

# New literature on family planning

A recent survey has shown that over 70% of married women under 45 years of age are in favour of Family Planning, which explains why Doctors are receiving more and more requests for information.

These new booklets and leaflets give the latest information on conception control and will save Doctors' time when dealing with these enquiries.

**The Condom protective as a Contraceptive.** Written by the Director of Research at the National Committee on Maternal Health Inc., New York. This authority on the statistical evaluation of family planning analyses the effectiveness and acceptability of the protective in detail.

**Modern Family Planning.** A new booklet discussing the various methods of family planning written in simple language suitable for distribution to interested patients.

**Diaphragm or Protective**  
A comparison of the two leading methods of conception control.

## The case against Coitus Interruptus

An indictment of this method of conception control—its failure rate and its physical and mental effects.

**The married woman's views on contraception.** A survey based on facts revealed by a recent investigation of the opinions of married women about family planning.

**Contraception—the facts about recent developments.** An enquiry into the stage reached in the development of oral contraception—the advances to date, the interest of the general public, the known disadvantages and the long-term dangers.

Some criticism has, in the past, been levelled at Protectives on the grounds that they reduce sensitivity. A recent development by the London Rubber Company almost entirely overcomes such objections.

**Lucofen**

Gargamelle is said to have eaten '16 quarters, 2 bushels, 3 pecks and a pipkin' of tripes at one sitting. Only then did she begin to feel 'a little unwell in her lower parts', subsequently giving birth to Gargantua—and a whole dynasty of giants.

Such a consequence of overeating is indeed rare. And it is to combat the more usual and less happy results that Lucofen has been formulated. A new drug for the limitation of appetite, Lucofen acts without interfering with normal meal anticipation. It thus helps to gain the active co-operation of the patient, so essential in the treatment of obesity. Eating sensibly, and taking Lucofen, the co-operative patient is more ready to help the doctor and himself.

**Lucofen**, 1-(*p*-chlorophenyl)-2-methyl-2-aminopropane hydrochloride acts without the frustration and irritability caused by many weight-reducing programmes.

The resultant weight loss is gradual, safe and dependable. Lucofen is free from the disadvantages of the usual amphetamine-like drugs, and thus causes no restlessness, sleeplessness or addiction. It is especially useful in combating the evening hunger felt by many patients. There is evidence of fat mobilisation.

**Dosage:** The recommended dose is one tablet (25 mg.) three times a day before meals, or three tablets before breakfast. This dosage normally results in an average loss of 1 lb. to 1½ lbs. per week.

**Presentation:** Bottles of 50 and 500 tablets.

\* *Francois Rabelais, humanist, physician and satirist, published the first book of his immense satire 'Gargantua and Pantagruel' in 1532, provoking laughter that has echoed through the centuries. The complete work is said to have added 600 words to the modern French language. And at least two—Gargantuan and Rabelaisian—to our own.*

## ANUSOL PUT HIM BACK ON THE JOB

He went on working until he *couldn't* carry on any longer. Anusol, of course, was imperatively needed. Pity it hadn't been used sooner. However, the antiseptic, decongestive action of this haemorrhoidal suppository was rapidly effective as usual. Where inflammation is an additional problem, ANUSOL-HC (containing hydrocortisone) is the specific treatment. When the inflammation has been controlled, ANUSOL plain is the ideal continuation therapy. Both ANUSOL-HC and ANUSOL plain are available as suppositories or ointment.

# DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

## NICOTINIC, SALICYLIC AND p-AMINOBENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. Transvasin can be prescribed on Form E.C.10.

## REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3

Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

## trial of strength...

Gypsona owes its traditional strength to an unvarying, exclusive source of raw material, high plaster content, a special interlocking weave and—above all—stringent physical and chemical standards.

