Quickly because penicillin G gives high and sustained blood levels; pleasantly because of its apricot flavour. And it is just as clinically effective as "V" Syrup at less than two thirds the cost.

## dramatic clinical results in psoriasis

followed by medical successes throughout the United Kingdom

Though modern medicaments have brought almost dramatic relief to many forms of skin affection, Psoriasis has so far remained intractable. Its aetiology continues to baffle investigation and many forms of tried therapy have yielded only partial or temporary results.

Now ALPHOSYL—after extensive clinical trials and medical successes throughout the United Kingdom—shows promise of bringing total clearances in many cases of Psoriasis.

In ALPHOSYL, for the first time, are presented in combination two agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition itself and positive stimulation of the healing process.

ALPHOSYL LOTION combines these two valuable agents in one preparation and has had impressive results where other medications have failed.

The successes obtained with ALPHOSYL indicate that it deserves a trial in all cases of Psoriasis—no matter how extensive the area of infection, how long the duration of the condition, or whatever the therapy previously used. have pronounced advantages over either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

\*Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless hydrophilic cream, known as TARCORTIN.

**TARCORTIN CREAM** is supplied in 7 grm. and 15 grm. tubes, containing 0.5% hydrocortisone in a special coal-tar extract.

Provisional diagnosis?—P.U.O. What the mother didn't even bother to say was that the only fluid this little boy will accept is Lucozade. It's true of so many patients, for the liquid glucose in Lucozade is only one quarter as sweet as sucrose, and one third as sweet as dextrose. Also, as the doctor knows, it supplies needed calories more quickly. That is why Lucozade is such a useful therapeutic aid, and why the doctor too approves of . . .

Even in frank oedema, once daily is all you need. Easy for patient to remember and stick to, easy for physician to supervise.

• **No therapeutic gap between doses.**

Round the clock effectiveness. Your first dose provides good diuretic and hypotensive action that's sustained right up to the time next day's dose takes over.

• **Peak natruresis at 10 mg. level.**

Maximum sodium output occurs with each single 10 mg. dose. Natruresis remains well above control (i.e. undosed) level more than 24 hours. Larger single doses give no added effect.

• **Enhanced potassium-sparing effect.**

Enduron's single daily dose causes but a temporary single peak of potassium loss (compared to multiple daily peaks with multiple-dose thiazides). Basic ratio of sodium excretion versus potassium is enhanced too. Potassium depletion is rarely seen.

**ENDURON** is a distinctive analogue of the thiazide family, created by Abbott. Usual adult dose is only 2.5 to 10 mg. once daily; this low multigramme dosage provides the security of a very safe therapeutic ratio.

**"Unlike the other antiseptics, Dettol appeared to have its efficiency increased by the presence of soap, and against *Staph. pyogenes* the effect was one of true synergism."**

*"Antiseptics in Midwifery"* *Brit.med.J.* 1956 2, 200.

The efficiency of Dettol is determined by several techniques, one of which makes use of freshly isolated cultures of *Staphylococcus aureus* obtained from hospitals in various parts of the United Kingdom. The following are representative of the results so obtained:

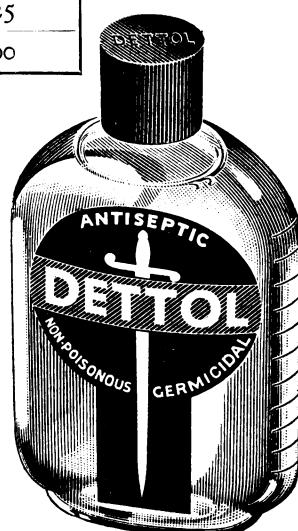

SOURCE OF CULTURE		Dilutions which kill in 10 minutes at 20°C.	
Hospital	Clinical Case	Saline Suspension	24-Hour Broth Culture
A	ABSCESS OF ARM	1 in 300	1 in 100

