# EFFECTIVENESS WITH ECONOMY

'EFFICO' tonic is a well-balanced combination of vitamins, traditional stimulants and bitter stomachics in a pleasantly flavoured syrup base. Its reliability as a restorative for the convalescent, the overworked and the aged, and in post-influenzal and similar conditions, has been proved in extensive clinical use.

'EFFICO' Tonic with a basic N.H.S. cost of 2/2½d per 8 fluid ozs. (total N.H.S. cost 4/1d) provides effectiveness with economy.

#### THE EFFICO FORMULA

Aneurine Hydrochloride B.P.	1 mgm.

BRAND OF PHENELZINE

# DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

# NICOTINIC, SALICYLIC AND p-AMINOBENZOIC ACIDS in Ester form

In cases of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilatation of the skin with a superficial crythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

\*Therapeutische Umschau 1952, 8, 143

#### LLOYD-HAMOL LIMITED

Transvasin is available in 30g. tubes, N.H.S. price in the U.K. 2/6 plus P.T., and is not advertised to the public. Samples and literature will be gladly sent on application.

# EFFECTIVE AND SAFE FOR ALL YOUR PATIENTS

ANALGESIC AND ANTIPYRETIC

PANADOL ELIXIR Medically speaking, the very young don't know what's good for them, but they will take their medicine if it tastes good. Fanadol Elixir scores here. Its flavour received a 90% 'vote' of approval in a series of 'taste referendums' conducted in a number of hospitals and clinics. Panadol Elixir scores on safety too. This one-ingredient analgesic, antipyretic does not cause gastric irritation or haemorrhage.

PANADOL TABLET Caution in the prescription of certain analgesics is called for not only with patients who have a dyspeptic history, but with those, especially the elderly, whose stomachs are likely to be easily upset. Panadol does not cause the gastric irritation which may be associated with salicylate analgesics.

> PANADOL is N-acetyl-p-aminophenol 0.5 G. Ingredient cost of 24 Tablets: 1/11 d.

Sound sleep ... fresh awakening.

# Medomin<sup>®</sup> Geigy

Dose: 1 tablet taken ½-1 hour before retiring. Available in tablets of 200 mg Heptabarbitone (Cycloheptenylethyl barbituric acid) Containers of 10, 100, 1000 Medomin presents the surety of hypnosis through the barbituric acid nucleus. One tablet taken  $\frac{1}{2}-1$  hour before retiring will give 6-8 hours natural sleep. Because of the rapid breakdown and elimination of this barbiturate there is a fresh awakening with no clouding of the mind. Medomin thus represents a genuine advance in hypnotic therapy. Its action is positive and yet so smooth and free from side effects that it may safely be given to children.

'209 patient-nights on Medomin and 79 patient-nights on butobarbitone are reported on. Results tell strongly in favour of Medomin (91 per cent very good response as compared to 58 per cent with control sedative). Out of the 209 there were only two cases of "hangover-like" symptoms.' Med. Press, 243, 131 (1960).

Geigy Pharmaceutical Company Ltd. Wythenshawe, Manchester 23

PH. 178

The new British National Formulary sounds a note of commendation for sulphadimidine. We would like to remind you that this valuable drug—introduced 18 years ago by I.C.I. under the name 'Sulphamezathine'—is today's most widely prescribed sulphonamide.

IMPERIAL CHEMICAL INDUSTRIES LIMITED

#### Still the best sulphonamide for routine use...

The British National Formulary 1960 again confirms the pre-eminence of sulphadimidine amongst sulphonamides and draws attention to the following advantages:—

- \* Probably the best sulphonamide for routine use.
- \* Particularly suitable for children.
- \* A compound of high activity.
- \* Produces high blood levels when given six hourly.
- \* Toxic effects are rare.
- \* Fulfils all the theoretical advantages of a sulphonamide mixture.

In addition, it is worthy of note that 'Sulphamezathine' is featured as the drug of first choice for urinary tract infections and for bacillary dysentery.

# SULPHAMEZATHINE

trustworthy · economical · safe

Tablets 0.5.g: basic N.H.S. cost 1/8d. per 25. Oral Suspension: each teaspoonful contains the equivalent of 1 tablet. Bottles of 100 ml. cost 3/4d.

