BROXIL (potassium phenethicillin) is a product of British research at BEECHAM RESEARCH LABORATORIES LIMITED Brentford, England. *Telephone:* ISLeworth 4111

Rinurel relieves sinus headache and the symptoms of the common cold, thus enabling the patient to continue normal activity with a minimum of discomfort to himself and others. Rinurel provides analgesic, antipyretic, antihistaminic and decongestant effects and can be expected to control symptoms whether they arise from infection, allergy, or both.

Rinurel gives prompt, lasting relief from pain and discomfort without rebound congestion, gastric disturbance or constipation.

Dosage: Two tablets initially followed by one every four hours. Prophylactically one tablet every four hours.

Formula: Paracetamol 150 mg. phenacetin 150 mg. phenylpropanolamine hydrochloride 25 mg. phenyltoloxamine dihydrogen citrate 22 mg.

ORAL PENICILLIN ACTIVE AGAINST RESISTANT STAPHYLOCOCCI

ORBENIN is indicated for immediate use in known or suspected resistant staphylococcal infections, and in mixed Gram-positive infections (e.g. infected burns) where resistant staphylococci may be present.

- Orbenin is stable to staphylococcal penicillinase and highly effective against 'resistant' staphylococci. Its activity is four times that of methicillin.
- Orbenin is also highly effective against other Gram-positive organisms, including streptococci, pneumococci and penicillin-sensitive staphylococci.
- Orbenin is bactericidal: it is acid-stable and well absorbed by either the oral or intramuscular routes.

Dosage by mouth is 500 mg. 6 hourly. Dosage by intramuscular injection is 250 mg. four to six hourly.

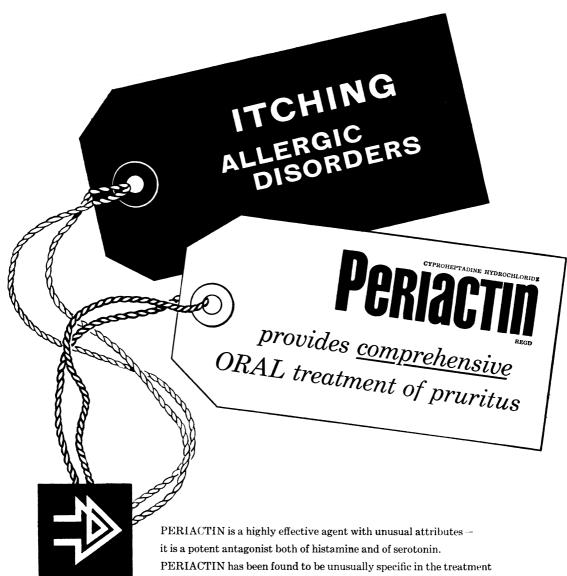

ORBENIN (3-0. chlorophenyl-5-methyl-4-isoxazolylpenicillin sodium salt monohydrate)

For the man whose job causes worry—and gastric distress

People with worrying and exacting jobs often suffer from gastric disorders. 'Stelabid' is specific for such disorders. 'Tyrimide', the powerful and long-acting anticholinergic component in 'Stelabid' relieves pain in gastro-intestinal disorders; it inhibits hypermotility and spasm and reduces excessive gastric secretion. The 'Stelazine' constituent in 'Stelabid' prevents nausea and vomiting and allays the mental stress and strain that can provoke and aggravate gastric disturbances. Exceptionally long-acting, 'Stelabid' ensures night and day relief of pain on a convenient b.d. dosage regimen.

STELABID—relieves physical pain and mental strain in peptic ulcer and other gastro-intestinal disorders

Each 'Stelabid' tablet contains 1 mg. 'Stelazine' (brand of trifluoperazine) and 5 mg. 'Tyrimide' (brand of isopropamide). Available in containers of 30 and 250.

Smith Kline & French Laboratories Ltd, Welwyn Garden City, Herts

Sociology in Medicine

M. W. SUSSER and W. WATSON

This book is in two parts. The first contrasts the patterns of health and disease found in peasant societies, particularly in Africa, with those found in industrialized societies. Here the authors discuss demography and epidemiology, the influence of various cultural characteristics on health and medical care, the class structure of industrial society, and the effects of social mobility on the configuration of disease. The second part concentrates on the contemporary family in Britain, and the effects of the internal and external environment on individuals throughout the family development cycle. They pay particular attention to child-rearing and the care of the sick and the aged.

