# LAEVORAL

## in general practice

Over the past 10 years clinical and metabolic studies have established that Laevulose (fructose) occupies a special place among the various sugars available for carbohydrate therapy. Laevoral is a 65% concentration of Laevulose for oral administration and provides the following clinical advantages over other forms of carbohydrate therapy.

### FASTER LIVER GLYCOGEN REPLENISHMENT

### GREATER ENERGY PRODUCTION

### ENHANCED PROTEIN-SPARING

### METABOLIZED INDEPENDENTLY OF INSULIN

Significant advantages are shown in the treatment of the debilitated patient, the chronic sick and all conditions of metabolic stress encountered in general practice where carbohydrate therapy is indicated.

### DOSAGE

1-3 tablespoonfuls daily or as prescribed. Laevoral may be taken with fruit juice or with the usual beverages.

# Jectofer® the foremost intramuscular haematinic for anaemia in pregnancy

## No permanent stain

Jectofer does not cause permanent skin staining, inflammatory swelling, prolonged pain, or tenderness at the injection site.<sup>1</sup> Even discoloration caused by an accidental subcutaneous injection disappears in 1-2 weeks. The injections are simple; given deeply into the gluteal muscle, there is no need for a test dose, and no need for a slow injection technique.

## Rapid, dependable response

Jectofer overcomes the inherent difficulties of oral iron therapy. The desired effect is not jeopardized by either impaired absorption or neglect of the patient in taking the tablets. Jectofer is rapidly absorbed from the injection site (by the blood as well as by the lymph) and is readily utilised by the bone marrow.<sup>2,4,5</sup> The therapeutic response is achieved within a short time, as shown by raised Hb and serum levels and restored body iron stores.

## Absence of allergic reactions and carcinogenicity

No allergic reactions of any import have been reported from the use of Jectofer alone<sup>1</sup> and no evidence of carcinogenicity has been found.<sup>1,3,6</sup>

Iron-deficiency anaemia particularly in iron-deficiency of pregnancy. Intolerance or impaired absorption of oral iron. Substitute or supplement for blood transfusions.

Due to exceedingly rapid uptake of iron-sorbitol, it is recommended that oral iron medication is discontinued to prevent the possibility of temporary overloading.

Jectofer is a low-molecular weight iron-sorbitol-citrate compound in a dextrin-stabilized, aqueous, sterile solution. 2 ml. ampoules containing 100 mg. iron, in boxes of 5, 10 and 50 ampoules.

Jectofer is now classified under Category N of the Report of the Standing Committee on the Classification of Proprietary Preparations, January 1959. (Category N denotes drugs of proved and accepted value which are not yet classified as Standard).

Almost every week fresh evidence is received of Alphosyl's success in even those cases of Psoriasis which have defied all other treatment of years.

The most recent controlled study showed that in 55 cases out of 62—89% of the group—psoriatic lesions were cleared by 75% to 100% and nearly half of them were completely cleared after use of Alphosyl.

In Alphosyl allantoin and a specially refined coal tar extract are presented together for the first time. This combination not only causes a rapid clearance

of the condition but positively stimulates the healing process. Alphosyl is particularly safe. The fact that potentially hazardous measures—arsenicals, mercury, corticosteroids, x-rays—need not be used, further commends the medication. It can be confidently employed for scalp to toe psoriasis in even the most tender parts of the body. It is non-greasy and non-staining; it vanishes on application and thus is acceptable cosmetically especially for use on the scalp, face, hands or any parts of the body which may be exposed.

## Even obstinate cases of Psoriasis yield to Alphosyl—75% to 100% clearance overall

Completely cleared in 6 months: Adult male, Alphosyl therapy initiated 7th June. Marked improvement by 4th August, progressing until skin cleared of all lesions by 6th December.

METHYLDOPA

**a new and completely different antihypertensive agent with significant advantages**

**ALDOMET is indicated in all degrees of hypertension and has significant advantages both for the physician and the patient.**

ALDOMET reduces both standing *and lying* blood pressure.

Diurnal blood pressure variations rarely occur. By adjustment of dosage, morning hypotension can be prevented without sacrificing control of afternoon blood pressure.

Exertional hypotension rarely occurs.

When an effective dosage is attained, ALDOMET produces a smooth, maximal effect in most patients in 12 to 24 hours.

Dosage is simple, flexible and easily established.

The duration of action is short and hypertensive rebound does not occur on stopping treatment.

There is a general lack of severe side effects.

**ALDOMET is a first choice for the treatment of all cases of essential hypertension.**

## You just dispose of the Steriseal syringe after use

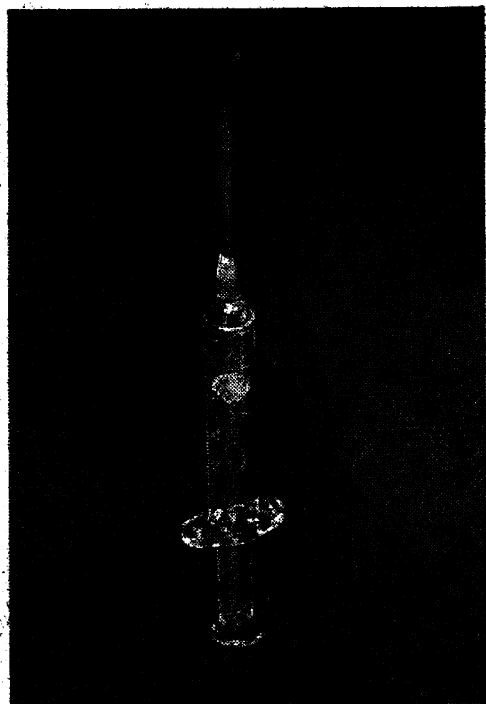

**T**HIS is the Sterile Disposable Hypodermic Syringe made by Shrimpton Steriseal Limited, Washford Mills, Redditch, Worcestershire, from 'Diakon' I.C.I. acrylic polymer. The Steriseal syringe contributes towards safety and time saving in the modern hospital.

