## 'DRENISON'\*

brand Flurandrenolone in conjunction with occlusive dressings has proved highly successful in the treatment of resistant dermatoses—even in psoriasis. 'Drenison' cream or ointment is applied to the area which is then covered with thin flexible plastic sheeting. This technique facilitates penetration into the skin and hastens recovery. 'Drenison' with Neomycin is also available, for use where infection is present.

Presentation: 'Drenison' and 'Drenison' with Neomycin are available in both a vanishing cream and an ointment base, in tubes of 5 and 15 G.

## THE SIMPLEST TREATMENT FOR AMOEBIASIS

**FURAMIDE**

Simple, practical and economical, Furamide changes the conventional approach to amoebiasis. **These are FURAMIDE'S outstanding advantages.**

**EFFECTIVE** Cure rates of 75% to 80% in the acute stage and 90% to 100% in the chronic condition may be expected.

**CONVENIENT** No injections, no enemas, no special diet. Furamide is very suitable for ambulant patients.

**SIMPLE** Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

**SAFE** Side-effects are unlikely. The toxicity of Furamide is very low.

**ECONOMICAL** Hospitalization is not normally necessary so that treatment with Furamide is cheaper than the older forms of therapy.

Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims. A list of references and detailed literature will gladly be sent on request.

**FURAMIDE** Each tablet contains 0.5 G of Entamide (diloxanide) furoate, a product of Boots research. Packed in bottles of 15 and 250 tablets.

When treatment demands  
bland fluid—

**ROBINSON'S**  
makes it easy

Barley water has long been recognised as the ideal treatment in cases where large amounts of liquid form part of the prescription. With its high solids content, smooth demulcent barley water—hot or cold—is especially suitable in gastro-intestinal complaints where the internal membranes are inflamed and tender.

Robinson's Lemon Barley and Orange Barley provide a convenient form of natural, wholesome barley water freshened with lemon and orange and perfectly balanced for rapid absorption.

Robinson's 'Patent' Barley gives a quickly prepared home-brew of barley water that can be mixed with milk or flavoured with any fruit juice that the patient prefers. A half-pound pack makes 96 glassfuls of fresh barley water.

# SMOKING AND HEALTH

Do you agree with the findings of the Royal College of Physicians' report on smoking in relation to cancer of the lung and other diseases?

If you do, then you must accept the following facts about the nicotine and tars in cigarette smoke :

1. tars are linked with the high incidence of lung cancer
2. nicotine *must* be avoided in thrombo-angiitis obliterans
3. nicotine *can* be damaging in coronary artery disease
4. nicotine *does* affect the heart in many normal people.

Cigarette smoking is not an easy habit to control ; but now there is a way to reduce the nicotine and tars in cigarette smoke, without affecting smoking pleasure. How ? By smoking through an Aquafilter.

