Synadrin

Regd. Trade Mark

new compound for the treatment of patients with angina pectoris

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments¹¹⁻¹⁷ and it has been tested in over 1,000 patients¹⁻¹⁰. Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."¹

Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

Femipausin is a Hoechst product containing methyltestosterone 5 mg. and ethinyl oestradiol 0.01 mg. per tablet. It is indicated in the treatment of symptoms of the menopause. The oral administration of combined androgen and oestrogen is accepted therapy; the combination has two advantages. One—the frequency of oestrogen-induced bleeding is greatly reduced; two—androgens increase the general sense of well-being. Femipausin has been formulated very carefully to provide an accurate hormonal balance, and it is well tolerated during prolonged therapy. Femipausin tablets are presented in bottles of 30 and 150 at basic NHS prices of 4/5d. and 21/4d.

TRICLORYL

TABLETS

TRICLORYL (triclofos) is a new pharmaceutically flexible compound developed by Glaxo research.

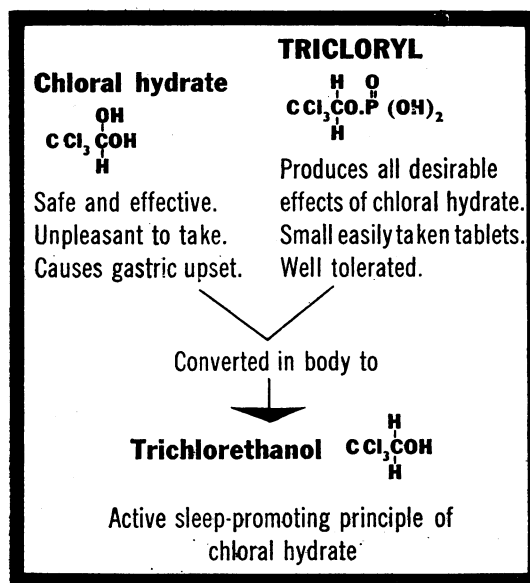

Presented as a *tablet*, Tricloryl offers all the outstanding advantages of chloral hydrate without the latter's objectionable taste or gastric irritant properties.

Safe alternative to barbiturates

Despite their well recognised hazards, and mainly because of lack of suitable alternatives, the barbiturates are still widely prescribed. Although it does not entirely replace the barbiturates, Tricloryl is of much greater benefit and safer to use in the great majority of patients.

Relationship to chloral hydrate

After oral administration chloral hydrate is converted to trichlorethanol, its active sleep-promoting principle. Tricloryl is a chemically stable phosphoric ester of this substance which in the body is rapidly hydrolysed back into trichlorethanol. It shows all the characteristic and well known properties of the parent compound without any unpleasant after-effects.

Sound sleep without daytime drowsiness

Tricloryl produces a sound sleep which is of the same degree and duration as that induced by chloral hydrate. The patient is easily aroused, if need be. He wakes refreshed in body and mind and there is no drowsy daytime aftermath.

Tricloryl not only has a much higher safety factor than the barbiturates—there is also much less fear of habituation.

The tablets are small and easily taken with water. Dosage is from 1 to 4 tablets daily.

Tricloryl is a safe and reliable way of promoting sound sleep in the great majority of patients.

Introducing **FUCIDIN** ZN6-Na

an oral antibiotic of completely new personality
original product of Leo Research

In releasing FUCIDIN, LEO PHARMACEUTICAL PRODUCTS DENMARK appreciate that a number of pharmaceutical preparations have been introduced with high expectations, only to exhibit in subsequent widespread clinical use properties limiting their usefulness.

Initially therefore, LEO restrict themselves to the following statements:

1. In laboratory and clinical trials over a period of two years, FUCIDIN, the sodium salt of fusidic acid, a substance unrelated to any available antibiotic, has demonstrated outstanding activity against the staphylococcus whether antibiotic sensitive or resistant.
2. While it is probably inappropriate to use the word 'safe' with respect to any chemotherapeutic substance, no serious side-effects have been reported to date following extensive clinical trials with FUCIDIN. Its basic steroid structure, far from causing any of the untoward reactions that have become associated with the steroids, may be responsible for the efficient diffusion of FUCIDIN throughout the majority of body fluids and tissues.
3. There is substantial reason for believing that FUCIDIN will be shown, in further work currently under way, to possess a range of antibacterial activity different from any antibiotic at present available. Furthermore the absence of effect on gram-negative coliform organisms eliminates the risk of sterilization of the gastro-intestinal tract, a phenomenon predisposing to fungal superinfection which has often followed therapy with oral antibiotics.

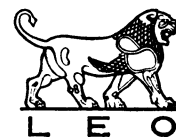

The following reports of laboratory and clinical investigations have been published:

Fucidin: A New Orally Active Antibiotic. *Lancet* (1962) May 5th. **I**: 928 Antibacterial Activity in vitro of Fucidin. *Lancet* (1962) May 5th. **I**: 931 In vitro Studies of a New Antibiotic (Fucidin). *Lancet* (1962) May 5th. **I**: 932 A Case of Staphylococcal Septicaemia Treated with Penicillin and Fucidin. *Lancet* (1962) May 5th. **I**: 933 Antistaphylococcal Activity of Fucidin. *Lancet* (1962) May 5th. **I**: 935 Fusidic Acid: a New Antibiotic. *Nature* (1962) March 10th. **193**: 987 *Ugeskr. a major advance in treatment

'ALDOMET' is a unique antihypertensive agent. Its development has stemmed from fundamental research on antagonists to the biosynthesis of pressor amines from aromatic amino acids.

'ALDOMET' provides effective lowering of standing and lying blood pressure, usually without symptomatic postural hypotension. Daily blood pressure fluctuations are minimised. Exercise hypotension rarely occurs.

'ALDOMET' may replace ganglion and adrenergic blocking agents in many patients including some with severe benign or malignant hypertension.

A striking feature of therapy with 'ALDOMET' is the general lack of severe side effects—patients usually feel well and improve symptomatically.

'ALDOMET' is supplied as tablets containing 250 mg. methyldopa, for oral administration. Fully detailed information on 'ALDOMET' is available on request.

RICH, LUSCIOUS AND OF VERY GREAT AGE

Domecq's

CELEBRATION CREAM

Domecq's 'CELEBRATION CREAM' sets a stan-
dard of high quality and excellence in Sherry which
is probably unique. Aged in the wood in the
Bodegas of the great Spanish Sherry House of
Pedro Domecq—shippers to this country continu-
ously since 1730—"CELEBRATION CREAM" is
a Sherry of rare and distinctive appeal.

Obtainable everywhere from Wine Merchants and
in the best bars and hotels. If you have not yet tasted
this superb and outstanding Sherry, do so to-day.

MARMITE yeast extract

contains

Riboflavin (vitamin B₂) 1.5 mg. per oz.

Niacin (nicotinic acid) 16.5 mg. per oz.

in Restricted Diets

In the dietary control of obesity, diabetes
or other conditions a reduced intake of
vitamins may lead to complications. Addi-
tion of Marmite to these restricted diets
supplements their content of B vitamins
and adds flavour to meals which are apt
to be dull and uninteresting.

Salt-free Marmite is suitable for inclusion
in low-sodium diets. Like ordinary
Marmite, it improves the taste of savoury
dishes—especially if these are prepared
without salt—and is a source of all known
factors of the vitamin B complex, as well
as of potassium.

Diet sheets for reducing, low residue and
restricted sodium regimes are available free
on request from:—
