in the treatment of peptic ulcer

has particular advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or antispasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

For his tomorrows—we work today

Helpless—but not unhelped! While he sleeps the unceasing search goes on for new or better antigens to protect him from infectious diseases once regarded as unavoidable hazards.

Take whooping cough, the world's No. 1 killing disease of babies in the first year of life. By perfecting precise methods of making and testing pertussis vaccines Glaxo research has materially helped to raise whooping cough immunisation to its present high level of effectiveness. Significantly, it was Glaxo workers who were asked to assist in the preparation of the British Standard Pertussis Vaccine which was subsequently accepted as the International Standard. Every batch of Whooping Cough Vaccine Glaxo (and combined antigens containing it) measures up to these same high standards.

The primary immunising course with Whooping Cough Vaccine Glaxo is three 1 ml injections (or three $\frac{1}{2}$ ml injections if the Glaxo half volume vaccine is used); the first injection should be given at not later than three months of age.

GASTRIC ANALYSIS 1 Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer

GASTRIC ANALYSIS 2 Same patients as in first graph, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

"Nulacin has revolutionized the treatment of duodenal ulcer"

Proc. R. Soc. Med., 1958, 51, 1063.

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable

side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by *in vivo* clinical work carried out in many countries.

Nulacin tablets have no B.P. equivalent. The basic N.H.S. price of the 25-tablet tube is 2/-.

'Diconal' Tablets for relief of intractable pain

'Diconal' Tablets provide analgesia comparable with that produced by morphine. They are therefore of great value in carcinoma. Because the tablets are given by mouth and not by injection, the patient can be kept oblivious of the fact that his condition calls for so potent an analgesic.

'Diconal' Tablets contain dipipanone and cyclizine. Dipipanone relieves severe pain, while cyclizine appreciably reduces the incidence of nausea and vomiting, even in patients new to this type of therapy.

'Diconal' Tablets are:

-  **Of high value in relief of pain due to neoplastic disease, and other conditions where narcotic drugs would be employed.**

ANNOUNCEMENT

Efficiency and safety of Calcium B-PAS (Wander) in concurrent tuberculotherapy

In a recent British trial¹ with double-blind technique,
involving 132 patients,
it has been confirmed that
Calcium B-PAS (calcium benzamidosalicylate)
is as efficient in equal dosage as sodium PAS,
both as regards therapeutic results and its ability
to delay the emergence of bacterial resistance to isoniazid
given concurrently.

Because, moreover, Calcium B-PAS is better tolerated² and
'the most acceptable of the available PAS preparations'³,
CALCIUM B-PAS (Wander) and 'B-PASINAH' (Wander)
are therefore particularly indicated for patients who find it
difficult to take or to tolerate sodium PAS in its various forms.

These preparations are thus of special value
in domiciliary treatment
to minimize drug-default.

PRESENTATION

'B-PASINAH' Powders, each packet containing
Calcium B-PAS 3.5 g. and Isoniazid B.P. 87.5 mg.
Four packets provide a daily regimen of 14 g. and 350 mg. respectively.
'B-PASINAH' Cachets, each containing
Calcium B-PAS 1 g. and Isoniazid 25 mg.
B-PAS (Wander) Powders: packets of 3.5 g., cachets of 1 g. and as bulk powder.

a new, better-retained form of B₁₂ from GLAXO, the B₁₂ people

In 1948 a Glaxo research team achieved independently the isolation of the active principle of liver now known as vitamin B₁₂

Neo-Cytamen

injection of hydroxocobalamin (vitamin B_{12b})

Hydroxocobalamin, (vitamin B_{12b}) and cyanocobalamin have approximately equal haemopoietic effect in pernicious anaemia, but hydroxocobalamin (Neo-Cytamen) is believed to be closer to the form in which vitamin B₁₂ is normally utilised in physiological processes. Following a substantial dose, it is much more effectively retained by the body than cyanocobalamin, giving consistently higher levels in the blood; dispersal from the injection site is slower, accumulation in the liver is as good or better, and urinary loss of vitamin is considerably less. This more efficient retention may be explained by the increased binding to serum protein characteristic of hydroxocobalamin.

Neo-Cytamen offers particular clinical advantage when a 'depot' preparation is needed to give prolonged B₁₂ serum levels from a high dose. In such cases, the greater retention of hydroxocobalamin may permit the interval between doses to be extended—a convenience for both patient and doctor. For this purpose, Neo-Cytamen is to be preferred to depot preparations of cyanocobalamin which contain substances not found in nature.

Neo-Cytamen is issued in strengths containing 250 and 1,000 micrograms hydroxocobalamin per ml in boxes of 6 one ml ampoules.

LOSS IN URINE

following a single 1,000 microgram intramuscular injection of hydroxocobalamin, only 27% is lost in the urine during the first seventy-two hours compared with 69% cyanocobalamin when given in the same dosage.

LEVELS IN THE BLOOD

A 1,000 microgram injection can produce within five hours a 96-fold rise in the B₁₂ serum level; by the second to fourth week this level may be 2.5 times higher than after administration of an identical dose of cyanocobalamin.

THE MEDICAL SERVICE OF THE ROYAL NAVY

VACANCIES FOR MEDICAL OFFICERS

The Royal Navy offers Short Service Commissions of 3 or 5 years' duration to registered medical practitioners. Opportunity exists for transfer to Permanent Commission, by selection, after one year's service. There are facilities for postgraduate study and training for higher degrees with a view to specialization, in the case of officers entered on 5-year short service and on Permanent Commissions. Specialities include Underwater Physiology, Nuclear and Aviation Medicine, as well as the usual clinical subjects.