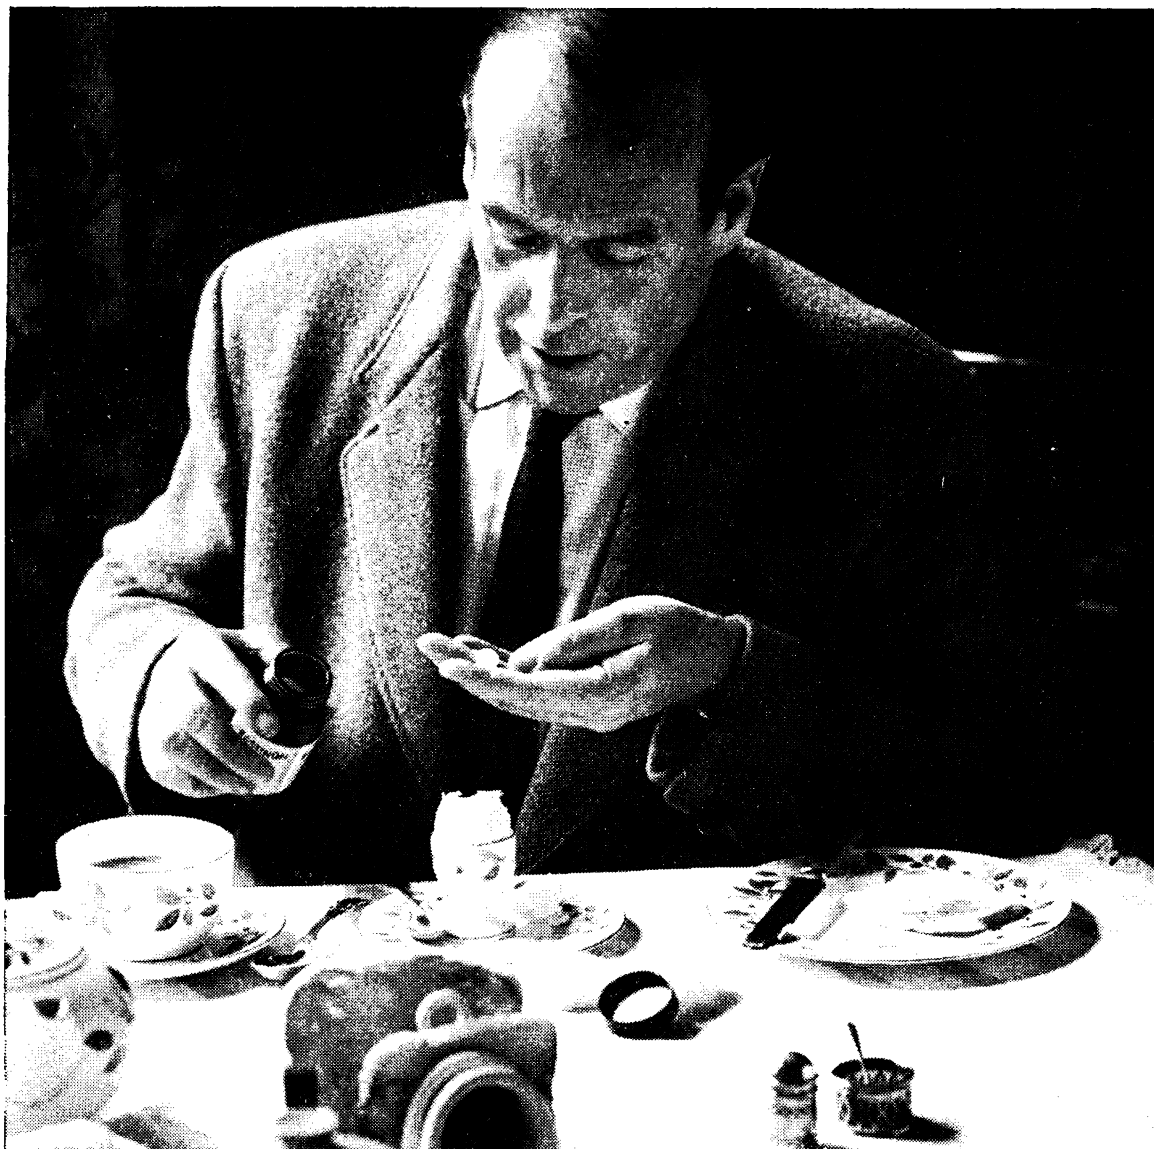

The Aquafilter is a disposable cigarette holder containing a patented filter cartridge of treated fibres which have been *water-activated* (on the principle of the oriental Hookah, which filters smoke through water to remove irritants without affecting tobacco taste).

Independent laboratory tests were conducted on ten of the leading brands of cigarettes, plain and filter-tipped, small, standard and king size (between them accounting for the great majority of all cigarettes smoked in Britain). In these tests, which were made under standardised conditions of smoking as laid down by the Tobacco Manufacturers Standing Committee, the Aquafilter was found to remove an average of 76% of the nicotine and 77% of the tars from cigarette smoke. No significant difference was found in the average elimination percentages between the plain and filter-tipped cigarettes tested.

