

# New literature on family planning

A recent survey has shown that over 70% of married women under 45 years of age are in favour of Family Planning, which explains why Doctors are receiving more and more requests for information.

These new booklets and leaflets give the latest information on conception control and will save Doctors' time when dealing with these enquiries.

**The Condom protective as a Contraceptive.** Written by the Director of Research at the National Committee on Maternal Health Inc., New York. This authority on the statistical evaluation of family planning analyses the effectiveness and acceptability of the protective in detail.

**Modern Family Planning.** A new booklet discussing the various methods of family planning written in simple language suitable for distribution to interested patients.

**Diaphragm or Protective**  
A comparison of the two leading methods of conception control.

## The case against Coitus Interruptus

An indictment of this method of conception control—its failure rate and its physical and mental effects.

**The married woman's views on contraception.** A survey based on facts revealed by a recent investigation of the opinions of married women about family planning.

**Contraception—the facts about recent developments.** An enquiry into the stage reached in the development of oral contraception—the advances to date, the interest of the general public, the known disadvantages and the long-term dangers.

Some criticism has, in the past, been levelled at Protectives on the grounds that they reduce sensitivity. A recent development by the London Rubber Company almost entirely overcomes such objections.

# SUMMER SINUSITIS and RINUREL

Heat—dust—hay fever—all tend to exacerbate any tendency to sinusitis; whatever the aetiology, the patient is in pain and discomfort and seeks symptomatic relief as quickly as possible. Such conditions respond to the administration of Rinurel. In sinusitis no single drug will lessen the severity of the symptoms, and combined drug therapy is indicated. Rinurel tablets are the medication of choice. They contain two analgesics, a decongestant and an antihistamine. Dosage is simple and side-effects minimal. Treatment with Rinurel will result in a grateful patient, and will pave the way to the search for the underlying cause.

# LUCY BALDWIN APPARATUS FOR OBSTETRIC ANALGESIA

The Lucy Baldwin Apparatus is designed for the administration of nitrous oxide and oxygen mixtures for analgesia in obstetric practice. Gas mixture, which may be varied between 70% nitrous oxide/30% oxygen and 100% oxygen, conforms accurately to the value selected on the control dial no matter how draw-off conditions may change. The analgesic properties of nitrous oxide may thus be exploited to the full whilst at the same time maintaining adequate oxygenation. The gas mixture flows only in response to the patient's inspirations and safety cut-off valves eliminate any possibility of inhalation of pure nitrous oxide in the event of undetected failure of the oxygen supply. We shall be glad to send you illustrated literature on request.

**for  
Lucofen**

Whenever Sir John Falstaff felt an urge to eat—he ate. Bread, sugar, meat, capons—washed down with flagons of sack—all helped to create “that stuffed cloak-bag of guts, that roasted Manningtree ox with the pudding in his belly”.

Look at him! Look at your patients too; wouldn't they benefit from Lucofen, a new treatment for obesity through appetite limitation? In the treatment of obesity, the active co-operation of the patient is essential. Lucofen secures this co-operation, because his normal anticipation of meals is unaffected—but he will be satisfied much earlier. Eating sensibly and taking Lucofen, the co-operative patient is more ready to help the doctor and himself.

**Lucofen**, 1-(*p*-chlorophenyl)-2-methyl-2-aminopropane hydrochloride acts without the frustration and irritability caused by many weight-reducing programmes.

The resultant weight loss is gradual, safe and dependable. Lucofen is free from the disadvantages of the usual amphetamine-like drugs, and thus causes no restlessness, sleeplessness or addiction. It is especially useful in combating the evening hunger felt by many patients. There is evidence of fat mobilisation.

**Dosage:** The recommended dose is one tablet (25 mg.) three times a day before meals, or three tablets before breakfast. This dosage normally results in an average loss of 1 lb. to 1½ lbs. per week.

**Presentation:** Bottles of 50 and 500 tablets.

*\* The action of Shakespeare's Henry IV Part I covers the years preceding the battle of Shrewsbury, July 1403. Falstaff at this time was “some fifty, or by'r lady, inclining to three score”. He owes his name, and perhaps more, to the denigrated soldier Sir John Fastolf (1378-1459).*

## PHENOXYPROPAZINE

This new compound is the first monoamine oxidase inhibitor to have been developed by entirely British research.

Clinical trials show that Drazine is highly effective and rapid in action in the treatment of mental depression. It has remarkably low toxicity and incidence of side-effects. Patients on long term treatment with Drazine are more stable than they are on long term treatment with other monoamine oxidase inhibitors. Excitability caused by excessive reversal of the depressed state seldom occurs even after prolonged Drazine therapy.

