained by Subsidiary Companies, leaving £12,542,720 to be dealt with in the Accounts of the Parent Company.

With due regard to the future capital requirements of the Company, and to the higher rate of profits tax which will be payable next year, your Board feels able to increase the dividend by 2½% and recommends a final dividend of 10% which, with the interim of 5% already paid, makes 15% for the year. The Board has also transferred £5,000,000 to general reserve, and it is now proposed, subject to the approval of the shareholders, to capitalize part of the reserves by the issue of one new ordinary share of 10s. credited as fully paid for every five ordinary shares held.

As shareholders will appreciate, time is required to make the requisite arrangements for a capital issue and, at this stage, it is difficult to say whether these will have been completed before the time comes round for declaration of next year's interim dividend. It is the Board's intention, however, to declare an interim dividend at the rate of 6% on the present capital, but this payment should not be taken as an indication that the total dividend next year will be any higher than the equivalent of the current year's dividends.

### SCOTCH WHISKY

Our Malt and Grain distilleries, despite the drought last year, have completed their distilling programme with improved efficiency and productivity. The increase in distilling capacity at our Malt distilleries has been materially helped by a new process of effluent treatment developed by our research staff to ensure that discharges to rivers comply with recent legislation. Although considerable capital expenditure has been incurred in meeting the new regulations, this has been offset to an appreciable extent by the production of a valuable animal feedstuff as a by-product, and we have also secured a substantial increase in the availability of excellent malt whiskies.

New warehouse construction has continued throughout the year to accommodate our rising stocks. As far as possible, our new warehouses are sited in rural areas and each is equipped with the most modern fire detection systems to ensure immediate action by fire fighting services in the event of an emergency.

Since the last war, approximately £250,000 has been expended by the Company on fire detection installations.

With regard to stocks, there was a further increase in the stocks of Scotch Whisky held by the entire Industry, which, at 31st March, 1960, stood at 267 million proof gallons, compared with 243 million proof gallons last year.

I reported last year on our decision to abandon the quota system in the Home market, to enable our brands to come into free supply. I am glad to say that our experience during the year has clearly demonstrated the high regard of the public for our brands.

Nevertheless, while your Group has gained a larger share of the sales in the Home market, there is little cause for complacency. The total Industry sales of Scotch Whisky in that market—in spite of derationing—are still below the level achieved immediately prior to the War, and it is clearly important to secure an expansion in the Home trade. This will not be an easy task, and some reduction in the present punitive rates of duty would provide a valuable stimulus.

With regard to the Export markets, the U.S.A., which still absorbs approximately one half of the Industry's exports, continues to take increasing supplies. Most leading brands are now fairly freely available, and while some further expansion in sales can be expected to follow the growing prosperity and increasing population, there is no doubt that greater efforts will be required by both shippers and importers to secure this.

The Scotch Whisky industry is still pressing for an amendment to the U.S. tax regulations under which imports of Scotch Whisky in bottles at the normal marketing strength of 86° American proof are taxed on an assumed basis of 100° proof. This provision in the U.S. Revenue Laws was introduced many years ago to prevent loss to the Revenue in circumstances which no longer exist. It is not applied to American whiskies and it is hoped that steps will be taken to remedy this unjustifiable surcharge.

In other markets where shipments are not affected by local restrictions, the demand for our brands during the past year has, in many cases, been greater than we could satisfy. Certain additional gallonage will be available during the current year, and while it is too early to say if this will be readily absorbed, the fact that our brands are strongly established in all important export markets gives good grounds for confidence in the outcome.

### GIN

In my last statement, I referred to the increasing competition which our Gin Companies were facing in the Home Market. These conditions have continued, but I am able to report that our brands have more than held their position, and sales showed a very satisfactory increase over the previous year.

Our general export trade was satisfactory, and total shipments show a substantial increase.

Your Company has under consideration the production of one or more of its brands of Gin in various overseas markets where changing economic conditions and competition from local manufacture make this desirable.

### INDUSTRIAL GROUP

**CHEMICAL DIVISION.** With the general revival in industrial activity, there has been a substantial increase in the sales of all our chemicals, with a corresponding improvement in earnings. While no new major plants were brought into production, our butanol manufacture was fully re-established at Hull, and the new plant for continuous manufacture of phthalate plasticizers is in full operation. Carbon dioxide had a record year, and the industrial use of this product continues to increase.

A major development, recently announced in the Press, is the construction of a new plant to produce acetic acid. Acetic acid, in addition to having a wide general sale, is one of our principal raw materials used to produce a range of chemical derivatives. The new plant will operate an entirely new process developed by our Research Department, which should give significant economies in production costs.

**BRITISH HYDROCARBON CHEMICALS LIMITED.** Three new plants have been commissioned during the year. The first plant, for the production of high density polyethylene, presented a number of teething problems. These are now being steadily overcome, and production of specification material is now fully established. The two other units for the production of cumene and phenol are both operating well and to full capacity.

Three further major projects are now in hand. First, a substantial increase in our production of butadiene, for which there is an increasing demand in the manufacture of synthetic rubbers. Second, a new plant to produce methanol, which has a wide variety of industrial uses. The third project is the production of ethylene dichloride, which will be used by our Plastics Division in their expanding manufacture of polyvinyl chloride resins.

