

# Serenity at the menopause

Mixogen restores a real sense
of mental and physical well-being.
This proven hormone combination quickly
and safely relieves hot flushes and other
symptoms without risk of withdrawal bleeding.
Depression and emotional tension disappear
without recourse to sedatives.

DOSAGE

1 to 2 tablets daily, omitting treatment every fourth week.
Each Mixogen tablet contains:
Ethinyloestradiol B.P. 0.0044 mg.
Methyltestosterone B.P. 3.6 mg.
Tubes of 25. Bottles of 100.

'Palaprin' is a unique new chemical—aloxiprin—which presents an entirely new approach to salicylate therapy because it is hardly affected by the acid gastric juice—but releases its analgesic and anti-inflammatory properties in the alkaline intestinal medium. This by-pass action of 'Palaprin' dramatically reduces the gastric irritation which so often precludes the prolonged use of aspirin even in the buffered or 'soluble' forms. 'Palaprin', with its unique by-pass action, gives you. unprecedented freedom of dosage.

FULL SALICYLATE ACTION FOR RHEUMATIC CONDITIONS

# PALAPRI

brand of aloxiprin

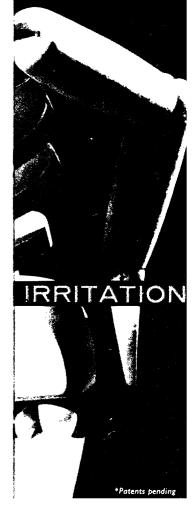

#### INDICATIONS:

Rheumatic conditions, chronic arthritis, myalgias and all conditions where an effective analgesic and anti-inflammatory agent is required.

# Bacteriological evidence

'Fucidin...a highly active antistaphylococcal antibiotic.' 
In vitro investigation<sup>1-7</sup> of the activity of FUCIDIN, the new oral antibiotic, has shown it to possess potent bactericidal properties for staphylococci, both antibiotic sensitive and resistant, and certain Gram-negative micrococci.

**N.B.** It has been noted repeatedly that *in vivo* results obtained with FUCIDIN are significantly superior to those expected on the basis of *in vitro* studies.<sup>1-3, 5-8</sup>

# Pharmacological evidence

## oral absorption-excellent diffusion

FUCIDIN is rapidly absorbed when administered by the oral route,<sup>3,4</sup> and diffuses efficiently throughout the majority of body tissues and fluids,<sup>4</sup> therapeutically effective levels being achieved within half an hour of ingestion of the normal dose (500 mg.—2 capsules).<sup>3,4</sup>

#### low toxicity— no significant side effects

No serious untoward reactions have been reported following extensive clinical use of FUCIDIN. Occasional patients have experienced gastric discomfort, but this has in most cases been overcome by ensuring that doses are taken during meals or by prescribing a suitable antacid to be taken with each dose of FUCIDIN.<sup>2-4, 8-10, 17</sup>

#### no danger of monilial superinfection

Monilial superinfection, a phenomenon often occurring following the use of many oral antibiotics, is avoided when FUCIDIN is used, due to its minimal effect on Gram-negative coliform organisms.

'...the activity against gram-negative bacilli...is extremely low.'3

# Clinical evidence

FUCIDIN has proved exceptionally effective in the treatment of the following conditions in which *Staphylococcus aureus* was the predominant pathogen:

# medical

## 1 Thoracic and upper respiratory tract infections

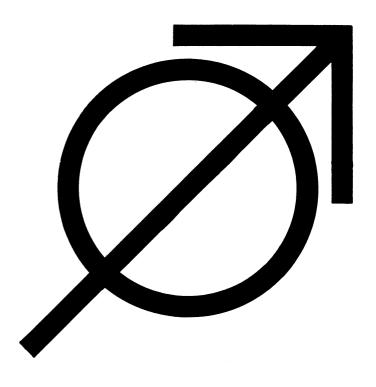

bronchitis and bronchitic exacerbations staphylococcal pneumonia staphylococcal empyema bronchiectasis (secondarily infected) mucoviscoidosis (secondarily infected)

#### 2 Cardio-vascular and haemic infections

acute staphylococcal septicaemia sub-acute bacterial endocarditis pyaemic thrombo-phlebitis post-operative infection of the mediastinum and chest wall

## dermatological

boils
carbuncles
abscesses
sycosis vulgaris
impetigo contagiosa
infected atopic and allergic skin lesions

## surgical

#### 1 General surgical infections

secondary infections of:
traumatic lesions
post-operative wound infections
skin-grafts (including pedicle grafts)
decubitus ulcers
abscesses in scar tissue
infected sinuses and fistulae

#### 2 Orthopaedic infections

acute osteomyelitis chronic osteomyelitis periostitis post-operative infection (including patients in whom a metallic foreign-body e.g., a pin and plate on a femur remained *in situ*.)

