Moditen is a Trademark

SINGLE DOSE

SQUIBB FLUPHENAZINE DIHYDROCHLORIDE

A Combined Effort

The Russian troika, pulled by the combined effort of three horses, was a popular and safe means of transport. In antibacterial therapy, too, the combined effort of three sulphonamides is more effective and safe than that of a single sulphonamide, which accounts for the popularity of 'Sulphatriad' over the past fifteen years.

In 'Penitriad', the combined effort of three sulphonamides is enhanced by that of penicillin V-K, 'Penitriad' being effective against infections caused by both sulphonamide- and penicillin-susceptible organisms.

DERNATOSES SUB-ACUTE AND CHRONIC RESPOND TO TARCOTT SEVEN DAYS!

A HEALING COMBINATION TAR + HYDROCORTISONE

In Tarcortin the combination of tar with hydrocortisone has provided a preparation

with spectacular results in cases of eczema and other dermatic affections – both sub-acute and chronic. The two photographs show the difference made after only two days of treatment. This is only one example of many clinical cases* which prove that the combination of tar plus hydrocortisone has a far swifter, more pronounced and complete effect than either preparation alone

in the treatment of sub-acute and refractory skin affections.

Tarcortin cream is supplied in 7 gm. and 15 gm. tubes, containing 0.5% hydrocortisone and 5% special coal tar extract in a vanishing-type base.

ORBENIN (BRL)

ORAL PENICILLIN ACTIVE AGAINST RESISTANT STAPHYLOCOCCI

ORBENIN is indicated for immediate use in known or suspected resistant staphylococcal infections, and in mixed Gram-positive infections (e.g. infected burns) where resistant staphylococci may be present.

- Orbenin is stable to staphylococcal penicillinase and highly effective against 'resistant' staphylococci. Its activity is four times that of methicillin.
- Orbenin is also highly effective against other Gram-positive organisms, including streptococci, pneumococci and penicillin-sensitive staphylococci.
- Orbenin is bactericidal; it is acid-stable and well absorbed by either the oral or intramuscular routes.

Dosage by mouth is 500 mg. 6 hourly. Dosage by intramuscular injection is 250 mg. four to six hourly

 $\textbf{ORBENIN} \ (3\text{-}o.\ chlorophenyl-5-methyl-4-isoxazolylpenicillin sodium salt monohydrate})$

CICATRIN

accelerates healing rates by 25-50%*

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antibiotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

Spray

... the new non-touch technique for

burns
infected dermatoses
leg ulcers

Spray treatment applies the full potency of Terra-Cortril directly on to the inflamed area. Its effect is immediate because the action is not retarded by a base.

Infection is prevented, inflammation and pain reduced, scar tissue development decisively checked and the healing process accelerated. Spray treatment prevents softening of surrounding tissue sometimes caused by dressings or ointments. The spray has a soothing effect much welcomed by patients.

Patients and nurses will find it easy and simple to use. Any part of the body can be sprayed in a few seconds.

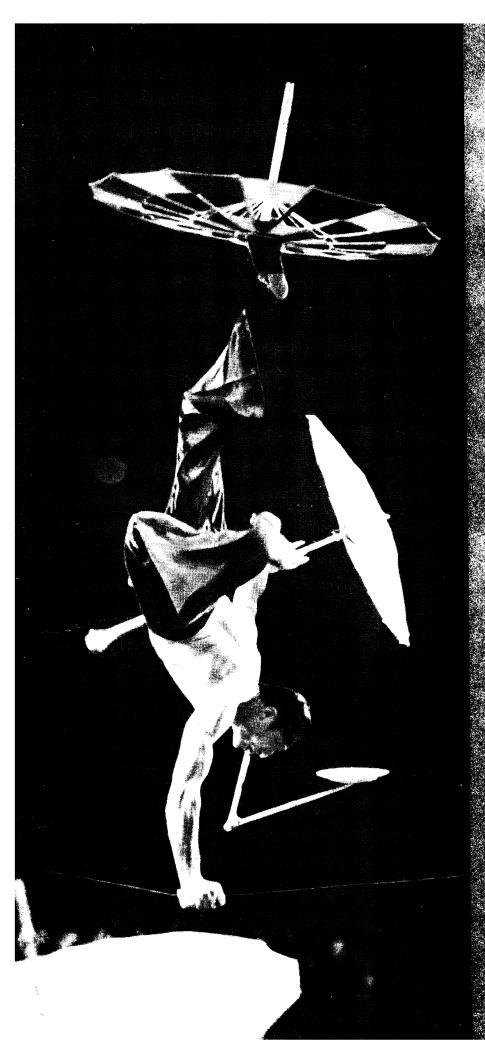

Dressings may not be required. Spray treatment can be used with modern exposure techniques.