This book should be of value to all those concerned with the practice of medicine as well as to social workers and sociologists.

The Management of Impaired Fertility

MARGARET MOORE WHITE and the late V. B. GREEN-ARMYTAGE

The authors have devoted more than twenty-five years to the study of subfertility and in this book they have attempted to present as simply as possible the causes, investigation and treatment of subfertility based mainly on their own personal experience, but partly on the work of others with a similar interest.

The text is divided into five parts: Part I. The Development, Anatomy, and Function of the Reproductive System. Part II. Causes of Sterility or Impaired Fertility. Part III. Investigation of Impaired Fertility. Part IV. Medical and Surgical Treatment of Impaired Fertility. Part V. Male Subfertility.

The authors have endeavoured to make the book of practical assistance to those who are interested or find themselves compelled to know something about the treatment of subfertility, and they have concentrated on practical rather than theoretical aspects.

Diseases of the Nervous System

LORD BRAIN

This book has been extensively revised for this new edition, and the publication in 1960 of Lord Brain's shorter book Clinical Neurology has enabled him to make Diseases of the Nervous System somewhat longer than before, and therefore more comprehensive. This edition reflects more than any previous one the growing overlap between neurology and general medicine. This is shown in the sections dealing with acute porphyria, hepatic failure, biochemical disorders associated with mental retardation, the neuromyopathies associated with carcinoma and other neoplasms, polymyositis and the myopathies which occur with the collagen disorders, muscular disorders due to thyroid disease, the effects of disturbed potassium metabolism, and the numerous metabolic causes of coma. Much of this is new material. Considerable additions have been made to the chapters on Extrapyramidal Syndromes, Disorders of Muscle, and Psychological Aspects of Neurology. There are also a number of new illustrations.

The text has been reset and the new typeface and larger format should make this new edition both easier to read and more convenient to handle than its predecessors.

Aspects of Psychiatric Research

Edited by DEREK RICHTER, J. M. TANNER,

LORD TAYLOR and O. L. ZANGWILL

This book on research into the causes and treatment of mental illness consists of twenty chapters, each of which reviews the progress made during the last decade in one particular subject. Each chapter is written by a practical research worker in the field, though in a non-specialized way so that it is understandable to those who work in other subjects. The field covered is very wide, ranging from Professor H. Harris on 'Biochemical "Errors" and Mental Defect', Professor Paul Polani on 'Chromosomal Abnormalities as a Cause of Defective Development', Dr. Marthe Vogt on 'The Function of Some Pharmacologically-Active Brain Constituents' and Dr. R. A. Hinde on 'The Relevance of Animal Studies to Human Neurotic Disorders' to Dr. T. C. N. Gibbens on 'Psychiatric Aspects of Crime', Dr. John Harrington on 'Research into Neurosis in Industry', Dr. J. Tizard on 'Treatment of the Mentally Subnormal', Sir Geoffrey Vickers on 'Mental Disorder in British Culture' and Lord Taylor on 'The Public, Parliament and Mental Health'.

The book has been sponsored by the Mental Health Research Fund to mark the tenth anniversary of the beginning of its grant-giving activity. It will appeal to medical students in their last two years (and particularly to those contemplating psychiatry as a career), to general physicians and surgeons interested in the progress of psychiatry, to psychiatrists, and to many workers in the basic sciences, including physiology, psychology and biochemistry.

Monozygotic Twins BROUGHT UP APART AND BROUGHT UP TOGETHER

IAMES SHIELDS

Largely as the result of an appeal in a scientific television programme, there came to light forty-four pairs of monozygotic, or genetically identical, twins who had as children been brought up in different homes. The case histories of these twins, the largest series of such pairs to have been studied up to now, form the basis of this report. The possible effects of the different experiences of these twins are seen in the light of their later histories and their performance on tests of intelligence and personality. Nevertheless, some pairs showed remarkable similarity even when the twins had never met, or had lived in very different circumstances. A crucial comparison is between these 'separated 'identical twins and the same number of identical twins obtained from the same source but brought up together as children.

