

GENERAL PRACTICE PROVES BROXIL THE MOST EFFECTIVE ORAL PENICILLIN

AVAILABLE IN TABLET AND SYRUP FORM

**Broxil (Regd) is a product of British Research
at the Beecham Research Laboratories Ltd.,
Brentford · England · Tel.: ISLeworth 4111**

Franol eases the patient's breathing by dilating the bronchioles and reducing mucous congestion. It helps the patient by freeing him from distressing symptoms and allowing him to get unbroken rest at night. Since its introduction, the prescribing of Franol for the relief of bronchitis and asthma has increased every year. More and more doctors use Franol to relieve bronchial spasm in the treatment of these conditions.

"We have tried out a considerable number of preparations, and the one which gives the best results is a compound of theophylline, ephedrine, and 'luminal', marketed under the trade name of 'Franol' (Bayer). The three ingredients act respectively on the bronchial musculature, the nerve endings, and the central nervous system, and there is probably some potentiation since the dose of each individual component is small. Its most striking effect is in suppressing those nocturnal attacks which may occur night after night with clockwork regularity. . . . It rarely has any side-effects, and the remarkable improvement in the patient's general condition . . . is most gratifying. Weight goes up, appetite improves, and the patient increasingly begins to be able to do more".*

What it is. Tedral is composed of theophylline (2 gr.), ephedrine hydrochloride ($\frac{3}{4}$ gr.) and phenobarbitone ($\frac{1}{4}$ gr.).
What it does. These three constituents respectively relieve constriction, reduce congestion, and counteract the central stimulation of ephedrine. This effective combination of drugs ensures prompt and lasting relief.

How it is presented. Tedral is available in the form of *tablets: plain* for daytime use (1 tablet every 4 hours), and *enteric-coated* to ensure night-long protection against attacks (1 tablet together with 1 plain tablet, on retiring); and as *suspension*, which is specially suitable for children, and in which each teaspoonful contains the equivalent of $\frac{1}{2}$ Tedral tablet.

'ICIPEN' in Chronic Bronchitis and other winter ailments

"The nearest approach to the activity of penicillin G against important pathogenic organisms such as haemolytic streptococci and pneumococci is that of penicillin V."

Brit. med. J., 1960, ii, 1695.

This recent study confirms that penicillin V retains a prominent place in the oral treatment of penicillin-sensitive infections.

'Icicen' tablets provide effective therapy for all these infections. The tablets each contain 300 mg. potassium penicillin V and, taken three times a day, they provide therapeutic blood levels adequate for treatment.

'Icicen' tablets are ideal for long-term prophylaxis as in chronic bronchitis. The cost of one day's prophylaxis, namely 1 tablet twice daily, is 1/6 $\frac{1}{2}$ d. This represents a substantial saving in cost compared with other antibiotics.

'ICIPEN' is easily remembered, easily written and only one strength of tablet is supplied.

A Varied Diet for Infants

Early mixed feeding for infants has been advocated by many paediatricians. Although milk remains the infant's staple food, finely minced meat, puréed vegetables, lightly poached eggs and grated cheese are added at an early age. Marmite is particularly recommended as a source of the B vitamins for babies and young children.

As children enjoy the taste of Marmite, it is easy to introduce it into their diet in the form of Marmite gravy which is poured over minced meat and sieved vegetables; for older children, Marmite can be spread lightly on rusks, toast or bread and butter. In cooking, Marmite is a useful addition to soups, stews and other savoury dishes.

'THOSE APPLES OFF THE TREE, DOCTOR...

... I shouldn't wonder. Something he ate anyway. Just suddenly started feeling sick. Then he was. Said he had a gripe right in the pit of his stomach. Couldn't keep anything down hardly. Been a bit loose at the other end too. Still, he's a shade better since I telephoned. Got his school sports tomorrow, you see.'

Diagnosis?—Acute gastritis. What the mother didn't even bother to say was that the only fluid this little boy did keep down was Lucozade. And he wanted it—like so many patients, for the liquid glucose in Lucozade is only one quarter as sweet as sucrose, and one third as sweet as dextrose. Also, as the doctor knows, it supplies needed calories more quickly. That is why Lucozade is such a useful therapeutic aid, and why the doctor too approves of ...

a fresh start in corticosteroid therapy

Betnelan

the entirely new
anti-inflammatory steroid

Betnelan names betamethasone, an entirely new compound developed in Britain by Glaxo Laboratories Ltd. It is effective in low doses in **acute asthma, severe eczema, severe allergic urticaria, shock** and other conditions for which corticosteroids are indicated systemically. Betnelan is devoid of salt retention activity, has negligible effect on potassium balance, causes no mental depression, has no muscle weakening effect and shows promise of clinical superiority in other respects.

Each tablet of Betnelan contains 0.5 milligram betamethasone and for short-term therapy a "2:1:½" dosage scheme is suggested. For example, 2 tablets t.i.d. for 2 days followed by 1 tablet t.i.d. for 2 days and ½ tablet t.i.d. for 2 days. For maintenance, dosage need be no more than ½ tablet twice daily.

The merits of betamethasone derive from its unique chemical structure formed by introducing a methyl group, (CH₃), in the beta position on the molecule of 9-fluoro prednisolone. This represents more than 20 new stages of manufacturing complexity.

... and Betnelan is inexpensive

NEW! Regal Milk
makes two major contributions to
infant feeding

1. The New Regal can has a golden-lacquered lining which prevents rusting or discoloration when the can is opened.

2. New Regal Full-Cream Milk contains added Vitamin C. (6.8 mg. per fluid ounce).

These unique features are to be found only in New Regal Milk—the best and safest for infant feeding, Hospital dietary and general home consumption.