The 4 features of Elastoplast

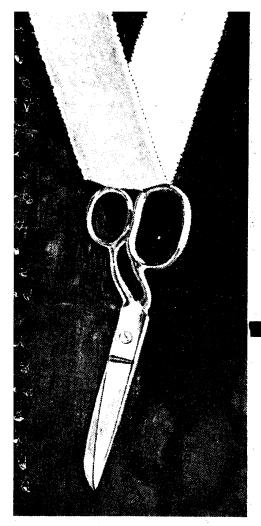

During 30 years of development, stringent laboratory standards have been laid down to ensure the superiority of Elastoplast bandage. But there are four simple working standards, which you can easily demonstrate for yourself, by which an Elastic adhesive bandage can be judged. Only Elastoplast conforms to all four. Try them yourself!

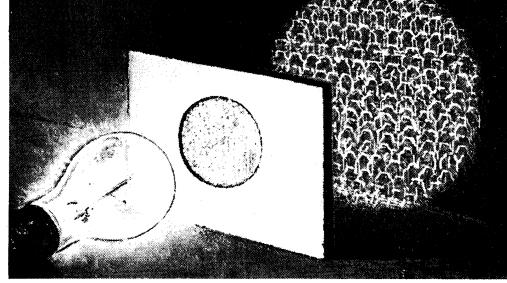

STRETCH AND REGAIN

Stick the first three inches of an Elastoplast bandage to the edge of a table top. Mark a foot length of it with paper clips and stretch it firmly as far as it will go. The foot length will extend to 21 inches with little effort — a 75% increase. When you let it go it will return to nearly its original length; no more than 13 inches. In most surgical techniques, this stretch and regain is critically important. It is at its maximum in Elastoplast.

Only Elastoplast has all

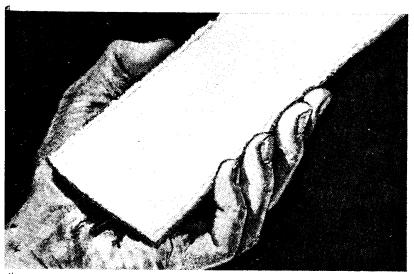

TRY THESE TESTS FOR YOURSELF

POSITIVE ADHESION

Press the handle of a pair of heavy scissors on to the adhesive halfway along a strip of Elastoplast and suspend the scissors from it. You will be surprised how long they hang before they fall. Elastoplast has always been known for its power-Ful adhesive spread, which sticks at the moment of contact and keeps the bandage firmly in position during the longest treatment.

EVEN, ALL-OVER FORGER
Cut a hole about 2 inches in diameter in a piece of card and stretch a piece of Elastoplast over it. Hold it between a clear electric lamp and a white surface so that the pores project images of the filament. See how close, even and uninterrupted the filament pattern is. This even porosity, over the whole adhesive surface, is characteristic of Elastoplast. It leaves no occluded patches or bands of skin beneath the bandage, even when there is more than one layer.

SOFT NON-ADHESIVE EDGES

Feel the softness of the selvedge of an Elastoplast bandage and note that it is neither sharply cut nor ragged, but luxuriously fluffy. This is why Elastoplast does not cut nor mark the skin. The edges are free from adhesive so that the bandage cannot stick to the clothing and does not ruck during weeks or months of wear.

It costs no more to specify ELASTOPLAST

SMITH & NEPHEW LIMITED WELWYN GARDEN CITY · HERTFORDSHIRE

'LIBRIUM'

proven therapy for anxiety and tension

ergotamine alone is not enough

To combat an incipient attack of migraine, oral ergotamine alone is inadequate. It needs the potentiating effect of caffeine. Above all, it needs a rapidly acting anti-emetic to counter its main defect as well as the vomiting resulting from migraine itself.