If you have patients who should give up smoking, but insist that they can't, they should be advised to smoke through an Aquafilter, always.

Details of the actual percentages of nicotine and tars extracted by the Aquafilter from each of the different brands of cigarettes tested are available to doctors on application, together with samples of the Aquafilter. Please write to the address below.

# ORAL PENICILLIN ACTIVE AGAINST RESISTANT STAPHYLOCOCCI

**ORBENIN** is indicated for immediate use in known or suspected resistant staphylococcal infections, and in mixed Gram-positive infections (e.g. infected burns) where resistant staphylococci may be present.

- Orbenin is stable to staphylococcal penicillinase and highly effective against 'resistant' staphylococci. Its activity is four times that of methicillin.
- Orbenin is also highly effective against other Gram-positive organisms, including streptococci, pneumococci and penicillin-sensitive staphylococci.
- Orbenin is bactericidal: it is acid-stable and well absorbed by either the oral or intramuscular routes.

Dosage by mouth is 500 mg. 6 hourly. Dosage by intramuscular injection is 250 mg. four to six hourly.

# **'OTOSPORIN'**

## **clears infected ears**

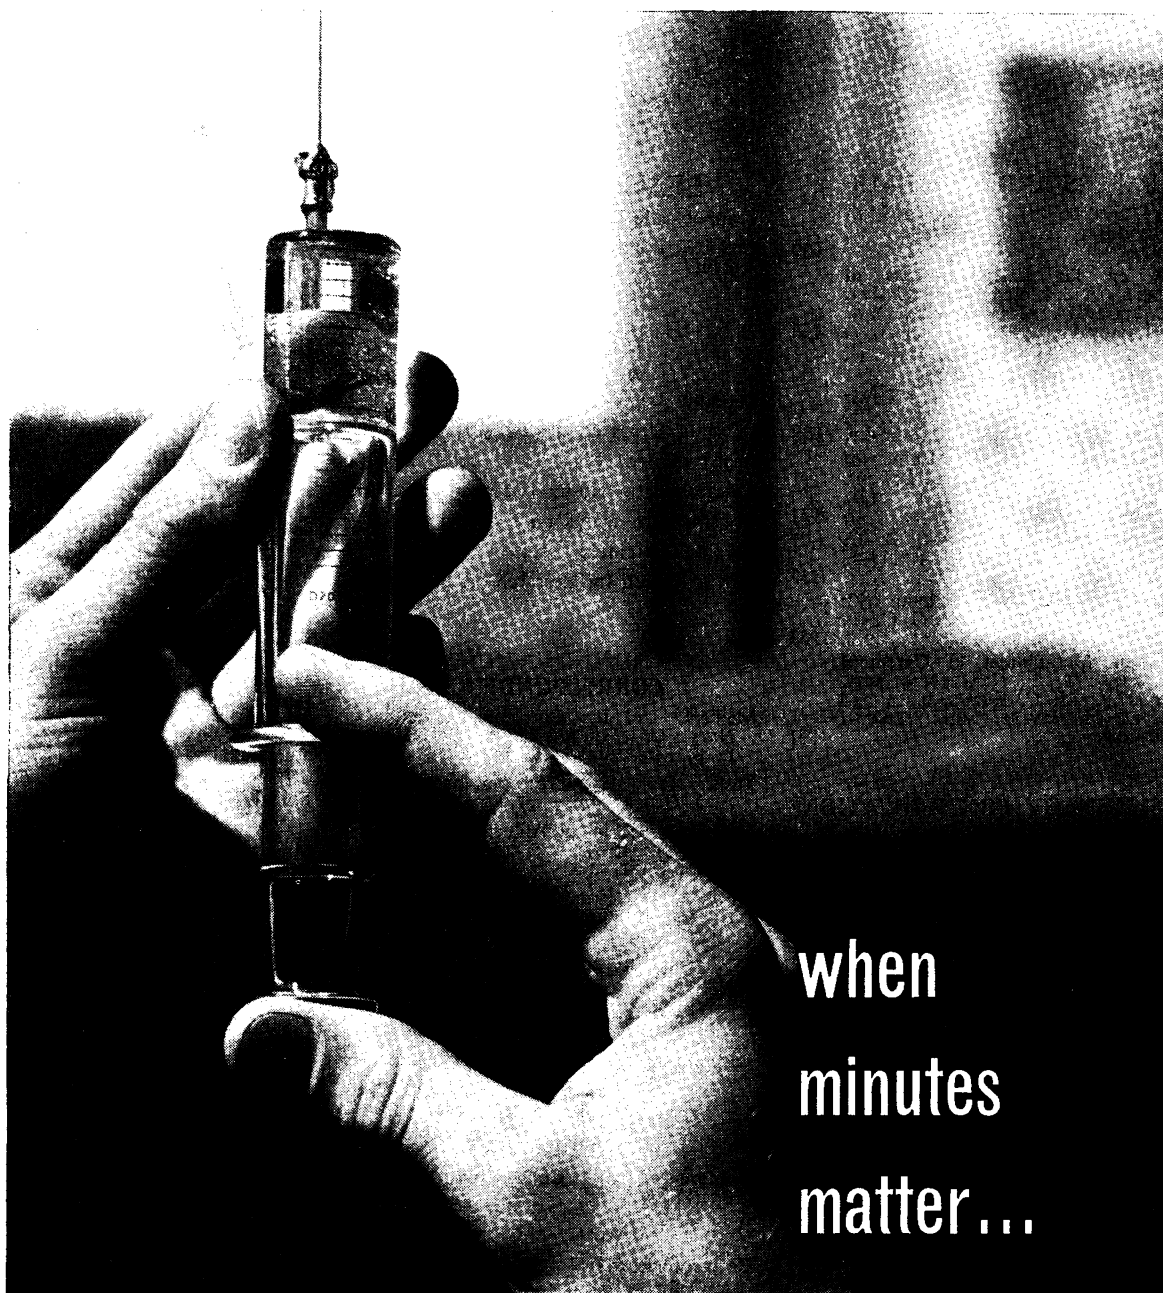

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' brand Drops.

'Otosporin' is an aqueous suspension containing both neomycin and polymyxin B sulphate which are together effective against practically all the bacteria found in ear infections. They are unlikely to induce bacterial resistance or skin sensitisation, and neither of them gives rise to cross-resistance or cross-sensitisation to penicillin and other antibiotics. Their effectiveness is visibly enhanced by the hydrocortisone in 'Otosporin'; this, by reducing inflammation, not only relieves pain, but provides greater access for the antibiotics