This book is about normal human personality, and its aim is to explore the effects of social environment and upbringing as much as to elucidate the nature of genetical factors. Its functions are thus complementary to those of the average textbook of genetics. It deals with a topic of obvious interest and importance, but one where many geneticists fear to tread and where some would say they had no business. It also shows that there is indeed a genetical background to the varying manifestations of personality.

QUESTIONS, PLEASE?

Use of tampons to lessen menstrual odour

One young patient has a very poor attitude toward menstruation because she is embarrassed by the odour associated with it. What measures, besides scrupulous cleanliness, might she take to end the problem?

A Recommend that your patient use Tampax. The offensive menstrual odour that so many women (and their associates) find intolerable is produced only when menstrual flow is acted on by bacteria in the presence of air. Menstrual blood acquires its odour therefore only after leaving the vagina. Thus, the Tampax user cannot offend, while the wearer of a malodorous perineal pad is bound to be subject to this embarrassment.

Tampax also makes general cleanliness easier for the patient. With Tampax to protect bath water from menstrual contamination, this healthful practice is aesthetically acceptable. The same is true in the shower and the pool or at the beach, because women accustomed to the use of vaginal tampons know that bath water does not enter the vagina.³

The male physician wondering about the hygienic value of Tampax might ask patients who have been using it if they would go back to the use of the perineal pad. The physician would undoubtedly find that women "would be horrified at the idea".4

Tampax is available in Regular and Super absorbencies.

SAFE, SOUND SLEEP

TRICLORYL

tablets

the palatable improvement on chloral hydrate

Tricloryl provides all the desirable sleep promoting effects of chloral hydrate. Like chloral hydrate Tricloryl acts by being converted in the body into trichlorethanol. It differs from chloral hydrate however in being much more palatable, unlikely to cause gastric irritation and in being able to be presented as tablets. With the same wide margin of safety as chloral hydrate Tricloryl is suitable for patients of all ages. It produces the same quiet, sound 'physiological' sleep from which the patient can be easily and completely aroused if necessary. On awakening the patient is refreshed and free from any 'hangover' effect. Habituation is rare.

With the introduction of Tricloryl there is at last a really satisfactory way of providing the 'chloral hydrate' effect which is so desirable in many cases of sleeplessness.

TRICLORYL

Bottles of 20, 100 and 500 tablets each containing 0.5 gram monosodium triclofos.

Dosage: for sleep, usually 2 tablets for sedation, ½ to 1 tablets as needed.

Tricloryl is a Glaxo trade mark

SOUTH PAWS AT NORTH POLE

ACCEPTABILITY OF COD LIVER OIL

It is not often that the nutritionally erudite disport themselves in the correspondence columns of *The Times**, but they did so recently. One Professor of Nutrition, one Professor of Physiology, one Reader in Nutrition, and a sprinkling of biochemists and medical men—all these contributed in the space of a couple of weeks.

It all began with a report of a recommendation (inadvertent, as it transpired) of polar-bear liver as an article of diet. A correspondent then pointed out that polar-bear liver is toxic because of its extremely high content of vitamin A, and is known to be toxic by the Eskimos. He said he hoped that any non-Eskimo readers of *The Times* would bear this in mind.

Another correspondent said that certain animals avoided the liver instinctively; and a third, having said polar bears were usually left-handed, then suggested that an instinctive avoidance of vitamin A excess explained the resistance of children to cod liver oil.

At this point the Professor of Physiology (dubious about these instincts) said that his three children had *liked* cod liver oil, and any food new to them had had to be flavoured with it. Was this, he asked due to precognition of his books or to participation mystique, or was it merely a conditioned reflex? And he quoted some work at Johns Hopkins University which had demonstrated that, when given a free choice, children would choose cod liver oil for themselves.