New Regal Half-Cream Milk (also in internally lacquered cans)

This milk is specially formulated to meet the specific demands of premature, marasmic or other babies unable to tolerate a full-cream feed. It is invaluable, too, for all adults on 'reduced fat' diets.

When a patient asks you about family planning . . .

Over 70% of your married patients believe some form of contraception to be essential to the harmony of their married lives—yet few are fully aware of the necessary facts. More and more they turn to you, the family doctor, for advice.

To assist you with these enquiries a number of special booklets and leaflets has recently been published. They are: *A Married Woman's Views on Contraception*; *Fertility Control in General*

Practice; *The Condom as a Contraceptive*; *Diaphragm or Protective?*; *The Case against Coitus Interruptus*; and *Modern Contraceptive Technique*. Also available for patients themselves is the new *Modern Family Planning* booklet.

DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

NICOTINIC, SALICYLIC AND p-AMINOBENZOIC Acids in Ester form

In cases of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. Transvasin can be prescribed on Form EC10.

**'MEN WHO TAKE RESPONSIBILITY
MUST TAKE A SECOND HOLIDAY'**

MEDICAL OPINION AGREES

■ **Hard work won't kill you.**

Men of a certain calibre actually thrive on it. But these are the very men who *must* take a second holiday. They need more than one break a year – and if they take it, they enjoy their work more. They do more of it and do it better. They enjoy living and do it better. They live longer.

This is a summary of the conclusion reached by medical men* concerned with the health of the nation's top management. Their work has convinced them that for men in important positions a second holiday is no luxury. It is an absolute necessity.

■ **In these days of rapid air travel**

it is an unexpected pleasure too. A few precious days off at this time of year can now accomplish much more. For a busy man with only a long weekend to spare, Amsterdam, Paris, Madrid are possible destinations. Sun warm enough for swimming and lying in is shining now in North Africa, Greece, and the Middle East. A winter sports holiday by air is less trouble than a country weekend. And nowhere you fly by BEA is too far to return from in a few hours if work calls you back. Ask your travel agent how quickly and simply a trip can be arranged.

BEA have published a special new brochure to give you ideas about where to go, what to see, what the temperature is at this time of year. Ask your travel agent for it.

ROBINSON'S

makes it easy

Barley water has long been recognised as the ideal treatment in cases where large amounts of liquid form part of the prescription. With its high solids content, smooth demulcent barley water is especially suitable in gastro-intestinal complaints where the internal membranes are inflamed and tender.

Robinson's Lemon Barley and Orange Barley provide a convenient form of natural, wholesome barley water freshened with lemon and orange and perfectly balanced for rapid absorption.

Robinson's 'Patent' Barley gives a quickly prepared home-brew of barley water that can be mixed with milk or flavoured with any fruit juice that the patient prefers. A half-pound pack makes 96 glassfuls of fresh barley water.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3

Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

FEDERATION
University of London****POSTGRADUATE TRAVELLING
FELLOWSHIPS**

The Governing Body of the British Postgraduate Medical Federation invites applications from registered medical or dental practitioners for a limited number of postgraduate Travelling Fellowships. The aim of the Fellowships is to enable graduates who are in the course of training as specialists in one of the pre-clinical or clinical branches of medicine, surgery, or dentistry to obtain experience of the methods of practice, education and research at other universities or centres in the United Kingdom and abroad. Candidates must be British subjects who are holding an appointment at one of the undergraduate or postgraduate teaching Hospitals or medical or dental schools or postgraduate institutes of the University of London. The Fellowships will normally be tenable for one year, and the successful candidates will be expected to commence work in September or October, 1962. The value of the Fellowships is not less than £1,000 per annum, and, in addition, allowances are paid for study abroad, for dependents in the case of married Fellows, and for travelling. Applications must be submitted before November 30, 1961, and further information and application forms may be obtained from the Assistant Director, British Postgraduate Medical Federation, Central Office, 18 Guilford Street, London W.C.1. MENTAL HEALTH RESEARCH FUND**STUDENT PRIZES AND TRAVELLING FELLOWSHIP IN PSYCHIATRY**

The Mental Health Research Fund awards annually to medical students and doctors in their pre-registration year three Monetary Prizes and a Travelling Fellowship as the result of an essay competition on a subject relating to mental health, and a subsequent interview.

Applicants gaining the top three places in the essay competition will be given prizes of £100, £50, and £25 respectively.

The Travelling Fellowship, tenable in a Psychiatric or other department abroad for up to six months, will be awarded as the result of an interview combined with consideration of the candidate's undergraduate record. Persons interviewed will be chosen from the top ten in the essay competition. The travelling fellowship will normally be taken up at the end of the pre-registration year or, in the event of it being awarded to a medical student, may be taken up after qualification.

The subject for the essay this year is "Discuss the Role that Parental Attitudes Play in Shaping the Personality of the Child."

The Panel of Examiners consists of two members of the Research Committee of the Mental Health Research Fund and one member of the Association of Teachers of Psychiatry in Undergraduate Medical Schools.

Essays should be sent, before March 1, 1962, to the Secretary, Research Committee, Mental Health Research Fund, 39 Queen Anne Street, London W.1 (Tel. WELBECK 1272), from whom further details may be obtained. (6557)

A natural action laxative

When advising a laxative, medical preference usually favours the use of a product which acts in a perfectly natural way. Andrews meets this demand admirably. Its effect is to increase the fluid content in the bowel by osmosis and so induce a mild and natural aperient action that does not irritate the intestine.

Andrews will be found particularly useful for relieving constipation arising from decreased food intake, either during illness or restricted diet.

Andrews has further advantages, it is mildly antacid and relieves gastric discomfort. It also improves the flow of bile and helps to check biliousness and sick headaches.

The pleasant taste and refreshing effervescence of Andrews make it readily acceptable to most patients.