## THE COMPLEX MELANCHOLY OF THE VICTORIANS

In contrast to the outward success and prosperity of Victorian poets there is a consistent strand of melancholia which pervades their poetry. This trait is particularly marked in Tennyson. It should be remembered that all Tennyson's brothers were eccentric and that Tennyson himself displayed a morbid fascination with death.

*"She only said, 'My life is dreary,  
He cometh not', she said;  
She said, 'I am weary, weary,  
I would that I were dead!'"*

Mariana, TENNYSON.

The major part of Tennyson's eighty years of public and private life was full of happiness and success. It could not be said that he was afflicted with involutional depression but he was certainly capable of describing this disease in his verse—a disease which we now know commences in middle age in a personality that has previously been rigid, obsessional, asocial, intolerant, reticent and conscientious.

# ***tiglyssin***

*brand tigloidine hydrobromide  
for relief of spasticity and  
spasms associated with  
upper motor neurone disease*

Tigloidine is a minor alkaloid of the atropine series, but is almost totally devoid of anticholinergic activity. It has however been shown (1) to share with atropine an effect on muscle characterised by quick fatigue on rapidly repeated stimulation. For this reason, its possible therapeutic effect on pathologically increased muscle tone was investigated, and useful activity subsequently reported in Parkinsonism (2), Huntington's chorea (3) and spastic paraplegia (4, 5).

