dramatic clinical results in psoriasis

followed by medical successes
throughout the United Kingdom

Though modern medicaments have brought almost dramatic relief to many forms of skin affection, Psoriasis has so far remained intractable. Its aetiology continues to baffle investigation and many forms of tried therapy have yielded only partial or temporary results.

Now ALPHOSYL—after extensive clinical trials and medical successes throughout the United Kingdom—shows promise of bringing total clearances in many cases of Psoriasis.

In ALPHOSYL, for the first time, are presented in combination two agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition itself and positive stimulation of the healing process.

ALPHOSYL LOTION combines these two valuable agents in one preparation and has had impressive results where other medications have failed.

The successes obtained with ALPHOSYL indicate that it deserves a trial in all cases of Psoriasis—no matter how extensive the area of infection, how long the duration of the condition, or whatever the therapy previously used. have pronounced advantages over
either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

*Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless hydrophilic cream, known as TARCORTIN.

TARCORTIN CREAM is supplied in 7 gm. and 15 gm. tubes, containing 0.5% hydrocortisone in a special coal-tar extract.

Which would you recommend for patients with arterial disease?

In planning diets for patients with arterial disease and coronary heart disease, many doctors recommend the substitution of a vegetable fat to aid in lowering the patient's serum cholesterol level. Look carefully at the two bottles above: which would you recommend to a patient? **ANSWER:** They are identical. The bottle on the right contains Mazola Corn Oil, labelled with its fatty-acids percentages. The bottle on the left contains *exactly the same oil*, and bears the label under which it is sold in thousands of grocery stores throughout the country. (Where your patients can buy it easily and inexpensively.) Mazola Pure Corn Oil: 3/4 for 16 fluid ounces.

NULACIN

"has revolutionized the treatment of duodenal ulcer"

simply

safely

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by 'in vivo' clinical work carried out in many countries.

* **SUCCESS** in winning the Ferodo Gold Trophy for the best British Commonwealth contribution to motor racing in 1960.

* **SUCCESS** With the British motoring public: far more car owners rely on Dunlop than on any other tyre.

* **SUCCESS** in the Grand Prix races of the world: all of them in 1959 and 1960 and since the start of 1961 have been won on Dunlop.

* **SUCCESS** with the British motor manufacturers: more new cars are fitted with Dunlop than with all other tyres put together.

These world-wide successes prove that Dunlop tyres are the best you can buy. Today, millions of motorists rely on the Dunlop 'Gold Seal' for everyday motoring. It offers that much more in roadholding and cornering—especially on wet or 'greasy' surfaces; that much more in long, trouble-free life; above all, that much more in built-in safety. RADIOISOTOPE STUDIES PROVE PERITRATE INCREASES MYOCARDIAL BLOOD FLOW

Clinical trials have reaffirmed the effectiveness of Peritrate in increasing myocardial blood flow. The report of their objective findings states that "PETN produces a prolonged increase in myocardial blood flow beginning within one hour after ingestion and lasting up to five hours, without producing changes in cardiac output in patients with arteriosclerotic heart disease with previous infarction".*

In patients with coronary artery disease not on therapy, a 50% decrease in mean myocardial blood flow is reported.

*"Measurement of Myocardial Blood Flow".
J. Amer. med. Assoc. (1960) 173, 1231.

METHOD The radioisotope method consists in placing a scintillation detector on the chest wall and monitoring the passage of radioactive material through the heart and through the myocardial circulation. Myocardial blood flow and cardiac output are then determined on the basis of the time-activity curve obtained.

PERITRATE

IN CORONARY ARTERY DISEASE

Peritrate is available in three forms, as 10 mg. tablets, 80 mg. sustained action tablets and combined with phenobarbitone (Peritrate 10 mg. Phenobarbitone 15 mg.)

DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

NICOTINIC, SALICYLIC AND p-AMINOBENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. Transvasin can be prescribed on Form E.C.10.