Pay: On entry a Surgeon Lieutenant married and over the age of 25 years will receive £1,195, with annual pay increments thereafter and a tax-free ration allowance of £112 p.a. if unaccommodated. Additional allowances are paid for children's education, disturbances involving essential moves of family, and for service overseas.

Gratuities and Pensions:

Gratuities are payable on completion of short service commissions:

3 years' service £1,500 tax free

5 years' service £3,000 tax free

Those officers accepted for Permanent Commissions receive £1,500 (Taxable).

Service becomes pensionable after 16 years.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3

Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

It's true of so many patients, for the liquid glucose in Lucozade is only one quarter as sweet as sucrose, and one third as sweet as dextrose. Also, as the doctor knows, it supplies needed calories more quickly. That is why Lucozade is such a useful therapeutic aid, and why the doctor too approves of ...

The age of the successful candidate will probably be less than 35 years. Duties will include the organization of clinical trials, critical appraisal of new drugs and advice to management on medical subjects.

Salary will be according to experience, qualifications and age.

Correspondence will be treated in strictest confidence by the Medical Adviser and should be addressed to Box 1619, B.M.J.

ASSISTANT TO MEDICAL DIRECTOR A. WANDER LIMITED

A British doctor is required to assist the Medical Director in medical copy-writing, general correspondence with the profession, training a large team of representatives, other duties attaching to the office, and ultimately assisting in the arrangement and evaluation of clinical trials of new synthetics.

These qualifications are essential: Scottish or English Conjoint licences or university degree; good grounding in pharmacology and therapeutics; reliable medico-legal knowledge as relating to drugs, medical ethics and propaganda; ability to write meticulous English and to lecture.

The following will rank as advantages: working knowledge of German and/or French, a year or two having been spent in general practice, good standing in professional bodies.

Age limit is 27 to 40. Salary will be by arrangement according to qualifications set out above. Applications, within 10 days, in strict confidence, to Dr. Arthur A. Bradley, Medical Director, A. Wander Limited, 42 Upper Grosvenor Street, London W.1. (8806)

MEDICAL PRACTITIONER

E. R. SQUIBB & SONS, LIMITED, of Edwards Lane, Speke, Liverpool

wish to appoint a Medical Practitioner with outstanding academic and professional qualifications and experience to act in the capacity of Director of Medical Services. The Director of Medical Services will be required to organize and lead a new group within the Company, the purpose of which will be to make available to the medical profession a comprehensive information service relating to all clinical aspects of the Company's ethical products. It is desirable that the Director of Medical Services should retain his professional contacts and status in the field of clinical medicine. Experience in the design, operation, and assessment of clinical trials and wide knowledge of Pharmacology, Microbiology and related fields are desirable. He should possess sympathetic understanding of the aims and objectives of the Pharmaceutical Industry, while retaining his unbiased professional detachment. The Director of Medical Services will be based at Speke, Liverpool, but a certain amount of travel on the Company's behalf should be anticipated. The post will carry a generous salary and adequate expenses, and the Company operates a realistic non-contributory pension scheme. Candidates interested in entering the field of ethical pharmaceutical industry are invited to write to the General Manager, giving a brief résumé of their professional qualifications and accomplishments. be held in the Western General Hospital, Edin-
burgh. It will be conducted by the physicians and
surgeons of the Gastrointestinal Unit. The course
is not designed to cover all diseases of the alimen-
tary tract but will concentrate on those conditions
which are presently being subject to special investi-
gation and research, and which are of particular
importance. The course will include formal lec-
tures and discussions, and each afternoon there will
be a demonstration of cases. The course is de-
signed for both physicians and surgeons, preferably
those who already hold a higher diploma, and who
are interested in advancing their knowledge of this
branch of medicine. No attempt will be made to
cover the requirements of any examination. The
class will be limited and the course will occupy
a week from March 26 to 31, 1962, inclusive. The
fee is £15, payable to "The University of Edin-
burgh." All meetings will be held in the Teaching
Unit, Western General Hospital. Lunch and tea
will be available at the hospital. Applications
should be made to the Director of Studies, Edin-
burgh Postgraduate Board for Medicine, Surgeons'
Hall, Edinburgh 8. (7444)

*The Sherry of
all Sherries...*

RICH, LUSCIOUS AND OF VERY GREAT AGE

Domecq's

CELEBRATION CREAM

Domecq's 'CELEBRATION CREAM' sets a standard of high quality and excellence in Sherry which is probably unique. Aged in the wood in the Bodegas of the great Spanish Sherry House of Pedro Domecq—shippers to this country continuously since 1730—'CELEBRATION CREAM' is a Sherry of rare and distinctive appeal.

Obtainable everywhere from Wine Merchants and in the best bars and hotels. If you have not yet tasted this superb and outstanding Sherry, do so to-day.

**MARMITE**

yeast extract

contains

Riboflavin (vitamin B₂) 1.5 mg. per oz.
Niacin (nicotinic acid) 16.5 mg. per oz.

In Restricted Diets

In the dietary control of obesity, diabetes or other conditions a reduced intake of vitamins may lead to complications. Addition of Marmite to these restricted diets supplements their content of B vitamins and adds flavour to meals which are apt to be dull and uninteresting.

in Preventive Medicine

The prominent part played by diet in preventive medicine is now fully recognised. A well-balanced diet can contribute markedly to general good health and, conversely, a faulty diet can precipitate illness and hinder recovery. Marmite is a useful protective food providing the important B vitamins in a convenient and appetising form.