#### 3 Gastro-enterological infections

staphylococcal enterocolitis staphylococcal peritonitis staphylococcal appendicitis sub-phrenic abscess

# 4 Genito-urinary infections

peri-nephric abscess prostatic abscess

# 5 Obstretrical and gynaecological infections

breast abscess pelvic peritonitis, salpingitis and endometritis infected perineal lesions

## 6 Oto-rhino-laryngological infections

acute sinusitis otitis media otitis externa (secondarily infected)

## 7 Ophthalmological infections

infections of the lid margins

# The ubiquitous staphylococcus—an insidious threat

# Clinical evidence establishes a defence

# FUCIDIN-oral antistaphylococcal antibiotic

# primary choice against a most lethal secondary invader

FUCIDIN has been shown to be of restricted value in the following indications:

infected burns (extensive — treated by 'exposure' 17 method) chronic empyema

## prophylactic use

FUCIDIN has been used with success as an 'umbrella, to protect patients post-operatively where the risk of secondary infection by staphylococci must be obviated before surgical intervention is undertaken.

#### \* scope for further controlled investigation

FUCIDIN therapy has not been reported in sufficient volume in the following clinical fields for adequate assessment of its value, but results achieved so far warrant extension of adequately controlled investigations:

ophthalmology neurology paediatric and neo-natal infections genito-urological infections

# Medical Information Service

The Medical Department has available a considerable volume of information (published and unpublished) concerning the use of FUCIDIN in special indications. The services of this department are at your disposal at all times, and welcomes **all** information concerning clinical experience with this antibiotic.

#### Dosage and route of administration

In adults, the suggested standard oral dose is 500 mg. of FUCIDIN (two capsules) three times daily given in conjunction with a meal, preferably before it.

severe, acute and chronic infections: a policy of combined therapy is advocated employing FUCIDIN and one of the antibiotics with which a synergism exists e.g. novobiocin or a penicillin.

## Presentation

FUCIDIN Capsules—250 mg, of the sodium salt of fusidic acid packed in bottles of 36 and 250 capsules.

**METHYLDOPA** 

# a new and completely different antihypertensive agent with significant advantages

ALDOMET is indicated in all degrees of hypertension and has significant advantages both for the physician and the patient.

ALDOMET reduces both standing and lying blood pressure.

Diurnal blood pressure variations rarely occur. By adjustment of dosage, morning hypotension can be prevented without sacrificing control of afternoon blood pressure. Exertional hypotension rarely occurs.

When an effective dosage is attained, ALDOMET produces a smooth, maximal effect in most patients in 12 to 24 hours.

Dosage is simple, flexible and easily established.

The duration of action is short and hypertensive rebound does not occur on stopping treatment.

There is a general lack of severe side effects.

ALDOMET is a first choice for the treatment of all cases of essential hypertension.

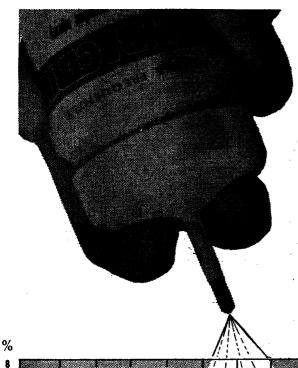

# ALDOMET is an original discovery of the Merck Sharp & Dohme Research Laboratories and is made in England by MERCK SHARP & DOHME LIMITED, HODDESDON, HERTS

ALDOMET is available as yellow, film-coated tablets containing 250 mg. methyldopa. Detailed information on dosage, administration, indications, precautions and bibliography is available on request.

# **POLYBACTRIN**

and POST-OPERATIVE SEPSIS

A survey of over 6,000 major surgical cases included in a 4 year clinical study

"Staphylococcal infection of surgical wounds was studied in one hospital for four years. The yearly infection-rate fell progressively from 6.7 % in 1957 to 1.8% in 1960. Reasons are given for the belief that the improvement was due to the increasing use in the operating-theatres of an antibiotic mixture of neomycin, bacitracin, and polymyxin B ('Polybactrin') which was sprayed periodically into the wound during the course of the operation.

The incidence of infection among wounds which were sprayed in this way (2.0%) was less than half that of wounds not so treated (4.3%) and during the last year of the survey the infection-rate among over 1,000 sprayed wounds was as low as 1.2%".