## BIMEZ for longer action

'Bimez' combines the qualities of 'Sulphamezathine' with the advantage that only one dose per day is required for effective therapy.

Available as Tablets and Oral Suspension.

When winter returns, you can expect a throng of people in your surgery with 'cold spell' symptoms . . . and noses fit for KARVOL. Soothing decongestant KARVOL is the simplest, most effective treatment for upper respiratory tract congestion. # nasal congestion orally

WANDER

"timed-release tablets"

# The NEW concept for relief of the Common Cold

In the common cold and postnasal drip, one "timedrelease" 'TRIOMINIC' tablet brings welcome relief of symptoms in minutes. Running noses stop, clogged noses open—and stay open for 6 to 8 hours. The pat.ent can breathe again. 'Triominic' is not likely to cause secondary congestion, and it eliminates local overtreatment and consequent nasal pathology, such as commonly follow the use of topical decongestants in the form of sprays and nasal drops.\* \*Illinois med. J., 1957, 112, 259.

> Each "timed-release" 'TRIOMINIC' Tablet contains: Phenylpropanolamine-HCl ......50 mg. (norephedrine-HCl) Mepyramine maleate B.P. ......25 mg. S7. Part 1.

Dosage: One tablet every 6 to 8 hours, total number not to exceed 3 in 24 hours.

Packs: Supplied for dispensing in bottles of 50 and 250.

N.H.S. Basic Price for 50 tablets-8/6d.

Also available: 'Triominic' Syrup, for children and those adults who prefer a liquid medication, in bottles of 2 fl. oz. and 20 fl. oz. (dispensing). N.H.S. Basic Price for 2 fl. oz. is 2/6d.

Each "timed-release" tablet keeps nasal passages clear for 6 to 8 hoursprovides "around-the-clock" freedom from congestion on just 3 tablets daily.

FIRST

the outer layer dissolves within minutes to produce 3 to 4 hours'

THEN

the inner core disintegrates to give 3 to 4 more hours' relief

# when potassium intake is suspect

Most patients on a moderate maintenance dosage of an oral diuretic do not usually require supplementary potassium because a mixed diet containing reasonable amounts of fruits and vegetables prevents hypopotassaemia. However, the possibility of potassium deficiency must be considered in debilitated patients with poor appetites, especially if digitalis therapy is also being employed.

The amount of potassium chloride included in 'HydroSALURIC'-K tablets will supply additional potassium (in a palatable form) to those patients who cannot include an adequate amount in their diet.

Each 'HydroSALURIC'-K tablet has a core containing more than half a gram of potassium chloride covered by a new and reliable type of enteric coating. The hydrochlorothiazide component is applied outside this coating, to ensure rapid absorption and effect.

Average dosage: 1 to 2 tablets, once or twice daily, as required.

## HydroSALURIC-K

Regd

Tablets: Hydrochlorothiazide, 25 mg.; Potassium chloride, 572 mg. The United Kingdom N.H.S. basic cost is 3s. 10d. per 12 tablets (ex dispensing pack).

### Comment from three important papers in the Lancet, 20th August.

"Patients are spared constipation, impotence, dryness of the mouth, and iridoplegia, and there is no risk of paralytic ileus."

"Life need no longer be made a misery by the parasympathetic effects of the ganglion blocking agents."

"Its action is apparently steady; tolerance does not develop; and outpatient care of cases is relatively easy."

"If our present experience is confirmed, and if our survival-rates are as good as those with pentolinium, guanethidine or some similar drug should almost entirely replace the older ganglion blocking agents."

"Guanethidine was much more satisfactory in outpatient control. A single daily dose was adequate, and there was only 1 outpatient failure in 16 patients, in contrast to 16 failures in 25 patients treated with bretylium tosylate."

... relief is always within reach

Immediate action is the key to successful treatment of migraine. And 'Migril' is tailor-made for such action. The tablets can be taken anywhere—at any time—to avert an attack. And thanks to their adequate content of ergotamine, they provide really prompt relief. Each tablet contains 2 mgm. ergotamine tartrate; yet this dosage can be taken with minimal risk of nausea or vomiting—for 'Migril' also incorporates the powerful anti-emetic, cyclizine hydrochloride. Caffeine is added, too, to potentiate the action of ergotamine. For these good reasons the patient who carries 'Migril' carries constant insurance against attacks.