H	INFECTED BABY'S EYE	1 in 100	1 in 225
I	AXILLARY ABSCESS	1 in 200	1 in 100

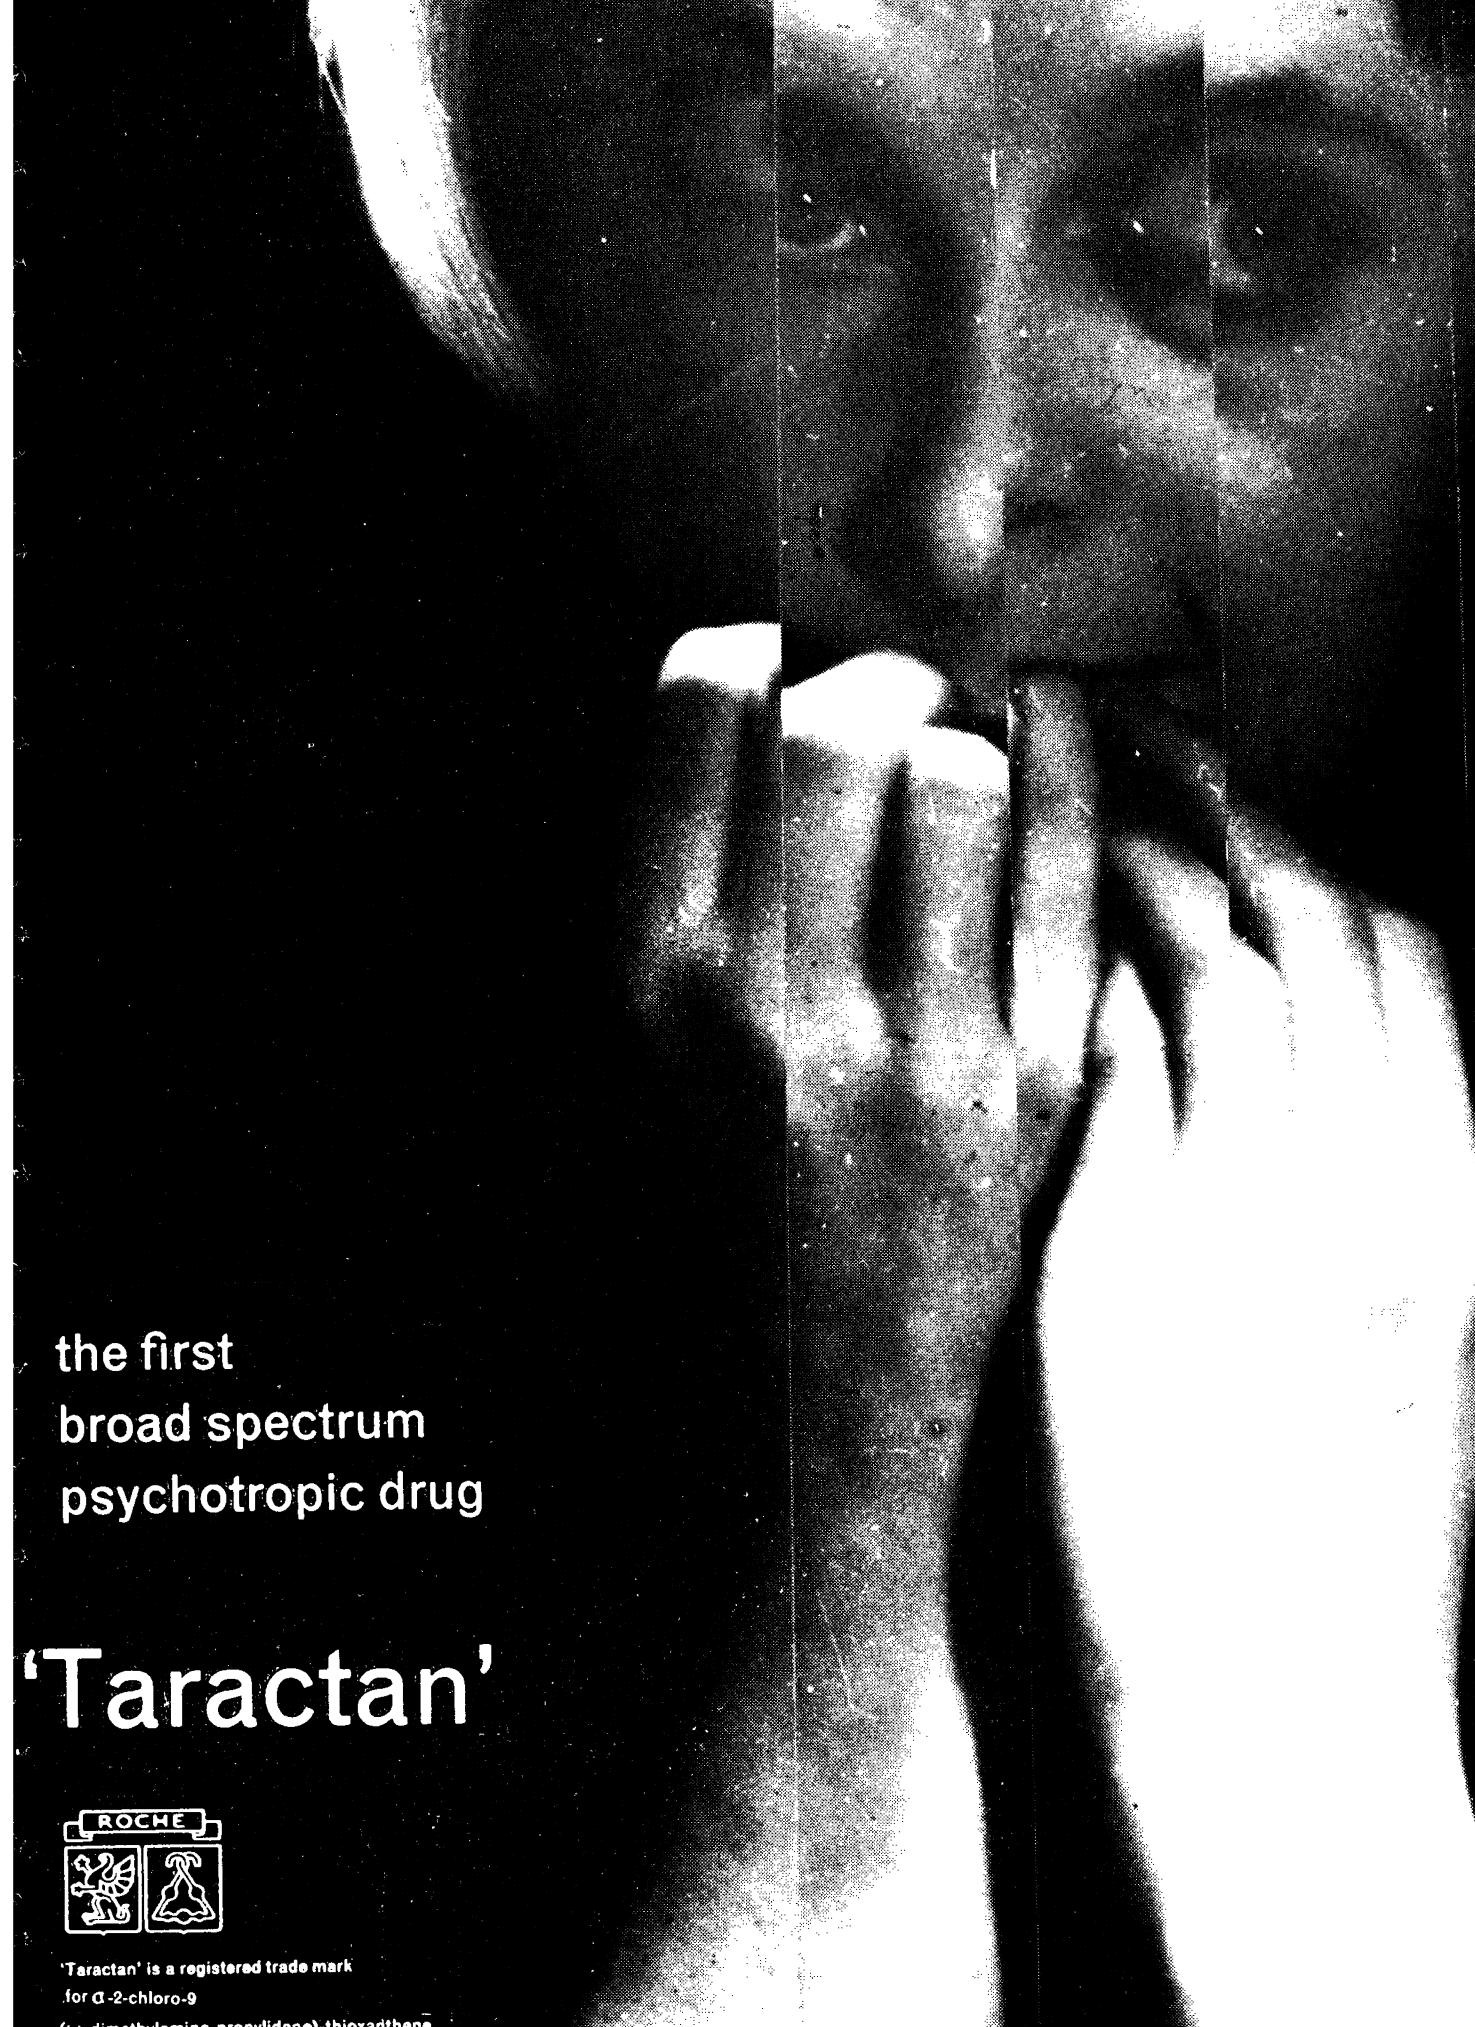

These results indicate that in the dilutions recommended Dettol provides a margin of safety.

In tests with *Staphylococcus aureus* phage type 80 (using freshly isolated cultures from hospitals), a dilution of 1 in 165 of Dettol destroyed the organism in ten minutes at 20°C.

NICOTINIC, SALICYLIC AND  
p-AMINOBENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. Transvasin can be prescribed on Form E.C.10.

# Betnelan

the entirely new  
anti-inflammatory steroid

Betnelan names betamethasone, an entirely new compound developed in Britain by Glaxo Laboratories Ltd. It is effective in low doses in acute asthma, severe eczema, severe allergic urticaria, shock and other conditions for which corticosteroids are indicated systemically. Betnelan is devoid of salt retention activity, has negligible effect on potassium balance, causes no mental depression, has no muscle weakening effect and shows promise of clinical superiority in other respects.