'Migril' contains every one of the necessary ingredients—ergotamine tartrate, caffeine, and the proven anti-emetic cyclizine hydrochloride. 'Migril', the ever-present companion of thousands of migraine sufferers, is their reliable insurance against an attack.

Winter respiratory ailments cost British Industry hundreds of millions of pounds annually

Treatment with 'Icipen' can cost as little as 1/6½ a day

'ICIPEN' provides effective penicillin V therapy for winter ailments. It is especially useful in the treatment of upper respiratory tract infections, pneumonia, acute sinusitis, scarlet fever and otitis media.

'ICIPEN' presents the potassium salt of penicillin V in convenient dosage forms. One tablet of 'Icipen' V 300 three times a day is adequate for most infections due to penicillin-sensitive organisms.

'ICIPEN' Syrup is a pleasantly-flavoured preparation especially suitable for children.

The basic N.H.S. cost at two or three tablets daily is $1/6\frac{1}{2}$ d. and 2/4d. respectively.

'ICIPEN' V 300 Tablets: Each tablet contains 300 mg. penicillin V as potassium salt. In packs of 12, 100 and 500.

'ICIPEN' V Syrup: Each teaspoonful (5 ml.) contains 150 mg. penicillin V as potassium salt. Available in bottles of 30 and 60 ml. Basic N.H.S. cost 4/3 and 6/11 respectively.

COW & GATE MILK FOODS GUILDFORD - SURREY

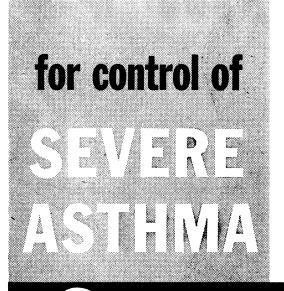

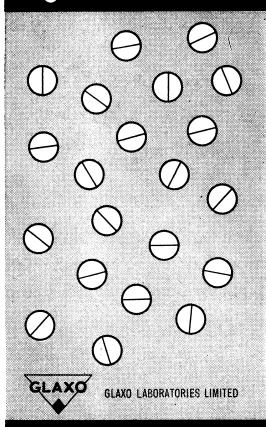

Betnelan (betamethasone) is the recent anti-inflammatory steroid developed by Glaxo. It has proved remarkably effective in the treatment of severe asthma when other measures have proved inadequate.

Although dosage should be varied to suit the individual, in general practice a short-term course of 21 Betnelan tablets given over 6 days, is usually sufficient to achieve control. Side effects are no problem in short-term use and treatment is inexpensive.

Betnelan

When conventional treatment of less severe asthma is interrupted by an acute attack, short-term Betnelan therapy can restore control. When the attack is extremely severe (status asthmaticus) all recognised measures which may include injectable corticosteroids (Betnesol Injection is recommended) should be taken, at least initially. At the same time oral treatment with Betnelan can be started to maintain control. Betnelan is presented as scored tablets of 0.5 milligrams betamethasone in bottles of 30, 100 and 500. Half-strength tablets of 0.25 mg are also available in similar quantities.