### ...means more intensive

# action against migraine

Each compression-coated tablet contains ergotamine tartrate, 2 mgm; caffeine (alkaloid), 100 mgm; cyclizine hydrochloride, 50 mgm. In bottles of 10 and 100.

# Announcement

The Pharmaceuticals Division of I.C.I. are proud to announce that they have entered into an arrangement with the Syntex Corporation to collaborate in the development and production of steroid compounds to be marketed in Great Britain and the Commonwealth.

Syntex have a fine reputation for their research work in the field of steroid chemistry. They were in fact responsible for the invention of the first large scale manufacturing process for progesterone. It was from this work that the Syntex organisation developed, and many of the steroid compounds now in regular use have emanated from the Syntex laboratories in Mexico. During the last twenty years Syntex research workers have contributed no fewer than 300 articles on steroids to the world's scientific journals, a record unequalled by any other organisation.

Hitherto Syntex have sold their steroids in bulk or have licensed other pharmaceutical manufacturers to produce under Syntex patents. In future their products will appear under the joint I.C.I./Syntex label and I.C.I. will collaborate with this organisation in both research and manufacture in the steroid field.

#### Anaemia of Pregnancy

It has been generally accepted that the incidence of megaloblastic anaemia of pregnancy in this country is very low. Reports indicate, however, that this type of anaemia may occur more frequently than has been suspected hitherto, but remains undetected in many cases. These observations suggest that it may be advisable to administer folic acid to all women in the last trimester of pregnancy.

Marmite yeast extract is a source of all known members of the vitamin B complex and has been used with conspicuous success in the treatment of nutritional megaloblastic anaemia of pregnancy. Its haemopoietic potency may be associated with the folic or folinic acid fraction. Marmite is readily incorporated in the diet and its pleasant taste ensures easy administration.

show

75-100% clearances

Impressive clinical results in the treatment of Psoriasis by ALPHOSYL continue to be recorded, and indicate most strongly that this allantoin-coal tar combination deserves a trial in all cases of:

- total scalp-to-toe psoriasis
- psoriasis of many years' duration
- psoriasis involving tender areas
- psoriasis refractory to all previous treatment

The most recent controlled study, of a group of 62 patients, shows that in 55 cases (89%) psoriatic lesions were cleared 75-100%, and nearly half

alphosyl

of them were "completely cleared." In ALPHOSYL, for the first time, are presented in combination two powerful and proved healing agents: allantoin and a specially refined coal tarextract. The synergistic effects of these medicaments result in rapid clearance of the condition and positive stimulation of the healing process. ALPHOSYL is notably safe to use and promotes no irritation or tolerance. It is a non-greasy, non-staining lotion vanishing on application to the skin and is thus a welcome advance cosmetically.

FORMULA: Special coal tar extract 5% and allantoin 2% in a smooth, non-greasy lotion base.

# Corn Oil, Cholesterol and Coronary Heart Disease

In 1957, 26% of all male deaths between the ages of 45 and 64 in England and Wales were caused by coronary heart disease. Despite considerable research, the cause or causes of this disease have still not been proved. However, it has been suggested from preliminary clinical trials that there may be a connection between high level blood cholesterol and the incidence of coronary heart disease.

FATS AND CHOLESTEROL On this subject, an eminent authority on nutrition has written, '... the

important point is to increase
E.F.A. and to decrease non-E.F.A.
and excessive carbohydrate
(which gives rise to non-E.F.A. in
the body). Not all unsaturated
fats or oils are good sources
of E.F.A.: the best sources
are the vegetable seed oils,
and of these corn (or maize)
oil has proved slightly
superior to others in detailed
trials of lowering serum
cholesterol in man.'

### **DIETARY ADVICE**

To avoid raising the level of cholesterol in the blood, many doctors recommend their patients to reduce their daily intake of animal fats by the substitution of a vegetable oil which contains the essential fatty acids. One that is particularly recommended is Mazola Corn Oil. Mazola is made from specially selected maize. which gives an oil rich in the most important of the essential fatty acidslinoleic acid. For this reason, it helps to reduce blood cholesterol. Mazola can be used for frying, grilling, baking and for salad dressings.