*While clinical trials are continuing it is recommended that the use of Drazine is restricted to consultants and hospitals.*

Drazine is (1-Methyl-2-phenoxyethyl) hydrazine hydrogen maleate.

**Would you  
throw  
a spanner  
in the works?**

*No one disputes that spanners can be very useful: they can also bring work to a standstill if you are not careful. Most analgesics are rather like spanners—very useful so long as their side-effects do not interrupt the normal working of your patients. You would call Zactirin a very special spanner. It can safely slacken off your patients' pains without the risk of work-stopping disturbances such as dizziness, gastric upsets, disorientation—that's because it contains Wyeth's new, specific analgesic, ethoheptazine. You can see how Zactirin\* will work in your next patient who works.*

## Come, fill the case...

Breadless, wineless, sadly songless in an unpoetic wilderness known as "the dog house". Such poetic justice may well descend upon that dream-filled head of yours. For if you scatter your quatrains to the four corners of the living-room, don't feign surprise when you're hauled onto the carpet—Persian or otherwise—and faced with a wife waxing anything but lyrical. The gist of her few-thousand-word sermon being: "The proper place for books is a bookcase". Who can deny it?

Minty have specialised for years in making superb bookcases that house your many-splendoured books in dust-free distinction behind very elegant sliding glass doors. Easy on the eye—and the pocket—they allow you to go your merry way reading books, buying books—for Minty bookcases are *sectional* and may be started for as little as £10.16.0—on deferred terms if you prefer.

Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). The Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.17, Minty Ltd., 44-45 High Street, Oxford.

## FOR GERIATRIC PATIENTS safe, comfortable, effective HERNIAL SUPPORT

Because each Spencer Support is designed to order to meet the patient's individual needs, results are demonstrably superior.

The patient shown on left, aged 74, developed a left ventral hernia following surgery fourteen years previously. A left inguinal hernia resulted from the long wearing of a cast following a hip injury 3 years ago. "Stock" supports proved ineffective. A Spencer Support as shown was prescribed with excellent results. Her Spencer gives safe, comfortable and effective control of the hernias—improves and maintains posture—protects and supports the weak muscles of old age. With the aid of her Spencer, the patient runs her household, does all her own work, and—as she says—still has time "to enjoy life."

Prescribe Spencer with confidence for men, women, children—for abdomen, back, breasts. No case is too difficult for Spencer Designers!

## A Ross Microreader where you want it

The full value of using microrecords in Hospital administration is only obtained if the micro-reader can be located in the room where the consultation is taking place.

This is just what the Ross Microreader was designed to achieve. It is compact and portable and will stand conveniently on table or desk. It is a universal reader in that it will project any type of microrecord, 35 mm. or 16 mm.; cards or film; opaques or transparencies. Miniature X-rays can be viewed with equal facility and even microscope slides can be examined using the special microscope objective.

It is less costly than the conventional, bulky, single purpose reader, thus making it an economical proposition to have several conveniently situated reading stations instead of one.

May we send further details of the ROSS microreader; or we should be pleased to submit one for examination and trial.

## THE MEDICAL SERVICE OF THE ROYAL NAVY

### VACANCIES FOR MEDICAL OFFICERS

The Royal Navy offers Short Service Commissions of 3 or 5 years' duration to registered medical practitioners. Opportunity exists for transfer to Permanent Commission, by selection, after one year's service. There are facilities for postgraduate study and training for higher degrees with a view to specialization, in the case of officers entered on 5-year short service and on Permanent Commissions. Specialities include Underwater Physiology, Nuclear and Aviation Medicine, as well as the usual clinical subjects.

**Pay:** On entry a Surgeon Lieutenant married and over the age of 25 years will receive £1,195, with annual pay increments thereafter and a tax-free ration allowance of £112 p.a., if unaccommodated. Additional allowances are paid for children's education, disturbances involving essential moves of family, and for service overseas.

### Gratuities and Pensions:

Gratuities are payable on completion of short service commissions:

3 years' service £1,500 tax free

5 years' service £3,000 tax free

Those officers accepted for Permanent Commissions receive £1,500 (Taxable).

Service becomes pensionable after 16 years.

when  
craftsmanship  
counts...

Few of the traditional materials of the craftsman contribute so much to perfection in the artist's hands as does Gypsona in the hands of the surgeon.