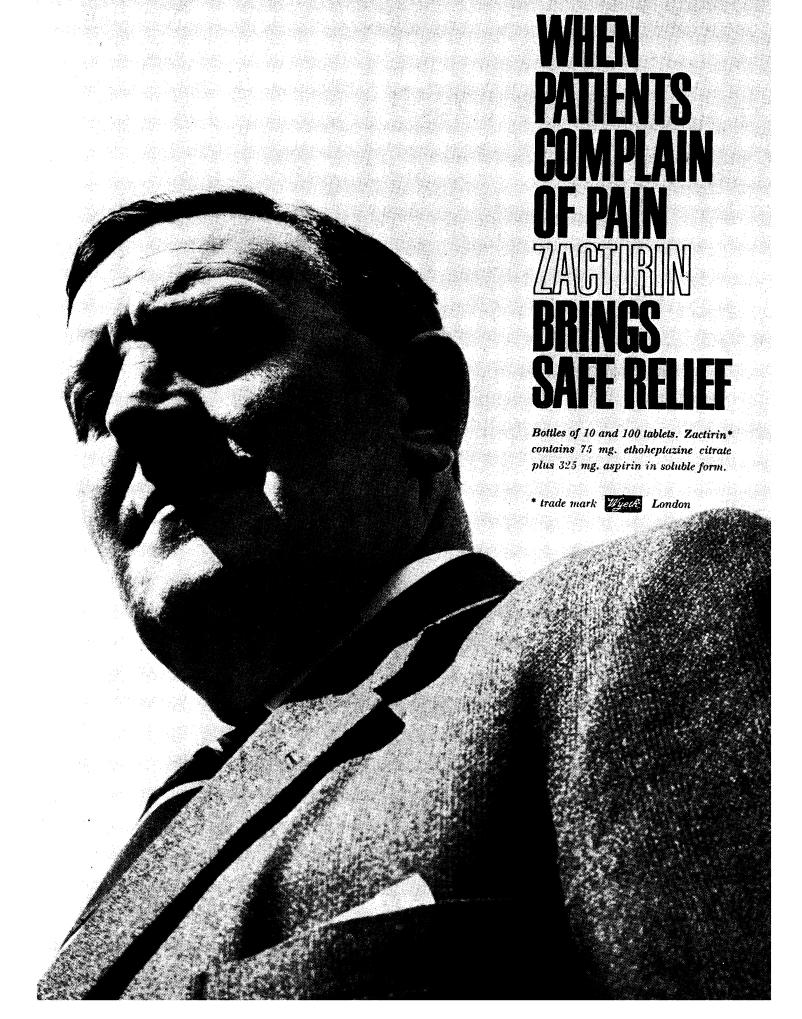

NEW-soluble corticosteroid tablets

BETNESOL TABLETS

Betamethasone disodium phosphate in a form which dissolves spontaneously in water to provide a palatable solution. This new form of betamethasone ensures maximum efficiency of absorption and greater tolerance in patients liable to dysposia

The names Betnelan and Betnesol are Glaxo trade marks.

Even in psoriasis...

*DRENISON ** brand Flurandrenolone in conjunction with occlusive

dressings has proved highly successful in the treatment of resistant dermatozes—even in psoriasis. 'Drenison' cream or ointment is applied to the area which is then covered with thin flexible plastic sheeting. This technique facilitates penetration into the skin and hastens recovery. 'Drenison' with Neomycin is also available, for use where infection is present.

Rapid relief
this winter for
CHILBLAINS
& COUGHS

ADAPRIN

Tablets for Chilblains

Among predisposing factors to chilblains are assumed to be defective peripheral circulation and diminished coagulability of the blood.

Each Adaprin tablet contains nicotinamide (50 mg.) and acetomenaphthone (10 mg.) as the logical drugs to counteract these defects. Nicotinamide is preferred to nicotinic acid because of the unpleasant symptoms of rapid vasodilatation associated with the latter compound. Adaprin is non-toxic and may safely be given to children and adults for long periods for prevention. Relief from existing chilblains may be expected in a few days. In containers of 25, 100, and 500 tablets.

PAVACOL

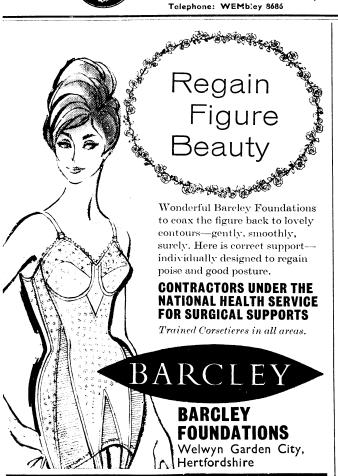

Syrup and Pastilles for Coughs

Pavacol Syrup (Improved Formula)—a distinctively flavoured cough remedy containing papaverine and pholoodine. Papaverine relaxes the bronchi by direct action. Pholoodine, the new ingredient, is a central cough suppressant which is as effective as heroin (diamorphine), but without the disadvantages of that dangerous drug. Pholoodine is much less toxic even than codeine, and it does not cause constipation. Pavacol Syrup and Pavacol Diabetic Syrup are supplied in bottles of 4, 16 and 80 ozs.