Each tablet of Betnelan contains 0.5 milligram betamethasone and for short-term therapy a "2:1: $\frac{1}{2}$ " dosage scheme is suggested. For example, 2 tablets t.i.d. for 2 days followed by 1 tablet t.i.d. for 2 days and  $\frac{1}{2}$  tablet t.i.d. for 2 days. For maintenance, dosage need be no more than  $\frac{1}{2}$  tablet twice daily.

*The merits of betamethasone derive from its unique chemical structure formed by introducing a methyl group, (CH<sub>3</sub>), in the beta position on the molecule of 9-fluoro prednisolone. This represents more than 20 new stages of manufacturing complexity.*

## DIET PROBLEM?

TAKE A CARD ... When diet is an important factor in treatment, it saves valuable time if you can put your finger on an indexed card giving the appropriate diet.

The Energen Desk Filing Box with its selection of standard diets is but one of the aids provided for the general practitioner by the Energen Dietary Service. Other facilities include the preparation of special diets for individual cases and consultations with a dietitian where desirable. These services are available *free* in the United Kingdom. For full details please write to: The Dietitian

## MARMITE yeast extract

contains

Riboflavin (vitamin B<sub>2</sub>) 1.5 mg. per oz.  
Niacin (nicotinic acid) 16.5 mg. per oz.

### ***in convalescence***

A diet of high nutritional value is essential during convalescence to restore body constituents lost during illness. It is often difficult, however, to tempt the patient's appetite at this stage.

Marmite yeast extract is of special value in these circumstances. It is easily incorporated in the diet and its pleasant flavour is appreciated by the patient. Moreover, its appetite-stimulating properties encourage interest in food.

### THE MEDICAL SERVICE OF THE ROYAL NAVY

#### VACANCIES FOR MEDICAL OFFICERS

The Royal Navy offers Short Service Commissions of 3 or 5 years' duration to registered medical practitioners. Opportunity exists for transfer to Permanent Commission, by selection, after one year's service. There are facilities for postgraduate study and training for higher degrees with a view to specialization, in the case of officers entered on 5-year short service and on Permanent Commissions. Specialities include Underwater Physiology, Nuclear and Aviation Medicine, as well as the usual clinical subjects.