In controlled trials Tigloidine has been found to reduce spasms and spasticity to a useful extent in approximately fifty per cent of patients suffering from upper motor neurone disease: an incidence and degree of improvement greater than were produced by a matching placebo. The effect of the drug in any individual patient is unpredictable; patients whose clinical state is similar do not necessarily benefit to the same extent. In patients who do respond, however, the effect of the drug appears to be well maintained—in one trial (4) no loss was seen after periods of administration up to a year.

The effect of Tigloidine is, of course, purely palliative, it has no curative effect on the cause of spasticity, nor can it slow down the advances of progressive CNS disease.

#### DOSE AND ADMINISTRATION

The daily dose for adults is 1-2G, divided into three and taken with meals. A suitable starting dose is 0.75G, and this should be slowly increased until no further improvement occurs or mild atropine-like side-effects appear. Administration for 3-4 weeks is usually needed for the full effect to develop.

# *Durex Gossamer and the post-partum period*

The new, pre-lubricated protective—Durex Gossamer—is advocated by many gynaecologists and obstetricians, as an important adjunct to the treatment of certain abnormal vaginal conditions.

A most important application of the Durex Gossamer is in preventing an exacerbation—*during coitus*—of the inflammation and discomfort which frequently accompanies the post-partum period, vaginitis and leucorrhea. Furthermore, this type of protective is recommended where insufficient vaginal secretion is manifest, as in early marriage, frigidity and menopausal atrophy.

Where there is risk of transferring infection, Durex Gossamer has been shown to reduce the incidence of vaginal infection during the post-partum period.

But the outstanding advantage of Durex Gossamer is the confidence it instils, and the comfort it provides during the post-partum period. The physician and patient know it to be an effective and reliable contraceptive.

Build up a holding in Natbifs (National Banking Insurance and Financial Shares Trust) and secure life cover at the same time. That's the essence of Natbifs Life Assurance Savings Plan. You declare an intention to invest £x a month (minimum £5, maximum £40) in Natbifs Units for ten years. Throughout that time you have (a) built-in life cover equal to the balance of your intended saving (b) half-yearly income distributions reinvested in the purchase of further units (c) the prospect of growth of capital and income. Unit value has more than doubled since 1956 and income has also increased by over 44%.

The scheme is operated through National Banking Insurance and Financial Shares Trust (Trustee: Martins Bank Ltd.) in conjunction with The English Insurance Company Limited (a subsidiary Company of the General Accident Fire and Life Assurance Corporation, Limited).

# Counteracting protein loss in the elderly

In the elderly, the lack of interest in food is both cause and result of failing energy and vitality. ORABOLIN ensures full use of such nitrogen as is available in the food, thus counteracting body protein loss; the renewed vigour and appetite lead to improved independence and gain in weight. ORABOLIN is effective in doses as low as 0.05 mg. per kilo body weight, well tolerated and free from liver toxicity or other harmful effects.

#### DOSAGE

1 to 2 tablets daily.

#### FORM AND PACKS

## WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. This pioneer body in Cancer Research was founded by the Royal Colleges of Physicians and Surgeons specially to undertake this vital work in its own laboratories. It has no official grants and is entirely supported by voluntary contributions. Please help us when you can.

### **Suggested wording for Bequests**

*'I hereby bequeath the sum of . . . . . pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Field's, WC2 for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer shall be a good discharge for such legacy'.*

## CLIMATE AS PLANNED

Cool and calm, (under hot arc lights), a surgeon works without pause. In Maternity a baby takes a first breath of clean, temperature-right air. Patients sleep in an atmosphere that makes sleeping easier. In wards, in labs, in store-rooms, in therapy departments, people, equipment and supplies are better for an ideal, controlled, dehumidified climate. This is Chrysler Airtemp in action. Chrysler Airtemp: the world's finest, more reliable Air Conditioning Equipment... to create a planned climate.

**PACKAGED UNITS:** neat, compact almost silent self-contained units in the 3 through 35 h.p. range. A 3 h.p. model takes up only 20" x 35" floor space. Or where necessary.

