**Lucofen**

Whenever Sir John Falstaff felt an urge to eat—he ate. Bread, sugar, meat, capons—washed down with flagons of sack—all helped to create “that stuffed cloak-bag of guts, that roasted Manningtree ox with the pudding in his belly”.

Look at him! Look at your patients too; wouldn't they benefit from Lucofen, a new treatment for obesity through appetite limitation? In the treatment of obesity, the active co-operation of the patient is essential. Lucofen secures this co-operation, because his normal anticipation of meals is unaffected—but he will be satisfied much earlier. Eating sensibly and taking Lucofen, the co-operative patient is more ready to help the doctor and himself.

**Lucofen**, 1-(*p*-chlorophenyl)-2-methyl-2-aminopropane hydrochloride acts without the frustration and irritability caused by many weight-reducing programmes.

The resultant weight loss is gradual, safe and dependable. Lucofen is free from the disadvantages of the usual amphetamine-like drugs, and thus causes no restlessness, sleeplessness or addiction. It is especially useful in combating the evening hunger felt by many patients. There is evidence of fat mobilisation.

**Dosage:** The recommended dose is one tablet (25 mg.) three times a day before meals, or three tablets before breakfast. This dosage normally results in an average loss of 1 lb. to 1½ lbs. per week.

**Presentation:** Bottles of 50 and 500 tablets.

\* *The action of Shakespeare's Henry IV Part I covers the years preceding the battle of Shrewsbury, July 1403. Falstaff at this time was “some fifty, or by'r lady, inclining to three score”. He owes his name, and perhaps more, to the denigrated soldier Sir John Fastolf (1378-1459).*

effective against  
hand-borne  
cross-infection?

# Steriloderm<sup>\*</sup>

## BACTERICIDAL GEL GETS TO GRIPS WITH THAT EVER-PRESENT DANGER

STERILODERM IS A NEW WAY of giving bactericidal cover. You use STERILODERM *after* you wash, for added protection against the risk of hand-borne cross-infection. Throughout the medical profession it has been shown that routine washing is but poor protection. After you wash you need to protect your skin with a bactericidal layer. It is unwise to rely only on germicidal detergents whilst you wash, since the residue is much diluted when hands are rinsed. STERILODERM, perfectly safe—but at the same time suitably powerful—disinfects the skin *after* washing, building up a resistance against organisms transmitted from the outside, and a defence against the deep-seated bacteria which are exuded from the lower layers of the skin.

GET TO GRIPS with gram-positive and gram-negative organisms: *Staphylococcus pyogenes*, *Streptococcus pyogenes*, *Proteus vulgaris*, *E. coli*, and *Ps. pyocyaneus* in particular.

STERILODERM gives you *added* protection against all common cross-infections.

# dramatic clinical results in psoriasis

followed by medical successes  
throughout the United Kingdom

Though modern medicaments have brought almost dramatic relief to many forms of skin affection, Psoriasis has so far remained intractable. Its aetiology continues to baffle investigation and many forms of tried therapy have yielded only partial or temporary results.

Now ALPHOSYL—after extensive clinical trials and medical successes throughout the United Kingdom—shows promise of bringing total clearances in many cases of Psoriasis.

In ALPHOSYL, for the first time, are presented in combination two agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition itself and positive stimulation of the healing process.

ALPHOSYL LOTION combines these two valuable agents in one preparation and has had impressive results where other medications have failed.

The successes obtained with ALPHOSYL indicate that it deserves a trial in all cases of Psoriasis—no matter how extensive the area of infection, how long the duration of the condition, or whatever the therapy previously used. ## **Marmite** *in* **the Diabetic Diet**

Clinical references to the diabetic syndrome can be traced to ancient Egyptian writings, and various forms of dietary treatment have been practised for centuries. The discovery of insulin in 1921 completely changed the outlook in diabetes, but adherence to a low-carbohydrate diet still remains an essential part of the treatment.

Marmite yeast extract is widely recommended as an addition to the diabetic diet, as it provides all known factors of the vitamin B complex which may be in short supply in a carbohydrate-restricted regime. Moreover, its pleasant taste and the ease with which it can be incorporated in the diet, ensure ready acceptance.

# Taking a problem of infection in hand

The occurrence of dysentery due to the bacterial agent *Shigella sonnei* represents 98.9% of all dysentery and the incidence of this highly contagious disease has grown during the last ten years. (1).

It is known that 69% of the cases of dysentery relate to children under 15 years of age, 33% being below school age. (2). In addition, there are indications that infection among children may be transmitted to their mothers. The spread and occurrence of dysentery is best controlled by attention to personal hygiene. . . . It is also imperative that environmental hygiene is strictly

observed. Effective disinfection of those surfaces which may become contaminated must be carried out regularly. (3).

Used for this purpose, a solution of Domestos and water will destroy the organism *Shigella sonnei*. This solution should be used on the exterior of the toilet bowl, the seat, the cistern and door handles, the floor and all those areas which may be touched — particularly by the hands of children. In the lavatory bowl itself, Domestos will eliminate heavy soiling overnight, giving a residual available chlorine which destroys bacterial and virus contaminants.

Domestos is an oxidising agent of great potency; used at a concentration of from  $\frac{1}{4}$  to 2 ozs. per gallon, it provides a level of available chlorine in the range 150 to 1,200 parts per million — sufficient to destroy not only the organism *Shigella sonnei*, but also those bacteria responsible for food poisoning and typhoid, and the poliomyelitis virus.

2 Data from the Registrar General's Statistical Review of England and Wales for the year 1959, Part 1.

# WELLDORM is SAFE

for the  
anxious patient...

**Welldorm is an ideal, safe sedative during labour. Unlike barbiturates it does not cause respiratory depression, either in the mother or the foetus.**

for old people...

Neither toxic nor habit-forming, Welldorm is safe for patients of all ages, and can be left in the hands of emotionally unstable people with little danger of accident or abuse.

for adolescents...

In anxiety, tension, agitation and restlessness; for daytime sedation without drowsiness and for sound sleep at night without hangover, Welldorm is safer than barbiturates or tranquillisers.

## REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3

Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments. They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

### **Favourite patient: favourite drink**

Mrs K. The indomitable she, all quips and curls. And the favourite patient's favourite drink, the one in the glass in her hand?—Lucozade, of course. It has helped during the last few days of gastro-enteritis, when appetite was poor and glycogen stores were low. It is helping now as the patient emerges into convalescence, ready for a light diet, eager to be up and about. Less than a quarter as sweet as sucrose, providing 126 Calories in one glass, and putting them into the blood-stream *quickly*—those are the reasons why the doctor too approves of . . .

President: The Earl Spencer  
Medical Superintendent: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This registered hospital is situated in 130 acres of park and pleasure grounds. Patients, both male and female, who are suffering from incipient mental disorders, or who wish to prevent recurrent attacks of mental trouble, are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male and female, in the hospital or in one of the numerous villas in the grounds of the various branches can be provided.

### WANTAGE HOUSE

This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of mental and nervous disorders by the most modern methods; insulin treatment is available for suitable cases. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

### MOULTON PARK

Two miles from the Main Hospital there are several villas situated in a park and farm of 600 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit growing.

### BRYN-Y-NEUADD HALL

The seaside home of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout fishing in the park.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354 Northampton), who can be seen in London by appointment.