Pavacol Pastilles—contain the powerful, wide-range, quaternary ammonium antiseptic, Octaphen, together with the antitussive compounds, papaverine and codeine, and the demulcents and volatibe oils present in Pavacol Syrup. For the prophylaxis and treatment of bacterial and fungal infections of the mouth and throat—and for symptomatic treatment of cough. In tins of 24 pastilles.

DEFICIENT intestinal bulk is one of the main causes of constipation. In such cases Andrews is particularly useful. It swells the bowel content by osmosis and stimulates peristalsis. In this perfectly natural way, Andrews induces a mild aperient action that does not irritate the intestine.

Andrews relieves constipation arising from decreased food intake during illness or restricted diet. It is also mildly antacid and relieves gastric discomfort; it helps to check biliousness and sick headaches. Andrews is readily acceptable because of its pleasant taste and refreshing effervescence.

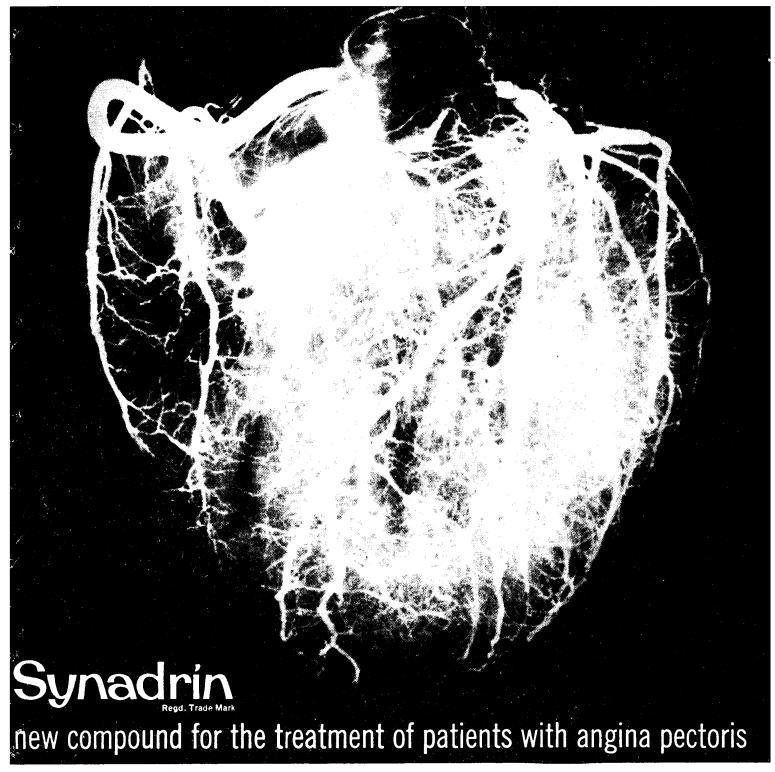

makes TB dosage more flexible

Whichever school of PAS-isoniazid therapy you favour—b.i.d. or t.i.d.—PYCASIX, the new 6-cachet daily form of Pycamisan, suits either and gives the full daily requirements of both drugs in the minimum number of cachets. Each daily dose is presented in a single packet, an incentive for the patient to take his full dose regularly.

Each daily dose of 6 cachets provides 12 G. sodium aminosalicylate B.P. and 300 mg. isoniazid B.P. Tins of 180 cachets (1 month) and 360 cachets (2 months).

6-CACHET DAILY PAS-INH THERAPY

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments¹¹⁻¹⁷ and it has been tested in over 1,000 patients1-10. Results of trials so far reported have been

promising and Synadrin has been described as "an effective drug for treating angina pectoris."1

Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous in-

- farction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well
- tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

NEW ZEALAND ARMY NEW CONDITIONS OF SERVICE FOR DOCTORS

An opportunity now exists for a limited number of doctors to emigrate with their families to New Zealand for service under favourable conditions with the New Zealand Army. Those interested can accept a short service engagement of four years which includes ninety days clinical leave in addition to normal leave. A long service engagement with full benefits of Regular service, including up to nine months clinical leave, can be applied for after the initial four-year engagement. For full details of benefits write to:

Senior Army Liaison Officer, New Zealand Army, The Adelphi, John Adam Street, London W.C.2.