The new cracking plant, with its capacity of 70,000 tons per annum of ethylene, to which I referred last year, was successfully commissioned in June of this year.

Forth Chemicals Limited, and Grange Chemicals Limited, subsidiaries of British Hydrocarbon Chemicals Limited, have each had a very good year. Forth Chemicals Limited has decided on a further increase of its production of monomeric styrene, which should be in operation by the end of the year.

**PLASTICS DIVISION.** Last year's indications of an increased demand for plastics, particularly for industrial applications, have been fully confirmed, and this Division has had an exceptionally busy year.

British Geon Limited has in hand a further substantial increase in its capacity for polyvinyl chloride, for which the demand is still increasing. It is also increasing its production of Hycar oil-resistant synthetic rubbers.

British Resin Products Limited has had a good year, a particular feature of which has been the promotion of the sales of "Rigidex," the new polyethylene made by British Hydrocarbon Chemicals Limited. This material is finding increasing acceptance in a number of new fields.

Distrene Limited increased its production of polystyrene during the year, to meet expanding sales.

**BIOCHEMICAL DIVISION.** Although this Division succeeded in increasing its volume of sales, and there was continued improvement in technical efficiencies, the low prices ruling in world markets have resulted in substantially reduced margins. Special efforts are being directed to the discovery of new products to broaden our base in this business, and some progress is being made.

Last year I referred to the formation of an Australian subsidiary. I am glad to report that its first year's trading is satisfactory, and the prospects are encouraging. We have taken similar steps in New Zealand, where another subsidiary company has been formed.

**FOOD DIVISION.** Yeast. There has been a steady decline in the consumption of bread over recent years, with a corresponding fall in the use of yeast, but during the period under review, this trend has ceased and there are signs of a slight increase. Trading results were very satisfactory.

**Oils and Fats.** In spite of intense competition between the two major companies in this field, our subsidiary, The Peerless Refining Company (Liverpool) Limited, has again increased its sales and earnings.

### TECHNICAL DEVELOPMENT

The steady expansion of our diverse operations, to which only brief reference has been possible in this report, is in large measure dependent upon the technical skill and achievements of the scientific and engineering staffs in our organization.

The Company takes considerable pride in the fact that our technologists have built up a first-class reputation both in this country and with the many overseas companies with whom they have regular contact, and the Board has every confidence in their ability to break new and fertile ground in the future.

### PERSONNEL

A major contributing factor to the outstanding results of the past year has been the fuller over-all employment of all our producing resources and this, in turn, has placed a considerable burden of added responsibility on our executives, managers and personnel at all levels throughout the organization.

It is therefore particularly appropriate to record a sincere tribute and the grateful thanks of the Board to all employees, both at home and overseas, for the part they have played in the service of the Group.

## REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3  
Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

**MEDICINE****MEDICAL RESEARCH COUNCIL  
WORLD HEALTH ORGANIZATION  
INDIAN GOVERNMENT****Tuberculosis Chemotherapy Centre, Madras**

**VACANCY FOR A MEDICAL OFFICER**  
The Medical Research Council, on behalf of the World Health Organization, wish to obtain a Medical Officer of first-class attainments to assist the Medical Director of this project. The Centre, for which the Council have scientific responsibility, was started in 1956 and is in a fully productive state of research development; a number of reports have been published or are in the press. In addition to an out-patient clinic, it has a well-equipped routine and research laboratory, a statistical department and a sanatorium unit. Therapeutic trials are being made on the best forms of domiciliary chemotherapy for tuberculosis in the Indian setting; studies are in progress also on the epidemiology of the disease in contacts and on many laboratory questions. The results will be of benefit in solving certain outstanding tuberculosis problems, not only in India but generally. The successful candidate must have initiative and the energy to work under tropical conditions; have experience in the clinical aspects of tuberculosis and preferably in the social and preventive aspects as well; be prepared to do regular sessions in a busy out-patient clinic in close co-operation with Indian medical colleagues and to assist in the administration of the Centre's non-clinical activities including the supervision of staff and of the drafting of reports; be prepared to do some post-graduate teaching. He should be under 45. The successful candidate will be employed by W.H.O. by contract for two years in the first instance, probably extendable to 1966. Salary \$7,300 per year, income-tax-free under the usual W.H.O. arrangements, plus assignment allowance (\$950 per year without dependants and \$1,200 per year with dependants), post adjustment allowance (\$270 per year without and \$400 per year with dependants), dependant's allowance (\$200 per year for a wife, \$300 per year for a child) and various other installation allowances, educational grants and service benefit on termination (8% of salary per year), all tax-free. First-class air passages for successful applicant and dependants to India and back. Appointment, to start as soon as possible, will probably include initial training in London. It may be possible to arrange for the secondment of the successful candidate if he is at present employed by the National Health Service or the Medical Research Council. Applications (two copies) giving age, qualifications, details of experience, and the names of three professional referees, should be sent to the Secretary, (A.D.5), Medical Research Council, 38, Old Queen Street, Westminster, London, S.W.1, as soon as possible. Candidates placed on the short list will be asked to fill up World Health Organization questionnaires. (7676)

### ST. ANDREW'S HOSPITAL, NORTHAMPTON For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This registered hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological, and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in the grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a reception hospital in detached grounds, with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department of Diathermy and high-frequency treatment. It also contains laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 34354 (3 lines)), who can be seen in London by appointment.