THE MEDICAL SERVICE OF THE ROYAL NAVY

VACANCIES FOR MEDICAL OFFICERS

The Royal Navy offers Short Service Commissions of 3 or 5 years' duration to registered medical practitioners. Opportunity exists for transfer to Permanent Commission, by selection, after one year's service. There are facilities for postgraduate study and training for higher degrees with a view to specialization, in the case of officers entered on 5-year short service and on Permanent Commissions. Specialities include Underwater Physiology, Nuclear and Aviation Medicine, as well as the usual clinical subjects.

Pay: On entry a Surgeon Lieutenant married and over the age of 25 years will receive £1,195, with annual pay increments thereafter and a tax-free ration allowance of £112 p.a., if unaccommodated. Additional allowances are paid for children's education, disturbances involving essential moves of family, and for service overseas.

Gratuities and Pensions:

Gratuities are payable on completion of short service commissions:

3 years' service £1,500 tax free

5 years' service £3,000 tax free

Those officers accepted for Permanent Commissions receive £1,500 (Taxable).

Service becomes pensionable after 16 years.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

*Third Collection with classified contents list to volumes 1, 2 and 3
Price 25s. (by post 26s. 9d.)*

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

**ROYAL PERTH HOSPITAL
Western Australia****HEAD OF THE DEPARTMENT OF
HAEMATOLOGY**

Applications for the above post are invited from suitably qualified medical practitioners with considerable experience in Haematology. As at present established this post involves both clinical and laboratory responsibilities.

The successful candidate will be required to maintain a diagnostic haematology service and supervise the operation of the Hospital Blood Bank. If the selected candidate has had wide clinical experience, he would be responsible for the investigation and management of certain patients with haematological disorders (for which beds are available). Alternatively, the Board may consider appointing a candidate whose major interest lies in the laboratory aspects of haematology, in which case he would work in co-operation with the Physicians in charge of such patients as described above.

Royal Perth Hospital is the main teaching hospital of the Medical School of the University of Western Australia. At the invitation of the University Departments of Medicine and Pathology, the present occupant of the post has accepted teaching responsibilities.

The Department of Haematology is also well equipped and adequately staffed for the performance of all modern haematological techniques. The head of the department is a member of the Laboratory Services Advisory Committee which advises the Board of Management on the Hospital's Laboratory Services as a whole, and is also a full member of the clinical staff.

Salary: Within the range £A3,558 to £A4,038 per annum, according to qualifications and experience.

Conditions of Service: Include long service leave (three months on full pay after each seven years' service), sick leave, etc. Study leave may be granted as a privilege for some special purpose approved by the Board. Contribution to the State Superannuation Scheme is required, or alternatively, the hospital will consider subsidizing the appointed officer's existing commitments under an approved scheme or endowment policy.

Transport Expenses: A travel grant equivalent to minimum first-class sea passages will be provided for successful applicant and family (under 16 years of age), together with an allowance up to £A300 for the cost of removal of personal effects, etc., subject to a bond to remain in the hospital's service for a minimum period of three years.

A Memorandum of Information (including further details of the Department of Haematology) is available upon request.

Further information concerning Royal Perth Hospital and the State of Western Australia may be obtained from the Agent-General for Western Australia, Savoy House, 115 Strand, London, W.C.2.

Applications in writing, which must be addressed to the undersigned, should include date of birth, qualifications, experience, present and previous appointments, a list of publications, a recent photograph, and the names and addresses of three referees.

Applications close on October 31, 1961.—Joseph Griffith, Administrator. (8975)

A natural action laxative

When advising a laxative, medical preference usually favours the use of a product which acts in a perfectly natural way. Andrews meets this demand admirably. Its effect is to increase the fluid content in the bowel by osmosis and so induce a mild and natural aperient action that does not irritate the intestine.

Andrews will be found particularly useful for relieving constipation arising from decreased food intake, either during illness or restricted diet.

Andrews has further advantages, it is mildly antacid and relieves gastric discomfort. It also improves the flow of bile and helps to check biliousness and sick headaches.

The pleasant taste and refreshing effervescence of Andrews make it readily acceptable to most patients.