The syringe is sterilised after assembly and sealed in an airtight pack until used. It is intended to be used once only, then destroyed, to avoid any possibility of cross-infection. No time or money is wasted on re-sterilizing.

'Diakon' is a material that can be moulded at low cost and high speed to tight dimensional tolerances. For this reason, light, accurately-formed and highly transparent syringes like the 'Steriseal' can now be made at a price that makes single-use an economic proposition.

## A question of economics...

Since late 1955, in England and Wales, there has been a steady reduction in the resident mental hospital population in spite of a steadily increasing admission and readmission rate.\*

Chlorpromazine, the pioneer phenothiazine derivative to be used in psychiatry was introduced in 1954, and has played an important part in reducing the number of chronic patients and the length of stay of new admissions. Thus the overall cost of treatment of mental illness has been considerably reduced.

GLAXO LABORATORIES LIMITED

When conventional treatment of less severe asthma is interrupted by an acute attack, short-term Betnelan therapy can restore control. When the attack is extremely severe (status asthmaticus) all recognised measures which may include injectable corticosteroids (Betnesol Injection is recommended) should be taken, at least initially. At the same time oral treatment with Betnelan can be started to maintain control. Betnelan is presented as scored tablets of 0.5 milligrams betamethasone in bottles of 30, 100 and 500. Half-strength tablets of 0.25 mg are also available in similar quantities.

**D**EFICIENT intestinal bulk is one of the main causes of constipation. In such cases Andrews is particularly useful. It swells the bowel content by osmosis and stimulates peristalsis. In this perfectly natural way, Andrews induces a mild aperient action that does not irritate the intestine.

Andrews relieves constipation arising from decreased food intake during illness or restricted diet. It is also mildly antacid and relieves gastric discomfort; it helps to check biliousness and sick headaches. Andrews is readily acceptable because of its pleasant taste and refreshing effervescence.

# Synadrin

Regd. Trade Mark

## new compound for the treatment of patients with angina pectoris

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments<sup>11-17</sup> and it has been tested in over 1,000 patients<sup>1-10</sup>. Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."<sup>1</sup>

### Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

## ANTIBIOTIC-INDUCED DIARRHOEA\*

There is good evidence in continental literature, for which further confirmation is being sought in this country, that this troublesome complication of broad-spectrum antibiotic treatment can be relieved or prevented by administering living antibiotic-resistant *Lactobacillus acidophilus* in the form of ENPAC.

The lactobacilli can be shown to establish themselves and multiply in the bowel, and their presence is inimical to that of pathogens, including, according to some reports, *Salmonella* species, and to *Candida* and staphylococci.

"Patients in hospital who have had an operation, and a course of 'broad-spectrum' antibiotics, sometimes develop diarrhoea which may be severe and even fatal."—*Lancet* Annotations, 25th February, 1961.

# IN ANXIETY NEUROSES AND DEPRESSED STATES

# DRAZINE

Drazine (phenoxypropazine) has been found effective in all recognised forms of mental depression. Again and again it has helped patients with widely differing symptoms who have had no relief from earlier forms of treatment, including other MAO inhibitors and even ECT. Drazine is indicated in both reactive and endogenous depressions, either moderate or severe.

It has been equally successful in anxiety states and neurasthenia in which 'a return of energy, activity and drive'\* has been noted. Drazine produces a remarkably high degree of mental stability as well as elevation of mood.

Basic N.H.S. cost: 100 5 mg. tablets 11/7d. (dispensing). Subject to P.T.

# ABSTRACTS of WORLD MEDICINE

## *The selective abstracting journal*

Of the many thousands of articles appearing in the medical journals of the world, only a few make any really new and significant contribution to the sum of medical knowledge and experience.

These, and these alone, are the papers selected for summarization—**concisely, accurately, readably**—in Abstracts of World Medicine.

This selection of material makes it possible for the whole field of clinical medicine and many allied subjects to be covered in each monthly issue.

### The abstracts are grouped in sections which include :

Allergy, Anaesthetics, Cardiovascular Diseases, Chemotherapy, Clinical Haematology, Dermatology, Endocrinology, Forensic Medicine, Gastroenterology, Industrial Medicine, Infectious Diseases, Medical Genetics, Microbiology and Parasitology, Neurology and Neurosurgery, Nutrition and Metabolism, Paediatrics, Pathology, Pharmacology and Therapeutics, Physical Medicine, Psychiatry, Public Health, Radiology, Respiratory Diseases, Rheumatic Diseases, Tropical Medicine, Tuberculosis, Urogenital Diseases, Venereal Diseases.

*or from any leading bookseller or subscription agent*

\* The subscription rate will be increased in 1963. Subscriptions received (or postmarked) before October 31, 1962, starting with one or more of the issues published this year, will be entered for a full 12 months at the current rate.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent  $\star$  testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

$\star$  SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

**SERVICES**

# You can earn £2000 a year on entry in the Royal Air Force

**New Conditions for Registered Practitioners**

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years' civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

**'Pre-Registration Year' Scheme**

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn,

with full pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

**'Medical Cadetship' Scheme**

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned now in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

*For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893M), 1 Tavistock Square, London, W.C.1.*

## ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS NORTHAMPTON

President: The Earl Spencer

Medical Superintendent:

D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc.

### WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

### MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

### BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres in Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.