A Helpful Synopsis...

for prescribing Elastic Hosiery under N.H.S.

For VARICES

... OPTIMUM SUPPORT FOR ALL AVERAGE CASES

N.H.S: - ELASTIC YARN

THIGH STOCKINGS

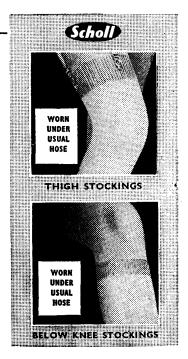

Virtually invisible, worn under the usual hose. Seamless throughout. Soft-Grip at top and foot, avoids constriction. Prescribed mainly for women.

SPECIFY: Thigh Stockings, Elastic Yarn, Soft-Grip.

BELOW KNEE STOCKINGS

Non-slip. Stay up without suspenders. Virtually invisible under usual hose. Seamless. No constriction, ridges or creases. Generally preferred for men.

SPECIFY: Below Knee Stockings, Elastic Yarn, Superlastik.

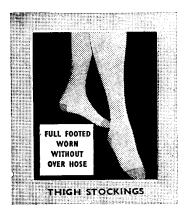

For EARLY VARICES

AND FOR PROPHYLAXIS IN PREGNANCY

N.H.S:- LIGHTWEIGHT NYLON ELASTIC YARN

Full-footed, closed-toe style thigh stockings for women. Provides support that is adequate in milder cases of varices, and in pregnancy. Worn without over-hose.

SPECIFY: Thigh Stockings, Nylastik.

¶ Frequent laundering and slow drying, away from fires, considerably lengthens the life of all elastic hosiery. Economy is promoted when patients have a second pair to permit correct laundering.

The **Scholl** name on the prescription ensures support and comfort to meet each patient's need

THE SCHOLL MFG. CO. LTD., 182-204 ST. JOHN STREET, LONDON, E.C.I.

PERMANENT

THE

ROYAL NAVY offers you MORE

YOU CAN SERVE almost anywhere in almost any field of Naval activity, combining your calling as a doctor with the stimulus of a life as a commissioned officer in the Royal Navy. You could serve in almost any vessel from a frigate to an aircraft carrier, sail with the fleet to the Far East or work with a squadron in the West Indies. You could apply your care to Royal Marines Commandos, among parachutists, frogmen or rock climbers. You could fly with the Fleet Air Arm as a specialist in aviation medicine or investigate the problems of deep diving and advanced submarine development. You could work in a laboratory, hospital or medical school; serve at home or abroad, on shore or afloat; or study any one of a variety of subjects ranging from radio-biology to tropical diseases. And throughout your service as a Naval Medical Officer you would be working with the finest equipment in complete clinical freedom - and perhaps a greater opportunity to exercise your versatility than would ever be possible in civilian life.

YOU CAN ENTER BY ONE OF THREE METHODS All schemes lead to Short Service Commissions of 3-5 years' duration. Holders of such commissions can apply for permanent commissions after one year following appointment as Surgeon Lieutenant.

PAY ON

GRATUITIES

		ENTRY	(tax free)	MISSIOI GRANT:
1	As a registered Medical Practitioner in rank of SURGEON LIEUTENANT.	£2,002 p.a. married, over 25	On completion of Short Service Com- mission of 3 years: £1,500; 5 years £3,000	£1,500 (nullifies gratuity)

The salary and conditions of service will be in accordance with B.M.A. recom-

Applications, with details of age, qualifications and experience, together with the names of three referees, should be forwarded in the first place to: The Manager Personnel Department (M.O.), Navy, Army and Air Force Institutes, Imperial Court London S.E.11.

SERVICES

You can earn £2000 a year on entry in the Royal Air Force

New Conditions for Registered Practitioners

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years' civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further

'Pre-Registration Year' Scheme

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn, with full pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned now in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893 P),1 Tavistock Square, London, W.C.1.