**Pay:** On entry a Surgeon Lieutenant married and over the age of 25 years will receive £1,195, with annual pay increments thereafter and a tax-free ration allowance of £112 p.a. if unaccommodated. Additional allowances are paid for children's education, disturbances involving essential moves of family, and for service overseas.

#### Gratuities and Pensions:

Gratuities are payable on completion of short service commissions:

3 years' service £1,500 tax free  
5 years' service £3,000 tax free  
Those officers accepted for Permanent Commissions receive £1,500 (Taxable).

Service becomes pensionable after 16 years.

**TO TREAT THE PATIENT AS WELL AS HIS ANGINA**

# PERIFENIL

for the patient with Angina

#### FOR THE ANGINA

Peritrate is an established coronary vasodilator, increasing coronary blood flow and maintaining its effect for 4 to 5 hours. Nardil, perhaps by virtue of its MAO inhibitory action, also increases coronary blood flow and cardiac output.

#### FOR THE PATIENT

Nardil, the exemplar of the newer anti-depressants, relieves the depressive or psychosomatic element seen in many anginal patients.

(Note: Patients receiving Perifenil should be warned against strenuous exercise.)

Both the constituents of Perifenil have just received the cachet of official approval, for it is proposed to include monographs on both substances in the 1963 British Pharmacopoeia.

Each Perifenil tablet contains:—

Peritrate (pentaerythritol tetranitrate) 20 mg.  
Nardil (phenelzine) 7.5 mg.

#### DOSAGE

One tablet four times a day before meals.

# NULACIN

"Has revolutionized the treatment of duodenal ulcer."

safely

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by *'in vivo'* clinical work carried out in many countries.

**MEDICAL OFFICER**

Applications are invited for a full-time appointment in the medical services of a leading British company in Commonwealth West Africa. Candidates should preferably be not more than thirty-five years of age, and should have had a good amount of experience since qualifying.

The scope of the work done by the Company's medical services varies from place to place in West Africa, but in general may be said to cover the health supervision of working communities and their dependants. In many cases this involves taking charge of a small hospital. There is also considerable opportunity for the practice of preventive medicine, public health and industrial medicine in the widest sense.

While each doctor is administratively responsible to his local manager, his professional links are with the Assistant Principal Medical Adviser, Unilever Limited, to whom applications should be made at Unilever House, Blackfriars, London E.C.4.

The successful candidate will spend an initial period attached to the London Medical Centre of Unilever Limited. During this time he will be given an opportunity to learn something of the many aspects of the business, and to devote extra time, if necessary, to any branch of general or tropical medicine, surgery, midwifery, etc. While in London he will be paid not less than the recommended B.M.A. scale for Industrial Medical Officers. On departure overseas, the starting salary and allowances will not be less than £2,500 per annum, and in accordance with age, qualifications and experience. The length of tours in West Africa is approximately eighteen months each, followed by generous leave on full pay. First-class travel facilities are granted to and from West Africa. There is a contributory pension fund, mid-tour passages are arranged, and education allowances paid for children under education in the United Kingdom. (5038)

**ASSOCIATE MEDICAL DIRECTOR for Canadian Pharmaceutical Firm**

The position requires a man who is interested in basic and clinical research and who would enjoy considerable travelling to meet clinicians throughout Canada. Some post-graduate work in the basic sciences is also desirable.

The company works a five-day, 37½-hour week, has a generous retirement plan, group life insurance and other benefits. Salary is open. Starting date is also open to suit the convenience of the successful applicant.

Please reply in confidence, giving personal and professional history, and enclose a recent photograph if available.

Interviews will be arranged in London, October 16-20.—Box 424, B.M.J.