**SPLIT SYSTEMS:** the Air Handling Unit Section is incorporated in or adjacent to the area to be conditioned, with remote Water or Air Cooled Condensing Units.

**SPECIAL PROBLEMS—SPECIALIST ADVICE**  
Two main considerations are involved in Hospital Air Conditioning: creating the ideal climate for the well-being of patients and staff, and meeting the highly-specialised climatic requirements of each separate section and department. Please contact our free Advisory Service which will be pleased to help solve both these problems.

## ANTIBIOTIC-INDUCED DIARRHOEA\*

There is good evidence in continental literature, for which further confirmation is being sought in this country, that this troublesome complication of broad-spectrum antibiotic treatment can be relieved or prevented by administering living antibiotic-resistant *Lactobacillus acidophilus* in the form of ENPAC.

The lactobacilli can be shown to establish themselves and multiply in the bowel, and their presence is inimical to that of pathogens, including, according to some reports, *Salmonella* species, and to *Candida* and staphylococci.

"Patients in hospital who have had an operation, and a course of 'broad-spectrum' antibiotics, sometimes develop diarrhoea which may be severe and even fatal."—*Lancet* Annotations, 25th February, 1961.

1 vehicle

Lacto-Calamine is cooling, astringent, antipruritic, protective, aesthetically acceptable and free from the risk of sensitisation attributed to some vehicles.

2 products

Both Cortoderm and Cortoderm-N present hydrocortisone in a cream base of Lacto-Calamine. Cortoderm-N contains 0.5% neomycin for infected dermatoses.

3 strengths

For economical treatment, both products are presented with 1.0%, 0.5% and 0.25% hydrocortisone. After initial treatment with 1.0% you can cut the strength (and the cost) as the condition is brought under control.

## Every SPENCER Support meets these 5 requirements

1. Every Spencer is designed to order, cut by hand and made separately for each individual patient.
2. It is made to fit the body—not as it is—but as it should be to meet the medical aims.
3. The weight of supporting the abdomen is placed on the pelvis—not on the spine at or above the lumbar region.
4. The abdominal support is from below, upward and backward.
5. Retains its shape. (A support that loses shape loses effectiveness.)

# ALDOMET<sup>Regd</sup>

METHYLDOPA

**a new and completely different antihypertensive agent with significant advantages**

**ALDOMET is indicated in all degrees of hypertension and has significant advantages both for the physician and the patient.**

ALDOMET reduces both standing *and lying* blood pressure.

Diurnal blood pressure variations rarely occur. By adjustment of dosage, morning hypotension can be prevented without sacrificing control of afternoon blood pressure.

Exertional hypotension rarely occurs.

When an effective dosage is attained, ALDOMET produces a smooth, maximal effect in most patients in 12 to 24 hours.

Dosage is simple, flexible and easily established.

The duration of action is short and hypertensive rebound does not occur on stopping treatment.

There is a general lack of severe side effects.

**ALDOMET is a first choice for the treatment of all cases of essential hypertension.**

*ALDOMET is an original discovery of the Merck Sharp & Dohme Research Laboratories and is made in England by*

**MERCK SHARP & DOHME LIMITED, HODDESDON, HERTS**

ALDOMET is available as yellow, film-coated tablets containing 250 mg. methyldopa. Detailed information on dosage, administration, indications, precautions and bibliography is available on request.

**ANNOUNCEMENT  
OF FELLOWSHIP IN MENTALLY RETARDED  
CHILDREN AND  
PHYSICALLY HANDICAPPED CHILDREN**

A Fellowship programme, to start July 1, 1963, for training and research in the broad area of mental retardation, deviant child development, and physically handicapping conditions is being sponsored by the Child Development Clinic of the Department of Paediatrics and the Hospital School for Severely Handicapped Children at the State University of Iowa.