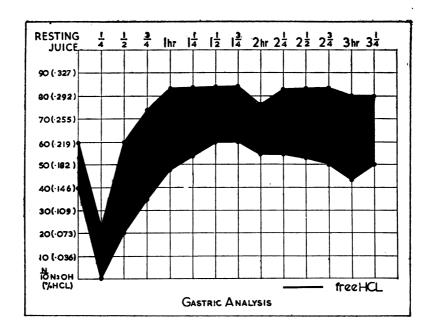

Finally, another correspondent said that most children not subject to parental bias (derived from the cod liver oil of yester-year) would take today's cod liver oil readily enough; and he added that a child would have to drink bottles of it before *it* would do any hyper-vitaminotic harm.

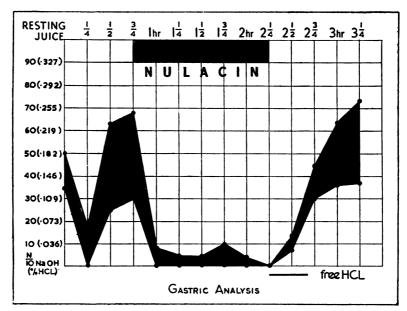

Well, we ourselves are not authorities on polar bear's liver, but we do know something about cod liver oil, including the fact that new refining techniques make it a great deal more palatable than it used to be; and whether or not it's due to participation mystique, people do get through a lot of our cod liver oil—that's why we keep performing 100 million hepatectomies on Gadus Morrhuae each year.

*THE TIMES, 12-24 March, 1962

ISSUED BY THE MAKERS OF SEVEN Seas

AVAILABLE IN BOTTLES AND CAPSULES

in peptic ulcer, Nulacin -and only Nulacin provides intragastric milk-alkali drip therapy without a tube

Nulacin treats peptic ulcer—continuously

DOSE

A Nulacin tablet should be placed in the mouth half an hour after food and allowed to dissolve. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

PRESENTATION AND PRICE

Nulacin is prepared from whole milk, combined with dextrins and maltose, together with magnesium trisilicate, magnesium oxide, calcium carbonate and magnesium carbonate. It is not expensive. The cost to the NHS is 2/- for 25 tablets. A special dispensing pack of 4 tubes of 25 tablets is available.

New Books and Editions

Ophthalmology in the Tropics

By E. J. Somerset, M.B., D.O.M.S., M.S.

A practical new book which gives in one volume a short description of the tropical diseases of importance to ophthalmic surgeons working in or about to go to tropical countries, and to medical men interested in tropical medicine and its ophthalmic aspects.

184 pages. 60 illus. 40s., postage 2s. 6d.

Thoracic Surgical Management

By J. R. Belcher, M.S., F.R.C.S., I. W. B. Grant, M.B.(Edin.), F.R.C.P. (Edin.), and M. F. Sturridge, M.B., B.S., F.R.C.S.

This new third edition has been thoroughly revised and new chapters on the subjects which have become important within the past 6 years have been added. These include respiratory failure, the cardio-pulmonary by-pass, and cardiac arrest.

3rd Ed. 220 pages. 68 illus. 30s., postage 2s.

Endogenous Inflammations of the Uveal Tract

By Alan C. Wood, M.D.

Highly significant advances which have been made within the past 5 years in the knowledge of the pathogenesis of both forms of uveitis have been summarized and presented in this new book by Dr. Woods—the world's foremost authority on this aspect of eye disease.

531 pages. 144 figs. 43 colour plates. 152s., postage 3s.

Gynecologic Cancer

By James A. Corscaden, PH.B., M.D.

The third edition of this book discusses proven methods of diagnosis and treatment of gynaecologic cancer and explains in detail advances of

3rd Ed. 585 pages. 117 illus. 96s., postage 3s.

Atlas of Anatomy

By J. C. Boileau Grant, M.C., M.B., CH.B., F.R.C.S.(Edin.).

This is one of the most highly regarded anatomy atlases in the world—this new fifth edition is a thorough revision with many new illustrations using a new photographic method of reproduction, resulting in the highest possible quality of illustration.

5th Ed. 585 pages. 665 plates—462 in colour, consisting of 1,071 separate figs., 706 in colour. 160s., postage 3s.

The Actinomycetes

By Selman A. Waksman and Hubert A. Lechevalier.

Nature, Occurrence and Activities.