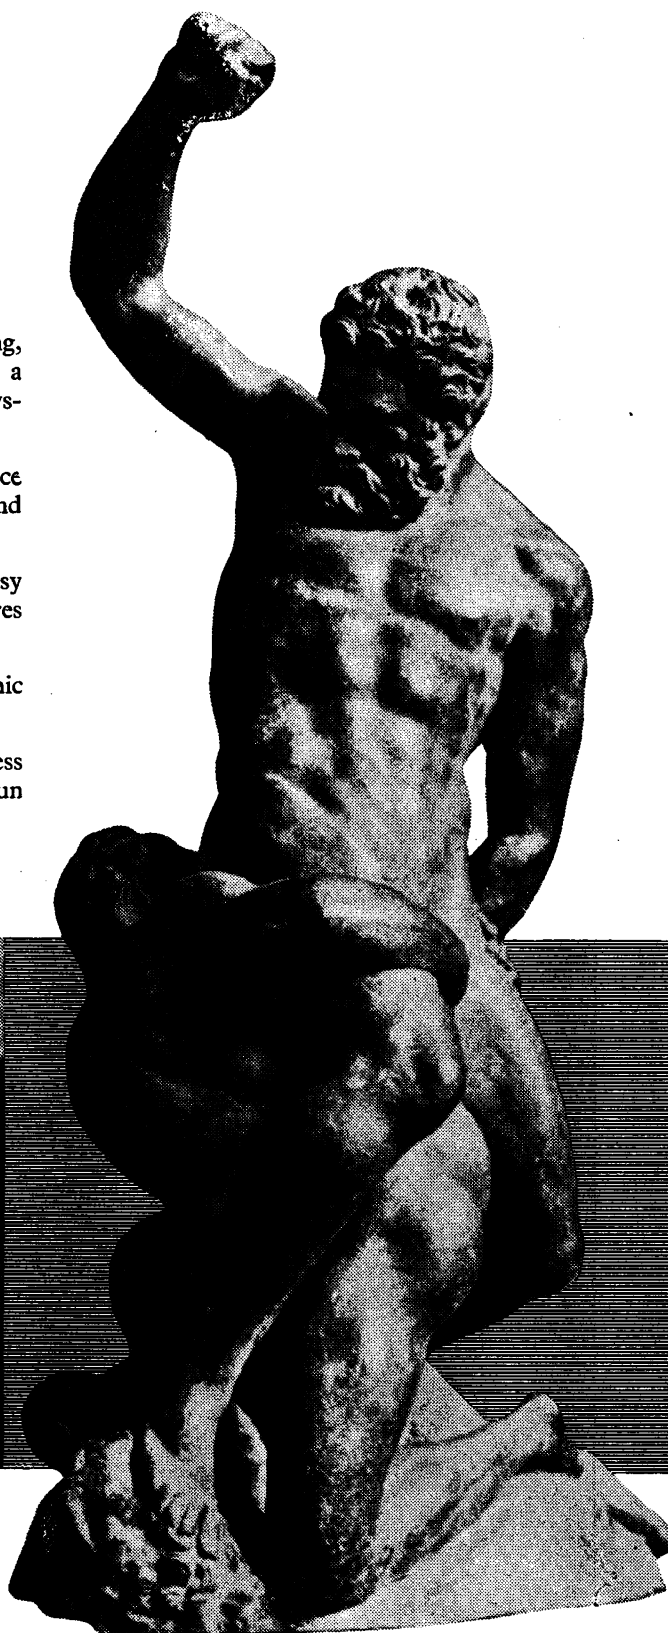

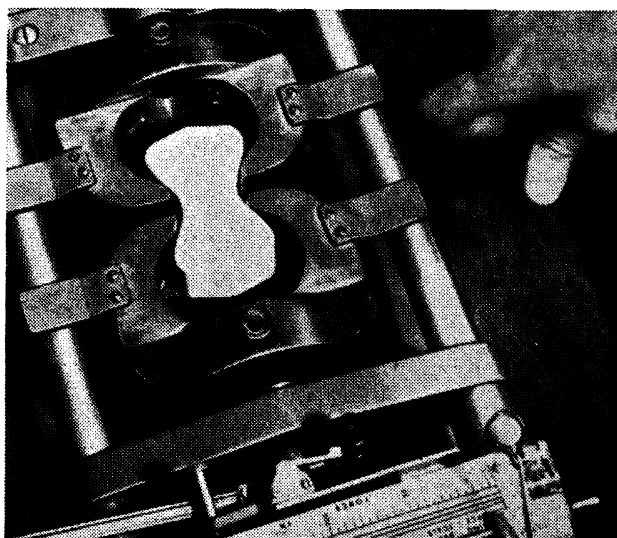

**STRENGTH** — the fine English gypsum is from a source exclusive to Gypsona and gives it unequalled strength and durability

**SPEED** — flexible, interlocking weave gives Gypsona easy moulding properties; consistent plaster content ensures optimum setting time

**SMOOTH WHITENESS**—for comfort and elegant, hygienic appearance

**ECONOMY** — high, unvarying plaster content means less bandage per cast. Gypsona is always cheapest in the long run

*During manufacture, plaster content is continually checked by laboratory analysis. Standard casts are made from batch samples and tested to breaking point.*

## DIABETES IN AN ENGLISH COMMUNITY

A Study of its Incidence and Natural History

by

**J. B. WALKER and DAVID KERRIDGE**

This work was initiated in 1955 by the British Diabetic Association in an attempt to arrive at a numerical evaluation of the problem of diabetes in Britain.

An English village of 5,400 inhabitants has been surveyed with a view to estimating the incidence of diabetes. The methods of conducting such surveys are discussed, and the importance of adopting a standard method stressed.