**GOVERNMENT OF KENYA**

Applications are invited for two posts in the grade of

**MEDICAL OFFICER**

Candidates must possess qualifications registrable in the United Kingdom. Possession of a D.P.H. is desirable but not essential. The duties on which officers will be employed include Public Health, Clinical Medicine and Hospital Administration. Kenya is a country at present in a dynamic state of evolution and the opportunities for doctors possessing initiative and imagination are considerable. Appointments will be on contract for two tours each of two years, in the salary scale £1,617 to £2,664 a year. Initial salary will be determined by qualifications and approved experience. On satisfactory completion of service the officer will be eligible for a gratuity (taxable) of 25% of salary. Free passages for the officer, his wife and dependent children on appointment and on leave after each tour. Government quarters with heavy furniture usually available at a rental varying from £60 to £115 a year. Approximately 14 weeks' home leave on full pay after each tour; local leave of 16 days in each tour also granted. It is considered that doctors contemplating a career in the public health service will find such an appointment an opportunity for gaining valuable experience in a developing field of public health, where the problems are thrown into sharper relief than in a more developed community. Application forms from Director of Recruitment, Department of Technical Co-operation, 3 Sanctuary Buildings, Great Smith Street, S.W.1, quoting RC.205/80/03. (5226)

There will be morning and afternoon sessions on Saturday, October 14, 1961, and Sunday, October 15, 1961, at which numerous patients will be available for examination by those attending the course. Instructions by Consultant Surgeons will be based on discussion of clinical findings and treatment. It is regretted that accommodation cannot be arranged. A charge will be made for meals taken at the hospital. Attendance will be limited to 16, and application should be made to the Administrator, Royal Orthopaedic Hospital, 80 Broad Street, Birmingham 15, not later than September 30, 1961. (5183)

**BIOCHEMISTS****Sully Hospital, Sully, Penarth, Glam**

**Senior Biochemist**  
required. The hospital is Regional Thoracic Centre for treatment of all thoracic, including cardiovascular, conditions in adults and children, and has full pathology, surgical and medical facilities with cardio-respiratory laboratory and animal research laboratory. Work will include co-operation with surgical colleagues in research projects and individual research will also be encouraged. N.H.S. conditions and salary (£1,250-£1,700 per annum). Applicants should hold appropriate Science Degree of University of England, Wales, Scotland or Ireland or Associateship or Graduate Membership of the Royal Institute of Chemistry, or such other qualification as may be approved for the purpose by the Minister of Health. Form of application from Group Secretary, 44 Cathedral Road, Cardiff. (5114)

**RECKITT & SONS LIMITED** wish to appoint an experienced Biochemist to take charge of a new Laboratory which is in the course of construction as part of an important development of the existing laboratories, in order to provide facilities for research directed towards the preparation of medicinal chemicals.

Reckitt & Sons Limited is a member of the Reckitt & Colman Holdings Group, which has considerable interests in a number of product groups (pharmaceutical, household, foodstuffs, cosmetic and horticultural) both in the United Kingdom and in over 25 countries overseas.

Reckitt & Sons' existing laboratories are well-equipped to support this development and provision is being made for biological studies using radio-active isotopes and other modern techniques. There is a good Library and Information Service. A Statistical Department is available to help in the planning and analysis of experimental work.

The Senior Biochemist should have some years of post-doctoral experience either in an academic institution or in an industrial establishment, and will be encouraged to pursue special research interests. It is desirable that his previous experience should be orientated to the study of metabolic problems and the mechanisms of drug action.

The conditions of work and employment are excellent and the attitude towards research is liberal. The salary paid will be a matter for individual discussion. There is a good contributory pension fund with provision for widows and dependants and a Prosperity Sharing Scheme. Assistance will be given in securing housing accommodation.

Enquiries will be treated in strict confidence, and should be addressed to:

The Technical Director,  
Reckitt & Sons Limited,  
Dansom Lane, HULL.

# ZOBEC\* SWABS ABSORB MORE COST LESS

**60% better absorption** The cotton wool film enclosed in Zobec Swabs increases both the rate and volume of drainage absorption. Improved absorption cuts the time taken in dressing wounds, thereby lessening the risk of air infection.

**22% saving in cost** Better absorption by Zobec Swabs reduces the number used per dressing. The resultant cost saving was assessed at 22% during a recent comparative trial in a large Midlands teaching hospital. Elimination of the time and trouble involved in cutting and folding gauze rolls produces a further economy more difficult to estimate.