# AN IDEAL ACHIEVED . . .

# a complete post-operative dressing

Elastoplast Airstrip Ward Dressings revolutionise the post-operative care of surgical incisions. They minimise the hazards, discomfort and inconvenience of bulky, conventional dressings. They reduce the risk of infection and provide ideal conditions for natural healing. They simplify nursing and offer patients a new standard of comfort.

- ready sterilised—seal out infection
- waterproof—but non-occlusive
- compliant, comfortable and unobtrusive
- non-adherent and painlessly removed
- need no making up
- save time, labour, space and cost

ergotamine alone is not enough

To combat an incipient attack of migraine, oral ergotamine alone is inadequate. It needs the potentiating effect of caffeine. Above all, it needs a rapidly acting anti-emetic to counter its main defect as well as the vomiting resulting from migraine itself.

'Migril' contains every one of the necessary ingredients—ergotamine tartrate, caffeine, and the proven anti-emetic cyclizine hydrochloride. 'Migril', the ever-present companion of thousands of migraine sufferers, is their reliable insurance against an attack.

is the ideal daytime sedative It relaxes mind and muscle

Bottles of 20 and 250 tablets (400 mg. meprobamate).

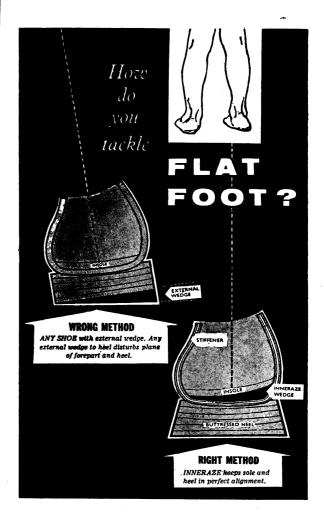

# ANXIETY SYMPTOMS AND MARRIAGE

All too frequently the underlying cause of numerous anxiety symptoms in young married patients is the fear of an unwanted pregnancy brought about by the use of unreliable contraceptive methods. Three million people, for example, still practice coitus interruptus.

Fortunately, today, married people are less inhibited in their attitudes towards the subject of family planning and more and more they turn to you, their family doctor, for advice.

Specially published to assist you with enquiries of this sort is a number of factual leaflets and booklets, among them a new edition of Modern Family Planning suitable for patients when the need arises. Others in the series (for purely professional reading) are Fertility Control in General Practice and The Condom as a Contraceptive (both written by Christopher Tietze, M.D.); A Married Woman's Views on Contraception; Modern Contraceptive Technique; Diaphragm or Protective? and The Case Against Coitus Interruptus.

If you would like copies of any of these publications, please write stating titles and quantities required to Medical Division, (Dept. 12c), London Rubber Industries Ltd., Hall Lane, London, E.4.

# ...do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

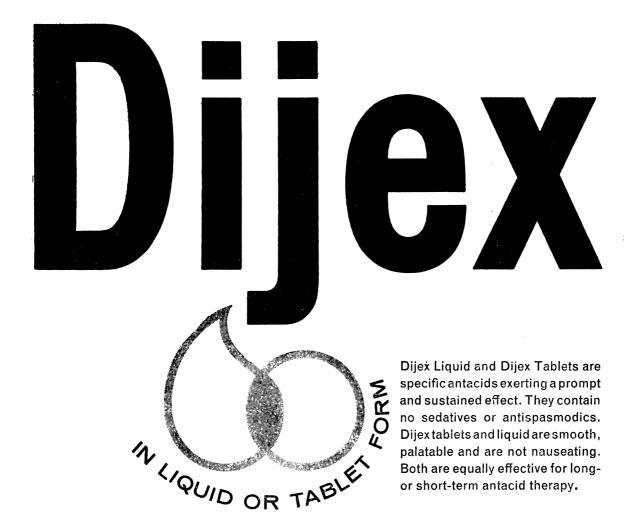

Information from Mr. W. J. Peake, James Southall & Co. Ltd., Crome Road, Norwich, NOR 60A

Whenever an increased flow of blood to the tissues is desirable you can confidently prescribe Vasculit. In a trial<sup>1</sup> in which radioactive isotopes were used, Vasculit produced an average increase in blood flow to the skin of 118.8% and an average increase in muscle circulation of 96.6%. Its usefulness extends over a wide range of conditions, from chilblains to occlusive vascular disease. A recent clinical trial<sup>2</sup> involving 25 cases of intermittent claudication recorded symptomatic improvement in 18, that is, 73%, and concluded "Vasculit represents a useful addition to the range of effective vasodilator drugs." Dösage: 1 to 2 tablets 4 to 5 times a day.