350 pages, 100s.

Volume II. Classification, Identification and Description of Genera.
374 pages. 66 illus. 120s.

Volume III. Antibiotics of Actinomycetes.

438 pages. 7 figs. 144s. (Postage on each title 3s.)

Clinical Endocrinology

By T. S. Danowski, B.A., M.D.

These four volumes discuss in detail the development, diagnosis, pathology and treatment of the endocrine diseases. Each chapter begins with a digest that summarizes the important features, and ends with a thorough bibliography, so that the reader will have a history of the early clinical and laboratory work in endocrinology. The books contain many tables and figures which present the findings in convenient form.

Volume I. Pineal, Hypothalamus, Pituitary, and Gonads. 500 pages. 34 illus. 140s.

Volume II. Thyroid. 559 pages. 58 illus. 140s.

Volume III. Calcium, Phosphorus, Parathyroid, and Bone. 504 pages. 74 illus. 140s.

Volume IV. Adrenal Cortex and Medulla.

510 pages. 51 illus. 140s. Postage on each Volume 3s

(The complete 4-volume set is available at £24.)

Aids to Surgery

By Michael Harmer, M.A., M.B., B.CHIR., F.R.S., and C. Maurice Lunn, M.A., M.CHIR., F.R.C.S.

Provides the essentials of surgery in handy, concise form for use as an "aid" to study, and a summary of surgery for those who may have need of a quick reference.

9th Ed. 399 pages. 69 illus. 15s., postage 1s.

Vector Electrocardiography

Herman N. Uhley, M.D.

This volume is designed to introduce the subject of vector electrocardiography on a simple and practical level. After the presentation of general considerations the author proceeds to a discussion of the normal vectorcardiogram and its corresponding vector electrocardiogram.

Tumors of the Breast

Max Cutler, M.D.

The purpose of this book is to make accessible to the reader a critical evaluation of the pertinent factors in the aetiology, pathology, diagnosis, prognosis and treatment of breast tumours. £7 10s. net

Martini's Principles and Practice of Physical Diagnosis

Revised by Yale Kneeland Jr., M.D., and Robert F. Loeb, M.D.

This book presents in simple direct language a masterful coverage of the techniques of direct examination for the physician.

Pitman Medical **Publishing Company Limited** 46 Charlotte Street, London W.1

The problem

of the

dirty mouth

Even in 1962 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

world-wide acceptance

Nearly a century ago Eli Lilly, a pharmacist with depth of vision considerably ahead of his time, felt the need to produce medicines of a known and constant standard.

From the realization of his ideal grew the organization of Lilly, and naturally enough, its reputation. Lilly Products have achieved acceptance the world over. The new Company identification—depicted above—symbolizes this world-wide confidence accorded to Lilly prescription products by physicians throughout the globe.

57 ways baby can enjoy the benefits of mixed feeding

In pre-Heinz days, mixed feeding was a real chore for mothers. The preparing, cooking, straining, sieving and serving of a baby's complicated diet took far too much toll in time and work. Now—with Heinz producing 57 varieties of Baby Foods, mothers can give their babies the benefits of mixed feeding without taxing either

strength or ingenuity! And Heinz take just as much trouble over babies' meals as the mothers would themselves. Only the best raw materials are used. Great care is taken over the preparation and cooking. From first to last, the very highest standards are observed. Proof of Heinz' excellent quality: the way babies take to, and thrive on, Heinz Baby Foods!

Baby Foods

N TONSILLITS LEDERKYN* ACETYL SULPHAHETHOXYPYRIDAZINE * REGD. TRADEMARK PEDIATRIC SUSPENSION

(Penotrane/prednisolone)

for monilial and bacterial infection of the skin.

Monilial Infections

The frequency of monilial infections has increased markedly in recent years. The present widespread use of antibiotics may be partly responsible for this.

In dermatology Monilia is commonly found in association with intertrigo and napkin rash.

Clinical response to Cortitrane is usually rapid. Any concurrent or secondary bacterial infection responds at the same time.