Gypsona never varies in its firm but submissive moulding properties and its predictable optimum setting time. Gypsona casts are of unequalled strength, smooth and white as porcelain.

Every Gypsona cast is to the surgeon a source of pride in his art, and to the patient, a reassuring symbol of speedy return to normal activity.

**STRENGTH** — the fine English gypsum is from a source exclusive to Gypsona and gives it its great strength and durability

**SPEED** — flexible, interlocking weave gives Gypsona easy moulding properties; consistent plaster content ensures optimum setting time

**SMOOTH WHITENESS** — for comfort and elegant, hygienic appearance

**ECONOMY** — high, unvarying plaster content

# Can home cooking ever be second best?

You've probably often said to a mother on the subject of weaning, "Make sure there is plenty of variety in your baby's diet." But, although she may grasp the importance of variety, she probably has no very clear idea as to how she is to provide it.

*This is one of the reasons why so many medical practitioners go on to recommend Heinz Baby Foods. With 31 Strained Foods, and 16 Junior Foods for the older baby, they offer a simple and practical way of achieving the variety you advise.*

**H**EINZ Baby Foods are prepared from the finest ingredients, which are inspected at every stage of production. They're cooked by a special process which keeps loss of mineral salts, vitamins and soluble nutrients down to the minimum. Finally, they're finely sieved or chopped to exactly the right consistency.

Endless variety all the year round. Carefully, hygienically cooked foods made from the finest ingredients. And there's yet another reason why Heinz can justifiably claim that their Baby Foods are better than home-prepared. Heinz Baby Foods, as the basis of her baby's diet, give a mother more time to spend with her baby, and so promote that calm, close relationship between mother and child which is probably just as important as a well-balanced diet.

# *NEW! Regal Milk*

*makes two major contributions to  
infant feeding*

1. The New Regal can has a golden-lacquered lining which prevents rusting or discoloration when the can is opened.

2. New Regal Full-Cream Milk contains added Vitamin C. (6.8 m.g. per fluid ounce).

These *unique* features are to be found only in New Regal Milk—the best and safest for infant feeding, Hospital dietary and general home consumption.

## *New Regal Half-Cream Milk* (also in internally lacquered cans)

This milk is specially formulated to meet the specific demands of premature, marasmic or other babies unable to tolerate a full-cream feed. It is invaluable, too, for all adults on 'reduced fat' diets.

THE INSTITUTE OF MEDICAL AND VETERINARY SCIENCE  
Adelaide, South Australia

## DIRECTOR

Applications are invited from medical graduates for the position of Director. This Institute is a large one with a total staff of some 185 persons and a graduate staff of approximately 50, including 23 medical graduates. The work includes both routine diagnostic pathology and research, and is carried out in the five divisions of bacteriology, biochemistry, haematology, surgical histopathology and virology, each with a competent head of division in charge. In addition, there is a division of veterinary pathology and one division devoted to medical research. The Institute undertakes laboratory work for the Royal Adelaide Hospital, and has branch laboratories at other Government-subsidized hospitals. It also undertakes work of a public health nature and for private practitioners. The laboratories are modern and well-equipped, and there is an association with the University of Adelaide for teaching purposes. It is anticipated that the Director could spend up to one half of his time in research if he so wished. The salary is £A.4,300 per annum, with provisions for adequate superannuation and overseas study leave. The appointment will be for five years, with eligibility for reappointment. First-class passages will be paid for the appointee and his family to Australia together with an allowance of up to £A.150 for the transport of excess luggage. Applications, including the names of three referees, will be received until August 31, 1961, and should be sent to the Chairman of the Council, Box 14, Rundle Street Post Office, Adelaide, South Australia. ## **KLING\*** conforming bandages

KLING Conforming Bandages stay put wherever put, but are light, airy and comfortable to wear. Dressings are held firmly in place on any part of the body without discomfort to the patient. Two-way stretch allows the bandage to conform to contours around joints and bony prominences and the self-adherent turns will not slip.

KLING Bandages are impregnated with lauryl dimethyl benzyl ammonium bromide to minimize cross-infection.

# VISIBLE SAFE ACCESSIBLE

Packed in glass, London Hospital catgut is visibly secure, easily recognised and accessible.

Sutures remain completely safe and sterile, because glass tubes cannot be slit or punctured accidentally. Glass cannot become permeable or otherwise deteriorate. Glass is not affected by chemical sterilising agents.

London Hospital 'spot' glass tubes do not splinter. Under slight pressure they break cleanly at the centre groove without filing.