Firestone Town & Country

with RUBBER-XIOI

\*The new revolutionary silent gripping rubber—on a safety carcass.

Synadrin is a specific coronary vasodilator, and is cnemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments11-17 and it has been tested in over 1,000 patients1-10. Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."1

# Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more

than 1,000 patients over the last two years.

# **ADVERTISEMENTS**

PHARMACEUTICAL PRODUCTS

Readers are reminded that prescribers' literature and clinical information are always available from advertisers on request.

# makes TB dosage more flexible

Whichever school of PAS-isoniazid therapy you favour — b.i.d. or t.i.d. — PYCASIX, the new 6-cachet daily form of Pycamisan, suits either and gives the full daily requirements of both drugs in the minimum number of cachets. Each daily dose is presented in a single packet, an incentive for the patient to take his full dose regularly.

Each daily dose of 6 cachets provides 12 G. sodium aminosalicylate B.P. and 300 mg. isoniazid B.P. Tins of 180 cachets (1 month) and 360 cachets (2 months).

# PYCASIX 6-CACHET DAILY PAS-INH THERAPY

# APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent \* testimonials with short statement of experience and appointments

Acid.
Applications should be sent at once if no closing date is given.
House Officers should submit a separate application for each post for which they apply.
Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

\* SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

### **SERVICES**

# You can earn £2000 a year on entry in the Royal Air Force

### **New Conditions for Registered Practitioners**

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years' civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

### 'Pre-Registration Year' Scheme

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn, with full pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

### 'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned now in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893N), 1 Tavistock Square, London, W.C.1.

May, M.A., M.D., F.R.C.P., Dean, The London Hospital Medical College, Turner Street, London E.1. (7516)

### THE JAMES SMELLIE BURSARIES

A Charitable Trust has been founded by Mrs. H. K. Smellie in memory of her husband, the late Professor J. M. Smellie, Professor of Paediatrics and Child Health in the University of Birmingham from 1946 to 1958. Throughout his life Professor Smellie taught and practised the attitude of human approach to clinical paediatrics, and the purpose of the Trust is to encourage this attitude in doctors in training by giving them the opportunity of increased experience in the art of personal doctoring and a more intimate acquaintance with the patient's environment.

Three Bursaries will be awarded annually. Details of these bursaries are as follows:

- 1. Two Bursaries to the value of 75 guineas each will be awarded to Senior Registrars or Registrars in Paediatrics. The holder will be required to work for one month in one or more of the following
  - (a) In the practice of an approved practitioner.
    (b) In a Health Centre working in close collaboration with a local authority.
    (c) In the Almoner's Department of an approved hospital.

  - (d) In any other way approved by the Advisory Committee for the Trust for the study of human problems in relation to Paediatries and Child Health.

The work of a holder of a Bursary should

The work of a holder of a Bursary should ordinarily be undertaken in a centre other than the one in which such holder is training. Each holder of a Bursary will be expected to submit a short account of his or her experience.

2. One Bursary will be awarded annually to the value of 50 guineas to an experienced registered medical practitioner who shall practise at the Birmingham Children's Hospital for two weeks in order to enable him to give special emphasis to the teaching of the human and social aspects of child health. This Bursary will be awarded by selection and invitation of the Advisory Committee to the Trust.

Applications for the award of the James Smellie Bursaries should be sent before November 30, 1962, to Professor D. V. Hubble, Department of Paediatries and Child Health, The Children's Hospital, Ladywood Road, Birmingham 16. Applications should be supported by two referees and should include a scheme of studies for approval by the Advisory Committee. (7507)

## ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS NORTHAMPTON

NORTHAMPTON

President: The Earl Spencer
Medical Superintendent:
D. J. O'Connell, M.D., D.P.M.
This private hospital receives patients, both male
and female, suffering from nervous and mental
disorders, including alcoholism and senile illnesses.
The fees range from fourteen guineas per week.
Private rooms with special nurses can be provided
either in the hospital or in one of the villas in the
grounds. The hospital is situated in 130 acres of
pleasant grounds, which provide all recreational
facilities. These include a nine-hole golf course,
sports ground, tennis courts, etc.

WANTAGE HOUSE

### WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

## MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

### **BRYN-Y-NEUADD HALL**

The seaside home of the hospital is beautifully situated in a park of 330 acres in Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seasoper. on the seashore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by