If you would like to know more about Mazola Corn Oil—
its benefits and uses—please write to us for a
free copy of the booklet 'The relation of dietary
fats to chronic degenerative diseases'.

# Investment in Plaquenil provides for the rheumatoid arthritic

70% of rheumatoid patients are showing major improvement with anti-malarial drugs. Plaquenil not only produces this improvement, but when compared with other potent anti-rheumatic drugs, demonstrates the lowest incidence of toxic effects.

Hydroxychloroquine sulphate. 200mg.

Ingredient cost of an average week's treatment (2 tablets daily): 6|4d

# MOBILITY IMPROVES WITH PLAQUENIL

# Technique for the treatment of stubborn varicose ulcers with

# ICHTHOPASTE bandages and ELASTOPLAST compression bandages

Ichthopaste applied to the skin beneath Elastoplast permits uninterrupted compression bandaging in cases of recalcitrant ulcers requiring long-term ambulatory treatment.

Make three slabs of Ichthopaste about 12 inches long by lapping the bandage backwards and forwards to give two or three thicknesses. Apply these to the anterior, lateral and medial aspects of the leg. Commencing just behind the toes, apply a complete Ichthopaste bandage, enclosing the heel and extending to a point immediately below the bend of the knee. Allow the bandage to follow its own course without pleating, and cut where necessary. Recommence bandaging to build up a uniform thickness of paste. Mould bandage carefully to conform evenly to the shape of the leg.

A complete Elastoplast bandage not less than 3" wide is now applied over the Ichthopaste, under firm compression from toes to knee including the heel.

In cases of copiously discharging ulcers and oedema, it may be necessary to change the bandages weekly at first, then at longer intervals as the ulcer dries and the oedema subsides.

**ELASTOPLAST** elastic adhesive bandages B.P.C. (porous) provide efficient compression and support, while permitting ambulation.

**ICHTHOPASTE** Zinc Paste and Ichthammol Bandages B.P.C. protect the hypersensitive skin and reduce oedema.

Do you consider the vehicle when you prescribe steroid therapy with hydrocortisone cream? Some vehicles have been implicated on grounds of sensitisation risk Lacto-Calamine, the excipient in Cortoderm and Cortoderm-N. has an unblemished reputation in this respect.

anti-inflammatory action to successful treatment of infected and non-infected dermatosis. 'Clinical experience in dermatology indicates that the vehicle employed for topical applications may be as important as, or even more important than. the medicaments they contain.'

# **Laxatives for Children**

As a Laxative for children Andrews has characteristics which have commended it to many physicians. A brief restatement of them may be helpful.

The laxative action of Andrews is mild, and is due to the presence of magnesium sulphate and other salts in balanced proportion. Their effect is to increase the fluid in the bowel by osmosis. There is no irritation of the intestine. Evacuation is easy, and without griping.

Andrews has a pleasant taste, and children accept it readily. Dosage is easily adjusted according to age.

It is mildly antacid, stimulates bile flow, and aids digestive processes. It is also useful as a gastric sedative in bilious attacks.

Andrews gives rise to no costive reaction when discontinued.

### THE SAFEST

SEDATIVE

KNOWN...

NOW

ENLISTED

AGAINST

# asthma

Control of asthma takes an important step forward with the introduction of 'Asmaval'. Here is a combination of ephedrine with the non-barbituric sedative 'Distaval' (thalidomide). Not only is this sedative exceptionally safe but highly efficient: it does not give rise to respiratory depression and has a low incidence of allergic reactions, 'Asmaval' is, therefore, admirably suited for routine preventive use-even for the young asthmatic.

Each tablet contains: Thalidomide ('Distaval') 12.5 mg. Ephedrine hydrochloride 20 mg. (1/2 gr.) DOSAGE: One or two tablets three times daily; appropriately less for children. PACKS and BASIC N.H.S. PRICE: -- 2/-Tubes of 25 tablets

# For SUB-ACUTE and Chronic dermatoses TAR + HYDROGORTISONE

combined in

# RCORTIN

### CREAM have pronounced

### advantages over either medicament alone

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone. \* Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream known as TARCORTIN.

### TARCORTIN CREAM

is supplied in 7 grm. and 15 grm. tubes, containing 0.5% Hydrocortisone in a special coal-tar extract.