The Hospital School has a residential programme for 60 severely physically handicapped children with reasonably normal intelligence, and also conducts an out-patient programme. All types of physical handicaps are considered but especially cerebral palsy. The Child Development Clinic is concerned especially with mentally retarded children, but some children with psychosomatic disorders or other forms of neurological defect are also seen. While there are some in-patient activities, the Child Development Clinic operates chiefly as an out-patient unit. Both the Hospital School and the Child Development Clinic operate in conjunction with the Department of Paediatrics.

Duties would include close association with the children in the in-patient groups and helping with out-patient evaluations. Ample opportunity would be provided to do investigative work, the exact nature of which would be determined by the interests of the Fellow. Attending certain national or regional meetings and attending certain post-graduate courses would be a part of the Fellowship programme.

An appointment of Fellow in the Department of Paediatrics will be offered with a stipend of \$7,500 annually. Applications can be made to Dr. Robert B. Kugel, Department of Paediatrics, University Hospitals, Iowa City, Iowa. (7798)

**APPROVED FIRST-YEAR PAEDIATRIC RESIDENCY** available. Close association with the University of Rochester, Department of Paediatrics, for several years. ## SCHOLARSHIPS

### THE NUFFIELD FOUNDATION

#### SCHOLARSHIPS IN FOOD SCIENCE

The Nuffield Foundation, with the aim of helping to advance fundamental research in food science, is prepared to offer annually up to five research Scholarships for science graduates and up to three research Scholarships for medical or veterinary graduates. The Foundation hopes these awards will be helpful in attracting more people to make a career in the field of food science research. The awards, tenable for periods of up to four years, are intended to provide suitable graduates with research experience to Ph.D. level, together with some formal training in selected subjects. The choice of subjects for study and research will be related to a candidate's background and interests, with special reference to toxicology, pharmacology, or pathology. The value of the awards, which will be fixed according to age, qualifications and experience, should make them of considerable interest. The awards can be supplemented by the amount of fees, marriage and child allowances, and, in appropriate cases, research expenses. The Scholarships are open to men and women holders of a science, medical or veterinary degree of a U.K. or other Commonwealth university.

Applications may be submitted by March 1 or July 1, 1963. Further particulars and forms of application are available from the Director, the Nuffield Foundation, Nuffield Lodge, Regent's Park, N.W.1. (7918)

**ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS NORTHAMPTON**

President: The Earl Spencer

Medical Superintendent:

D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc.

**WANTAGE HOUSE**

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

**MOULTON PARK**

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

**BRYN-Y-NEUADD HALL**

The seaside home of the hospital is beautifully situated in a park of 330 acres in Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.

**THE HOSPITAL GAZETTEER 1962**

*a guide to the Hospitals in the United Kingdom*

Designed especially to help doctors seeking a hospital appointment up to Registrar status.

The new edition includes information on psychiatric hospitals.

No other publication of its kind provides such comprehensive information.

It is possible to tell at a glance:

The number of beds; the establishment of medical staff; the type of work and nature of special departments; opportunities for preparation for postgraduate diplomas; accommodation provided; facilities for recreation and other relevant facts.

# COUGH RELIEF

at the right time  
for hours at a time

# PHOLTEx

**UP TO TEN HOURS RELIEF FROM ONE TEASPOONFUL  
THROUGH ION-EXCHANGE RELEASE**

## hours of relief from one dose

because *Pholtex* contains *pholcodine* and *phenyltoloxamine* as ion-exchange resin complexes to give smooth and prolonged effect — up to ten hours in many cases.

## more complete relief of unproductive cough

because the cough depressant action of *pholcodine* is potentiated and reinforced by the antihistaminic and antispasmodic activity of *phenyltoloxamine*.

## economy of treatment

because a 2 oz. bottle of *Pholtex* contains sixteen doses — enough for one week's treatment.

## dosage

One teaspoonful (4 ml.) at minimum intervals of eight hours — for children: half to full adult dosage according to age.

## composition

Each teaspoonful (4 ml.) contains *pholcodine* 15 mg. and *phenyltoloxamine* 10 mg. as resin complexes in a pleasantly flavoured thixotropic vehicle.

## basic NHS prices