The results show that there are about thirteen diabetics per thousand of the population, half of whom are asymptomatic. The relationship of diabetes to various social factors is examined. Plans for a follow-up study of the population are discussed.

To the teenager, acne has social implications which are no less distressing than the physical disfigurement. He feels, and is made to feel, uncomfortably different.

Camyna effectively clears the skin of acne lesions. It reduces seborrhoeic secretions and counteracts the spread of bacteria and fungi. Local circulation is stimulated and peeling and scaling encouraged. Camyna provides a complete therapy—no other treatment is necessary. The tincture is invisible during daily use and friends are unaware the patient is under treatment. Many girls find that the skin-coloured lotion makes an excellent foundation for make-up.

TO TREAT THE PATIENT AS WELL AS HIS ANGINA

# PERIFENIL

for the patient with Angina

## FOR THE ANGINA

Peritrate is an established coronary vasodilator, increasing coronary blood flow and maintaining its effect for 4 to 5 hours. Nardil, perhaps by virtue of its MAO inhibitory action, also increases coronary blood flow and cardiac output.

## FOR THE PATIENT

Nardil, the exemplar of the newer anti-depressants, relieves the depressive or psychosomatic element seen in many anginal patients.

(Note: Patients receiving Perifenil should be warned against strenuous exercise.)

Both the constituents of Perifenil have just received the cachet of official approval, for it is proposed to include monographs on both substances in the 1963 British Pharmacopoeia.

Each Perifenil tablet contains:—

Peritrate (pentaerythritol tetranitrate) 20 mg.

Nardil (phenelzine) 7.5 mg.

## DOSAGE

One tablet four times a day before meals.

## **clears infected ears**

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' brand Drops.

'Otosporin' is an aqueous suspension containing both neomycin and polymyxin B sulphate which are together effective against practically all the bacteria found in ear infections.

They are unlikely to induce bacterial resistance or skin sensitisation, and neither of them gives rise to cross-resistance or cross-sensitisation to penicillin and other antibiotics. Their effectiveness is visibly enhanced by the hydrocortisone in 'Otosporin'; this, by reducing inflammation, not only relieves pain, but provides greater access for the antibiotics

**SERVICES****MEDICAL EXPERIENCE IN THE  
ROYAL AIR FORCE**

Doctors, both men and women under 33, are assured of a progressive career in the Royal Air Force. Junior and senior ranks have ample opportunity for good-class general practice, and those with the necessary experience and qualifications can expect to be employed throughout their subsequent career as specialists in the clinical subjects or in aviation physiology. Generous leave is allowed for postgraduate study and courses.

Rank and seniority on appointment is related to previous experience. General practitioners are promoted on a length of service/time basis to Wing Commander, and specialists to Group Captain. Subsequent promotion to higher ranks is by selection.

Total emoluments (for the married officer) range from £1,307 per annum for a Flying Officer to £4,902 per annum for an Air Marshal. In addition officers selected as Junior Specialists (in the ranks up to and including Wing Commander) are eligible for additional pay of £109 a year whilst employed on the appropriate specialist duties, and recognized Specialists (in the ranks up to Air Vice-Marshal) are eligible for additional pay of £292 a year. Ample pensions and terminal grants are paid on retirement, and all suitable retired officers may be re-employed in clinical posts at a salary of £2,165 (plus pension).

Normally appointments are in the first instance to a short service commission of 3 or 5 years, for which tax-free gratuities of £1,500 or £3,000 are payable. Write to: Air Ministry (HN829), 1/6 Tavistock Square, London W.C.1. The future is with the R.A.F. The Royal Air Force.

# STAPHYLOCOCCAL SUPERINFECTIONS

"Patients in hospital who have had an operation, and a course of 'broad-spectrum' antibiotics, sometimes develop diarrhoea which may be severe and even fatal."

*Lancet Annotations, 25th February, 1961*

## ENPAC

### LACTOBACILLUS ACIDOPHILUS PREPARATION

For the prophylaxis and treatment of staphylococcal super infections.

"It was found that the staphylococci increased in both groups at the beginning of antibiotic treatment. Staphylococci continued to increase in the patients taking the antibiotic alone, but in those taking 'ENPAC' there was a pronounced drop in numbers."

*Lancet—May 4th, 1957. pp. 899—901*

## Low-sodium Diets

Restriction of the sodium intake is sometimes unavoidable in cardiac or renal disease, or in pregnancy. Unfortunately, meals prepared without salt tend to be insipid and the diet may soon become monotonous.

Salt-free Marmite imparts a pleasant savoury taste to soups and stews and is therefore popular with patients who have to adhere to a low-sodium diet. It is also appreciated as a sandwich spread or as a flavouring for egg dishes. Moreover, it improves the nutritional value of the diet by providing all known factors of the vitamin B complex.

## SALT-FREE MARMITE