Bacterial Infections

Cortitrane clears superficial bacterial infections both gramnegative and gram-positive. Any concurrent or secondary monilial infection responds at the same time. The sensitivity reactions which sometimes occur with topical antibiotics are very seldom seen with Cortitrane. Resistant bacteria have not been encountered.

Cortitrane contains 0·1% Penotrane (hydragraphen), a penetrating antiseptic, the activity of which is not impaired by the presence of serum or pus, and 0·25% Prednisolone, a well-tried and effective corticosteroid.

BASIC N.H.S. COST 30 1/25th grain tablets 8s. 6d. 30 1/10th grain tablets 10s. 6d.

DOSAGE

Initially two 1/25th gr. tablets daily, one in the morning and one at bed time—then adjust to individual patient's response. The dosage may safely be increased to one 1/10th gr. tablet t.d.s. where necessary.

SUSTA CSUSTAINED ACTION GLYCERYL TRINITRATE GIVES YOUR PATIENTS LASTING CONFIDENCE

Continuous and controlled therapy

One SUSTAC tablet gives continuous and controlled release of glyceryl trinitrate independent of pH for 12 hours after ingestion. Uniform release of the drug is ensured by a superior 'membrane' construction giving your patients protection approximately 20 times longer than with sublingually administered nitroglycerin.

Fewer attacks; increased confidence

SUSTAC can markedly reduce the number of anginal attacks. The freedom from attacks thus secured by SUSTAC eliminates much of the fear associated with the condition and helps the patient to regain confidence and live a more normal life.

Simple regimen

One SUSTAC tablet in the morning and one at bedtime is usually all the dosage necessary. This simple regimen is convenient for the patient and lessens the risk of 'missed doses' as well as avoiding the psychological disadvantages often associated with frequent medication.

service.

THE

ROYAL NAVY offers you MORE

You can serve almost anywhere in almost any field of Naval activity, combining your calling as a doctor with the stimulus of a life as a commissioned officer in the Royal Navy. You could serve in almost any vessel from a frigate to an aircraft carrier, sail with the fleet to the Far East or work with a squadron in the West Indies. You could apply your care to Royal Marines Commandos, among parachutists, frogmen or rock climbers. You could fly with the Fleet Air Arm as a specialist in aviation medicine or investigate the problems of deep diving and advanced submarine development. You could work in a laboratory, hospital or medical school; serve at home or abroad, on shore or afloat; or study any one of a variety of subjects ranging from radio-biology to tropical diseases. And throughout your service as a Naval Medical Officer you would be working with the finest equipment in complete clinical freedom -and perhaps a greater opportunity to exercise your versatility than would ever be possible in civilian life.

YOU CAN ENTER BY ONE OF THREE METHODS All schemes lead to Short Service Commissions of 3-5 years' duration. Holders of such commissions can apply for permanent commissions after one year following appointment as Surgeon Lieutenant.

		PAY ON ENTRY		RMANENT IMISSION GRANTS
1	As a registered Medical Practitioner in rank of SURGEON LIEUTENANT.	£2,002 p.a. married, over 25	On completion of Short Service Com- mission of 3 years: £1,500; 5 years £3,000	£1,500 (nullifies gratuity)

Terra-Cortri

brand of oxytetracycline and hydrocortisone

Spray

... the new non-touch technique for

burns infected dermatoses leg ulcers

Spray treatment applies the full potency of Terra-Cortril directly on to the inflamed area. Its effect is immediate because the action is not retarded by a base.

Infection is prevented, inflammation and pain reduced, scar tissue development decisively checked and the healing process accelerated. Spray treatment prevents softening of surrounding tissue sometimes caused by dressings or ointments. The spray has a soothing effect much welcomed by patients.

Patients and nurses will find it easy and simple to use. Any part of the body can be sprayed in a few seconds.

Dressings may not be required. Spray treatment can be used with modern exposure techniques.

INSTRUCTIONS TO ADVERTISERS

Please write advertisements and name and address clearly in BLOCK CAPITALS and send to the Classified Advertisement Manager, British Medical Journal, B.M.A. House, Tavistock Square, London W.C.I. Telephone: Euston 4499. Telegrams: Britimedads, Westcent, London. To cut down book-keeping entries and to avoid delay, please ENCLOSE PAYMENT with advertisement.