SCHOLARSHIPS

THE NUFFIELD FOUNDATION

SCHOLARSHIPS IN FOOD SCIENCE

The Nuffield Foundation, with the aim of helping to advance fundamental research in food science, is prepared to offer annually up to five research Scholarships for science graduates and up to three research Scholarships for medical or veterinary graduates. The Foundation hopes these awards will be helpful in attracting more people to make a career in the field of food science research. The awards, tenable for periods of up to four years, are intended to provide suitable graduates with research experience to Ph.D. level, togther with some formal training in selected subjects. The choice of subjects for study and research will be related to a candidate's background and interests, with special reference to toxicology, pharmacology, or pathology. The value of the awards, which will be fixed according to age, qualifications and experience, should make them of considerable interest. The awards can be supplemented by the amount of fees, marriage and child allowances, and, in appropriate cases, research expenses. The Scholarships are open to men and women holders of a science, medical or veterinary degree of a U.K. or other Commonwealth university.

Applications may be submitted by March 1 or July 1, 1963. Further particulars and forms of application are available from the Director, the Nuffield Foundation, Nuffield Lodge, Regent's Park, N.W.1.

pre-registration year three Monetary Prizes and a
Travelling Fellowship as the result of an essay
competition on a subject relating to mental health,
and a subsequent interview.

Applicants gaining the top three places in the

and a subsequent interview.

Applicants gaining the top three places in the essay competition will be given prizes of £100, £50 and £25 respectively.

The Travelling Fellowship, tenable in a psychiatric or other department abroad for up to six months, will be awarded as the result of an interview combined with consideration of the candidate's undergraduate record. Persons interviewed will be chosen from the top ten in the essay competition. The travelling fellowship will normally be taken up at the end of the pre-registration year or, in the event of it being awarded to a medical student, may be taken up after qualification.

The subject for the essay this year is "Discuss the Significance of Personality in the Genesis and Symptomatology of Psychiatric Disorder."

The Panel of Examiners consists of two members of the Research Committee of the Mental Health Research Fund and one member of the Association Teachers of Psychiatry in Undergraduate Medi-Schools.

cal Schools.

Essays should be sent, before March 1, 1963, to the Secretary, Research Committee, Mental Health Research Fund, 38 Wigmore Street, London W.1 (Tel.: WELbeck 4103), from whom turther details may be obtained.

INSTRUCTIONS TO ADVERTISERS

Please write advertisements and name and address clearly in BLOCK CAPITALS and send to the Classified Advertisement Manager, British Medical Journal, B.M.A. House, Tavistock Square, London W.C.I. Telephone: Euston 4499. Telegrams: Britmedads, Westcent, London. To cut down book-keeping entries and to avoid delay, please ENCLOSE PAYMENT with advertisement.

All advertisements, subject to approval, will appear in the forthcoming issue provided they reach this office not later than 1 p.m. on the MONDAY before the date of issue.

Cancellation of advertisements cannot be accepted if received after 2 p.m. on the Monday before the date of issue (issues affected by public holidays excepted).

Every effort is made to ensure the accuracy of advertisements appearing in the Journal. No recommendation is implied by acceptance, and the Editor of the British Medical Journal reserves the right to refuse or interrupt the insertion of any advertisement.

REPLIES TO BOX NUMBERS. The names and addresses of advertisers under box numbers are held by us in strict confidence and cannot be disclosed. Each Box No. should be addressed separately. Two or more replies can be enclosed in one envelope, addressed to the Classified Advertisement Department. The replies will be forwarded to the advertisers in plain envelopes.

DOCTORS ABROAD. Copies of vacancies advertised in the "Journal" can be sent by AIR MAIL. The minimum cost is 3s. per week, which covers up to three separate headings; additional headings 1s. each.

Calcium-sandoz Effervescent Tablets

in osteoporosis

of postmenopausal

or senile origin

Calcium-Sandoz Effervescent Tablets (orange flavoured): calcium gluconogalactogluconate (equivalent to 4 g. calcium gluconate) and 20 mg. ascorbic acid 2 to 5 effervescent tablets daily "Studies are reported here which suggest that calcium deficiency is an important factor

in many cases of postmenopausal and senile osteoporosis. Many patients with these forms of osteoporosis absorb and retain calcium abnormally avidly when on a high calcium intake in the form of supplements (calcium gluconate Sandoz), and moreover may continue to retain it avidly for at least three and a half years. Symptoms of the disease are relieved and no further fractures take place."

Lancet (1961) 1, 1015