All advertisements, subject to approval, will appear in the forthcoming issue provided they reach this office not later than 1 p.m. on the MONDAY before the date of issue.

Cancellation of advertisements cannot be accepted if received after 2 p.m. on the Monday before the date of issue (issues affected by public holidays exented).

Every effort is made to ensure the accuracy of advertisements appearing in the Journal. No recommendation is implied by acceptance, and the Editor of the British Medical Journal reserves the right to refuse or interrupt the insertion of any advertisement.

REPLIES TO BOX NUMBERS. The names and addresses of advertisers under box numbers are held by us in strict confidence and cannot be disclosed. Each Box No. should be addressed separately. Two or more replies can be enclosed in one envelope, addressed to the Classified Advertisement Department. The replies will be forwarded to the advertisers in plain envelopes.

DOCTORS ABROAD. Copies of vacancies advertised in the "Journal" can be sent by AIR MAIL. The minimum cost is 3s. per week, which covers up to three separate headings; additional headings 1s. each.

NEW ZEALAND ARMY NEW CONDITIONS OF SERVICE FOR DOCTORS

An opportunity now exists for a limited number of doctors to emigrate with their families to New Zealand for service under favourable conditions with the New Zealand Army. Those interested can accept a short service engagement of four years which includes ninety days clinical leave in addition to normal leave. A long service engagement with full benefits of Regular service, including up to nine months clinical leave, can be applied for after the initial four-year engagement. For full details of benefits write to:

Senior Army Liaison Officer, New Zealand Army, The Adelphi, John Adam Street, London W.C.2.

SURGERY OF THE CHEST

Edited by John H. Gibbon Jr., M.D., Gross Professor of Surgery and Head of L. partment, Jefferson Hospital and Medical College, Philadelphia.

Dr. Gibbon, with the aid of 24 authorities, has compiled a remarkable volume which sets out the most recent knowledge on all aspects of thoracic diseases amenable to surgery. Unusual disorders, fine points in diagnosis, refinements in surgical technique, and complications are carefully considered. Operative procedures are illustrated in detail.

900 pages, 600 illustrations.

PERIPHERAL VASCULAR DISEASES New (3rd) Edition

By E. V. Allen, B.S., M.D., F.A.C.P.; Nelson W. Barker, B.A., M.D., F.A.C.P.; and Edgar A. Hines, M.D., F.A.C.P., Professors of Medicine, Mayo Foundation, University of Minnesota.

This new edition reflects the many advances made in the past few years in the diagnosis and management of vascular disorders. Both medical and surgical methods of therapy are presented.

1.044 pages, 367 illustrations.

The set of two volumes.

£7

Published in two volumes for the first time, the Mayo Papers describe important developments made during the past year.

PHARMACOGENETICS: Heredity and the Response to Drugs

By Werner Kalow, M.D., University of Toronto Medical School.

This new monograph deals with the influence of hereditary factors on the organism's reaction to drugs. It demonstrates how drugs can be used to establish the presence or absence of specific genes.

231 pages, illustrated.

Novak's GYNECOLOGIC AND OBSTETRIC PATHOLOGY—New (5th) Edition

By Edmund R. Novak, A.B., M.D., and J. Donald Woodruff, B.S., M.D., Assistant Professors of Gynecology, The Johns Hopkins Medical School.

A thorough revision of an outstanding book. There is a new chapter on Abortion; the chapters on Uterine Sarcoma and on the Vulva have been virtually rewritten; the chapter on cytology has been extensively revised in the light of recent developments; and many new illustrations have been added.

713 pages, 761 illustrations.

££ 128

THE RADIOLOGIC CLINICS OF NORTH AMERICA

Commencing publication in April, 1963, these cloth-bound volumes will be published three times a year. Each issue will deal with current uses of and advances in diagnostic and therapeutic radiology. Available on subscription only.

A prospectus will be supplied on request.

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, the entire Vitamin B Complex should always be administered concurrently.

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

Aluzyme is not advertised to the public and may be prescribed under J.S.C. Classification Category "S."

Have you had your free copy of "The Therapeutic and Nutritional Value of Brewers' Yeast"?
